Pro*Stars adding to sales of major brands.

Betty Crocker matched her younger image by whipping up new products and product lines extensions. They include Oriental Classics, a shelf-stable line of dinner entrees; Tuna Helper Pot Pie, Meat Loaf and Sloppy Joe Bake versions of the Helper line, which dominates the $128 million add-meat dinner mix market; herbed butter and bacon-cheddar varieties of Twice Baked Potatoes; and Suddenly Salad, a line of three shelf-stable cold pasta mixes plus a potato-salad mix.

Other introductions or additions to General Mills's Betty Crocker product line, which has a commanding 40% bite on the $1.1 billion dessert mix category, were German Chocolate and Walnut Brownie mixes; Chocolate Chip and Cinnamon Streudel muffin mixes; MiniMorsels ready-to-spread frosting; and Pop Secret microwave popcorn, which has nabbed a No. 2 spot in the $238 million microwave popcorn market with a 21% share.

Thickening, thinning, test-marketing and pulling out describe the last year for General Mills' No.2 Yoplait yogurt in the $955 million refrigerated yogurt category. Sales of all Yoplait brands gave it a 17% market share, well behind No. 1 Dannon Co. General Mills announced it would yank YoCreme, a pudding-style yogurt designed to compete with Dannon, from store shelves by Nov. 1 because of a trademark-infringement suit against Portland, Ore.-based International Yogurt Co.

International Yogurt had marketed similarly named Yo Cream frozen yogurt since 1982. Yoplait registered YoCreme as a trademark in 1979 but didn't market it until 1986. General Mills opted to pull YoCreme from the shelves after a U.S. District Court judge in Portland ruled International could market Yo Cream in 32 states, including the high yogurt-consuming states California and New York. The judge said General Mills could market YoCreme in 18 states.

General Mills thickened its Original Yoplait; introduced Yoplait 150, a fruit-on-the-bottom yogurt containing 150 calories; rolled out five flavors of Yoplait Soft Frozen Yogurt; and began test-marketing YOP liquid yogurt.

General Mills continued its aggressive expansion in the $309 million fruit roll and bar segment, which grew 29% last year. The company stretched its Fruit Corners snack line to include Fruit Wrinkles, Bars, Roll-Ups in addition to Pudding Roll-Ups in three flavors. Seven-media measured ad spending for the fruit line plus $11 million Pudding Roll-Ups totals $31.3 million. Unconfirmed reports put ad support at $60 million. The Fruit Corners line commands 55% of the market.

Although U.S. family flour sales dropped 6.5% to $375 million for the year ending July 17, General Mills' Gold Medal flour held its No. 1 38% share of the market. Another segment experiencing a crunch is the cereal meal (granola) bar category, which shrank by 24% to $313 million. General Mills' Nature Valley Granola Bars holds a 20% share of this market.

General Mills' restaurant group, consisting of Red Lobster seafood establishments and Olive Garden Italian restaurants—the largest dinnerhouse chains in their respective fields—grew so much that high start-up costs reduced operating profits to 9%. Thirty-two more Red Lobster Inns will be built by mid-1988, 20 are in either cities where other Red Lobsters already exist or in West Coast cities and 12 in Japan, for a total of 483 in the U.S., Canada and Japan. New markets include Tulsa, Okla., and Livonia, Mich.

During fiscal 1987, 38 new Olive Gardens sprouted in the South, Midwest and West, including locations in Atlanta, Houston, Los Angeles and St. Louis. Forty restaurants will be added to the chain, which General Mills bills as an "Italian version of Red Lobster," for a total of 92 restaurants with a per-person tab of $9.

Still struggling are General Mills' 113-unit chain of York's restaurants and Leeann Chin's, a chain of four buffet and 12 carryout Chinese restaurants located in Minneapolis and Chicago. Company sources still consider Leeann Chin's as a test, but they concede that further expansion isn't likely.

General Mills added the Olive Garden account to Grey Advertising, New York, which also handles York's and Red Lobster's estimated $35 million account.

The company's line of Gorton's fish hooked the No. 1 position in the $200 million frozen fish market with a 21% share. Included in a school of new products were Gorton's microwave Crunch Filets and Sticks and a Fishmarket Fresh line of uncoated, individually wrapped fillets.

Florida law taxing to GF

When Florida passed a 5% tax on advertising, General Foods cancelled 90% of its ad budget in the state, banned future meetings there, and David Hurwitt, VP-marketing services, cut loose with: "There will always be disagreement on economic theory, but for individuals and businesses operating on this side of Oz, this [tax] is absolutely ridiculous."

sweep' stakes, plus

SWEEPSTAKES AND GAMES: THE TIP OF THE ICEBERG.

Because there's more to sales promotion than sweepstakes and games, at Don Jagoda Associates we do more than just create and execute sweepstakes and games.

re'bates

We work with advertisers and their agencies on planning and administering refund/rebate offers. We screen and verify all responses, very painstakingly, and return cash or coupons according to the terms of the offer. We're very careful when it comes to handling other people's money.

in·cen'tives

Because we know sometimes it takes more than money to motivate sales people, brokers, distributors and dealers, we help create and implement incentive programs. We know where and how to buy the prizes that will help increase sales, within budget.

pre'mi·ums

Looking for premiums or self-liquidators? We can help you there too. Our premium buyers shop the world looking for the right items to produce the right responses.

ful·fill'ment

And, with our ever expanding facilities, we have streamlined and expanded our capabilities for fulfillment. Getting the right merchandise to the right person on time, intact, is as important as getting people to respond to your offer.

sweep'stakes

Finally, if you decide to get involved in sweepstakes and games, the most visible tip of the promotional iceberg (in five years, sweeps have almost tripled in number), our more than 21 years of experience can be invaluable. We'll help you conceptualize, administer and—through our National Judging Institute—judge your promotion. We go out of our way to help our clients avoid the myriad pitfalls that can befall the unwary promoter.

When it comes to promotion, whether it's the very visible type or the not so visible but very effective nitty gritty variety, you have our number.

Problems and controversy dogged General Motors Corp. in 1986, a year in which the company's earnings trailed those of archrival Ford Motor Co. for the first time in 62 years.

A $750-million stock buyout of GM's best-known critic, Electronic Data Systems founder H. Ross Perot, contributed to a growing public perception that something had gone awry at the world's largest industrial corporation. It was a messy breakup, following an acrimonious feud between Mr. Perot, the billionaire Texan, and GM Chairman Roger Smith.

GM's share of the U.S. car market slipped for the second straight year, amid widespread complaints that many of its models—especially in its profitable, big-car lines—lacked style and distinction.

Its own problems led GM to squeeze its suppliers, including ad agencies. GM divisions restructured fee arrangements with their agencies in the summer of 1986, reducing commissions in most cases to 12.5%. Industry sources indicated GM's ultimate goal was to lower the commission on media buying to 9%, although that would be partially compensated by paying fees for collateral work formerly done free.

GM also was forced to scale back its ballyhooed import-fighting project, Saturn Corp. Saturn officials cut in half initial production goals. The production of some 250,000 cars a year, starting in 1990, is now planned.

GM's financial results continued to decline in the first half of 1987. For the first six months, earnings amounted to $1.903 billion, down 14.2% from the prior year period. Sales for the first half totaled $52.8 billion, down 2.9% from 1986 first half.

Results would have been worse except for strong contributions from GM's nonautomaking subsidiaries. For the first half of 1987, finance arm General Motors Acceptance Corp. earned $893.2 million, up 55%; computer services subsidiary EDS had a profit of $136.6 million, up 15%; GM Hughes Electronics, the subsidiary that includes Hughes Aircraft and Delco Electronics, earned $278.8 million, up 12%.

Mr. Smith told analysts this April that the company was putting a new emphasis on profitability, even if that meant some sacrifice in market share. To curb costs, the company reduced its salaried rolls by 23,000 persons from mid-1986 to the middle of 1987. GM in late 1986 also announced plans to close 11 plants as part of an attempt to cut operating costs by $10 billion by 1990.

GM's share of the U.S. new-car market, which was 44.44% in 1984 and 42.09% in 1985, fell to 40.98% in 1986. This compares with No. 2 Ford, which had an overall 18.2% share, down from 18.8% in 1985. The decline continued in the first half of 1987, as GM's share fell to 37.59%.

Despite the share decline, GM's total U.S. car sales were the best since 1979. Total unit sales were 4,693,161 in 1986, up nominally from 1985. For the year, Chevrolet posted a 2% gain, Pontiac, a 5.6% gain, and Cadillac, a 1.8% gain in unit sales. Oldsmobile unit sales were off by 0.6%, while Buick dropped 9%. GM's total 1986 U.S. truck sales were 1,592,641, down 3.6%.

Industry car and truck sales both set records in 1986, reaching 11.46 million and 4.86 million, respectively.

The record car pace was attributable to the biggest consumer incentive promotion in automotive history, initiated when GM announced consumer loans of as low as 2.9% to clear out 1986 models before the October launch of 1987 models. GM's incentives were announced with a GMAC ad campaign themed "The Big One," created literally overnight by agency Campbell-Ewald Co. GM and the agency were able to block out huge amounts of time and space without tipping off the competition.

But GM's domestic competitors and a few importers soon followed suit, luring unprecedented numbers of buyers into the marketplace. It was the biggest sales month ever for domestic cars and the second-highest ever for imports.

GM and the industry also got a late-year sales boost from a pending change in U.S. tax laws. Buyers flocked to showrooms in late December so they could take advantage of deductions that were to be phased out beginning in 1987.

But the sales spurts from incentives and from the tax law changes caused an early 1987 dropoff in sales, because they drew in many customers who otherwise would have waited several months before buying. At mid-year, corporate economists for the Big 3 were forecasting total car sales for the year would be down about 13%, although truck sales would end up about even.

GM responded in August 1987 with a new broad-based incentives program, with consumer loans as low as 1.9%, which was quickly copied by its domestic competitors. Initial reaction suggested the program would boost sales from the lacklustre totals of earlier in the year but wouldn't be the sweeping success of the 1986 program.

In an effort to develop more distinctive brand identities, four of the five GM passenger car divisions changed ad theme lines and direction as they entered the 1987 model year. The only one to keep its direction was Pontiac, which continued to follow a long-range image strategy begun in 1982 when it decided to emphasize sporty, expressive products.

Under the theme line of "We build excitement," the vast majority of Pontiac advertising, via D'Arcy Masius Benton & Bowles, was aimed at showing the sportiest of its models, such as the Fiero GT, Grand Am SE and the restyled Bonneville. Pontiac continued the "Conversations" theme begun in the 1986 model year, in which target customers are shown in warm, gently humorous slice-of-life stories.

Pontiac launched its first captive import in June 1987, the LeMans subcompact built by Korea's Daewoo Motor Co. on a design by GM German subsidiary Opel Kadett. At $5,995, the base model LeMans gave Pontiac an entry-level competitor against a rush of new imports such as the Korean-built Hyundai Excel and Yugoslavian-built Yugo GV. "L'affordable, L'exciting, L'imported, LeMans," read the headline for one magazine ad that touted the car as "a new form of driving excitement."

Chevrolet's new ad direction was a contemporary execution of its longstanding claim as the mainstream American car brand.

The introductory ads for the new "Heartbeat of America" campaign brought together a pulsating rock score with striking visuals used in quick-cut vignettes. Chevrolet agency Campbell-Ewald and Crushing Enterprises, New York, which developed and produced the music, won the Advertising Age Advertising Music Awards competition in the original-music category for "Heartbeat of America."

The campaign was aimed at Chevy's target audience: first-time car buyers, women and persons under 35. Chevrolet's share of total GM car sales grew during both calendar and model year 1987. In June 1987, 42.4% of all GM cars sold were Chevrolets, compared to 38.9% in the same period a year earlier.

Chevrolet had its biggest new-launch period in three decades in early 1987. It put its new compact cars, Corsica and Beretta, on sale March 12, and followed that six weeks later with the introduction of its new full-size pickup. The media blitz for the introductions included run-

REACH OUT.

Face it. Targeting corporate executives through national business publications, on a limited budget, is next to impossible. But now, with THE NETWORK of City Business Journals, you can reach out to this affluent group for less money and in greater numbers than ever before.

That's because THE NETWORK, comprised of 50 weekly business tabloids that cover 40 of the top 50 markets, delivers top management at a lower CPM ($36.31) than Forbes ($76.01), Fortune ($63.44), BusinessWeek ($73.56) or The Wall Street Journal ($45.81).*

Regional Sales Offices: Atlanta 404 249 8000 · Boston 617 542 6913 · Chicago 312 337 3981 · Dallas 214 520 3030

ning spots on every NBC prime-time program March 13-19 for the cars and April 18-25 for the trucks.

Beretta TV spots featured dissolves between the car and a shark while voiceover urged the viewer to "Discover a new species." Corsica spots showed sand blowing over the car in a desert setting, with voiceover saying, "The winds of change are blowing at today's Chevrolet." Creative for the truck introduction compared the vehicle to a "leaner, meaner" grizzly bear.

Chevrolet also linked the three new-vehicle introductions in a merchandising program with Procter & Gamble; the campaign was touted as the biggest cross-promotional effort ever. Chevrolet gave away 750 vehicles worth $9 million in the promotion, in which paper keys were placed inside 200 million boxes of seven P&G products. Chevy dealers, however, gave the effort mixed reviews, with many saying it failed to produce significant numbers of buyers despite drawing increased showroom traffic.

Buick and Oldsmobile divisions had a difficult time establishing distinct identities, a problem caused both by look-alike models and by waffling on what images they wanted to project.

Buick abandoned its 30-year-old theme, "Wouldn't you really rather have a Buick?" and steered away from yuppies in its 1987 model ad launch via McCann-Erickson. Actor Hal Holbrook was brought on board as the new broadcast ad spokesman in a campaign with the theme line, "Buick. Where better really matters." The campaign tried to evoke the traditional image of a Buick as "the doctor's car," even showing a 1955 Buick Roadmaster in the introductory TV spot. The campaign failed to stem Buick's sales slide, leading to calls for change from the Buick Dealer Council, which also wanted a spokesman younger than Mr. Holbrook.

Buick took its first step toward a new strategy with an upbeat summer 1987 broadcast campaign themed "Oh, Buick," with music adapted from the 1957 Buddy Holly hit, "Oh, Boy." Buick also was preparing an image-oriented campaign for 1988 models, including the Regal, the first car to come out of GM's $5 billion GM-10 midsize car program.

Oldsmobile began to shed its conservative image in an effort to capture the sportier upscale car market. Its new ad theme line was "Oldsmobile quality. Feel it." Golf pro Fuzzy Zoeller replaced actor Dick Van Patten as ad spokesman in an attempt to create a younger image. Olds introduced a sporty version of its Toronado, the Trofeo, in mid-model year as part of the effort to win younger customers. But when it came to advertise a 90th anniversary sale in August 1987, it selected 91-year-old George Burns as spokesman.

Cadillac's big news was the introduction of the $54,700 two-seater convertible Allante in February 1987, its first entry into the ultra-luxury market dominated by European makers such as Daimler-Benz. The car was designed by Italian stylist Sergio Pininfarina. Bodies were built at Pininfarina's facility in Turin, Italy, then shipped by airplane to Detroit where they were assembled at GM's new Detroit-Hamtramck Assembly Center.

Allante advertising represented it as "The new spirit of Cadillac," and the division was hoping the car would lead a long-range repositioning of the division to better compete with European makes.

Cadillac employed several unique approaches to reach the super-affluent target market for Allante, including a direct-market campaign using VHS videotapes and sponsorship of a series of dinner party-concerts held in the homes of the rich and famous. Cadillac's first-year production capacity of about 5,000 Allantes was quickly sold out to dealers.

GMC Truck division continued its theme "It's not just a truck anymore" as it reached for an upscale audience by differentiating its products from comparable Chevrolet trucks.

Its new full-size Sierra pickup was launched in June 1987 with lifestyle-oriented TV spots and print ads. The campaign featured actor Madison Mason portraying a maverick-type entrepreneur who combines jeans and cowboy boots with coat and tie and owns a Sierra for his upper-crust sportsman activities.

The GM board of directors in May 1987 elected Exec VP Robert Stempel to be president-chief operating officer, effective with the September retirement of F. James McDonald. Exec VP Donald Atwood was elected to the vacant post of vice chairman.

Advertising budgets were not exempt from Gillette Co.'s restructuring precipitated by the company's battle against the hostile takeover attempt by Revlon Group in November 1986. Gillette successfully fought off two attempts, although Revlon remained undaunted, launching a second bid in less than a year in late August.

Gillette parried the first two and is mustering resources to combat the third, but the initial victories registered during Gillette's fiscal year have been costly: Gillette spent $558 million to buy out Revlon's position.

Despite the takeover attempt by Revlon Chairman Ronald O. Perelman, Gillette's 1986 performance was positive. Before special charges relating to the takeover attempt and the subsequent restructuring, the company posted operating profit of $411 million, up 8% over the year before. But after calculating the special takeover and restructuring-related charges, profit from operations declined 39% to $232 million and net income and earnings per share were 90% below 1985 levels.

The battle with Revlon will affect Gillette for years to come because it has redirected the company's focus to the short term. The lesson Gillette learned is that it must be more concerned about quarterly results and generate the kind of short-term earnings that will keep the stock price high and investors happy.

To put that lesson into practice, in December 1986 Gillette began a complete corporate restructuring—in effect, a downsizing. Gillette is shedding marginal businesses, laying off some 2,400 or 8% of its worldwide workforce and emphasizing high growth portions of the company, reports Brian McFarland, VP-advertising services.

Industry analysts expect the company's performance to improve. "We are expecting about a 35% increase in profits in both 1987 and 1988," says Diana Temple, analyst at Salomon Brothers in New York.

The restructuring is affecting all Gillette marketing. "It has called into focus the payback of all marketing programs. We've had to take a harsh view of major spending versus expected performance. We're looking more closely at cost/benefit," says Mr. McFarland.

Measured media spending continued to drop, from $86.2 million in 1985 to $69.4 million in 1986. By comparison, the company spent $93.8 million in measured media in 1983, according to BAR/LNA. Spot TV expenditures were halved, to $8.1 million in 1986. Network TV plunged 26.3% to $39.5 million in 1986.

Cable TV spending in 1986 soared to $7.7 million from $1.9 million in the prior year. "On a percentage basis, we are a leading spender on cable. We have a heavy commitment, and we continue to believe in it because it delivers an extremely efficient CPM," says Mr. McFarland.

Magazine spending increased 6.7% to $12.8 million. Small increases in Gillette's magazine advertising are circumstantial, reflecting timing more than any deliberate major shift from broadcast to print, says Mr. McFarland. He expects to see slow, steady increases in magazine advertising. "As broadcast is chewed up budget-wise, print is an alternative," he says.

Ms. Temple questions the company's ability to cut back marketing efforts and still move ahead. "Gillette has not had a major new product launch in recent years," she says, adding that new products are the force that powers the growth of consumer packaged goods companies like Gillette.

Among its shaving products, Gillette extended its Good News line with a disposable razor that incorporates a lubricating strip similar to Atra's. The company is offering both versions of the Good News razor.

The Good News line of toiletries is continuing in test market on the West Coast and will probably remain in test market for another year, says Mr. McFarland. "It's toiletries line is a radical break, and we intend to go slowly, carefully. A national rollout is a very substantial commitment," he says.

It is a complete line of price-competitive, no-frills toiletries. The idea is to capture a consumer's entire toiletries, health and beauty aids needs with a single brand. "It's very tricky because the brand crosses over so many categories," says Mr. McFarland.

Making the Good News toiletries effort even more difficult is the fact that it conflicts with the way the trade stocks and displays the individual items, making the line a radical departure for the industry, says Mr. McFarland. Gillette wants the entire line displayed together.

Gillette Co. recently made three significant acquisitions. In 1986, the company added Lustrasilk haircare products in the United States and La Toja toiletries in Spain. In early 1987, it gained Waterman writing instruments from France.

Sports continue to play a major role in marketing Gillette's male-oriented products, but the company's sports focus is changing. The company could not come to terms with Major League Baseball over Gillette's long-standing sponsorship of the All-Star balloting. "Major league baseball wanted to change the structure, and we didn't like the changes," Mr. McFarland says. The changes, essentially, were additional fees.

Gillette replaced the All-Star balloting promotion with its Cavalcade of Sports promotion, which allows consumers to win trips to major sporting events escorted by former greats in that sport. "It has been very successful. It allows a much greater span of interest," says Mr. McFarland.

The company will be a major sponsor of the World Series, but it is de-emphasizing baseball overall in favor of the NFL football games and NBA basketball and, on the college level, NCAA football and basketball.

Football and basketball deliver "a younger audience," says Mr. McFarland. He indicates the company will take a major sponsorship position with the NCAA Final Four basketball tournament.

Gillette, while continuing to be a network TV advertiser, is not actively participating in the upfront network TV market. "The investment generally hasn't been rewarding in our circumstances," he says, because Gillette doesn't require exclusive positions. Instead, the company will work the scatter market for its TV buys.

The company continues its commitment to 15-second TV spots. "We believe it is effective communication for established brands," Mr. McFarland says. He uses longer spots for new brands.

In this year of upheaval, Gillette applied its restructuring to its advertising agency relationships. This also contributed to the drop in advertising spending. "Some of the drop is the result of moving lines to new agencies, and we're waiting for the new campaigns," says Mr. McFarland. Gillette removed Young & Rubicam from all products and Lowe Marschalk U.S. from all but the Braun account.

N W Ayer came up the big winner, picking up the company's Right Guard and Silkience lines from Y&R and the Toni product line from Lowe Marschalk. N W Ayer continues to handle Gillette's White Rain and other small personal care lines.

BBDO Worldwide, the other big winner in the restructuring, has added Dry Idea and Soft & Dry while it continues to handle all the shaving lines. McCann-Erickson continues to handle Gillette's writing instruments. Chiat/Day, San Francisco, handles Oral-B toothbrushes. Hill, Holliday, Connors, Cosmopulos, Boston, handles Liquid Paper and the Good News toiletries line currently in test market. HHCC also picked up Aapri facial cleaning products, which were moved from N W Ayer because of a potential client conflict.

Goodyear Tire & Rubber Co. increased total ad spending and revamped its consumer ad campaign in late 1986 to use a single theme, "Goodyear, Take Me Home," on a global basis for all of its tire advertising. But the significance of the move was overshadowed by a grueling takeover battle the company fought with Anglo-French financier Sir James M. Goldsmith in October and November.

The struggle ended Nov. 20 when Sir James agreed to sell back his 11.5% share in the company for $620.7 million, netting a profit estimated at $93 million. In return, Goodyear remained independent. But the company was forced to restructure to pay for a stock buy-back of 40 million of its own shares at $50 each.

Within two months Goodyear sold its aerospace subsidiary, farm and resort properties in Arizona and motor wheel division, and placed on the block its energy subsidiary, deflating Chairman Robert E. Mercer's diversification plan for the company.

The takeover battle also damaged Goodyear's bottom line. Worldwide net income dropped 70% to $124.1 million in 1986. U.S. sales remained even; operating profits dove 75.6% to $97 million.

The "Goodyear, Take Me Home" global campaign, which was launched in the midst of the takeover furor, brought together J. Walter Thompson Co., which handled Goodyear's North American advertising, and McCann-Erickson, which covers the company's international efforts. Some observers say, however, JWT's permanence on the account could be tenuous.

When JWT itself became the object of a takeover attempt by British-owned WPP Group PLC earlier this year, Goodyear warned it would drop its account with JWT if WPP were successful. After the buyout went through, Goodyear put JWT under review, where it remains at presstime, according to a spokesperson for the tiremaker.

Goodyear used an emotional pitch in its new campaign in 1986, following the success the past two years of competitor Michelin's "baby" spots that feature infants cavorting with tires in an obvious statement on safety. The campaign influenced increases in all media at Goodyear except national magazines, which dropped 7.7% to $10.9 million.

Despite the increased ad budget, Goodyear saw a slight decline in its share of the overall domestic tire market, according to Harry Millis, an industry analyst with McDonald & Co. Securities Inc. of Cleveland. He estimated Goodyear's share of the U.S. tire market declined to 31% in 1986 from 32% in 1985. Firestone Tire & Rubber Co. ranked second and Uniroyal Goodrich Tire Co. third, each with about 16%.

In addition to its other problems in 1986, the company's best known image—the Goodyear blimp—had its advertising air supremacy challenged by another such airship owned by Fuji Photo Film USA Inc. A third blimp, flying McDonald's Corp.'s colors, also took to the air briefly. Goodyear filed lawsuits in two states in

January 1986 against Fuji to prohibit it from using the blimp in its advertising, but settled the matter out of court in mid-1987.

While Goodyear remains tightlipped about advertising plans for the second half of 1987 and next year, it no doubt plans to place greater emphasis behind its tire operations.

Goodyear's sales from tires and transportation products have increased to about 85% from 80% after its restructuring. It has acquired two large independent tire dealer chains since last fall, increased its ownership in a manufacturer of tread rubber, improved its tire holdings overseas and is making money in 1987. In the first half of 1987, it posted net profits of $425.2 million, compared with $54.6 million in the first six months of 1986. Sales improved 9.9% to $4.86 billion.

It has been a year of major acquisitions and divestitures for the U.S. subsidiaries of Grand Metropolitan PLC, the London-based consumer products, hotel and beverage conglomerate. Chief among these moves were the sale of GrandMet USA's tobacco business and a series of acquisitions—including the purchase of Heublein Inc.—which has positioned its already well-advertised International Distillers & Vintners operation for leadership in the U.S. wines and spirits market.

The company has continued to invest heavily in the U.S. market, despite unfavorable currency valuations. During 1986, operating profits from consumer product divisions increased by 27.6%, when calculated in dollars, but only by 8% when converted to pound sterling. In 1986, North American operations contributed 30.5% of total sales, down from 33.9% of sales in 1985.

GrandMet USA, based in Montvale, N.J., includes Alpo Petfoods, Diversified Products Corp., Atlantic Soft Drink Co., Pepsi-Cola San Joaquin Bottling Co., Pearle Health Services and Children's World, a day-care provider. These operations, plus results from several months of Liggett Group ownership, comprise GrandMet USA total sales shown in the accompanying box. A separate entity from GrandMet USA in the Grand Metropolitan corporate lineup is International Distillers & Vintners, the group that operates Paddington Corp., Carillon Importers, Traditional Beer Importing Co. and now Heublein Inc. IDV had worldwide sales of $1.58 billion, up 2%.

Pound sterling was converted to dollars for this profile at the rate of $1.4678=£1.

Since taking control of GrandMet USA, Inc. as chairman-ceo, Ian A. Martin has moved to clarify its strategic direction and to fortify the unit's financial performance. Following the close of its fiscal year, Sept. 30, 1986, GrandMet USA disposed of its tobacco division, Liggett Group, for $137 million to an investor group led by Bennett LeBow. Liggett's generic and brand name cigarettes hold approximately 4% of the $34 billion domestic cigarette market.

The Quality Care home health care operation was sold to Lifetime Corp. of Great Neck, N.Y., for $101 million. Quality Care was acquired by GrandMet USA for $125 million in 1985.

Grand Metropolitan in June 1986 turned down a bid by Trafalgar Holdings Ltd., Los Angeles, to acquire its hotel interests for $900 million. Trafalgar has since accumulated about 5% of Grand Metropolitan shares.

During the year, GrandMet bolstered its strong Alpo brands with the purchase of Blue Mountain, a regional brand of canned and dry dog and cat food, for approximately $11 million from RJR Nabisco.

GrandMet's largest move, by far, was its March 1987 acquisition of Heublein Inc. from RJR Nabisco for an estimated $1.2 billion. Alcoholic beverages contributed $876 million to RJR's 1986 sales, netting operating earnings of $138 million. With the acquisition, IDV now markets six of the 35 liquor brands with more than one million cases in U.S. sales, according to market analyst John C. Maxwell Jr. of Furman, Selz, Mager, Dietz & Birney, New York.

Prior to the acquisition, IDV's top selling brand was J&B Rare Scotch, ranked 16th with an estimated 1.95 million case depletions, down 9.7% from 1985. Its Absolut imported vodka benefited from changing fashion in liquor consumption and showed a 47.1% sales increase to 1 million cases from 680,000. Absolut spiced up sales with the introduction of its pepper-flavored Absolut Peppar, one of the leading flavored vodka brands.

For the first time in recent years, Baileys Original Irish Cream liqueur dropped below 1 million cases depletion. IDV's total case depletion for 1986 was 25.4 million cases, according to the *Impact* Databank.

The Heublein acquisition not only gives IDV extra clout, it provides an easy introduction into some of the hottest growth segments in the stagnant alcoholic beverage market.

Some of the leading brands include Smirnoff, the world's largest selling vodka, which had 7.02 million domestic case depletions, down 0.6%; Popov vodka (4.02 million cases depletion, up 3.9%); and Jose Cuervo tequila, which had a 20% increase in depletions, up to 1.4 million cases. According to *Impact* Databank, Smirnoff held a 4.1% market share and Popov had 2.3% in 1986.

In addition to Heublein's liquor brands, the purchase included Inglenook wines and Almaden Vineyards (Almaden only recently was acquired by Heublein). IDV now ranks 4th in the domestic wine market with a 7.5% dollar share behind E&J Gallo (28%), Vintners International (10.4%) and Canandaigua (7.6%). In 1986, according to *Impact* Databank, Almaden had 9.3 million cases depletion

The $638,400 microcomputer commuter.

Scott Hunter, systems development manager, isn't the average commuter. When he arrives at his office today, he will issue purchase orders for micros and peripherals worth over $600,000. Scott is upgrading his company's PC equipment to speed communications between the field offices and headquarters. His company knows that Scott will select the most efficient, cost-effective and reliable models available. He is a **"Power User"** of micros at work and at home.

To keep his edge as a microcomputer expert, Scott reads BYTE, the authoritative micro technology magazine for the **"Power Reader."** BYTE readers have tremendous clout when it comes to micro-related purchases where they work. During the next 12 months, BYTE subscribers with technical titles like Scott's will buy or influence their companies' average purchases of $710,097 for micros, peripherals and software. It's a fact...the BYTE reader is *the* **"Power Buyer."**

In terms of buying influence, our "Scott Hunter" typifies the average BYTE reader with a technical job title, according to the *1986 Hardware and 1987 Software Purchasing Influence Studies.*

Are you putting the "Power of BYTE" to work for your micro products? To find out how...call your BYTE Advertising Sales Consultant today.

BYTE

and Inglenook 8 million case depletions.

In earlier transactions IDV acquired Sambuca Romana, which dominates the U.S. sambuca liqueur category, as well as the U.S. distribution rights to Amaretto di Saronno, the country's third largest imported liqueur.

IDV's measured advertising spending in seven media was $21.9 million in 1986, up 17.1%. Heublein's measured spending totaled $24.5 million, up 4.6% over 1985 levels. Leading spenders among IDV brands include: Absolut vodka, up 29.6% to $4.6 million; Baileys Original Irish Cream Liqueur, up 29.6% to $4.9 million; and J&B, up 22.9% to $5.25 million.

Spending was about even in support of Bombay Gin, with $2.2 million in measured media, while spending declined by 3.7% in support of Grand Marnier.

The leading advertising spender among GrandMet USA subsidiaries was Alpo, with a total of $24.3 million, up 14.7%. Alpo canned and dry dog food received the largest individual spending, with $8.4 million; $6.8 million of that total was in network TV. Alpo has switched its media strategy to utilize more split 30's after finding that split 30's were 70% as effective as 30-second spots while costing half as much.

Alpo puppy food, introduced in the eastern U.S. in 1985, was supported with $5.3 million, up 16.3% in preparation for a national rollout. Alpo canned dog food received $6.5 million in measured spending. Alpo leads its $863 million category with a 26.7% share, down from 28.5% in 1985, according to Mr. Maxwell.

Overall, Alpo ranks sixth in the $5.6 billion pet food market with a 7% market share, down from 7.1% in 1985. Ralston Purina is the leader with 27.3%, followed by Quaker Oats 13.1%, Nestle's Carnation brand 12%, Mars' Kal Kan 9.3% and H.J. Heinz' StarKist's 8.3%.

Pearle Health Services, the retailer of eyecare services, showed disappointing sales during its first full year of ownership under GrandMet. It had an estimated $19.5 million in sales, with only $112,000 in operating income. Advertising spending in media for Pearle and its Texas State Optical subsidiary amounted to $18.6 million, up 5.8% from 1985 levels.

With saturation of the home fitness equipment market, sales for Diversified Products Corp. were off. Advertising spending declined dramatically to only $240,300, from $6.3 million in 1985.

Greyhound Corp.'s advertising budget in 1986 remained level with 1985 as the company divested its financial services and transportation units to become a consumer products and foodservice company.

In December 1986, Greyhound sold its scheduled bus service, which it had been attempting to restructure on a regional basis. A Dallas-based investor group headed by former Trailways CEO Fred Currey paid $350 million for the operation. The sale effectively left Greyhound as a marketer of Armour-Dial products and of the household cleaners obtained in the March 1985 purchase of the consumer products group of Purex Industries.

In late 1986, Greyhound's Dial Corp. activities and personnel were realigned into three areas: personal care, food and household/laundry.

In personal care—which includes soaps, deodorants and antiperspirants—Dial deodorant soap remained the advertising leader with $15 million in measured media, an 8% decline from 1985. Tone complexion bar received measured media spending of $8.4 million, up 3.7%. In late 1986, Dial Corp. introduced a new formula Tone, which garnered a 2.5% market share.

In 1986, Dial products were marketed for the first time in a hotel amenities program. Also, promotional tie-ins were implemented, such as with Dial soap and Wendy's fast-food restaurants.

The most significant increase in ad spending went to Pure & Natural, a bar soap positioned as "a contemporary alternative to (Procter & Gamble's) Ivory," says Mark R. Shook, marketing director for the personal care group. In its first full year, Pure & Natural received $8.4 million in measured ad spending, a 59% increase from 1985. After garnering a 4% market share in its first three months, the soap has stabilized at a 2.4% share.

In mid-1986, the personal care group continued in a new product mode with the introduction of Nutrelle face and body soap, Dial liquid soap and Dial deodorant stick. Nutrelle, an upscale bar soap currently in two controlled test markets, is priced comparable to Dove soap bar. "Nutrelle has stark packaging in an attempt to communicate a no-nonsense approach to skin care." Mr. Shook says. Liquid Dial, a pump version positioned as an anti-bacterial soap, is currently undergoing regional expansion. Also in mid-1986, Dial Corp. introduced Dial deodorant stick in eastern markets.

In 1986, Armour canned meats extended its Vienna sausage line with the introduction of Vienna Sausage in Taco Sauce. The product is distributed regionally in southwestern markets. Another food segment line extension was microwave pizza, also introduced in 1986. Marketed under the Ellio's label acquired in the 1985 Purex purchase, microwave pizza, French bread pizza and frozen pizza are distributed regionally in the Northeast.

In early 1987, Lunch Buckets, microwaveable soups and entrees, expanded to 15 varieties, from nine. The product line, first introduced in late 1985 in convenience stores, is now available in supermarkets on a regional basis. In August 1987, Dial Corp.'s food division introduced Prospector premium chili in Texas markets. Prospector, an upscale, premium chili, is a new registered trademark for the company.

Net income for the consumer products division in 1986 was $34.1 million, down 17.6%. Company execs cite poor marketing strategy in the laundry products segment as key to the decline. "Early in 1986, we took a consumer-oriented approach to marketing our laundry products," says Curt Hicks, VP-marketing for Dial Corp.'s laundry and household products division. In mid-1986, marketing efforts for the laundry products group were redirected. The products shifted to a more trade-oriented approach. In addition, "we made several changes in our cooperative advertising agreements that have helped turn around the laundry products segment," Mr. Hicks says.

The household products segment remains consumer-oriented, with a focus on advertising and couponing. In January, a soil and stain remover under the Purex label was introduced in test markets. Also, a line extension of the regionally distributed Sno Bol toilet bowl cleanser will be introduced late 1987 or early 1988. Late 1986, lemon-scented Brillo scouring pads were introduced in test markets. Also in test markets since summer of 1987 is fresh-scent Purex bleach. Purex heavy-duty liquid detergent rolled out regionally in May 1987 in eastern markets.

Following the sale of its scheduled bus service, Greyhound Corp. leased or sold several of its bus terminals. However, the company continues to be a large builder of buses for intercity use. In January, Greyhound Corp. purchased General Motors Corp.'s North American transit bus manufacturing operations. Last year, transportation manufacturing accounted for $223.3 million, or about 7% of total revenues.

In 1986, Greyhound Corp. began a significant retreat from financial services. In October, Greyhound Capital Corp., a computer leasing concern, was sold to Bell Atlantic Corp. In addition, a sale is pending for Verex Corp., a private mortgage insurer. Because of changed tax laws, Greyhound Corp. dropped plans to sell Greyhound Leasing and Finance Corp. in July 1986. It then phased out the commercial equipment leasing side of the business through restructuring. The name was changed to Greyhound Financial Corp. to reflect its new focus on real estate financial activities.

In the services/food services division, Greyhound Corp. this month acquired Dobbs House an inflight catering and airport terminal concessions business. The purchase dovetails with the May 1986 acquisition of Aeroplex Stores, which operates 84 retail gift shops in major airports and hotels nationwide. Both operations are part of the Florida Export Group, which operates duty-free shops in airports and on Caribbean cruise liners. Premier Cruise Lines, a subsidiary of Florida Export Group, became the official cruise line to Walt Disney World.

Downsizing of corporate headquarters staff in 1986 by 25% included key personnel, most notably long-time Dial Corp. President-CEO Ed Walsh in October 1986. In July 1987, Greyhound Corp. Chairman John Teets announced plans to build two 24-story office buildings on a six-acre site in Phoenix, Ariz.

GTE Corp. lopped off its biggest advertised unit in 1986—US Sprint—which pared its advertising by 25%, while it beefed up spending on general corporate and directories advertising.

GTE, which retained half interest in the US Sprint long-distance operation when it became a joint venture partner with United Telecommunications Inc., continues to reflect the negative results of US Sprint on its balance sheet. Estimates indicate US Sprint won't become profitable until 1988 or 1989.

US Sprint's total pre-tax loss for 1987 could be $500 million to $600 million, much higher than first estimated. The higher losses were incurred when US Sprint pulled in a million new customers in the third and fourth quarters of calendar 1986 and had to lease expensive lines from AT&T when its own lines became overburdened by the extra business. Analysts believe the company's sacrificing of short-term profits to build a customer base will pay off in the long run.

GTE Chairman/CEO Theodore F. Brophy says a return to profitability will be achieved with completion of the all-digital, all-fiber optic network later this year, giving the joint venture an edge on quality and making it cost-competitive in a field dominated by AT&T with an 85%

market share. US Sprint's share is 5%, behind the 8% claimed by MCI Communications Inc.

Measured advertising for 11 monitored media at GTE, void of US Sprint in 1986, totaled $67.1 million, down 42%, with the difference largely credited to the absence of US Sprint expenditures. In the seven-media listings of BAR/LNA, which compiles statistics by brands, GTE spending of $37 million was virtually even with 1985 minus US Sprint.

The largest expenditure at GTE, according to BAR/LNA, was $20.9 million for general corporate promotion, an increase of 19% from the previous year. The funds backed the company's "Gee! No, GTE" corporate campaign that is being continued this year. Both network and spot TV received about 40% of the admonies and magazines the rest.

GTE also sponsored "Discover: The World of Science" specials consisting of five one-hour segments running on PBS last fall.

GTE Directories expanded internationally, getting directory-publishing contracts in Argentina and Malaysia. In addition, it picked up two contracts in the People's Republic of China—one to sell advertising in a business-to-business directory for the capital, Beijing, the other to publish a directory to be distributed to government offices throughout the country. GTE Directories sells Yellow Pages advertising and publishes more than 1,000 phone books for GTE and other phone companies in the U.S. and overseas.

GTE Directories pulled $5.3 million in advertising, all in spot TV, an increase of 8.1% over the previous year.

GTE's other major ad spending was a $6.2 million expenditure for Sylvania home light bulbs, down 4.6% from 1985.

The company began marketing the new Sylvania Nite-Kat flood-light, which produces illumination invisible to the human eye yet enables closed-circuit cameras to "see" into dark areas requiring monitoring for security reasons.

For $90 million, the company acquired Rotaflex, a London-based manufacturer of residential and commercial lighting fixtures; this will further expand GTE lighting operations in Europe.

Also in Europe, GTE and Siemens AG, West Germany, created a joint venture to produce telecommunications equipment for the U.S. and other countries.

GTE expanded its Business Services operations with the acquisition in late 1986 of Airfone Inc., which introduced the first air-to-ground phone service for passengers on commercial airlines in 1984. With phones in some 300 planes on U.S. routes at fiscal year end, planning is going forward to expand the service in the U.S. and to extend the service to airlines globally. GTE Airfone also provides a similar radio-phone service for passenger trains.

GTE is participating with Washington, D.C.-based TCOM Systems Inc. to provide the electronic-mail connection in a new overnight delivery mail service to debut this fall. GTE will provide the computer-switching network that will enable mail to be sent electronically to GTE data centers across the U.S. for rerouting to TCOM centers to be stuffed in envelopes and delivered through U.S. mail. The service is aimed at businesses. TCOM was founded in 1986 by retired U.S. Postmaster General William F. Bolger.

Despite a sluggish year for toy sales, Hasbro Inc. retained its leading position as the top sales generator among players in the $12.5 billion toy industry. Hasbro sales of $1.3 billion—a 9% increase over 1985—outpaced Mattel Corp., Hawthorne, Calif., which reported revenues of $1.1 billion in 1986.

The company, which has grown 113% in five years, is made up of Hasbro toys, Milton Bradley games and Playskool preschool products. It spent approximately $125 million on advertising in 1986, up 9%, with $40 million of that attributed to international spending.

Priding itself on product diversity, Hasbro in 1986 acquired the Child Guidance line from CBS Toys, New York, and Schaper Toy division from Kusan Inc., Nashville, Tenn. During the year it introduced a record number of products including Visionaries holographic action figures, Moondreamers fantasy dolls and Yakity Yaks electronic plush animals. The company also paid $3 million to Axlon, Sunnyvale, Calif., in return for the right of first refusal on any four toy products Axlon develops.

In 1986, Hasbro reacquired international rights to G.I. Joe so that it could introduce the action figure line in Europe. G.I. Joe was Hasbro's No. 1 product in 1986, with sales of $185 million, and was the year's best-selling product, according to Toy Manufacturers of America. G.I. Joe sales in 1986 represented 14% of the company's revenues. In fact, Hasbro in 1986 had 34 of the top 100 products in the U.S. toy industry.

So far in 1987 Hasbro has introduced a William "the Refrigerator" Perry doll to its G.I. Joe collection, available only by redeeming proofs of purchase from specially marked G.I. Joe packages.

Unlike Tonka Corp.'s GoBots line of transformable action figures that were discontinued in 1987, Hasbro's Transformers remain a top-selling product, bringing in $214 million of the company's 1986 revenues. That year, the line was second behind G.I. Joe in sales for the company. This year Transformer line extensions include figures that change into multiple forms. The toys are supported by the ad theme "Much more than meets the eye" from Griffin Bacal, New York.

Hasbro in December filed a lawsuit against Tonka, who supposedly was infringing on Hasbro's exclusive right to use holograph technology for a toy product. The suit was later dropped, and Tonka has since introduced its SuperNaturals line to

How To Influence America's Most Influential PEOPLE

Every week, we reach over 837,000 (that's 87%)* of the affluent New Orleans market.

But next August, that's not the whole story.

More than 40,000 delegates, politicians, business leaders, and working press will be in New Orleans for the Republican National Convention in August, 1988.

You should be here, too. In the pages of The Times-Picayune.

It's a rare opportunity to reach and influence a large, concentrated audience of opinion leaders who are, by every demographic standard, *the* prime target for your advertising message.

That's why it makes good marketing sense to include The Times-Picayune in your "88" media campaign strategy.

While the eyes of the nation will be on the movers and shakers, their eyes will be on us.

The Times-Picayune

Good news for savvy advertisers.

compete against Visionaries. Visionaries is supported with an $8 million ad campaign themed "Control the magic" that feature action figures with hidden personalities within their holographs.

Hasbro brought back its My Little Pony line for a fifth year after having already sold 60 million units worldwide of the colorful plastic "poseables." The line was supported with an estimated $6 million advertising campaign themed "I'm a My Little Pony, Mommy," obviously targeted to young girls. Hasbro in 1986 saw disappointing box office returns from its "My Little Pony" movie, one of the company's first feature film ventures. An estimated $2.4 million was spent advertising the film.

Hasbro's Jem fashion doll appeared on TMA's top ten monthly list several times in 1986. The line continues to be supported with an estimated $8 million advertising campaign themed "Truly Outrageous," plus its own animated syndicated TV series. In 1987, Hasbro updated Jem by adding gold strands to her pink and blonde hair and giving her a "less hard-looking" appearance. Hasbro ran several promotions for Jem this year, including one where consumers could send away for a cassette of "Jem & the Rockers," a fictitious rock group.

For girls, Hasbro in 1987 introduced Moondreamers dolls with glow-in-the-dark hair and Fairy Tails birds with long silky hair.

Hasbro's Milton Bradley division in 1986 introduced "A Question of Scruples"—which turned out being the year's best-selling game (1.6 million units).

Hasbro continued its $15.3 million account themed "Feelin good about the Playskool years" to promote its preschool division. From the Child Guidance acquisition, Playskool gained the Busy Fire Truck, Busy Choo Choo, Sesame Street and Disney Poppin' Pals lines. The Playskool division also houses the Touch 'N Hug line of textured, musical plush animals and books as well as Pipeworks building sets. Pipeworks is a construction set that allows children to build cars, wagons, etc., by connecting colorful pipes.

Alphie II is a new member of Playskool's electronic Play & Learn group. It is designed to teach children spelling and mathematics basics with the help of a robot-shaped computer.

Sunnyvale, Calif.-based Hasbro Electronics, the name of the Hasbro/Axlon joint venture, is preparing for the introduction in early 1988 of its first product—tentatively called "Nemo." Nemo will be a $200 video game system that hooks up to a standard VCR and lets viewers change the action on their TV screens. Nemo's introduction will be supported by an estimated $10 million in advertising via Goodby, Berlin & Silverstein, San Francisco, hired exclusively to handle Hasbro Electronics' products.

Hasbro so far has had limited success in entering the electronics industry. The company discontinued its Yakity Yaks line of talking monkeys and bears after six months on the market because it could not make inroads against a growing zooful of competition including Worlds of Wonder's Teddy Ruxpin. This failure, added to the discontinuation of the Inhumanoids action figure line, contributed $11 million in losses in 1986.

Both WOW and Mattel are introducing advanced video systems to compete against Nemo. Mattel's Captain Power debuted this fall. WOW's IntraView system will be introduced at the Consumer Electronics Show in Las Vegas in January.

At H.J. Heinz Co. in 1986, tradition took a back seat to trend. Heinz Ketchup, the perennial leader among the company's advertised products, was unseated by Weight Watchers frozen meals as the company cut its measured ad budget by 19.7% from the prior year.

Heinz, which is seeking economies in advertising through cost-cutting maneuvers and efforts to merge division media buying, put $11.4 million in measured ad support behind Weight Watchers frozen meals, down slightly from 1985, according to BAR/LNA. Marketed through the company's Foodways National subsidiary, Weight Watchers frozen meals claim an estimated 10% of the $1.7 billion premium frozen meal category. Stouffer's leads the crowded field with a 25% share.

Early in the year, the company rolled out Weight Watchers Candle Lite frozen dinners, spending more than $3 million on ads to launch and support the six-meal line. Overall, Heinz spent $26.3 million in measured media to promote Weight Watcher food products in 1986, up 34%. Advertising for the line continues to be concentrated on network and spot TV.

In July 1986, Heinz purchased Pro-Mark Co. of Tulsa, Okla., producers of Weight Watchers-brand dairy products, for an estimated $200 million. The company continues to build the Weight Watchers brand: Weight Watchers Ketchup with reduced calories and reduced salt, Weight Watchers spaghetti sauce in two flavors, plus additional fruit spread, salad dressing and Crispbread flavors have been added in 1987.

Weight Watchers International scored a 10% increase in U.S. enrollments in 1986, and a 6% gain on European sign-ups. Meeting sites are up 13% in the U.S. According to Leonard J. Tacconi, the Jericho, N.Y.-based subsidiary's national marketing manager, Weight Watchers recently enhanced its Quick Start Plus program adding a Self-Discovery Plan and an optional Exercise Plan to the original Quick Start diet. The "self-discovery" element aims to help dieters recognize trouble spots or "eating triggers" through a series of self-help quizzes.

Inner Circle, Weight Watchers' premium priced, small group program was launched nationally in 1986, and double-digit enrollment growth continued in the At Work program.

Measured advertising for Weight Watchers International neared $7.4 million, up 13.9% from 1985.

Heinz continued to gain market share in the $500 million tomato ketchup market. Last year the company's flagship product claimed 55% of the ketchup market, up from 50% in 1985. The increase came in spite of a 30% decline in ad spending for the product, to $8.7 million. The company used a "kids-intensive" marketing strategy in 1986 by tailoring ads to children's TV shows. Ad support for Lite Ketchup jumped from $18,900 to $405,000—all in magazines. A new 40-ounce squeezable plastic ketchup package debuted nationally in November, and Heinz Ketchup 'n Onions rolled out this spring.

Other new product introductions this year include squeezable relish, Hickory Smoke 57 Sauce, Cajun Style and Mesquite Smoke barbecue sauces and Chico-San Mini Rice Cakes. Heinz acquired Chico, Calif.-based Chico-San in 1984 and currently holds an estimated 60% of the $30-$60 million puffed rice cake market. According to the company, dollar-sales of the product increased 50% in 1986. Ad support for Chico-San products neared $1.9 million in 1986, up from about $500,000.

Heinz recently added five strained-fruit yogurt flavors to its baby food products. Another 18 flavor varieties were added to the company's instant dry baby food line. In 1986, the company spent $2.9 million in advertising to support Instant Baby Food, down 43%. Heinz holds less than 20% of the baby food market.

According to Martin Thomas, general manager of sales and marketing services at Heinz's Ore-Ida Foods subsidiary, new product or line extensions for 1986 have concentrated on value-added products, vegetable products beyond potatoes and more convenient preparation methods for fried potato products.

"Consumer interest in convenient eating has continued to grow during 1986 and shows no sign of abating," he says. "Increases in take-out foods show family eating patterns shifting back to at-home occasions. Catering to convenience-oriented, in-home meals is a continuing objective of Ore-Ida."

Ore-Ida's Vegetable Crisp breaded frozen vegetable side dish rolled out nationally in 1986. The company spent $231,000 on magazine and spot TV ads in the rollout. Breaded okra has been added to the original four-variety lineup. The company reformulated Onion Ringers, introduced in June 1986, and recently edged out Campbell Soup's Mrs. Paul's for the top-selling brand in the frozen onion ring category.

Ore-Ida Microwave Fries got the most ad support of any Ore-Ida product with $2.1 million, up from virtually no support in 1985. The company introduced a microwave hash brown product in June 1986 and recently added a larger size to the Microwave Fries line. According to Mr. Thomas, the company has 4% of frozen potato category dollar volume with its microwave line and expects market growth to continue.

Ore-Ida products introduced early this year include a toaster hash brown and Special Recipes, a line of seven potato-based side dishes including au gratin and scalloped potato casseroles and stuffed potatoes.

The Ore-Ida advertising and promotion budget for 1986 was $16 million—$6 million on advertising and $10 million on sales promotion—a dropoff of $3 million from 1985.

In the foodservice area, the company recently introduced Steak-Crisp, beef nuggets or strips coated with a light batter.

In pet foods, the Star-Kist Foods subsidiary's 9-Lives leads the $1.15 billion canned cat food category with a 22.4% share. Combining 9-Lives and Amore, Heinz holds 28% of the market (up from 27% in 1985), a hair behind Nestle's Carnation (Friskies and Friskies Buffet, Fancy Feast and Bright Eyes) which holds a 28.6% share.

The company spent $5 million advertising 9-Lives canned cat food last year, down 19.4% from 1985. Ad support for Amore gourmet canned cat food line more than tripled to $6.2 million, and market share shot up from 2.2% to 5.6%. The overall market grew 6.8%, according to analyst John C. Maxwell Jr. of Furman, Selz, Majer, Dietz & Birney, New York. Overall, Heinz spent $15.3 million in measured media on cat food, down 24%.

The company holds a 10% share of the $360 million dog treat market with its Jerky Treats brand and another 7.6% share with its Meaty Bones. At $1.1 million in 1985, ad spending for Jerky Treats was down 50%.

According Mr. Maxwell, Heinz ranks fifth in the $5.6 billion pet food market with an 8.3% share behind Ralston Purina (27.3%), Quaker Oats (13.1%), Nestle's Carnation (12%) and Mars' Kal Kan (9.3%).

Star-Kist controls 36.5% of the $1.4 billion canned tuna market, up slightly over 1985. Competitors include Ralston Purina's Chicken of the Sea brand with a 20% share and Bumble Bee tuna with 15%. Star-Kist spent $1.8 million advertising tuna in 1986, mostly in spot TV, about even with 1985. According to Star-Kist marketing executives, very little of the advertising for tuna does not show up in measured media.

Star-Kist Foods claims an overall $84 million advertising and promotion budget, up 18% over 1985. Advertising amounts to $44 million, with $40 million going to sales promotion and market research.

Last year, Star-Kist launched a nationwide public relations effort to celebrate the 25th anniversary of Charlie the Tuna, the company's spokesfish. TV spots were developed in honor of the occasion.

Heinz launched a major push into Third World markets in 1986 with a tropical fruit-based children's drink called Frutsi. Invented by Heinz in Mexico, the product has been marketed there since 1981. According to Heinz executives, Frutsi will give the company a low-exposure entree into a number of foreign countries. From that point, Heinz hopes to expand its offerings to include many of the company's traditional processed foods.

Last year Heinz international operations accounted for 40.1% of the company's

Other food	192	188	2.3

Acquisition and new product development continue to provide avenues of growth at Hershey Foods Corp., whose confectionery segment still accounts for more than 66% of sales and 80% of operating income.

Hershey's corporate strategy to pursue acquisitions in the areas of manufacturing, distribution, sales and marketing of food items, and restaurant operations, was met with the October acquisition of Reading, Pa.-based Dietrich Corp.'s cough drop and confectionery business.

The buyout moves the company even closer to archrival Mars Inc. for market leadership in the $8 billion U.S. candy market. Most analysts place the companies within a share point, with Hershey fractions of a point below and Mars slightly above 36%.

With estimated sales of $90 million, the Dietrich acquisition gives Hershey candies such as 5th Avenue brand, Queen Anne chocolate covered cherries and Mello-mints peppermint patties, as well as Luden's cough drops.

Luden's provides Hershey with an entry into a market segment that had been tested and abandoned by Mars in 1985. Luden's holds an estimated 16% to 18% market share, in a market estimated at $120-$192 million at retail. Warner-Lambert's Halls brand with 50%, and Procter & Gamble (Richardson-Vicks) Vicks brand at 16% to 18% are other key players in the category.

A mid-1987 acquisition of the Canadian confectionery and snack business of Nabisco Brands Ltd. further enhances Hershey's position. Hershey will take over the manufacture and distribution of Nabisco Canadian brands which have sales of $200 million (Canadian). Brands include O Henry, Life Savers, BreathSavers, Planters nuts, Chipits chocolate chip, and Carefree and Bubbleyum chewing gums.

"Momentum is with Hershey," says Leonard Teitelbaum, vp capital markets for Merrill Lynch. "It is keeping the pressure on with its acquisitions and new product development. The company has done an excellent job of expanding its market. Though it says it is committed to acquisition, it can generate plenty of growth with its strong new product development."

Two new Hershey items introduced in late 1986 are expected to extend the company's appeal to mature candy eaters. Grand Slam, a chocolate-coated, crisped rice, caramel and peanut bar, and Bar None, a chocolate-coated chocolate wafer product, were each test marketed in the western U.S.

National rollout of Bar None is slated for September 1987.

Sales of Hershey's 35 established chocolate and confectionery products were strong in 1986, with half of the unit's sales increase attributed to volume gains. The remainder is attributed to a January retail price increase, upping the average bar price from 35 to 40 cents.

By July, Hershey had instituted a 10-14% increase in bar weight to help soften the impact on consumers of the price increase.

Faced with a market situation where competitors increased advertising and promotional spending, Hershey's overall measured spending of $65 million was 5.7% below 1985 levels.

Reese's peanut butter cup continues to be the sales leader among Hershey brands, supported by $6.3 million in advertising spending, down 16% from 1985. Spending also declined on Hershey's candy bars, down 4.5% to $17.75 million; Her-

Six million Michiganders have one thing in common. They don't read the Detroit papers.

If you think you can cover all of Michigan by buying only the Detroit papers, you've underestimated us. We're Booth, 8 great daily newspapers. And, we reach a most valuable segment of those six million Michiganders. Valuable in size and significant in buying power. It's called Booth, Michigan and it's America's 10th largest metro market. The 9th largest market of households with an income of over $25,000 a year. You can reach this important market–a market whose mobility is distinctly upward–by calling Booth Newspapers at (313) 540-5600.

You get 8 newspapers at a 15% discount with just one call. One order. One bill. Represented nationally by Newhouse Newspapers.

booth

shey's Kisses, down 17.1% to $5.8 million, and the renamed Hershey's granola bars, down 63% to $2.5 million.

Spending increases were seen in multiproduct advertising, up 47% to $3.1 million and on specialty products such as Rolo candies, up 54% to $1.4 million, and Hershey's chocolate chips, up 314% to $1.1 million. Spending remained virtually unchanged at $3.2 million for Skor candy bars.

Acquisitions also led activity for Hershey's Friendly Ice Cream Corp. division. Two New England restaurant chains were folded into the Friendly operation during 1986—Idlenot Farm Restaurants of Springfield, Vt., a chain of 12 ice cream and sandwich shops in Vermont, New Hampshire and New York, and Litchfield Farm Shops Inc. of Waterbury, Conn., a chain of 23 ice cream and sandwich shops located in that state.

Friendly now operates more than 825 restaurants with take-out ice cream service. In addition to building concentration in the northeastern states through acquisition and conversion, Friendly has built outlets in non-traditional locations such as hospitals and museums.

Friendly also engaged in an active expansion program in Florida. By year end, it had 12 restaurants operating in the Orlando area, with six additional units slated to open in 1987.

To support these restaurants in a generally sluggish consumer climate, Friendly increased its advertising spending in measured media by 45.1% to $5.28 million.

During 1986, Hershey saw its market leadership position in the pasta market slip as rival Borden manifest a voracious acquisitions appetite. Borden held an estimated 17% of the market at the end of 1986, with its Creamettes and Globe A1 Pasta, to Hershey's estimated 16.8%, spread among its six regional brands. However, with Borden's 1987 acquisition of Prince, which held an estimated 7% of the market, Borden is the undisputed market king.

However, such leadership is of questionable value, according to analyst Mr. Teitelbaum, who doubts that "pasta is anything other than a regional market. I don't think that it makes much sense to market pasta on a national level since there are such strong brand loyalties by region. On a region-by-region basis, Hershey's brands are very strong."

Media ad spending in support of Hershey's pasta brands is relatively modest compared with the company's other lines, totaling only $2.3 million in measured media. Among the individual products, San Giorgio pasta products, distributed in Pennsylvania, Ohio and Indiana, received the largest spending—$844,400 up 54% from 1985 levels. American Beauty pasta, which was rolled out into the Pacific Northwest and California from its mid-western base, received a 47.7% spending boost, up to $759,800. Skinner pasta, a southeastern regional brand had a spending increase of 52%, up to $564,400.

Hewlett-Packard Co. readied its long-awaited HP 3000 line of computers for marketing in 1986, only to have software problems delay distribution until August 1987 in what analysts viewed as Hewlett's all-or-nothing technological gamble.

Nevertheless, the Palo Alto, Calif.-based marketer of computers and medical instruments emerged from a 1985 slump in which net profits plummeted 28.5%. In fiscal 1986, income increased 10% worldwide to $516 million—thanks to the weak U.S. dollar and strong overseas sales.

Profits have kept climbing in 1987. In the three quarters ending July 31, 1987, earnings were up 19% to $426 million on sales of $5.8 billion, up 9.6%.

H-P's advertising expenditures were propelled forward 38% over 1985 spending largely because of the "What if" image campaign produced by Leo Burnett USA, Chicago. These ads presented H-P as a thoughtful innovator and marketer of business work stations. Part of the campaign's aim was recognition and awareness that business systems, not other products, are H-P's main business.

"We were getting calls from people saying, 'I'm looking for parts for my Packard automobile,' " says Karen Gervais, manager of H-P press relations. Network TV spending rocketed from $4.4 million in 1985 to $20.5 million—none of it for specific products. The other notable media shift was a 61.5% slash in measured magazine spending to $3.44 million. Direct-mail was used to inform consumers of product introductions.

H-P marketing veered from product-specific advertising toward a corporate image approach in 1986. Seven-media measured spending figures of BAR/LNA show that H-P cut ad spending for all categories except "general promotion" by 48% to $3.4 million in 1986. A meager $1.5 million was spent to market business computer systems, factory and office automation systems and personal computers.

Workforce cuts and product intro delays characterized 1986. Effective last October, 1,515 employees accepted voluntary severance or early retirement programs, at a cost of $22 million. At the end of fiscal 1986, there were 2,000 fewer employees than in 1985. Additionally, the long-awaited HP 3000 Series 930 business minicomputer was kept in the wings.

The Series 930, first shipped in August 1987 to ASK Computer Systems, Los Altos, Calif., plus the revolutionary technology behind it, are viewed by analysts as healthy signs for H-P. "No longer can the skeptics on the outside say 'They don't have a machine,' " says Adam Cuhney, an electronics industry analyst for Kidder Peabody, San Francisco.

The Series 930 retails for $180,000—some $45,000 less than when it was first announced. But the current Series 930 has twice the memory of the product that was first introduced. The Spectrum technology reportedly makes the business minicomputer twice as powerful as H-P's existing models.

The Series 930 and Series 950, a more powerful $260,000 business computer slated for shipment before 1988, puts H-P in direct competition with Digital Equipment Corp. (DEC) and IBM.

Both computers use H-P's new concept of reduced instruction set computing, or RISC. RISC essentially is a simplified philosophy of computer design, affording fast computation by leaving out complex computer functions. Usually, additional functions merely add to a computer's size and cost.

RISC allows H-P to undercut comparable DEC computers by 15%-20% in price, and to come in up to 30% lower than comparable IBM models, claims Mr. Cuhney, who says DEC and IBM are "reluctantly following" H-P into RISC technology.

Also this year, H-P introduced three terminals—the HP 700/41, 700/42 and 700/71. The HP 700/42, designed for use with DEC computers, sells for $500, or 28% below competitors' prices. The 700/41 sells for $375 and the 700/71, for use with IBM computers, retails for $675.

H-P stepped up spending for research and development by 20% to $824 million in 1986.

U.S. advertising	205	156	31.1

American Honda Motor Co., a subsidiary of the third-ranked Japanese car producer in Japan and largest overseas-based marketer of autos in the U.S., boosted its 1986 unit car sales in the U.S. by 25.5%, supported by a comparable hike in ad spending and increased domestic U.S. production.

American Honda's parent, Honda Motor Co. Ltd., Tokyo, posted net earnings of $547 million on worldwide sales of $18.7 billion for the 1987 fiscal year ended Feb. 28, 1987. While total revenues for the year were down only 1.4%, earnings took a sharp 43% drop, which Honda attributed to strengthening of the Japanese yen and reduced sales of motorcycles and power products.

Figures for both 1987 and 1986 fiscal years were converted from yen to dollars at the rate of Y153 = $1.

Nearly 70% of the revenues of the parent Honda Motor Co. come from the sale of its autos, motorcycles, ATVs, scooters and power equipment in overseas markets. About 50% of its business is from the North American market alone. The appreciation of the yen against the dollar has made Honda products more expensive abroad, cutting into profitability.

Worldwide unit sales keep moving up for Honda autos, however, rising 15.6% to a record 1,582,000 units in fiscal 1987, reflecting the expansion of overseas production and dealership networks in such major markets as the U.S.

Sales of imported Honda cars in the U.S. in 1986 totaled 458,268 units (405,399 with the Honda nameplate and 52,869 of the newly introduced Acura Legends and Integras), up 11% from 1985. This represented a 14.1% share of the import car market, down slightly from 14.3% in 1985.

Sales of U.S.-built Accords and Civics were 235,247, up 61.2%, giving Honda total car sales of 693,515, up 20.3%. This represents a 6% share of the U.S. market, making Honda last year's leader among foreign-based automakers. Toyota ranked second with a 5.7% share, Nissan third with 4.8%.

Honda projects U.S. sales of 750,000 units for 1987—110,000 Acuras and 640,000 Hondas—and one million Hondas and Acuras by 1990. This increase appears within reach because of the company's steadily expanding production facilities in the U.S.

Unlike truck imports, the import of cars is limited by the self-imposed quotas assumed by the Japanese car marketers under the Voluntary Restraint Agreement. Honda of America began producing the Accord model at its Marysville, Ohio, plant in 1982, adding Civic sedan production at Marysville in 1986.

The Marysville plant, with a capacity of 360,000 cars a year, has given Honda a major advantage over some of its larger Japanese competitors by allowing it to top import quotas from Japan with domestic U.S. production. This has helped Honda become the top-selling Japanese car company in this country in 1986 (exclusive of truck sales).

In early 1987 Honda announced it would invest $450 million to expand a plant at Anna, Ohio, to manufacture engine and drive train components for Accord and Civic autos assembled in nearby Marysville. The Anna plant has been producing motorcycle engines for a year and a half.

Sales of the new luxury/performance cars of the Acura division, launched in 1986, fell short of the original forecast of 58,000 units, and the shortfall resulted in a push to expand the dealer network.

Source: Broadcast Advertisers Reports as reported by Leading National Advertisers
Note: Dollars are in thousands

There were about 150 Acura dealers at the end of 1986, a total that was expected to reach 300 by the end of 1987 and 600 within several years. Dealers have been told a more upscale car, priced above the Legend, is on the way. The model reportedly will be a sedan, larger than Legend.

Expansion of the Acura dealer outlets was supported by a doubling of media spending to more than $40 million for 1987. Measured expenditures for 1986 amounted to $24.5 million, with the ad budget split 40%-40% Legend/Integra, with 20% devoted to divisional promotions.

A revised budget is now split about 60%-40%, Integra/Legend. At $11.5 million, national magazines and enthusiast publications accounted for the biggest media outlays.

TV spots which broke in the fourth quarter positioned the Legend touring sedan against the European luxury imports. Integra spots emphasize the car's Formula One racing heritage.

The Acura Legend was named *Motor Trend* magazine's '87 Import Car of the Year, with the Acura Integra placing second in the magazine's annual competition.

Following the launch of the Acura and total redesign of Accord in 1986, the only major change in the 1987 model line was a new 4-wheel-drive version of the Civic wagon. The top-selling Civic/CRX models (212,791 units sold at prices ranging from $7,600 to $9,600) accounted for the major slice of the budget, with total media spending measured at $31 million, some 60% in network TV.

Spending in support of the Honda Accord, which accounted for sales of 112,767 units at prices ranging from $9,795 for a three-door hatchback to $14,959 for the four-door LXi sedan, was measured at $14.7 million, half in network TV, via Ketchum Communications.

Measured ad spending for the top-of-the-line Prelude models ($15,475 for the automatic Si coupe) reached $4.1 million, and there are signs it may top that figure this year because of a campaign that broke midyear. Rubin, Postaer & Associates, Los Angeles, handles.

Honda and Mazda have raced to be first to introduce a four-wheel-steering option for the 1988 model year. The feature allows the rear wheels to steer the car in concert with the front end. Earlier this month, Honda introduced an all-new line of Preludes that feature 4WS, and it will support the Preludes with a $10 million campaign. Mazda also began marketing its 626 models with the 4WS option earlier this month. It is promoting safety as the main 4WS benefit. Honda is pushing the option as another example of its technological capability.

The new Prelude sport coupe will be followed this fall by a new generation of more upscale Civics, leaving Accord as the only carryover model in the Honda lineup in 1988.

Honda maintained its dominant position in the world motorcycle market and held a 45% share of the U.S. market in 1986, down slightly from 48.6% a year earlier. It is followed by Yamaha at 17.8% (up from 16.9%), Kawasaki at 14.9% (unchanged), Suzuki at 12.2% (up from 10.1%) and resurgent Harley-Davidson at 9.6% (up from 7%).

Honda also led the competition in sales of all-terrain vehicles in 1986 with a 59% share, down from 63.5% a year earlier. And Honda held a commanding lead in motorscooters with an 83% share, followed by Yamaha and Vespa.

The 1986 calendar year saw the introduction of a new 4WD ATV, an industry first that was quickly parroted by the competition. Honda's entry, which had the support of network TV, was the Four Trax 4x4, priced at $3,398. TV spots carried the tagline "Follow the leader, he's on a Honda," a theme since 1979.

The year ended with Honda spending an estimated $20 million on motorcycle advertising, most of it in network and spot TV and magazines. The combined annual budget for motorcycles, scooters and ATVs is estimated at topping $45 million, up about 10% over 1985.

Honda's motorcycle line for 1987 included the introduction of three new entry-level models—250cc Rebel, an on-road bike; the 200cc Fat Cat, an off-road machine and the 200cc Reflex, a dual-

First in a series of discussions in the M/A/R/C Symposium.

A Candid Discussion About Database Marketing.

Q: What is the difference between database marketing and traditional direct marketing?

A: Database marketing is the next evolution of direct marketing. The primary difference is the ability to communicate more precisely with different market segments and incorporate the consumer response back into the database. Once the response information becomes part of the file it can be used for segmentation purposes in creating the next direct marketing program. The advances in the data processing industry over the last 10 years have made storing of large amounts of information about prospects and customers much more affordable. The real magic is in the analysis of the data and its application to a particular marketing problem.

Q: I currently employ targeting tactics in my media buys. How will this be different in a database marketing environment?

A: It'll give you the ability to communicate more precisely with identified market segments. Analysis of promotion responders can yield strategic marketing direction.

So, the collective intelligence of the database improves with use. By appending the database with additional information from previous promotions or database overlays, targeting can be refined to much higher levels. Each new promotion or database overlay added to your consumer database provides more marketing variables to segment market niches that have a higher propensity to respond to your offer.

Q: What kind of marketing applications should be considered for database marketing?

A: Categories which have a high degree of switching, are mature, or have well-defined niches are excellent candidates. Examples of programs which work well in a database strategy are competitive and continuity promotion programs, frequent traveler and shopper programs, sales lead generation and business-to-business direct marketing programs.

Q: If you had to describe the biggest difference between M/A/R/C Database Marketing and others, what would it be?

A: There is a big difference between just collecting information and knowing what to do with it. The most important difference is our ability to leverage over 25 years of marketing and consumer research experience to design, develop and implement marketing programs that best suit your needs. It becomes a matter of knowing what to ask, and then knowing what to do with the answers. Database marketing allows you to communicate with each customer on an individual basis and create a dialogue that will continually enrich your market intelligence. As an example, we very often uncover information that points to needed changes in the marketing mix. So, the results of the interpretation of the information can optimize strategic marketing programs. M/A/R/C can also identify cross-selling opportunities, either for existing products and services or for new introductions. And, you can use it as a tool to outmaneuver your competition's marketing strategy in as many or as few markets as you choose. With M/A/R/C Database Marketing, pre-emptive planning will become the norm because you will have quantified knowledge of the category consumer base.

Q: Isn't database marketing going to make an already expensive advertising vehicle even more so?

A: The true benefit of database marketing is that it optimizes each marketing program that you run. As mass media costs rise and response to these programs gets harder to quantify, the need for measurable marketing solutions increases. The ability to fine tune your targeting, so you only reach those prospects which have a high probability of responding, can dramatically reduce your costs while improving your volume. M/A/R/C can provide a turnkey test of database marketing with your brand or service for less than $100,000.

Q: I know M/A/R/C has a great reputation in custom research, but I imagine you use a service bureau for database management. Don't you?

A: No. Most direct marketing agencies do use a service bureau. M/A/R/C is unique. Information has long been our business and our state-of-the-art computer capabilities enable us to do everything in-house. We think it is the only way to offer clients a formula for success where one plus one equals four.

M/A/R/C has a long history of proactive client service. We have been dedicated for the past two decades to working with clients to understand and create the best product or service mix to sell in changing market conditions. This expertise and dedication to service are carried forward into our newest service, database marketing. When you think about it, an integrated system customized to meet your individual needs – a system that's capable of revolutionizing your marketing strategy – is a powerful concept.

Q: OK. You've got my attention. How do I find out more about M/A/R/C Database Marketing?

A: Call Ken Orton at 1-800-527-2680 or return the coupon.

☐ *Yes, I want to arrange an interview to find out how effective M/A/R/C Database Marketing can be for my company.*
☐ *I'm interested, but before we meet, call me at my office.*

The Artistry of Marketing. It Works.

purpose on/off-road vehicle. All are priced at about $1,500.

Honda's 1987 scooters got big play in a $10-million campaign that broke mid-May. TV commercials featured documentary-type shots of the teen-targeted Elite 50 model and top-of-the-line Helix scooters moving in traffic to lively rock music. The spots, filmed in 8mm, bear a grainy look that resembles home movies.

Last year, the company formed Honda North America Inc., a separate unit that was established to coordinate activities of Honda's 13 U.S., Canadian and Mexican subsidiaries.

Tetsuo Chino, former president of American Honda Motor Co., was named president of the new company, which is headquartered in Torrance, Calif.

In 1986, IC Industries moved to reallocate its corporate resources into specialty foods produced by Pet Inc., consumer services supplied by its Midas International operation and commercial products as it took steps to merge or sell portions of its far-flung railroad operations.

Pet Inc., a division of the specialty foods group, reported record operating income of $125.4 million in 1986, a 24.3% increase over the record established in 1985. This earnings performance represented the sixth consecutive year of improved earnings for Pet, whose 1986 sales increased 9.5% to $966 million.

In November 1986, Pet purchased Ogden Food Products for $310.2 million. The Ogden unit includes Progresso's ready-to-serve soups, sauces, canned specialty vegetables, cooking oils and bread crumbs. The acquisition gives Pet a 26% share of the $500 million ready-to-serve soup segment, the company claims. Progresso has a 5% share of the $2 billion total soup market, which is dominated by Campbell Soup Co., with an 80% share.

Progresso products were supported by $8.4 million in seven-media spending, as measured by BAR/LNA. Also part of the Ogden acquisition were several other established brands, including Las Palmas Mexican foods and Hain & Hollywood health foods. During the year, Pet also acquired Primo through a merger with Primo Foods, La Creme from Kraft Inc., and Cajun Cookin' from Louisiana Seafood Packers.

Pet's best-selling brands include Old El Paso, with 31% of the $626 million Mexican dry grocery market and 13% of the $268 million frozen Mexican food market. The El Paso line received $9.3 million in measured-media ad support, up 57.4% in 1986. Other top sellers include Downyflake and Roman Meal, with 30% of the $213 million frozen waffle market; Progresso soups and Pet-Ritz frozen pie shells, with 75% of the $107 million frozen pie shell market.

Pet continued to expand in foreign markets, introducing Old El Paso Mexican foods into Australia and Japan. In 1986, Pet sold an evaporated milk plant and discontinued its food operations in Mexico.

Pet's 1986 product introductions included seasonings and salad dressings to the Old El Paso grocery line; new combinations of beans to the B&M baked beans line; salt-free seasonings to Accent; salt-free meat spreads to the Underwood meat spreads line; Whitman's frozen chocolate cream pies and Downyflake frozen breakfast entrees.

Earnings for Midas International Corp. increased 11.7% to $44.8 million, compared with the previous record of $40.1 million in 1985. Last year, Midas had 25% of the U.S. exhaust system replacement market, 11% of the brake market and 5% of the overall shock absorber, strut and front-end replacement market.

In its 30th anniversary year, Midas' network of stores grew to 2,100 shops in 10 countries, up 155 over 1985. The division acquired full ownership of Le Silencieux, its French subsidiary, several exhaust service shops in Australia and four shops in the U.K.

Midas decreased its measured media spending by 4% in 1986, to $36.1 million.

Pepsi-Cola General Bottlers, distributors of Pepsi-Cola and other soft drinks in eight midwestern states, set records for sales and operating income for the second consecutive year. Operating income of $55 million was up 3.8%. The distributor, Pepsi's second largest independent bottler, signed an agreement in August 1987 with GenCorp to buy its Pepsi bottling operation, RKO Enterprises. The merged units would become the largest independent bottler for Pepsi.

However, PepsiCo Inc., which has the right of approval in the transfer of a franchise, quickly nixed the deal. Analysts view PepsiCo's response as an indication it wants to build its company bottling operations, especially in light of Coca-Cola Co.'s acquisition of many of Coca-Cola's bottling operations into Coca-Cola Enterprises, which it spun off into a publicly held company in 1986. IC and GenCorp have filed suit against PepsiCo.

In 1986, the bottling division introduced PepsiCo's three new flavors of Slice—regular and diet orange, apple and cherry cola—in all markets. Slice, the No. 1 juice-added soft drink, accounts for up to 8% of bottling volume in some markets. Pepsi General continued to expand its fountain and vending machine business, as nearly 300 Kentucky Fried Chicken restaurants in Pepsi General markets switched to Pepsi products.

The sale or merger of the Illinois Central Gulf Railroad has been a top priority of IC Industries for several years. The company plans to divest all but a 3,000-mile core system running from Chicago to the Gulf of Mexico.

IC Gulf Railroad reported the third-best year in its history. Railroad activities, including real estate, had revenues of $706 million in 1986, down 22.4% from 1985 because of lower traffic volume resulting from the downsizing program.

Operating income was $86.3 million in 1986, up 12.2% over 1985. ICG sold seven line segments totaling 938 miles for $205 million in 1986, reducing system miles by 21% to 3,719.

IC's overall loss of $56.3 million from continuing operations was credited largely to third quarter costs associated with restructuring the rail operations and to an $80.4 million writedown of discontinuation operations at Pneumo Abex, an aerospace, industrial and fluid power concern.

Hussmann Corp., the industry's leading refrigerated display case manufacturer and refrigeration contractor in the U.K., continued its strong earnings growth, with operating income of $76.2 million, exceeding 1985's record by 33.2%. This large increase reflected, among other factors, the earnings of two food-service companies that were acquired in late 1985.

WHY BE A LITTLE FISH IN A BIG POND?

FASHION BUSINESS IS BIG BUSINESS IN TRAVERSE CITY/CADILLAC/CHEBOYGAN.

Traverse City/Cadillac outspends Nashville, Tennessee, the 31st ranked HH ADI in the United States, for Apparel and Accessory sales-per-household. In just five years, Effective Buying Income has leaped up 78%, outpacing Michigan and the East North Central Region by a midwest mile. Total Retail Sales have jumped up 39%, again beating increases in Michigan and the East North Central Region and proving that apparel and accessory sales are always big sales in Traverse City/Cadillac/Cheboygan.

WPBN-TV/WTOM-TV DELIVERS THE HEART OF THE TRAVERSE CITY/CADILLAC MARKET.

We've got the facts, figures and programming to help your sales dominate the Midwest's fashionable new market.

International Business Machines Corp. is restructuring its marketing and distribution functions in the U.S. following declines in worldwide earnings in both 1985 and 1986. The back-to-back slide in earnings was the first for IBM since 1933.

In addition to product introductions for all hardware lines, IBM focused on value added enhancements in hardware and software applications in 1986, analysts say.

IBM's total advertising spending fell an estimated 10% to $295.5 million in 1986 over the prior year, although IBM funneled $47 million into measured spending for personal computers, up 35% over 1985, according to BAR/LNA.

Despite the heavy spending, IBM's share of the $16.9 billion U.S. market for personal computers fell to 29.6% in dollars in 1986 from 40.6% in 1985, according to San Jose, Calif.-based Dataquest, a division of Dun & Bradstreet Corp. Also falling in share was Apple Computer Corp., the No. 2 maker, to 9.1% in 1986 from 10.3% in 1985. No. 3 Compaq increased share in 1986 to 6.6% from 5.2% in 1985.

IBM's decline was attributed to an onslaught of lower-priced IBM clones, and to the fact that the IBM-PC XT and PC-AT are nearing the end of their product life cycles. IBM's newest personal computer, the IBM System/2, introduced in April 1987, has the potential to put IBM back in the driver's seat, analysts say.

The problem is that System/2 hardware was introduced well ahead of applications software in order to blunt inroads by Apple Computer and Compaq in the business market, says Stephen P. Cohen, analyst with the Gartner Group, Stamford, Conn. "Now the market is in a state of transition [for IBM]," Mr. Cohen says.

It is not yet clear how IBM will fare given System/2's limitations in software. Another factor is Cupertino, Calif.-based Apple Computer's March 1987 introduction of two more powerful versions of its Macintosh computer.

Houston-based Compaq Computer's net income tripled in the second quarter of 1987, defying a predicted slowdown in Compaq's sales expected from inroads made by System/2's introduction. Although System/2 was a bright spot for the second quarter, IBM's profits fell 16% during the first six months of 1987 to $1.96 billion on revenues of $23.48 billion, up 4.8%, compared with the same period in 1986.

In April 1987, IBM changed the focus of its personal computer advertising from spotlighting a single user accomplishing business and personal objectives to showing a group of users accomplishing interrelated tasks.

In changing its approach, IBM's New York-based agency, Lord, Geller, Federico, Einstein shelved IBM's popular Charlie Chaplin character, who symbolized the single user, in favor of the group, represented by the main characters from the CBS TV series M*A*S*H.

Corporate general promotion accounted for IBM's second largest category with $28 million in measured spending for seven media in 1986, up 3% over 1985, according to BAR/LNA. The spending was divided mostly between network TV and consumer magazines.

IBM's change in strategy for marketing and distribution of all products reflects new emphasis on selling more applications software, complementary products, and custom products, says Robert Simko, executive director of International Technology Group, a Los Altos, Calif.-based consulting firm.

The overriding objective is to sell more products and services to key target markets, he says.

In applications software, IBM is focusing on its own products and on those of third-party vendors. For example, the OS/2 operating system for System/2 was designed by Redmond, Wash.-based Microsoft, but IBM also plans to introduce an enhanced version called IBM OS/2.

This has caused confusion, prompting Compaq in July 1987 to schedule a joint news conference with three major software companies to explain that OS/2 and other advanced software would run on IBM-compatible machines (i.e. Compaq). IBM's measured spending for personal computer software was $3.9 million in 1986, up 1%.

Another IBM objective is selling more complementary and peripheral products, analysts say. In recent years, IBM has increased its emphasis on joint ventures in horizontal applications, such as computer integrated manufacturing, and in vertical applications, such as IBM's arrangement with United Airlines to sell United's Sabre reservations system to travel agents.

In peripherals, IBM's had measured spending for printers in 1986 of $10 million, up 16% over 1985. Network radio claimed 37% of the media budget that also included heavy amounts for network TV and magazines.

IBM also had $2.8 million in measured magazine spending for graphics display systems, a new category, and $615,000 in magazine spending for modems, up 131% over 1985. IBM also spent a measured $11.3 million on electronic typewriters in 1986, down 21%, divided 82% network tv and 18% magazine.

A third area where IBM is concentrating is custom modified products for total office systems integration, Mr. Simko says. Examples include IBM systems for the Federal government, and announcement in 1986 of a total office automation project for Ford Motor Co.

"Hardware is still the dominant factor in IBM's plans, but they also have to sell the value added (enhancements) in both hardware and software to achieve their profitability goals," Mr. Simko says.

In the $2.8 billion market for high-end minicomputers, IBM's share in dollars plunged as several smaller companies picked up percentage points. IBM's share fell to 25.9% in 1986 from 49.9% in 1985. Meanwhile, DEC's share increased to 17.6% in 1986 from 14.2% in 1985. Data General and Ft. Lauderdale, Fla.-based Gould Computer Systems moved up with 4.2% and 3.2%, respectively, according to Dataquest.

DEC has taken the lead in the $3.1 billion market for low-end minicomputers with 38.1% in 1986, up from 10.1% in 1985. IBM's share in dollars in 1986 fell to 29.8% from 44.6% in 1985. No. 3 Wang is a distant third with 4.3%.

For minicomputers overall, IBM has a slim lead of 26% in dollar share over DEC, which has 19.1%. Following is Unysis with 3.5%, Hewlett Packard with 2.6% and NCR with 1.4%, according to Dataquest.

IBM's problems in mid-range systems stem from decentralization in the 1970s, analysts say. Divisions were given responsibility for their own products and launched a diverse line of hardware and software products that are difficult to interconnect. Digital takes full advantage of the situation by emphasizing in advertising that its VAX system permits interconnection now among all its products.

But IBM's October 1986 introduction of the 9370 Information System, and the introduction in 1986 of improved versions of IBM's System 36 and 38, should greatly improve IBM's interconnections and its competitive position, says Frederic G. Withington, a New York consultant.

"IBM has been held back by the dead hand of the past while DEC ruthlessly cut off all (non-VAX) products. DEC's window of opportunity is closing as the power of IBM's computers increases and the prices fall," Mr. Withington says. More power means IBM can emulate compatibility between products.

IBM's measured spending for the System/36 and System/38 was $6 million in 1986, up 11%, with network TV claiming 42% of the ad dollars and magazines and network radio the rest.

IBM still dominates the market for mainframe computers in the U.S. IBM's dollar share of the $6.7 billion market for mainframes grew to 71.8% in 1986 from 68.3% in 1985. No. 2 Unisys has 7.9%, Amdahl 5.6%, and Honeywell 5.4%, according to Dataquest.

IBM introduced two entry-level models of its 3090 mainframe in February 1986. The system is clearly more powerful, but IBM's lag time in creating software applications leaves a window of opportunity for smaller companies, such as Amdahl, which typically offer IBM compatible processors at 20% to 25% lower prices, Gartner Group's Mr. Cohen says.

IBM's reorganization of marketing and distribution started with the January 1986 appointment of Edward E. Lucente as group VP for the information systems group. Analysts say Mr. Lucente has set the tone and strategy of IBM's new focus in marketing and distribution. IBM also appointed in March 1987 Kaspar V. Cassani and Jack D. Kuehler as executive VPs, the second-ranking posts in the corporation following the August 1987 retirement of Paul J. Rizzo as vice-chairman, a position that will not be filled.

Mr. Cassani, who assumed most of Mr. Rizzo's responsibilities, is now in charge of worldwide marketing in addition to the information systems group, which runs all marketing operations in the U.S. Mr. Kuehler is in charge of the Federal Systems Group, technology, and large-scale systems development.

In mid-July 1986, IBM concentrated

ADVERTISING AGENCY

all of its business at JWT Group agencies, involving roughly $200 million in billings. Winners were Lord, Geller, Federico, Einstein, the current agency of record for corporate and personal computers and related software, and J. Walter Thompson USA. Losers were Doyle Dane Bernbach, Leber Katz Partners, and Geer DuBois, all of New York. DDB was agency of record for TV buying.

The dismissal of DDB, which handled IBM's information systems group, was triggered by DDB's union with Needham Harper Worldwide and BBDO International to form New York-based Omnicom Group. BBDO has Apple Computer. Leber Katz Partners was dropped because of its merger with Foote, Cone & Belding, which services Westborough, Mass.-based Data General Corp., an IBM competitor in midrange computers.

ITT Corp.'s estimated U.S. ad expenditures dropped 15.2% in 1986 as Chairman-CEO Rand Araskog continued his efforts to divest the company of acquisitions made by his predecessor, Harold Geneen.

The corporate streamlining began in 1979, and since that time ITT has sold off more than half of its former holdings including the recent sale of its telecommunications equipment operations to a 37%-owned ITT joint venture with French-government-owned Cie. Generale d'Electricite. ITT also has made more than 40 acquisitions. In 1986, it sold 12 companies from its three remaining major business segments—industrial technology, diversified services and natural resources—for $597 million.

Income from the more than 100 sales since 1979 totals more than $4 billion. The proceeds went largely to reduce the company's debt. According to a company spokesman, ITT has reduced its debt by about $660 million. Its year-end debt-to-equity ratio was a 25-year low of 29-71 and shareholder equity of $46.17 a share was the highest in the company's history.

"Overall it's clear that in the last two years the company's returns have been improving," says Jack Kelly, a VP with Goldman Sachs, New York. He noted insurance, hotels (which Mr. Araskog earlier said he would consider selling) and forest products as the leaders in the revitalization of the company. "They also exited a major area that was not doing well," says Mr. Kelly, referring to the telecommunications equipment division; this was transferred to CGE for $1.5 billion as part of a joint venture agreement that gives ITT a 37% stake in the partnership.

The French deal was designed to create the world's second-largest telecommunications company (after American Telephone & Telegraph Co.) with sales of roughly $9.6 billion. It captured major shares of key European markets, including 80% in France, 60% in Spain, 40% in West Germany and 20% in Italy.

More acquisitions and sales may be in the future for ITT, but a company spokesman indicates the corporate strategy is to make acquisitions consistent with its major lines of business. "We are in the latter stages of an asset redeployment plan that we started in 1987," he says.

The spokeman adds that ITT intends to be among the top 10 businesses in the world in each of its major market segments—automotive parts, electronic components, fluid technology, insurance, financial services, defense and space technology, natural resources and hotels.

Overall, Mr. Kelly predicts ITT will continue its turnaround in financial results. He predicts 1987 net income of $8.48 million ($5.75 a share) and 1988 income of $9.35 million ($6.60 a share).

The determining factor for ITT's future, however, does not rest with the company's marketing, according to Mr. Kelly. "The key factors to improving returns at ITT are not related to marketing," he says, "but to improved manufacturing techniques, financial controls and focusing on the businesses that are making them money."

ITT declined to discuss its 1986 advertising budget. But its estimated general corporate promotion budget dropped to $4.7 million in 1986 vs. $13.5 million in 1985. That budget will go to new corporate ad agency, Wells, Rich, Greene in New York. WRG replaces Biederman & Co., also of New York.

According to figures compiled by BAR/LNA Multi-Media Service, the Sheraton Hotels division, which is the owner or franchisor of 488 hotels in 58 countries, was the top advertising spender among ITT's divisions in 1986. It spent more than $8.3 million, primarily in magazines, up 20% from 1985.

The Hartford Insurance Group's spending doubled to $6.8 million, mostly for business, auto and life insurance lines.

With the expiration of the exclusivity rights for marketing ibuprofen in September 1986, Johnson & Johnson introduced Medipren, its entry in that category, to help build its market share in the overall analgesic market already dominated by flagship Tylenol.

At year end, ibuprofen held a 15% share of the analgesic market up from 9% in 1985 and will continue to climb this year as more companies introduce new entries. Other new competitors thus far include Thompson Medical Co.'s Ibuprin, several generic brands and a line extension from American Home Products called Trendar and Upjohn Co.'s Haltran, both marketed as menstrual pain relievers, a new segmentation.

Bristol-Myers' Nuprin and American Home Product's Advil had the exclusivity for two years in a category that is slowly pulling shares away from aspirin and acetaminophens such as Bayer and Tylenol, respectively.

Despite this latest pressure, McNeil Consumer Product's Tylenol remains No. 1 in the market with a less than 30% share at the close of 1986 down from nearly 33% in 1985. Advil is No. 2 with a 9.6% share which also holds two-thirds of the ibuprofen segment, according to Oleh Denysyk of Kline & Co. consulting firm in Fairfield, N.J. Tylenol's loss of shares was brought on by the ibuprofens, and because of the cyanide poisonings that led to the removal of the capsule form at midyear.

The recall, which effected only a temporary glitch in supplies, cost J&J $130 million. Along with divestitures and discontinuations of various operations, this resulted in a deficit in U.S. operating profit for J&J in 1986.

Measured spending for Tylenol, according to BAR/LNA, increased only 1% again this year to $60.8 million after a 1.1% increase in 1985. Medipren, launched in September 1986, was supported by a measured $12.4 million in advertising. On an annualized basis, that would bring Medipren into the high spending category of segment leaders Bristol-Myers' Nuprin ($36.2 million) and AHP's Advil ($47 million).

Medipren is expected to receive over $25 million in support in 1987 via new agency Lowe Marschalk, New York. This is the agency's first assignment from a J&J company.

In the Personal Products division, J&J continues to hold the leading position in the external feminine protection category but not without strong competition. Procter & Gamble's Always line, introduced in 1984, is edging very close to No. 2 Kotex (Kimberly-Clark) in this $1.5 billion market causing J&J's Stayfree line to fall 5 points to a 40% share. K-C is holding on to a 23.5% share while P&G climbed to 20%.

The Stayfree line, consisting of Stayfree maxi and Silhouette maxi pads, Sure & Natural maxishields, Carefree panty shields, and Assure & Natural pantyliners, received $21.3 million in measured advertising, down 25% from 1985. However, spending for the Stayfree Silhouette maxi, shaped to fit a woman's body, increased more than two-fold in 1986 to $18 million mostly in network TV and magazine.

With the fear of toxic shock subsiding among women, tampon sales have increased over 1986 helping J&J's Personal Products "o.b." tampons to regain declining shares. With measured ad spending decreasing 42% to $3.2 million, "o.b." currently holds a 9% share placing it third in the $4 billion market. The leader in this market is Tambrand's Tampax at a 56.5% share followed by Playtex brand with a 30.3% share.

Other activity in this division includes the introduction of Serenity incontinence pads for adults in April of this year. The company hopes to gain shares away from Procter & Gamble's Attends now dominating that market with a 58% share and Kimberly-Clark's Depends holding a 20% share. Serenity was recently assigned to SSC&B, New York.

The Advanced Care Products division of Ortho Pharmaceutical Corp. recalled Ovutime ovulation predictor kits, a product it began marketing last year. The recall resulted when batches of the home test deteriorated. The company spent $1.6 million in measured media on its introduction via Kallir, Philips, Ross, New York. Shipments are not expected to resume in the near future.

Currently, J&J is seeking Food & Drug Administration approval for a new sweetener called sucralose. Sucralose is non-caloric and has a taste that is 600 times sweeter than sugar. This new substance could cause heavy competition for NutraSweet marketed by the company of the same name, but not for several years because FDA approval could take up to five years.

A new healthcare subsidiary was created at J&J this year that is marketing health maintanence programs to businesses. Health programs include consult-

THE NEW band FREEDOM

Boston Area Newspaper Dailies

There's a new freedom in Boston.

It's the new BAND rate structure offering flexibility of their newspaper network purchase in the Boston ADI.

Select any combination of the BAND network markets and custom-tailor your newspaper buy.

The Boston ADI. Boston MSA. New Hampshire. Or specific key markets.

The minimum circulation is 300,000; the maximum is 576,429 (27% ADI household coverage). The only limitation is your buy must fit within six (6) circulation/discount levels.

Call your Landon representative and learn about your new freedom in Boston.

ing, evaluation and classes in such areas as exercise, weight control, stress management, nutrition, smoking cessation and blood pressure management. The company suspects the demand for such services is high and being a healthcare company, feels it's an opportunity it can't ignore. Young & Rubicam, New York, is the agency assigned to this new division.

J&J acquired two companies in 1986. Coopervision Pharmaceuticals, bought from Coopervision Inc., for $260 million, produces prescription pharmaceuticals for ophthalmic use. The other acquisition, LifeScan Inc., markets home diagnostic tests.

The company sold to General Electric in August 1986 its diagnostic imaging businesses. The sale of the business, which produced $275 million in sales in 1985, contributed charges of $380 million against net income in 1986 that reduced net income by 46.3%. In geographic terms, the sale produced a one-time charge of $680 million against operating profit in the U.S., resulting in a loss of $13 million in 1986 vs. a gain of $543.5 million in operating profit in 1985.

Johnson & Johnson's VP-advertising, G.F. "Pete" Tyrell, was elected the new chairman of the Association of National Advertisers in October, succeeding Herbert M. Baum of Campbell Soup Co.

Marketing Without Waste.

We'd all like to avoid waste in our advertising and sales promotion programs.

Yet, for years we've been plagued with wasted circulation, wasted broadcast reach, and wasted advertising budgets.

Until Now.

Because now, with Epsilon's database marketing, you can channel your promotion dollars right to your best customers and prospects.

Epsilon can help you create and control your own, exclusive medium so you can...

- motivate customer purchases
- improve market share
- build customer loyalty

...without wasting your budget on people who aren't really interested in your products.

And with Epsilon's database marketing in your corner, you can outmaneuver your competition with innovative, strategic, targeted marketing programs.

So why not find out how you can start cutting the waste and making more money with Epsilon's database marketing?

If you're ready to begin a program for marketing without waste, **call Robert Romasco today at (617) 273-0250. Or send in the form below to Robert Romasco, Vice President, Epsilon, 50 Cambridge Street, Burlington, MA 01803.**

($ in millions)

Worldwide	1986	1985	% chg
Sales	2,000	2,040	(2.0)
U.S. advertising	145	146	(1.1)

S.C. Johnson & Son's initial success in the lucrative haircare and skincare categories has given this 101-year-old privately held company confidence to expand into the growing personal care markets, rather than in the already-mature homecare and insecticide categories.

Johnson, whose sales have remained static since 1984 fiscal returns, acquired the Check Up plaque-fighting toothpaste and chewing gum line from Chaska, Minn.-based Minnetonka Corp., in February 1987. Johnson's Rydelle Laboratories unit, which already markets Zact smokers toothpaste in the U.S., will be responsible for marketing Check Up.

While the company remains anchored by the strength of its furniture polishes, floor waxes and Raid, the leader in the insecticide category, measured media spending was $80.5 million, down 1.4% from its spending levels record in calendar 1985.

In 1986, Johnson put a significant portion of its measured media spending, an estimated $32.7 million, into its personal care and over-the-counter drug businesses. Raid, long Johnson's major ad expenditure, was second with $13 million in measured media support.

In Johnson's personal care division, L'Envie Parfum shampoo and conditioner, launched in the spring of 1986, received the largest single share of measured media spending, $9.1 million. L'Envie, a 12-item premium-priced line of products, contains fragrances similar to the most popular fragrances, such as Cosmair's Vanderbilt and Estee Lauder's White Linen. In late 1986, it added Capture, a fragrance similar to Calvin Klein's successful Obsession perfume. The brand's strategy is to "continually renew the fragrance types by introducing new variants based on new and popular fragrances," says a company spokeswoman. By the end of 1986, its first full-year of distribution, L'Envie had gained a 1.2% share of the $1.29 billion shampoo segment and 2.8% of the $540 million conditioner segment.

Taking into account its Agree and Halsa haircare lines, Johnson is estimated to be the third-ranked haircare company with a total 7.1% share in shampoos and a 10.1% conditioner share, says Diana Temple, cosmetics and toiletries industry analyst with Salomon Bros., New York. P&G remains the category leader with a 26.7% shampoo share and a 16.4% conditioner share.

Halsa, which received $8.1 million in measured media spending, down 49% from the previous year, also dropped a share point in the shampoo segment, dropping to 2.4%, say analysts. The brand held a steady 1.9% conditioner market share. According to the company, Halsa shampoo holds the same 3.9% share as the conditioner. In March 1987, the company extended the Halsa line with the introduction of Halsa Swedish Botanical Formula hairspray and styling mousse. They mark Johnson's entry into the growing $780 million hairspray and mousse segments.

Agree, Johnson's teen-age and young-adult positioned haircare line, received $3.2 million in measured media support, a 15.8% drop from 1985. Agree, with a combined 4.2% market share (5.8% in 1985), tried stimulating brand awareness by becoming the first shampoo and conditioner brand to sponsor a rock band's national tour. Agree also held a sweepstakes where the winner won a concert by the band "a-ha" at their school. In January 1987 Belinda Carlisle, a rock singer, was signed as Agree's spokeswoman.

Agree is teaming with Johnson's Edge shaving gel, the leading gel with a 25.3% share of the $217 million shaving preparation category, to sponsor the tour of the band "Night Ranger" later this year.

Johnson, with its Curel and Soft Sense brands, has become a serious player in the $550 million hand and body lotion category. Curel, a therapeutic skin lotion for dry skin, enjoyed an estimated 30% sales gain in 1986, while market share increased nearly one point to 7.2%. Supported by an estimated $10 million ad campaign, Curel helped fuel competition. The brand received $2.4 million in measured media support in 1986.

Soft Sense, the company's cosmetic entry, has an estimated 7.2% share (6.4% in 1985). The brand received measured media spending of $3 million, up 87.5% from the previous year. In April 1987, Johnson introduced Soft Sense Body Mousse with Vitamin E, a light, creamy, alcohol-free foam. An introductory print, TV and couponing program is handled by J. Walter Thompson USA, Chicago.

The company boosted its 24-plus brands of Raid insecticides with $13 million in measured spending, a 1.6% increase. Although the Raid brand has come under increasing competitive pressure from new product introductions by American Home Products' Boyle-Midway division (Black Flag) and American Cyanamid Co.'s Shulton unit (Combat), analysts say Johnson has held the lead with a 45% share of the $345 million (manufacturers dollars) category.

In spring 1987 Johnson staged an estimated $10 million introduction of Raid Roach Controller, the company's long-expected response to Cyanamid's Combat, which Johnson acknowledged was hurting its leading position. Raid Roach Controller, an insecticide bait aimed at serving consumers who prefer "passive insect control," was supported with a TV, magazine and couponing campaign via Foote, Cone & Belding, Chicago.

Although measured media support for OFF! personal insect repellent dropped 17.8% to $2.3 million, the brand continues to lead the estimated $60 million category. Cutter insect repellent, from a division of A.G. Bayer's Miles Laboratories, Elkhart, Ind., is the No. 2 brand.

Rydelle Laboratories supported its Zact smokers toothpaste with $3.9 million in measured media, primarily for network TV, a 14.7% increase from 1985. Now with two brand lines, Rydelle still faces an uphill battle against the Big 3 toothpaste marketers—Procter & Gamble Co., Colgate-Palmolive Co. and Lever Bros. Check Up had a declining 2% share of this $1 billion category when purchased.

Last November Rydelle introduced Aveeno lotion and Aveeno shower and bath oil, extensions to the Aveeno bath products line. Aveeno received $3 million in measured media.

Rydelle introduced Fiberall lemon-flavored tablets, another extension of the Fiberall laxative wafer and sugar-free, high-fiber powder line. Fiberall has a 7% share of the bulk laxative segment of the $450 million (manufacturers' level) category, according to Oleh Denyssyk, senior analyst with Kline & Co., Fairfield, N.J. P&G's Metamucil is the leading laxative. Fiberall received $3.9 million in measured media, down 29%.

Johnson's Pledge furniture polish led the homecare division in measured media with $7.2 million, up 12%. It commands an estimated 46% share, leading the $150 million (manufacturers' level) furniture wax and polish category. Johnson's wax-free dusting aid and cleaner, Duster Plus, is believed to hold less than a 5% share of the $31.5 million dusting aid segment, compared with 80% for segment-leading Drackett Co.'s Endust. The wax-free segment is growing steadily, posting an 18% gain in 1986. Duster Plus spent $2 million in measured media, a 63% drop from 1985.

Johnson introduced two new Glade products during 1987. Glade Litterfresh, a powdered cat box deodorizer which is sprinkled onto cat litter, and Glade II, a continuous-acting air freshener. Glade received $3.9 million in measured media, up 18.8%. Glade Litterfresh, introduced mid-year, received $300,000 in measured media. The Glade franchise holds an estimated 18% share of the $276 million (manufacturers' level) air freshening category. In the $108 million (manufacturers' level) aerosol segment, Glade claims a 46% share, according to Betsy Donovan, Kline & Co. household products analyst.

Shout prewash laundry soil and stain remover, which has a 34% share of the $156 million (manufacturers' level) category, received $4.1 million in measured media spending, up 28%. It is second to Dow Chemical's Texize division's Spray 'n Wash. In early 1987, a refillable 12-ounce bottle with attached scrubber cap was introduced for the brand.

Johnson's two main floorcare products, Future liquid floor finish and Brite liquid floor finish received $7.9 million in measured media, up 43.6%. In the $160 million floor polishes and waxes category, Johnson continues holding a 51% share, with Future accounting for a 26% share.

In May 1986 Curel got its first agency of record, Lotas, Minard, Patton, McIver, New York, which also is working on new concepts for haircare products.

In November, Johnson consolidated its estimated $10 million magazine and Sunday newspaper magazine section media buying at Botway Media Services, New York. Losing some of the business were Foote, Cone & Belding, Chicago; Laurence, Charles, Free & Lawson, New York; Lotas Minard Patton McIver, New York; and J. Walter Thompson USA, Chicago. FCB remains the agency of record for all other network TV buying; JWT stays agency of record for newspaper free-standing inserts and daytime network TV.

In January 1987, Johnson moved its estimated $10 million Glade air freshener and Pledge furniture polish accounts to HDM/Dawson. Johns & Black from JWT, Chicago.

K mart Corp.'s strategy for 1986 called for concentration of growth in its profitable core businesses, which include the company's 2,200-plus K mart stores and its specialty retail group. Last year K mart accelerated the growth of its three major specialty businesses, opening a total of 195 new Waldenbooks, Pay Less Drug Stores and Builders Square outlets.

Under the leadership of Bernard Fauber, chairman of the No. 2 retailer in the U.S., and Joseph Antonini, who was named K mart president-chief operating officer in August 1986, K mart closed or sold off businesses that returned inadequate profits in 1986 and early 1987.

Last year K mart adopted a five-year plan calling for it to surpass No. 1 retailer Sears, Roebuck & Co., Chicago, in sales and market share by 1991. Corporate growth focuses on extensive upgrading of its stores, the addition of 150 new K mart stores in the U.S. and more than 800 specialty retail stores in the U.S. and Canada.

Sears' 1986 sales of $26 billion were only 7% above K mart's sales, and Mr. Fauber projected K mart sales of $26 billion this year. The company posted record earnings and sales in the first and second quarters of 1987 because of more effective merchandising and advertising programs, Mr. Fauber says. In the first quarter, K mart reported earnings of $115.5 million on sales of $5.59 billion, and, in the second quarter, earnings of $145.4 million on sales of $6.3 billion.

K mart's battle to overtake Sears is being led by its continuing $2 billion effort to upgrade its image by refurbishing stores and adding brand-name merchandise, plus a massive $1 billion retail automation system designed to improve customer service and satisfaction.

A main objective of the new system is to centrally merchandise all K mart stores to better detect trends and purchasing behavior in stores. The bulk of the money is being spent on replacing or updating all existing point-of-sale equipment in each store. As of mid-year, 499 K mart stores had slot scanner checkout systems that use the universal product code (UPC) to track inventory.

The system eventually will link all stores with a satellite communications network that can expedite credit authorization and transmit data and video signals from its corporate headquarters to all K mart stores.

In July 1986, K mart broke a new mainstream ad theme, "America's favorite store," on ABC's Fourth of July weekend rededication telecast for the Statue of Liberty. Backed by a $10 million campaign, the claim was based on a survey by Simmons Market Research Bureau that said more Americans shop at K mart each month than at any other store.

Mr. Antonini, prior to becoming president-chief operating officer, was executive VP-ceo of K mart's apparel division. He was credited with being largely responsible for implementing the changes to K mart's fashion presentation and signing actress Jaclyn Smith as ad spokeswoman for several lines of clothing bearing her name. Analysts viewed Mr. Antonini in his new role as a catalyst in the retailer's effort to upgrade its stores.

Following up on the success of the upgraded women's apparel lines, K mart introduced Campus Sportswear to more than half its K mart stores. The line of men's wear is aimed at upscale yet value conscious consumers. TV and newspaper supplement ads broke in October as part of the company's "K mart. Yes, K mart" campaign started earlier in the year. That campaign emphasizes K mart's upgraded fashion apparel, cosmetics and accessories.

Shortly after bringing Campus Sportswear to K mart, the company launched a new Jaclyn Smith holiday line. The Smith clothing collections, which were first introduced in the summer of 1985, have led to a 6%-7% increase in sales of high-profit apparel. The apparel division now accounts for almost one-third of K mart sales.

Calet, Hirsch & Spector, a New York subsidiary of K mart agency Ross Roy Inc., Detroit, developed advertising for the Jaclyn Smith holiday line after taking over creative for most K mart apparel advertising earlier in the year. Advertising of Smith clothing under CH&S de-emphasized Ms. Smith's roles as a model and actress and focused on her less glamorous roles as a wife and mother so that K mart shoppers could better identify with her.

In November, K mart closed down its unprofitable 79-unit Designer Depot operation, established in 1982. At the same time it sold its 168-unit Furr's Cafeterias and Bishop Buffets to Cavalcade Holdings, Lubbock, Texas, for $237.5 million, because the cafeteria operations weren't profitable enough.

This year K mart sold 75 Kresge and Jupiter variety stores in 21 states for an undisclosed sum to McCrory Corp., York, Pa. The sale indicated that K mart wouldn't sacrifice profitability to overtake Sears. The April 3 sale announcement came two weeks after F.W. Woolworth Co., New York, broke off negotiations to acquire several Kresge stores in the U.S.

K mart restructured its six merchandising divisions in late 1986 to provide a stronger marketing focus to hard-goods operations. The restructuring included renovating K mart stores and reallocating space to increase productivity. The new divisions are consumables, convenience products, do-it-yourself, automotive and sporting goods, home fashions and leisure and entertainment.

The company also began an aggressive expansion of its in-store consumer financial services in January 1987. Banking outlets now are carried in 44 California K mart stores. Tests in Chicago-area stores will grow to include 23 stores in 1987.

K mart introduced an exclusive line of Jordache clothing for bigger women in March 1987, representing the first joint venture between the New York-based apparel designer and K mart. A print campaign via CH&S touting the line ran in women's magazines.

K mart broke two corporate image TV spots celebrating its 25th anniversary year in March. Also this spring, K mart announced its sponsorship of ABC-TV and NBC-TV's respective telecasts of the 1988 Winter Olympics in Calgary, Alberta, and the 1988 Summer Olympics in Seoul, South Korea. At the end of August, the retailer was still negotiating with the Official Olympic Committee to sponsor Olympic teams.

In August 1987, K mart signed on Martha Stewart, syndicated columnist, author and nationally recognized expert on food and entertaining, as home entertaining and lifestyle spokesperson and consultant for K mart's home fashion division. The signing on of Ms. Stewart, who will develop and advise on new products for sale in K mart's Kitchen Korner, Bed and Bath and Furniture departments, is viewed as another K mart effort to upgrade its image with higher quality merchandise.

Ms. Stewart also will write Kitchen Kornerstones, brochures to be distributed in all K mart stores beginning in mid-October, that give tips on cooking, table decor, using kitchen products and home entertaining. She will appear in November-breaking TV commercials, plus print ads in early November issues of *People*, *Vogue* and *Family Circle*. CH&S handles.

Kellogg Co. the nation's No. 1 marketer of ready-to-eat cereals, dropped from 42.6% to 42% in sales share of the $5.2 billion market and slammed the brakes on ad spending increases. In pound volume, Kellogg increased its market share to 42.6% from 41.6% in 1985.

Analysts say Battle Creek, Mich.-based Kellogg reaps nearly 91% of its sales from the cereal market, a category that grew 9.4% in the last year, according to Tim Ramey, a food industry analyst with Kidder Peabody, New York. Measured ad spending crept up just 2.7% to $220.1 million in 1986.

June Page, food industry analyst for E.F. Hutton & Co., New York, pinned Kellogg's small ad spending increase on advertising blitzes for new General Mills and Quaker Oats cereals in 1986, particularly Quaker's Cap'n Crunch and Life cereals.

"Kellogg doesn't like to get involved in heavy promotions . . . Kellogg has a firm conviction that they don't want a short-term market share," says Ms. Page. Instead, Kellogg raises ad spending under less competitive market conditions, she says.

During 1986, No. 2 cereal marketer General Mills, Minneapolis, increased its sales share by 0.4 points to 24.1%. Mr. Ramey forecast "fantastic" years in 1987 for Kellogg and General Mills and reduced market shares for smaller cereal marketers, including Quaker.

To achieve greater coordination of its marketing, production and distribution investments in the U.S. and Canada, Kellogg in 1986 merged two operations—U.S. Food Products division and Kellogg Salada Canada—into Kellogg North America, with Horst W. Schroeder as president. The Canadian operation had been handled by Kellogg International. Christopher McNaughton, U.S. food products president and Kellogg senior VP, resigned after the reorganization eliminated his position. Arnold G. Langbo was named president of Kellogg International division, and Gary E. Costley was picked as president of the U.S. Subsidiaries division. Messrs. Schroeder, Langbo and Costley also serve as Kellogg exec VPs.

Early this year, Gerald D. Robinson retired as Kellogg Co. president-chief operating officer, and Vice Chairman Paul J. Kehoe retired. Mr. Robinson's position was not filled, concentrating power at the top with Robert L. Nichols, vice chairman, and Chairman-CEO William LaMothe.

Kellogg added three new cereals in 1986—Apple Cinnamon Squares, All-Bran Fruit & Almonds and Nutri-Grain Almond Raisin—and already has introduced four through August 1987. New this year are Nutrific, Nutri-Grain Nuggets, Strawberry Squares and Pro Grain.

Five of the seven cereals introduced since January 1986 are targeted at adults 35 and over, and Kellogg hasn't scrimped on their introductions. Combined, the five-variety Nutri-Grain line, Nutrific and Pro Grain rollouts total $69 million—more than one-third of Kellogg's measured cereal spending in 1986.

The company also discontinued 3CPO and Kellogg's OJ's, a dry cereal partly sweetened with orange juice, a product launched in March 1985.

Four of the nation's top 10 cereals are marketed by Kellogg. Kellogg's Corn Flakes remained the nation's No. 1 cereal in pound volume, with a 6.6% market share. Frosted Flakes is second with a 6% share, with Raisin Bran and Rice Krispies ranking fourth and sixth with respective volume shares of 4.5% and 3.6%, according to Furman Selz Mager Dietz & Birney, New York. Volume share for flagship Corn Flakes eased slightly from 1985's 6.7%; Frosted Flakes remained at 6%, and Raisin Bran and Rice Krispies fell 0.2 points from 1985 market shares.

Measured ad spending for Kellogg's four top-rated cereals increased by 8% to $66 million.

Nearly 99.1% of measured Kellogg ad spending in 1986 was for network, spot or network cable TV. But of the three, only network TV increased, up 6.2% from 1985. Spot TV spending dropped 4.4%, and cable fell 35%.

Measured ad support for Kellogg's 15-flavor line of Whitney's 100% Natural Yogurt increased 5.1% to $4.2 million in 1986, although Kellogg pulled Whitney's from the "saturated" California market to concentrate on eastern markets, where it fares better. Whitney's reportedly holds a 4% dollar share of the $955 million refrigerated yogurt market.

Kellogg continued its drive into the shrinking $313 million granola bar market with butterscotch, chocolate chip and peanut chocolate chip Rice Krispies Bars—additions to original Rice Krispies Bars introduced in 1985.

Three new products hit the shelves from Kellogg's Mrs. Smith's Frozen Foods Co. subsidiary. Eggo Nutri-Grain Raisin and Bran frozen waffles were introduced in 1986. This year, a pecan variety of Mrs. Smith's "Pie in Minutes" No. 1 line of frozen pies was introduced, as were microwave Eggo pancakes. Mrs. Smith's holds a 50%-plus share of the frozen pie market.

Salada Foods in 1986 introduced Salada Sweetened Tea, the first teabag to contain sweetener. Salada also rolled national with its Hansen Island Creamy Microwave Fudge with print ads via Leo Burnett USA, Chicago.

Foreign sales rose from 29.2% to 32.1% of Kellogg's total sales in 1986, with the share of non-U.S. Kellogg profits rising from 20.8% to 22.4%. Europe provided most of the international punch, with 1986 sales climbing 35% over 1985. European profits shot up 37%.

As sales and distribution swell, Kellogg has increasingly invested in plant expansion and modernization. The 1986 capital budget of $329 million was 33.7% greater than 1985. Estimated 1987 capital spending is $395 million—a 20% increase over 1986. Among major Kellogg projects is a $500 million upgrading of its Battle Creek plant to house "state-of-the-art" processing and packaging equipment and expansion space. General Mills also is evaluating plant sites to expand its cereal production capacity.

A year after the Dart divorce, Kraft is playing the acquisition field with a vengeance, showing up repeatedly as the successful suitor.

Since January 1986, Kraft Inc. has made 24 acquisitions, 18 of those in foodservice. The two biggest recent buys, Anderson, Clayton Foods, maker of Chiffon margarine and Seven Seas salad dressings, and All American Gourmet, which markets Budget Gourmet frozen entries, carried a combined price tag of $531 million. That brought Kraft's buying spree to a whopping $700 million in the first six months of 1987.

Kraft has backed up its buying with a renewed emphasis on its branded food products. When Dart & Kraft broke up late last year, the food unit and Duracell batteries stayed under the Kraft banner. The remaining holdings—Tupperware, Hobart, West Bend and Wilsonart laminate—were spun off to form Premark International, a publicly held corporation based in Northbrook, Ill. and headed by Warren Batts, former president-ceo of Dart & Kraft. Premark took with it $15.3 million in measured media spending, about 80% of that for Tupperware and the rest for West Bend.

Kraft also shuffled its agencies, reassigning $125 million in advertising accounts. The big winners in the switch were Leo Burnett Co., Chicago, which grabbed $43 million from J. Walter Thompson USA and another $7 million from DDB Needham Worldwide, and Foote, Cone & Belding, which doubled its Kraft billings to $70 million.

The biggest loser was JWT, which saw its Kraft billings drop almost $100 million. JWT, which retains $75 million in Kraft work, had been closely associated with Kraft for more than 60 years and had originated the advertising line, "America spells cheese K-R-A-F-T."

With the reassignment, however, Kraft cut way back on corporate spending and chose instead to seek "major client" status at each of its new agencies. Kraft execs say they moved away from JWT because they believed the agency worked on too many brands to give each individual product the attention it deserved. JWT kept Kraft Singles, Philadelphia Cream Cheese and Cheese Whiz, plus the $13 million foodservice account. Kraft's announced goal is to become the biggest foodservice distributor in the U.S.

The changes in agencies were accompanied by a new compensation formula. Kraft switched from a fee-only basis to a combination of fees and media commissions. The fees are used to compensate agencies working on new product introductions, while the commissions are used to give agencies an extra incentive to boost the product's share.

Kraft's advertising drew fire over the summer from the Federal Trade Commission, which charged the company with misrepresenting the calcium content of its Singles cheese line when ads implied that a Singles slice contained as much calcium as five ounces of milk, which it does not. The issue is awaiting a formal hearing.

Polar B'ar ice cream squares, pulled off the market in July of last year when potentially harmful bacteria were found in a product sampling, is being re-introduced in test markets in the East. A spokesman says Polar B'ars is keeping the old name but will be treated as a new line.

One of the company's flagship lines, its Pourable Dressings, got a packaging lift when Kraft began testing squeezable plastic containers. Anderson, Clayton's Seven Seas salad dressing joins a raft of Kraft products that dominate the industry category. Kraft spent $24.8 million in 1986 on Celestial Seasoning, Light Mayonnaise, Miracle Whip, Presto and Kraft Salad Dressing, which is 38% of total spending in the category as measured by BAR/LNA.

Beginning a national rollout is Source, a calcium-enriched spread containing 15% of the recommended daily allowance of the mineral per tablespoon.

Duracell, the one non-food chunk of Dart left with Kraft after the breakup, got a substantial increase in advertising dollars to defend its 45% share of the $2.5 billion battery market. Duracell lost a couple of points of market share during the fray from Ralston Purina's acquisition, Eveready Battery Co., and from Eastman Kodak's introduction of the new Supralife brand. Kraft backed the Duracell line with about $30 million, up 30%, notes BAR/LNA.

Breyer's brand yogurt doubled its market share in 1986, Kraft claimed, thanks to an aggressive relaunching of the product. The amount of fruit in the product was increased; the package was redesigned, and a major sales promotion and advertising campaign was used to underline the change. Spending on the yogurt

Know your Knorr

Knorr brand of dehydrated soups and bouillons, responsible for a quarter of CPC International's grocery product sales, now include 570 varieties of soup, and 100 kinds of bouillons to match local taste preferences—the result of adding three new soups a year in each country. On the local level that means Knorr sweetcorn soup in London, miso soup in Tokyo, and Knorr Ikan Bilis bouillon, an anchovy soup base, in Kuala Lumpur, and Knorr seven spice cube in Casablanca.

Note: Dollars are in thousands

increased 187% to $2.7 million, according to BAR/LNA.

The Breyers brand was expanded in August with the introduction of Breyer's jellies and jams. The products, billed as all-natural, retain the trademark black labels of the ice cream.

The ice cream received $6.4 million in measured advertising, about the same as in 1985.

Kraft pulled back on its plans to enter the produce section when it ended its test of Vegisnax, pre-cut carrots and celery developed to be crunchier than other snack vegetables.

The line was put on the market early in 1986 and was withdrawn during the summer.

The Velveeta line (cheese, slices, shells & cheese dinners) also got a boost with the introduction of Mexican Velveeta and a packaged dinner, Velveeta Shells and Cheese. Velveeta spending dropped 26% to $20.9 million.

Kraft dominated spending among cheese marketers. According to BAR/LNA, it spent $65.6 million on cheese, which accounts for a 59.4% share of the $110.5 million spent on cheese by advertisers in seven media.

Kraft quickly traded on the Tombstone brand name with the introduction of the Tombstone Double-Top pizza. Tombstone was backed with $3.7 million in measured spending.

Also in the freezer case were the new Frusen Gladje sorbets, introduced in September 1986, and Marble Classics, a premium line of swirl-style ice cream. The entire Frusen Gladje line received $5.3 million in measured spending, up 28% from a year previous.

The Philadelphia Brand Cream Cheese family got two new members with the introduction of Light Philadelphia Brand Cream Cheese and Philadelphia Brand cheesecake mix.

Kraft spent $13.8 million on the Philadelphia brand line in 1986, about the same as in 1985.

Kraft brought out two new packaged dinner lines, Makin' Cajun and Applause dinners. Makin' Cajun, which began testing in October 1986, includes three dinner kits to which consumers add the meat or shellfish. Applause dinners are formulated for use with chicken and come in four flavors.

Food store	16,300	15,300	6.5
Convenience	480	404	18.8
Other	370	290	27.6

Kroger sales from continuing operations (not including drug stores sales) increased 7% to $17.1 billion in 1986, despite fewer food stores and low inflation. Sales per average square foot at its food stores rose to $360 from $347 in 1985.

Earnings from continuing operations declined 13% to $138.1 million, even before taking into account $82.3 million in special charges related to its restructuring. In the first half of 1987, Kroger posted two strong quarters. Sales from continuing operations were up 3.6% to $8.10 billion, while earnings from the same increased 18.7% to $90.6 million.

Company officials credited aggressive merchandising and lower operating costs —partly as a result of its restructuring— for the strong results.

Kroger spent $200 million on advertising in 1986, including local advertising not included in the national expenditures accompanying this article. That was 10.5% more than the $181 million spent in 1985, a company spokesman says.

Large increases in spending on network TV, network cable, magazines and outdoor advertising are primarily a result of a corporate "meat excellence" image campaign intended to increase exposure to Kroger's meat products, says J. Richard Owens, VP-advertising.

Owens says regional network TV cost a little less than spot TV and increased market coverage by about 50%. Spending on TV and radio will increase as a percentage of total ad spending in 1987, but print will remain dominant, he says. The company would spend more on regional network TV if it were available, Owens says.

Meat merchandising continued to be a top priority at Kroger in 1987. Results have been healthy: meat sales were up 14% in 1985 and 6% in 1986, despite reduced consumption of meat nationwide. Through the first half of 1987, meat sales were growing at a 5% pace.

A significant development in meat merchandising has been the introduction of Excel brand-name meat products in selected markets, where they have garnered as much as 50% of Kroger meats sales. Kroger officials say brand-name meat will be in all 1,300 Kroger stores within a year.

Other elements of the meat campaign—built around Alex the butcher in Kroger ads—include reducing fat trim to one-quarter inch, instituting a double-money-back guarantee policy, and precooked items ready for the microwave. Kroger has also set up an 800 number for customer questions about meat and seafood. The service fielded 39,000 calls in 1986.

With restructuring completed a leaner Kroger Co. is now focusing on store development—with the emphasis on convenience. Some 98% of new Kroger grocery stores, including many which are replacing older outdated units, are state-of-the-art designed for one-stop shopping. They're targeted at working women, two-income families and a maturing population with more disposable income.

The convenience stores include full-service, expanded grocery departments; drug stores; video departments; greeting cards and floral shops. They range in size from 50,000 to 66,000 sq. ft. At year end, Kroger had 1,298 food stores and 735 convenience stores, compared to 1,367 and 643, respectively, a year earlier.

Kroger also is expanding its marketing of Kroger-produced, upscale brands—Texas Gold premium ice cream, Esprit yogurt, Vienna Creme ice cream bars, American Home Danish and Engli calcium-fortified milk—to compete with similar national brands.

In May, its Dillon subsidiary bought Mini Mart Inc., a 115-unit chain of convenience stores based in Casper, Wyo.

Price Savers Warehouse Inc., a wholesale membership warehouse chain based in Salt Lake City and acquired in 1985, is expanding to the East. In addition, Kroger formed a new subsidiary, Welcome Inc., and will open three super warehouse stores in the Southeast by the end of the year.

Kroger's 1986 restructuring included closing 100 unprofitable stores, selling off its 870-unit, SupeRx and Hook's store division, and trimming headquarters expenses by 25% through an early retirement program.

More indirectly, implementation of the restructuring precipitated the ouster of William G. Kagler, president since 1983 and a 22-year veteran of what is now the nation's largest grocery chain. He was replaced by Joseph A. Pichler, who had been president-ceo of Dillon Co. Inc., a Kroger subsidiary since 1983.

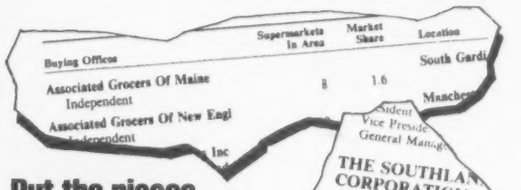
Loews Corp., now out of a losing position in the movie theater business, once again found new growth and big profits in its insurance and cigarette operations.

Lorillard, the company's cigarette unit, was its second biggest money-maker and accounted for the lion's share of its media spending in 1986. CNA Financial Corp., Loews' second most advertised division with a modest measured expenditure of $5.4 million—all in magazine advertising in 1986—was its most profitable.

Lorillard advertising stayed on even keel in 1986. In the seven media monitored by BAR/LNA, measured media expenditures for Lorillard cigarette products topped out at $58.3 million, about the same level as 1985.

Although industry-wide cigarette sales volume dropped 2.1% in 1986 from a year earlier, volume losses at Lorillard were smaller. Lorillard ended the year with record sales and profits, with net income up 28% over 1985. It was the division's 11th straight year of record profits, despite consumer health concerns, a declining cig-



Put the pieces together with Progressive Grocer's valuable library of directories

Marketing Guidebook profiles over 800 supermarket chains & wholesalers in 55 U.S. & Canadian markets. The "who's who" guide to the supermarket industry offers company level data, key personnel and buyers' name.

Market Scope provides a quantitative look at supermarket distribution. Displaying retail market shares for 2,500 buying offices, within syndicated market areas, it's the "what's what" guide to the supermarket industry.

Directory of Mass Merchandisers profiles nearly 850 discount / variety chains, drug stores, 5¢-10¢ stores, department stores & club-type stores, indicating store data, corporate plans, key personnel & buyers. A one-stop retail overview!

Directory of Convenience Stores profiles 1,200 convenience store companies in 53 U.S. market areas. Its comprehensive store data includes suppliers' names, stores selling gas, franchises, personnel & buyers!

Retail Tenant Directory offers 3,000 chain company profiles, which cover market penetration & expansion plans. It also lists key executives and their titles.

arette-smoking population, the high price of cigarettes and a depressed market.

Lorillard's sales performance was spurred by the impressive growth of the Newport brand, which posted a 3.8% market share, an increase of almost 10% over 1985. Lorillard's share of the total cigarette market remained at 8.1%, unchanged from a year earlier. Excluding generic and price/value brands, Lorillard's share of the market stood at 8.7%, up from 8.8% in 1985.

Newport remained Lorillard's leading brand in 1986, winding up the year as the eighth largest selling brand in the industry, with a 3.9% share, behind Marlboro, the perennial leader at 22.9%. Others in the top 10 brands were RJR Nabisco's Salem menthol at 7.8%, Brown & Williamson's Kool menthol at 6.4%, Philip Morris' Benson & Hedges at 4.4% and its Merit brand at 4%, RJR's Camel at 4.3% and its Vantage at 3.2% and American Brands' Pall Mall at 3.2%.

Loews spent more to advertise Newport —$33.7 million for the brand line, up 5.6% from 1985—than on any of its other brands or non-cigarette products. Newport menthols had the support of $23.1 million in measured spending, more than half of that in outdoor advertising, according to BAR/LNA.

First half market share reports for 1987 found Newport extending its gains, moving ahead of Benson & Hedges and into sixth position, with a 4.2% share. At the same time, Lorillard went into two test markets with Newport Stripes, a new entry with a white filter tip (other Newport brands are cork-tipped) designed to appeal to women. The test products are being offered in 100mm lengths and in slim and regular. Yet another Lorillard product tested this summer is a cigarette named Harley-Davidson, a king-size regular offered in a black package with a golden eagle logo.

Measured media spending for Lorillard's True cigarette line in 1986 rose slightly to $13.9 million, most of it devoted to the new True Gold brands introduced a year earlier. Magazines and newspaper supplements accounted for the major media expenditures, while use of outdoor amounted to about $2 million, a bit less than in 1985.

First half 1987 also saw the introduction of new packaging for Lorillard's True cigarette brand. Instead of the familiar white packaging with blue (non-menthol) and green (menthol) circles, Trues are now sporting a more contemporary silver packaging, retaining the blue and green circles motif to denote non-menthol and menthol versions. The new packaging reportedly rates high in consumer acceptance.

Measured media expenditures for Kent, Lorillard's one-time flagship cigarette line, dropped to $10.6 million, down 28.4% from 1985. Most of the 1986 outlay for Kent came in the third and fourth quarters, a marketing and promotional effort that helped reduce the brand's declining sales. At year end, Kent brands represented one-third of Lorillard's total cigarette sales and were the 12th largest seller in the industry.

Media spending on behalf of Lorillard's Beech-Nut chewing tobacco was measured at $2 million, of which $1.3 million went to spot TV, the company's only and probably final use of broadcast to promote its tobacco products. Expenditures remained virtually unchanged from year-earlier figures, and Lorillard loose-leaf chewing tobacco products maintained market share in 1986.

The year saw enactment by Congress of the Comprehensive Smokeless Tobacco Health Education Act, which eliminated all broadcast advertising for smokeless products. It also requires warning notices be placed on all packaging, print advertising and point-of-sale materials beginning in 1987.

Loews' financial arm, CNA Financial Corp., which made up 37% of Loews' revenue and 41% of its net income in 1986, reported record sales and earnings for the year. Net operating income was up 45% over 1985, net income up 32% and revenues up 39%. While most insurance lines showed gains, commercial property and casualty reported the largest increases, up 45% in profit. Life insurance sales also showed a healthy gain, with net income at $51.3 million, up 15.6% from 1985.

The company's Bulova watch and clock operations, restructured and moved into new facilities, posted a third straight profitable year. Bulova's timepiece advertising, which accounted for about $1.8 million in measured media in 1986, also took a new direction. Set to the theme of "Bulova, it's America's Time," ads and promos for watches and clocks depicted special moments in a person's lifetime and linked them with Bulova. Increased exposure through national publications and spot TV marked the 1986 ad effort.

Loews Hotels division marked an eventful year highlighted by the appointment of Preston R. Tisch, former president of Loews Hotels, as Postmaster General of the United States. The division's net income of $11.1 million remained virtually unchanged from 1985, despite a 10% increase in revenues to $175 million. Another high point of 1986 was the formation of the Grande Collection of Hotels, a marketing and reservation company representing international luxury properties, including Campton Place, San Francisco; the Regency, New York, and Westwood Marquis, Los Angeles.

Loews gained $11.1 million in income from its 24.91% holdings in CBS Inc. Laurence A. Tisch, Loews' chairman-ceo, who spearheaded the purchase of CBS stock in 1985, wielded his power in engineering the replacement at CBS of CEO Thomas H. Wyman. Mr. Tisch claimed the position for himself.

When you're on top, don't look down ...

Look even higher, to a new plateau and a new level of success to achieve.

So it goes in Tampa Bay, Florida's best market, where St. Petersburg, Tampa and Clearwater create a metro area that leads the state in population, households and income.

Every day, nearly 2-million area residents look ahead to growth that promises even greater prosperity. Growth that has spawned more than 807,200 households and sent our skylines upward. Growth that has added up to over $23-billion in effective buying income and driven retail sales sky-high.

And where else but in Florida's best market would you expect to find Florida's best newspaper — the *St. Petersburg Times*.

More advertisers turn to the ADI's top newspaper because it delivers 693,100 daily adult readers and 775,800 adults on Sunday.

So, if you do business in Florida's best market, do business with the *Times* and head straight to the top. Because, from our perspective, that's the best place to be.

Sources: Market statistics from Sales & Marketing Management's 1987 Survey of Buying Power. Readership is from the 1987 Scarborough Report.

To reserve your space at the top, call General Advertising, 813/893-8249. And, ask for your copy of *Suncoast*, a new report detailing growth in Florida's best market.

Mars Inc.

McLean, Va.

($ in millions)

Worldwide	1986	1985	% chg
Sales	N/A	N/A	N/A
U.S. advertising	313	276	13.4

Mars Inc. is overhauling its product lines in all divisions, launching new brands and discontinuing tests of items that haven't captured consumers' fancies, such as gourmet cat food and filled potato chips.

Advertising for all brands in 1986 increased only 13% to $312 million, following 1985's dramatic hike in ad spending of nearly 27%. But Mars continues to be a healthy ad spender, retaining its market lead in candy and rice products.

Its largest division, M&M/Mars, is preparing the introduction of a new bar, P.B. Max, a peanut butter cookie-candy bar, which would be aimed at Hershey's Reese's Peanut Butter Cups, according to sources. P.B. Max is slated for test later this year or in early 1988. Leo Burnett, Chicago, has the assignment.

M&M/Mars, with 37% of the candy market, still retains a slim 1% lead over arch-rival Hershey Foods' 36% share. Hershey in recent years has been more aggressive in launching new candy bars, but Mars appears to be more active in product development.

Mars' latest national introduction, Kudos, is a hit. Barely a year since its launch, chocolate-covered Kudos has snared a 20% share of the $387 million crowded granola bar category. Kudos, which comes in chocolate chip, nutty fudge and peanut butter flavors, has been available nationally since February.

Analysts credit Mars with recognizing that consumers see granola bars more as a confection than as a health-food snack. Kudos is sweeter and more like candy than products of many competitors. Mars also aggressively marketed and advertised Kudos, backing it with $4.5 million in measured spending in the limited market rollout in 1986.

In May, however, M&M/Mars dropped a longtime test of Royals, its M&M-like confection aimed at adults. Mars says next year it will try another product targeting older consumers. "We still believe in the upscale market," says Whitney Hill, M&M/Mars trade relations director. "Royals were probably too close to M&Ms." Royals were available for several years in Washington, Baltimore and Atlanta markets.

In July, M&M/Mars announced a reformulation of the U.S. version of the Milky Way bar to make it less sweet. More like its European version, Milky Way will contain 20% more chocolate and be enclosed in a jazzier wrapper. In September, Backer Spielvogel Bates Worldwide launched an $8 million campaign to tout the virtues of the new bar.

The candy division in June hired its first Hispanic agency, Mendoza, Dillon & Asociados, Newport Beach, Calif., to handle Snickers and M&Ms.

Mars' snack foods lines have not racked up the successes of its candy products. This year the company stopped shipments of Dooley's filled snacks and potato chips, which had been sold for several years in the Midwest. Cornquistos are still available only in the Southwest. The most popular Mars snack, Combos, has expanded to about 80% of the country, up from 60% last year. A new variety, peanut butter Combo crackers, was introduced this summer. Combos' traditional flavors were cheese-filled pretzel and cheese cracker varieties.

M&M/Mars candy measured media spending rose 13.5% in 1986 to $172.9 million. Snack food advertising fell 5% to $5.4 million, according to BAR/LNA. BAR/LNA, which measures spending in seven media, monitored spending for various candy and snack brands: 3 Musketeers, $3.6 million, down 44%; Kudos, $4.5 million (introduction); M&M Candies, $26.8 million, up 6.8%; Mars Bar, $5.9 million, up 11%; Milky Way, $9.2 million, up 31%; Royals Mint Chocolates, $1.2 million, up 200%; Skittles, $7.2 million, up 33%; Snickers, $27.5 million, up 7%; Starburst, $5.8 million, up 4%; Twix, $9.8 million, down 19%; Combos, $3.9 million, up 8%; Cornquistos, $600,000, down 54%; Dooley Filled Snacks, $700,000, up from $11,400; and Dooley Potato Chips, $200,000, down 71%.

Mars' Uncle Ben's division threw 71% more into its ad budget in 1986, spending $27.4 million, according to BAR/LNA. Country Inn Rice mixes now come in 11 flavors, with the addition of four new varieties this year.

And Uncle Ben's has entered the fast expanding ethnic-seasonings mixes market, with the national launch this summer of Susie Wan, four flavors of dry packaged dinner mixes. Consumers may add chicken or beef to such flavorings as sweet and sour, teriyaki or oriental. Another product, Susie Wan fried rice mix, is also new this year. Backer Spielvogel Bates Worldwide handles Susie Wan.

Uncle Ben's Country Inn Rice was backed by $13.2 million in advertising in 1986, up from $1.4 million. Spending for Uncle Ben's Rice fell 12% to $12.9 million. The division spent $1.2 million, down 14% for Uncle Ben's Side Dishes.

Mars' Kal Kan pet food division hiked spending by merely 0.8%. It discontinued Kal Kan Pet & Glamour Kitty Food, a gourmet cat food introduced in March 1986 in savory white fish, tender veal and chicken liver dinner flavors, and it axed Petcraft Dog Treats, also tested in 1986. The only addition to the lineup this year is Feathers, a wild birdseed in test in New England. No agency is assigned.

Market share for the Kal Kan division grew to 9.3% in 1986 from 8.4% of the pet food category in 1985, according to John Maxwell, analyst for Furman Selz Mager Dietz & Birney, New York. He estimated its sales rose to $522.9 million, from $453.3 million in 1985.

Kal Kan Cat Food continued to hold second place in the category, with 1986 sales estimated by Mr. Maxwell at $226 million. Crave dry cat food moved back into fourth place with sales of $66.5 million, while Heinz' 9-Lives fell from fourth to fifth place. Kal Kan canned dog food continues to hold the No. 2 slot in the category, with $155 million in 1986 sales, behind market leader Alpo ($230 million).

Mealtime dry dog food continues to slip in its market share. It dropped yet another notch in 1986, to seventh place, as sales fell slightly to $66 million, says Mr. Maxwell. He estimates 1986 sales of $7.4 million for Kal Kan Marrow Bones dog treats, making it ninth in the dog treat category.

Measured spending for Kal Kan division products includes: Crave Cat Food, $10.9 million, up 38%; Kal Kan Canned Cat Food, $8.2 million, down 2%; Kal Kan Canned Dog Food, $9.7 million, up 3%; Kal Kan Pet & Glamour Kitty Food, $20,000 (new); Mealtime Dry Dog Food, $4.8 million, down 44%; Petcraft Dog Treats, $900,000, up 125%; Petcraft Marrowbone Dog Biscuits, $400,000, up from $14,800.

In August 1986 Mars purchased DoveBar International, Chicago, maker of expensive, hand-dipped chocolate and ice cream bars. Dove is operating as a separate Mars division, but this July the company moved its estimated $4 million account for the main DoveBar product to a Mars agency, Leo Burnett USA, Chicago, from Zechman & Associates, Chicago. Dove's other two products, Forever Yours and Rondos, continue to be handled by Tatham-Laird & Kudner, Chicago.

This year Dove renamed Dove Delight, its ice cream dessert, dubbing it Forever Yours, the name of a discontinued Mars candy bar. And Rondos, bite-size chocolate-covered ice cream confections, were introduced this year. Measured spending for Dove in 1986 was $1.6 million.

Several days following the October 1986 acquisition of Associated Dry Goods by May Department Store Co., Joseph Brooks, the chairman-ceo of Associated's Lord & Taylor division retired, signaling the first of several changes to occur at the upscale, New York-based retail chain.

The acquisition diminished Mr. Brooks' hope of becoming ceo of Associated, a job he was being groomed to assume from Joseph Johnson. Mr. Johnson, unhappy over the acquisition, retired from his post one week before Mr. Brooks, but he remains on May's board of directors.

Marshall Hillsberg has replaced Mr. Brooks as chairman-ceo at Lord & Taylor, May's largest department store division, which in 1986 recorded sales of $825 million, up 17.5% over 1985. Mr. Hillsberg held the same title at May's G. Fox & Co., Hartford, Conn., where he was promised a significant promotion once the acquisition was final.

James Guinan, chairman-ceo, Norwalk, Conn.-based Caldor discount store unit, also resigned last October. He was replaced by Don Clarke, who had been chairman of May's Venture unit.

The acquisition, which added 440 stores to May's 145, gives May Co. a stronger presence in the Northeast, where Lord & Taylor operates most of its stores. Also included in the deal were Caldor discount stores, J.W. Robinson retailers and Loehmann's offprice clothing stores.

As a result of the acquisition, May had record sales of $10.4 billion in 1986, up 9.5% from 1985, while its measured advertising budget leaped from $24 million to $39.4 million.

May divides its stores into three divisions: department stores, discount stores and specialty stores. In 1986, total May department store sales increased 6.1% to $6.5 billion—a 4.5% increase on a store-for-store basis.

A record 12 department stores, comprising approximately 1.7 million sq. ft. of retail space, opened in 1986, marking the most department stores ever opened by May during a single year. The company also closed 13 department stores, only two of which were replaced by new May-owned stores.

Additionally, May agreed to sell its Pittsburgh-based Joseph Horne Co. department stores in a leveraged buyout led by Robert O'Connell, Horne's president-ceo. May had earlier promised to sell Horne in return for an agreement by the city of Pittsburgh, Allegheny County and the state of Pennsylvania to drop their lawsuit seeking to prohibit May from acquiring Associated Dry Goods. The suit was filed in July 1986 charging that the acquisition would be anti-competitive by giving May control of virtually all of the department stores in Pittsburgh and Allegheny County. At the time of the spinoff, Horne operated 15 stores. The chain's 1985 sales were $209 million.

Caldor and Venture are May's two discount store chains, responsible for 1986 sales of $2.5 billion.

Caldor's sales were $1.4 billion in 1986, a 5.4% increase over 1985. The chain grew 1.1% on a store-for-store basis. Because May management was disappointed in Caldor's performance in 1986, the company took steps to realign its inventory position through liquidation sales aimed at improving inventory currency. Caldor also reduced significantly the number of stock-keeping units carried.

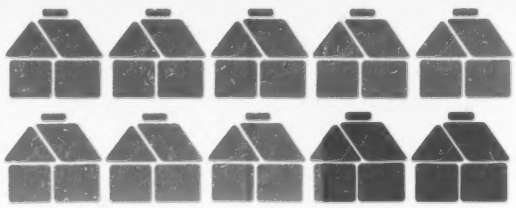
Venture sales were $1.1 billion in 1986, an increase of 12.5% over 1985. The chain grew 8.8% on a store-for-store basis. Three more stores were recently added to Venture's largest market area, Chicago, with a fourth store introduced in Manchester, Mo. At year-end, Venture operated 65 stores in seven midwestern states. The company continues to support the chain with the ad theme, "Save at Venture, save with style."

May's two specialty retail operations, Volume Shoe Corp. and Loehmann's offprice women's clothing stores, contributed $1.3 billion to the company's total revenues.

Volume, May's fastest-growing unit, operates under the name Payless ShoeSource in many states. The stores had 1986 sales of $934 million, an increase of 34.1% over 1985 and 14.3% on a store-for-store basis. This tremendous growth was attributed to the opening of 343 new Payless ShoeSource outlets, including the 129 acquired from SCOA Industries in early 1986. There are 2,210 Volume Shoe stores in 40 states and Washington, D.C., with plans to open 235 new outlets by the end of 1988.

Payless is supported with a TV and radio campaign themed "You could pay more, but why," via Foote, Cone &

ON THE GO BUFFALO



It's a city to know, a city that's growing.
Buffalo — the 2nd largest market in New York State--has an EBI of $13.6 billion. The Buffalo News is the paper that serves this active, revitalized market. And it does it well! We reach 81% of the households in our PMA daily — no other daily paper comes close.

Mazda Motors Corp.

RANK **54**

Hiroshima, Japan

($ in millions)

Worldwide	1986	1985	% chg
Sales	10,100	9,748	3.6
Net income	50	193	(74.1)
U.S. advertising	157	119	32.2

Mazda Motors of America Inc. found its limited offerings, the declining dollar and U.S. import restrictions a severe drain on profits in 1986-87. Ad spending only matched prior year levels, although that is likely to change as Mazda's U.S. output increases and it introduces its four-wheel-steering models this year.

Although worldwide sales showed a 3.4% increase over year-earlier figures, profits took a precipitous 74% drop, mainly because of the rise in value of the yen against the dollar. This particularly affects its top export market, the U.S., where its sales have been limited by voluntary import restraints and its margins are thinning as the differential between the price Mazda gets for its cars in the U.S. comes closer to the cost of producing them in Japan.

Sales and earnings of the parent company, Mazda Motor Corp., Hiroshima, Japan, which appear in the accompanying box for fiscal years ending Oct. 31, were converted from yen to dollars at a rate of Y161=$1.

Mazda will get relief from its reliance on exports and dollar dependency this fall when its cars start rolling out of the newly built $450 million plant at Flat Rock, Mich. The two cars that will be produced at the plant will be marketed separately by Mazda and Ford. Ford owns 25% of Mazda. The models include a front-wheel-drive Mazda 626 and a front-wheel-drive compact car for Ford, names Probe, that originally was planned as the replacement for the Mustang.

Mazda's long-awaited four-wheel-steering system was introduced in September 1987 in the 626GT. It is likely that 4WS will be offered on the 626 model produced at Flat Rock this fall. Mazda and Honda are in a dead-heat to see who can beat the other in offering the 4WS option stateside.

Mazda's worldwide factory sales were up 6.4%, to 1,405,170 units, a figure boosted by a 4.5% sales increase to 357,223 units domestically in Japan. Total exports increased 7.1%, to 1,047,947 units. Consumer acceptance of the redesigned Mazda 323 and RX-7 models helped maintain a strong flow of vehicles to North America during fiscal 1986. Shipments were up 19.2% to 430,889 units.

In the U.S., sales of imported Mazdas totaled 379,843 units—222,716 cars, up 5.2% from a year earlier, and 157,127 trucks, up 26.5% over 1985. Unit car sales gave Mazda a 6.8% share of the import car market, down from 7.4% in 1985.

Mazda auto sales represented 2.0% of the total U.S. market, behind Honda at 6%, Toyota's 5.7% and Nissan with a 4.8% share. The popular 626 models, priced from $10,000-$14,000, accounted for 92,411 unit sales, followed by the 323 models (priced at $6,009-$8,899) at 74,062 units and the top-of-the-line, high-performance RX-7s (priced at $14,199-$20,399) at 56,203 units.

High demand for the Mazda B2000 pickup trucks produced sales of 157,127 units, up 26.5% over 1985, giving Mazda a 16.7% share of the light truck import market and a 3.3% share of the total U.S. market. Mazda ranks third in light truck sales among imports, behind Toyota with a 41% import share (8.3% U.S.) and Nissan with a 23.8% import share (4.8% of the U.S. market.)

Mazda in the U.S. is a combination of Mazda Motors of America (Central), Rancho Dominguez, Calif., and Mazda Motors of America (East), Jacksonville, Fla. The California company is a joint venture of Mazda Motors Corp. (known as Toyo Kogyo Co. Ltd. until 1984) and Su-

mitomo Corp. and handles car and truck imports to the Great Lakes, Gulf regions and western U.S. The Florida operation is a subsidiary of C. Itoh Co. and handles imports to an 18-state region in the East and Southeast.

With only one major change for 1987—a new wagon in the 323 subcompact series—the company's ad strategy for the 1987 models closely resembled that of previous years. Measured media spending totaled $72.1 million, some 68% in network and spot TV and 30% in enthusiast and newsweekly magazines. TV and print ads continued to keep the price/value theme of previous model years and stressed "total performance" of the full Mazda line.

Actor James Garner continued as company spokesman for the 1987 models. A new series of ads play on his serious, no-nonsense, dry approach.

Media buying, largely on TV, is geared for weekend sporting events and magazine-format programs (such as "60 Minutes"). Mazda sponsored NFL football, NCAA basketball, women's and senior professional golfing and was the sole auto sponsor of the post-season Mazda Gator Bowl. It continued for a seventh straight year the "Mazda Sportslook" series of sports journalism cable programs on ESPN.

Mazda strengthened its small truck lineup with the mid-year introduction of its first four-wheel-drive model. The company also unveiled the B2200, a new two-wheel-drive pickup with a 2.2 liter four-cylinder engine.

The company continued its strategy of marketing its compact pickup trucks the same way it sells cars: zero in on wealthy, urban consumers. Mazda spent $24.7 million in measured media on trucks. The B2000 line of light trucks took the lion's share of the 1986 ad budget, $15.5 million of the measured spending in network TV and $6.7 million in magazines. The pickups were positioned as maneuverable, fun to drive and loaded with creature comforts.

Mazda pickup truck sales reached record highs in calendar '86 with the help of special value packages. One such package, attached to the SE-5 model and called the "SE-5 plus Five," offered $500 worth of extra features and equipment at no extra charge for a limited time. Later in the 1987 model year, the package was modified to become the "SE-5 plus Seven," offering $700 worth of extra freebies.

In late July, as sales of the '87s lagged and time for the 1988 model introductions grew near, Mazda also offered a special value package to spark sales of its 626 and 323 models. Full-page newspaper ads proclaimed "$900 in options free or $900 cash back on all Mazda 626's." On 323 models, the offer was $500 in options or a cash rebate.

Mazda continued its involvement in auto racing with its RX-7 high-performance rotary engine sports passenger car. Measured media spending behind the RX-7 in 1986 was $16.2 million, unchanged from the previous year. The car was named 1986 Import Car of the Year by *Motor Trend* magazine.

The news of MCA Inc.'s 1986 record revenues was almost overshadowed in July 1987 when the three-week hospitalization of 74-year-old Chairman-CEO Lew Wasserman fueled rumors that the company might be vulnerable to a takeover bid.

MCA stock traded heavily, and the board took measures to thwart a hostile takeover attempt. As of early August, however, Mr. Wasserman—who owns 6.9% of MCA shares and exerts control over another 8.4%—was back at work. Although there is continued speculation about eventual restructuring, MCA was back to making news through its movies, television shows and other products.

MCA reported the highest revenues in the company's history in 1986. Among the strongest moneymakers were a 50% interest in a Toronto-based theater chain, Cineplex Odeon Corp., acquired in May; record-high revenues from the Universal Studios Tour; and a full year's income from the toy products division, acquired in mid-1985. Nevertheless, a disappointing year for MCA's theatrical films and, especially, a shaky television syndication market resulted in lower operating profits than in 1985. Total measured advertising was held constant with 1985 levels.

Filmed Entertainment accounted for 53.7% of the company's total sales, down from 55.7% the previous year. However, the division's operating income dropped precipitously in the two-year period, from 67% of the total in 1985 to 42% in 1986.

Among Universal Pictures' 1986 releases, only "An American Tail" was a strong performer; a November release, it earned $22 million in rentals to domestic theaters by the end of the year. Notable disappointments were "Howard the Duck," which earned $9.8 million in rentals; "Psycho III," at $6.1 million, and "Legal Eagles," at $26.5 million. In comparison, the top earner, Paramount's "Top Gun," pulled in $82 million in rentals last year. The failure of "Howard the Duck," in particular, is thought to have spurred the resignation last September of Frank Price, who headed the motion picture group. He was replaced by Thomas Pollock.

Universal had a 9% share of the 1986 movie market, putting it behind Paramount (22%), Warner Bros. (12%) and Disney (10%).

A better year is shaping up for 1987, with strong showings so far for "The Secret of My Success," "Dragnet," and "Jaws: The Revenge."

Universal Pictures released 12 films last year, compared to 14 in 1985, and spent less on advertising—$38 million measured spending, down 9.5% from 1985. Ad spending patterns were similar both years. In 1986, new releases received from $2.5 million to $5 million in measured advertising.

Of the television spending, network got 83%, cable 9% and spot 8%.

Problems in the TV syndication market, particularly the bankruptcy filing of Grant Broadcasting, forced MCA Television to increase amortization costs for some series and increase its bad debt reserve, resulting in an approximate $50 million charge against 1986 operating income.

Syndication woes have caused MCA to shift toward producing less costly half-hour, rather than hour-long, programs.

The good news for the company was that "Magnum, P.I." went into syndication last fall; "The A-Team" and "Simon & Simon" will become available in 1987. Last year syndication licensing agreements were signed for "Kate and Allie," an additional season of both "Magnum, P.I." and "Gimme A Break," and additional licensing of the "Universal Pictures Debut Network II" package of theatrical films.

These syndication agreements are expected to produce more than $350 million in future revenues. MCA also signed an agreement last year with Arthur Co. to make its tightly budgeted comedies for the company.

Ad spending by MCA Home Video skyrocketed last year. Measured spending totaled $3.3 million, up from $273,000 in 1985.

In 1986, MCA Home Video offered nearly 100 first-time releases, including "Back to the Future," "Out of Africa," "Mask," "Weird Science," "The Money Pit," "Legend," "Sweet Liberty," "Brazil" and "Marnie." Home video and pay TV brought in $250 million in revenues in 1986, up 4.8%.

MCA's 50% investment in Cineplex Odeon in March 1986 resulted in what the company called substantial earnings. This year an 18-screen Cineplex Odeon complex opened in Los Angeles. The two companies have announced a joint venture to develop a Universal Studios Tour in Orlando, Fla., scheduled to open in 1989. The tour in Universal City produced a record $85 million in revenues last year, 31% higher than in 1985.

The music entertainment division expanded last year with MCA's purchase of Facility Merchandising Inc., Front Line Management and Full Moon Records. In the fourth quarter it entered the radio syndication market by forming MCA Radio Network and acquiring Barnett-Robbins Enterprises, syndicator of six weekly radio programs.

MCA Records continued last year's strong showing as albums by Patti LaBelle, New Edition and Ready for the World attained platinum status (over 1 million sold).

Boston received a triple platinum. The 1985 soundtrack album from MCA TV's program "Miami Vice" received a quadruple platinum (more than 4 million in sales).

The retail and mail order division, which includes Spencer Gifts, Intrigue jewelry stores and A2Z-The Best of Everything shops, rebounded from disappointing years in 1984 and 1985 and showed $15.5 million in operating income, up 10.7% over 1985.

The toy products division, created when MCA acquired LJN Toys in mid-1985, benefited from the continued success of "The World Wrestling Federation" and "Thundercats" products, introduced in 1985, the new "Photon" interactive game line and "Entertech" motorized waterguns. Measured ad spending for the division's first full year reached $10.5 million.

In 1986 LJN bought Grand Toys Ltd., a Canadian toy marketer, making it one of the dozen largest U.S. toy companies in revenue. MCA's toy interests also include a 9% interest in Coleco Industries Inc., acquired early this year to settle a dispute between the two companies over rights to the "King Kong" name.

Revenues in the book publishing division (Putnam Publishing Group) totaled $132 million, down 4.6% from 1985.

The purchase of WOR-TV in Secaucus, N.J., which was in litigation at the end of 1986, has now been completed. In anticipation of owning the station, MCA formed a broadcasting group last year.

The Age of Video Public Relations Has Arrived

And Medialink's Video News Release Network Delivers It.

Public Relations has entered the video era. And the message is clear: don't just tell the press about your new product or corporate news, show the nation with a video news release.

Now you can send your video news release or "electronic press kit" to television news departments nationwide – quickly and professionally – through the Medialink Video News Release Network.

- *We're the established national experts on distribution of video news releases.*
- *Our national news wire service alerts the right news producers to your release.*
- *Our twin satellite transmission provides you with the best possible exposure.*
- *Our exclusive Nielsen verification system delivers the most complete monitoring of television station usage available.*

This is why America's top corporations, public relations firms and video production houses rely on Medialink to transmit their important announcements, news or features to television newsrooms nationwide. We know the ins and outs of this business like no one else.

For more information or a copy of Medialink's Nielsen survey detailing the do's and don'ts of video news release production, call us.

McDonald's Corp.'s history is proof that success breeds success. As its number of stores has steadily grown, its marketing budget has increased, giving it unprecedented clout with media and promotional companies. That budget in turn continues to fuel additional growth.

McDonald's claimed the title as the world's largest foodservice operation years ago, and no competitor has come close to wresting that title from it. Total U.S. sales (from company *and* franchised stores) grew 7.8% to $9.53 billion in 1986. Meanwhile, the industry was growing barely 2% to approximately $46 billion. McDonald's captured a 20.7% share. Figures in the accompanying box represent only company-owned units.

McDonald's boasts the highest per-store sales of any chain. Restaurants open for at least one year took in an average of $1.369 million in 1986, up 5.6% from $1.296 in 1985.

In 1986, the global McDonald's system (comprising company- and franchisee-owned stores as well as joint-venture or "affiliate" stores) spent $789 million on advertising worldwide, a 15% increase over 1985. An estimated $592 million, or 75%, of that budget was spent in U.S.

That U.S. spending estimate is 7.6% above the $550 million estimated spending for 1985, lower than the global percentage increase because of an acceleration in marketing expenditures in foreign markets.

The 1986 global marketing budget of $789 million represents 6.3% of systemwide sales, compared with the 6.2% of systemwide sales allocated to marketing during the previous year and the 6% allocated in 1984.

Increasingly, McDonald's media plan has become dominated by its TV presence. In fact, in 1986, McDonald's increased its spending on network and spot TV and cable TV while decreasing its spending on all other measured media (print, spot radio and outdoor).

The only category in which McDonald's spending is increasing faster than in TV is unmeasured marketing, especially sales promotion. The McDonald's system has moved from being an occasional in-store promoter to a nearly constant one. Food items or special premiums now are offered nearly every week, backed by point-of-sale, direct mail or other promotional marketing programs.

Its promotional programs are becoming more grandiose and are receiving more extensive media-advertising backing. In September 1986, McDonald's launched the first fast-food promotion tied to the National Football League, a scratch-card game backed by an estimated $10 million in TV support. In 1987, McDonald's was back with a game linked to the board game Monopoly. Prizes were valued at $40 million, including a grand prize of $1 million.

McDonald's continues to be one of the 10 largest TV advertisers in the U.S. and the largest by far of any restaurant company. The $193 million it spent on network TV in 1986 represented nearly 44% of the $439.4 million spent on TV by all U.S. restaurant companies. It exceeded the combined network TV budgets of the next four chains (Burger King, Kentucky Fried Chicken, Wendy's and Red Lobster).

McDonald's spot TV expenditures of $128.2 million represent "only" 17% of the industry's total spot spending, but still exceed the budgets of Burger King and KFC combined.

The national creative funded by that TV budget is a mixture of "image" advertising (McDonald's motto of "Food, fun and folks") and product/price promotion. The company skillfully alternates between the warm approach of a dad taking his daughter to McDonald's and the hard sell offer of larger fries or free soft drinks with purchase of, say, a Big Mac.

Two commercials stood out in 1987. One, titled "New kid," aired first during the 1987 Super Bowl. It spotlighted an elderly man's first day as a McDonald's counter worker. In addition to being a likable, sentimental commercial, "New kid" also functioned as a gentle recruitment ad.

McDonald's set a precedent for the company in late August when it aired nationally a commercial called "Mac Tonight." The spot, which features a moon-faced character playing a piano atop a giant Big Mac and which targets dinner business, was created by Davis, Johnson, Mogul & Colombatto, Los Angeles, agency for the McDonald's Operators Assn. of Southern California. McDonald's has in the past run nationally local-market creative for promotional efforts such as children's meal premiums. But "Mac Tonight" is believed to be the first mainstream commercial to air nationally that was not created by national agency Leo Burnett USA, Chicago, in the six years Burnett has had the account.

The next step could be the use in the U.S. of a foreign commercial as McDonald's becomes a truly global marketer. In 1986, McDonald's opened its first stores in Argentina, Cuba (on the U.S. Naval base there) and Turkey, bringing to 45 the number of countries in which it is represented. The highest-volume store in the McDonald's empire last year was a Rome outlet that took in nearly $5 million in sales during only 9 months in operation.

McDonald's next targets are the Eastern Bloc countries. By the end of 1987, the company is expected to reach agreement to open its first stores in Yugoslavia, and it continues to negotiate a possible breakthrough in the Soviet Union.

McDonald's already is an international sponsor of amateur competition in gymnastics and swimming and is seeking similar arrangements in other sports, such as soccer.

The chain continues to consider refinements in its menu. In August 1986 it introduced for a limited time a Shanghai Chicken McNuggets variation on its chicken finger foods, followed in fall 1987 with a Mexican variation called Fiesta McNuggets. In test is a chicken version of the McD.L.T. sandwich introduced in 1985, and the company is looking at different formulations of a McPizza product.

The most important new menu item has been packaged salads. Tested regionally for several years, the salads were rolled nationally in May 1987. The salad rollout was part of McDonald's intensified focus on nutrition, a stance that has won it both applause and criticism.

The applause came in the form of quick consumer acceptance of the salads. The criticism was directed to a $12 million-$15 million print campaign launched in January 1987. The print ads, appearing throughout the year in a variety of consumer and medical-trade magazines, discuss the quality of McDonald's foods and how they fit with a balanced diet.

The first criticism of the campaign came from Center for Science in the Public Interest, a Washington, D.C.-based consumer watchdog organization. Calling the ads "misleading" because they contained incomplete information, CSPI called for McDonald's to halt the campaign. It did not.

The attorneys general of California, New York and Texas voiced similar reservations about the nutrition ads, and in April 1987 asked McDonald's to "cease and desist" continued use of the campaign. McDonald's did not halt the campaign, but the focus of its ads changed from nutritional composition of foods to the broader health benefits of its salads.

McDonald's proved it can go on the legal offensive as well. Continuing its history of jealously guarding its exclusive use of the "Mc" prefix for food products, McDonald's in August 1987 filed suit

Now there's a solution to waste in advertising.

Announcing ValueFinders℠: The new direct marketing traffic builder that fights waste by targeting your best potential customers. You can blanket millions of Discover℠ Cardmembers who have billions of dollars in buying power. Or target only the segments you want.

ValueFinders keeps your offer from getting lost in a clutter of advertising mail. We actually pre-sell your value-ad to our Discover Cardmembers as one of their membership benefits. So your offer fills the store. Not the trash can.

Call us at 312-634-4223 or write to the address below. It's a great way to trim waste and build traffic in one easy step.

ValueFinders℠

For People Who Expect Value.

against Alberto-Culver, Chicago, seeking to halt that company's planned introduction of a butter substitute branded "Molly McButter."

What may be McDonald's marketing move with the most significant long-term ramifications has been the development of close ties with the nation's No. 1 retailer, Sears, Roebuck & Co. The two first joined for a Christmas 1986 promotion that offered a stocking bearing the likeness of a character from Steven Spielberg's animated film "An American Tail" and a reduced-price coupon for Sears toys tied to the same film.

The McDonald's-Sears bond deepened in 1987 with a new joint venture: a "McKids" line of apparel available only at Sears and carrying the unmistakable McDonald's "Golden Arches" logo. That venture could blossom in apparel for teens and adults as well, and may become a standalone retail chain of its own in coming years.

Chemical	2,553	2,457	3.9
Retail merch.	5,065	6,073	(16.6)

The two big advertising divisions at Mobil Corp.—Mobil Chemical and retail merchandise (Montgomery Ward)—each reported earnings increases of more than 150% in 1986 over 1985. At the same time, aggregate ad spending for the parent dropped 14.1% in 1986.

Mobil Chemical earnings, the division's highest ever, were up 164% in 1986 as sales of premium petrochemical products, especially polyethylene and polystyrene resins, rose 70% last year.

Mobil has developed a more resilient resin for plastic grocery sacks, as well as a high-quality resin for blow-molding plastic bottles for household detergents, automotive lubricants and other products. It is the market leader in plastic grocery sacks. With more supermarkets switching from paper bags to plastic sacks, sales of the sacks rose 31% in 1986, the company says. Sales of Mobil's Hefty brand drawstring trash bag, the Cinch Sak, grew 37% in 1986. The drawstring closing also was added to other Mobil brands, including Hefty Steel Sak, Lawn & Leaf bags and medium-size trash bags, and the Kordite housewares brand. Wells, Rich, Greene, New York, created a TV campaign themed, "Hefty Hefty Hefty—Wimpy Wimpy Wimpy," for the Hefty brand in 1986. The company spent $10.8 million in measured media—mostly network and spot TV—advertising Hefty products, down 30.8% from 1985 for the line that includes garbage, kitchen, trash and diaper disposal bags.

Mobil's Baggies brand twist-tie plastic bags are the overall food storage bag market leader, with about 35% of the plastic storage bag market. Dow Chemical's Ziploc brands hold about 20% of market. Only $883,100 was spent, all on spot TV, in advertising Baggies in measured media, compared with virtually nothing in 1985.

Hefty brand disposable foam-plates, with a sales gain of 12% in 1986, lead the disposable foam-plate market. Further expansions are planned this year, the company says.

Chicago-based Montgomery Ward retail division, the ninth-largest U.S. retailer, benefiting from its 1985 restructuring, reported its earnings soared 152% in 1986, to a level that equaled its 1978 returns, previously its best performance.

In 1985, Mobil announced it planned to spin off Montgomery Ward as a separate company, and began restructuring the retail unit to that end. However, Montgomery Ward's status under the Mobil umbrella did not change in 1986 or so far in 1987. In 1986, the restructuring contributed a 21% reduction in work force, a 24% cut in administrative overhead and a 21% cut in inventory levels. MW's restructuring included the closing and/or sale of its Jefferson Ward discount chain in the Southeast, shutdown of 25 unprofitable MW stores and closing its 113-year-old Montgomery Ward catalog operations.

In March 1986 MW began converting 116 stores (40% of its 290 stores nationwide) into specialty stores. Under the banner "Seven Worlds of Ward's," the stores concentrate on seven core businesses—apparel, appliances, electronics, automotive, homecare, home furnishings and recreation—in seven separate areas under one roof. Not every store, however, houses all seven product categories.

Ward's also scaled back or eliminated product lines, especially in the recreation, leisure and homecare segments. Those lines accounted for $250 million, or 6%, of the company's total sales in 1985. This helped contribute to a 16.6% drop in division sales in 1986.

Advertising for the retail chain was restructured as well, from a broad-based national campaign to specialty efforts in local markets. Young & Rubicam's Chicago office handles the $10 million account; Ward's does its own print advertising in-house. Ads focus on Ward's service and merchandise values in local markets.

Last year the company signed a deal with Toys 'R' Us, a 236-store chain, to open joint stores around the country, the first in Gaithersburg, Md. Also, Ward signed National Car Rental, Minneapolis, to open rental counters in several Ward automotive care centers in the West. The moves were meant to fill retail space left unused when Ward dropped product lines and categories or closed stores altogether.

The bottom fell out of MW's measured media budget, as only a $3[illegible]lion made its way into national measured media compared with $9.3 million in 1985.

Mobil spent $47 million last year to update its gasoline service stations in the Northeast, where it owns or operates about 1,000 stations. New high-speed pumps were added, and fully-automated Automatic Teller Machines were installed in 3,600 U.S. locations. The point-of-sale terminals electronically process debit and credit-card transactions. They also are available in Mobil stations throughout Europe, Australia and the Far East.

Overall, Mobil reduced its number of gas stations worldwide by 6% in 1986, while increasing sales per outlet by 21%.

Sales of more profitable fuels—gasoline, diesel and jet fuel—have continued to rise. Sales of Mobil Super-Unleaded gasoline rose 46% last year, and newly formulated premium gasolines were launched in 10 countries, including the U.S., France and Australia.

The company spent $7.4 million in measured advertising on Petro gasoline, equal to expenditures in 1985, and $6.3 million on Mobil 1 Motor Oil, down 4.5%.

Mobil also continued its 15-year campaign of "advertorials" on op-ed pages of nine major market newspapers. Herbert Schmertz, VP-public affairs, says the company spends about $4 million on these annually. The ads are written in-house and placed through DDB Needham, New York, Mobil's main agency.

Mobil continues to sponsor public television's "Masterpiece Theater," as well as the record-setting around-the-world flight of the Voyager aircraft. Mobil's biggest plug came when the Voyager landed last December, and NBC's video feed carried the superimposed words "Courtesy of Mobil Oil."

Annual earnings included a charge of $150 million on the sale of the paperboard packaging division, Container Corp. of America in 1986. In 1985, Mobil charged to earnings $508 million for the restructuring of Montgomery Ward. Mobil reduced its heavy debt by $1.1 billion with proceeds from the sale of Container Corp. in July 1986. Also gained was $800 million from the sale of other assets, bringing to $3 billion the proceeds from selling assets in the past two years. Two-thirds of the debt incurred in 1984, when Mobil purchased Superior Oil, has been paid off.

Monsanto kept its promise of a better 'Year to Come' in 1986 following one of the most sweeping strategic repositionings ever of a major corporation in 1985.

The St. Louis-based company, which moved boldly into markets for sweeteners and prescription pharmaceuticals with the $2.75 billion acquisition of Skokie, Ill.-based G.D. Searle in July 1985, continued to reduce its reliance on the highly cyclical commodity-type chemicals, plastics and man-made fibers businesses.

Monsanto stated its advertising costs at $198 million worldwide for the calendar year, up 51% over 1985. The 1986 spending figure was up 108% over 1984, the last full year prior to the Searle acquisition. Monsanto's totals include all spending for media, research, agency work and salaries. AD AGE's estimates the company spent $88.6 million alone in measured media and unmeasured forms of advertising in the U.S., up 3% over 1985.

Monsanto's measured spending for the seven BAR/LNA media in 1986 fell to $48 million, down 8% from 1985, as the company decreased spending on brand awareness campaigns for the aspartame-based sweetener marketed under the brand name NutraSweet.

NutraSweet still accounted for the largest share of measured spending, with $24.6 million in seven-media measured totals in 1986, down 13% from 1985. Network TV took 89% of the NutraSweet spending, according to BAR/LNA. NutraSweet comprised 51% of Monsanto's measured seven media total.

Monsanto focused more heavily in 1986 on promoting the aspartame-based tabletop sweetener marketed under the Equal brand name. Equal received $16.2 million in measured spending for seven-media, up 67% over 1985, according to BAR/LNA. Equal's spending was largely in network TV (82%) and network radio (17%), and accounted for 33% of Monsanto's seven-media total.

Ogilvy & Mather, New York, was awarded the Equal account in August 1987, replacing an assortment of agencies handling various aspects of the account. O&M-Chicago continues as the incumbent agency for NutraSweet.

In the six years since the introduction of aspartame, sales of NutraSweet have gone from zero to more than $700 million in 1986. The product was first approved for use in dry products in 1981, and in diet carbonated beverages in 1983, a market it has literally revolutionized.

In 1987, the U.S. Food & Drug Administration approved the use of NutraSweet as an additive in four new categories. In juices and frozen novelties, FDA approved joint petitions by Coca-Cola Foods division of Coca-Cola Co., and the Tropicana Products division of Beatrice Cos. FDA also approved the use of aspar-

tame in ready-to-drink teas, following a petition by the Thomas J. Lipton Co. Shaklee Corp.'s petition was approved for breath mints.

The four new markets have total annual commercial sales of about $6 million, according to Robert B. Shapiro, chairman-ceo of Monsanto's NutraSweet unit. Currently, some 130 products in the U.S. and hundreds more around the world are sweetened by aspartame.

Analysts and a NutraSweet spokesman say that getting approval now for as many products as possible is important to NutraSweet Co., the only U.S. producer of aspartame. The aspartame patent in the U.S. expires in 1992, and each new approval gives it a head start, contracts, and business ties with major food and beverage producers before potential rivals can enter the field.

Monsanto also had significant spending for its Lasso and Roundup herbicides in 1986, promoting price cuts, new product mixes, and an economic message about better yields to gain market share among corn farmers. The depressed farm economy and uncertainty about acreage that will be planted in the U.S. as a result of set-aside programs announced in 1986 caused a drop in herbicide sales. However, international sales of Monsanto's herbicides were brisk.

Monsanto's spot TV spending for Lasso was $3.4 million in 1986, up 47%. Roundup received $1.7 million in measured spot TV for the year, up 5%. Bronco and Landmaster herbicides received a combined $600,000 in measured spot tv in 1986, up 11%. These products received support in farm publications, which as a medium was down 24% to $5.5 million in 1986. Farm spending supplied by AGRICOM does not include brand spending.

Combined spending for Monsanto's wear-dated fibers for apparel and home markets recorded a measured $700,000 in 1986, down 58% from 1985 levels. Seven-media measured spending for Monsanto carpet fibers was $1.1 million in 1986, down 41%.

Monsanto's restructure involved divesting numerous low-return, non-strategic businesses and assets beginning in 1985 and continuing in 1986. Monsanto also reduced employment by nearly 2,400 in 1986 through an early retirement program. The company took an operating loss in 1985, based on a net restructuring expense of nearly $1 billion.

Included in Monsanto's 1986 operating income was $160 million in restructuring income related to the sale of a petrochemicals facility and products in Texas City, Texas.

Two factors also affected comparisons between 1985 and 1986. Net sales of divested products were included only in 1985 operating income. Second, sales from the Searle and NutraSweet businesses were included only for the final five months of 1985, versus a full 12 months during 1986.

As a result, Monsanto's real sales volume in 1986 increased by 3%.

Monsanto also announced in May 1986 the appointment of Earle H. Harbison Jr. as president-chief operating officer. Mr. Harbison, a vice-chairman in charge of the G.D. Searle and NutraSweet subsidiaries, succeeded Francis J. Fitzgerald, who died a month after taking office.

RANK **30**

Nestle S.A.

Vevey, Switzerland

($ in millions)

Worldwide	1986	1985	% chg
Sales	21,900	24,300	9.9
U.S. advertising	305	319	(4.3)

The precipitous decline in the value of the U.S. dollar and the collapse of coffee prices were two major developments that forced Nestle SA's to re-evaluate its international and U.S. marketing approach and to streamline its operations, particularly its U.S. units, Nestle Enterprises and Carnation Co.

Nestle SA in March 1986 began serious consideration of a worldwide agency fee system to replace commissions. A year after that proposition, Carnation slashed its commissions to agencies by 2-3 percentage points. The consideration of a fee compensation system was prompted partly by Nestle's new emphasis on marketing, which the company believed had begun to lean more toward promotion rather than brand-building advertising.

Says Camille Pagano, exec VP-products and marketing at the Vevey, Switzerland, headquarters, "We were getting too bureaucratic, forgetting we were a consumer goods company and that marketing —branding—is really the engine of our business."

Although 1986 sales figures have not been reported by privately-held Nestle, its worldwide sales in 1985 were up 35%, largely because of its acquisition of Carnation. One-third of Nestle's sales are from the U.S., according to the company,

WHEN IT COMES TO CREATIVE PROMOTIONS, TOP MARKETERS LOOK TO WESTERN PUBLISHING.

If you see Western Publishing only as the Little Golden Books people, you should take another look. Because we've also created high-visibility promotions for some of America's top companies. Recognizable names like Procter & Gamble, General Foods, Armour-Dial and Kraft. We have the ability to develop customized promotions of every kind, and to put licensed characters to work for you. (Whether it means lining up a hot national character, creating one for you, lending you one of ours, or featuring your current corporate character.) And whatever we create, we can print. Coloring and activity books, puzzles, calendars, posters, games like Pictionary, or any of over 2,000 other printed products. We can even handle distribution and warehousing.

So when you're looking to create an effective promotion, look to Western Publishing. You'll like what you see.

Get the whole picture. Call for this Western brochure, or to talk with a representative about your promotion needs.

1-800-453-1222

WESTERN

WESTERN PUBLISHING COMPANY, INC.
1220 Mound Avenue/Racine, Wisconsin 53404

but the recent drop in the value of the dollar has caused the bulk of profits to come from European operations. Worldwide sales in 1985 were 42 billion Swiss francs ($21.9 billion in U.S. dollars as of May 1986 using exchange rate ISF = $0.52). It is estimated that Nestle SA sales in 1986 were down 9.9% because of low exchange rates. Profits in 1986 increased by an estimated 2.2%.

In May 1986, Nestle managing director Helmut Maucher took on direct line responsibilities for the company's North American operations and restructured the reporting system from a four-man executive committee to seven senior VPs reporting to him.

Carnation, acquired by Nestle in 1985, posted a profit of $200 million in 1986, up 5% from the previous year. Its cost-conscious parent, however, moved to hike that figure by cutting the "fat" at Carnation, including company personnel and agency commissions. In July 1986, Carnation trimmed its staff by as much as 10%, eliminating nearly 100 positions.

Less than a year later, Carnation cut its ad agency commissions to 12-13% from 15%. The major commissioned agencies affected were FCB, Los Angeles; SSC&B:Lintas Worldwide, New York; and Dailey & Associates, Los Angeles.

Nestle had a brush with ad agency merger-mania in 1986, when in late October Saatchi & Saatchi, London, resigned $5.6 million in overseas billings for Carnation pet foods business as a result of pressure from S&S client Mars Inc. Mars maintained that a conflict existed after Saatchi's acquisition of Ted Bates, a primary agency for Hackettstown, N.J.-based M&M/Mars.

Nestle began a no-holds-barred battle in the decaffeinated coffee segment in 1986, with new spots for its Taster's Choice line, via HBM/Creamer, Pittsburgh, and for Nescafe Decaf via McCann-Erickson. Both campaigns were brought before the National Advertising Division of the Better Business Bureau. The latter spots—which claimed Nestle used an exclusive Swiss patented process to decaffeinate Nescafe—were dropped, but the Taster's Choice spots had more significant repercussions.

These spots, which claimed only Nestle coffee brands, Taster's Choice and Nescafe Decaf, were naturally decaffeinated, were challenged by decaf competitors General Foods and Procter & Gamble. GF, the leading decaf marketer with a 9.5% share for its Sanka brand, brought the issue before the networks, who asked Nestle to delete mention of Sanka from the ads.

GF then countered with its own Sanka spots, via Young & Rubicam, New York, which featured a woman saying, "They say decaffeinated coffee is good for you. Then they turn around and get you wondering about the way it's decaffeinated. Well, the people who make Sanka want you to know you can enjoy cup after cup of Sanka without a drop of worry." The spots end with a woman talking about GF's natural decaffeination process and commenting, "Now, what are they gonna say about that?"

Nestle's Nescafe Decaf finished 1986 with a 2.1% share of market and Taster's Choice Decaf with 6.2%, according to John C. Maxwell Jr., analyst with Furman Selz Mager Dietz & Birney, New York. P&G's Folger's Decaf came in with a 3% share, and its High Point had a comparable share.

Overall, Nestle had a 26.8% share of the instant coffee market, well ahead of P&G's 19.5%, but trailing Rye Brook, N.Y.-based GF's 42.6% share. In regular coffees, GF also led in 1986 with a 37.8% overall share, as compared to Nestle's 8.6% for its Hills Bros. brand. P&G's regular coffee share in 1986 for Folger's was 27.5%.

Nestle spent $4.8 million in measured media on its Nescafe line, substantially down from $13.0 million the prior year. Nestle's spending, measured at $18 million in 1985 for Taster's Choice, was also down to $12 million, according to BAR/LNA.

Nestle's Hills Bros. was merged with its San Francisco-based MJB Coffee unit in March 1986. Hills Bros. support, at $3 million in measured spending, was the same as in 1985. Cohen & Johnson, Los Angeles, handles. Hal Riney & Partners handles MJB, which was supported with $3.7 million in measured spending, up 48%. Nestle also added a Nescafe Mountain Blend variety to its Nescafe instant line. The brand is supported only by couponing, which is handled in-house.

A busy new product arena for Nestle in 1986 was the frozen novelty segment, where its Carnation unit spent an estimated $40 million to introduce four products. Heaven Bars and a separate product, Heaven Sundaes, were moved national from 35% U.S. distribution. Advertising, from FCB, Los Angeles, broke in May. Measured 1986 spending was only $1.1 million, but still much higher than the $622,000 spent in 1985.

The company also introduced Fruit Scoops, a chocolate-covered, bite-sized fruit ice nugget, and Berry Swirl Bars, stick-held premium ice cream with fruit swirls. Bon Bons, Caranation's success story in this category in 1985, was supported with $4.8 million in measured media in 1986, up 129%.

Nestle Enterprises also rolled out its Premium Ice Cream bars, capitalizing on the success of its premium chocolate lines. The ice cream bars are covered in white, milk or semi-sweet chocolate. The company says it will support the product with a $15 million budget. HBM/Creamer handles.

In the $8 billion candy market, Nestle rode the gourmet trend toward adult chocolate consumption with several approaches, including Henri Nestle, a premium line of bagged chocolates wrapped in gold foil, tested in San Francisco. Local TV spots and magazine ads supported, with $614,800 in measured spending. J. Walter Thompson USA, the agency whose 1985 "Sweet Dreams" campaign for Nestle's Alpine White chocolate achieved critical acclaim, handles.

Nestle runs a close race with Cadbury for the third-ranking position in chocolates, but Hershey Co. and M&M/Mars continued their stranglehold on the market in 1986, together owning half of the category. Nestle's chocolate bar spending rose to $13.6 million in 1986, up 27.1%.

The company's Chicago-based Nestle Confections unit made strides to tap a new candy market in 1986—the video rental industry. With a new program, the company targeted the video rental market by offering three of its best-selling theater brands—Goober's, Raisinets and Nestle Crunch—for sale at video concessions. Support included ads on "Coming Attractions" posters distributed to video stores by an industry magazine called *Coming Attractions*.

Although Nestle has long been selling chocolate chips for baking, in early 1987 the company began expanding that business with a frozen cookie dough under the Nestle Toll House label. The dough, in tests in Boston, Denver and Indianapolis, is made with real butter and is premium-priced. Made in pre-formed pieces, the cookies can be baked one or two at a time. Flavors include Toll House chocolate chip, double chocolate chip, peanut chip and oatmeal-raisin. JWT, New York, handles the spot TV, couponing and print campaign.

Nestle also has been expanding its baking morsel line with a mint-chocolate variety and, in 1987, a line of premium baking bits called Toll House Treasures. The Treasures line includes semi-sweet, milk chocolate and white varieties. Direct mail and coupon mailings are scheduled for late 1987, also handled by JWT.

Scandal hit Nestle's Beech-Nut Nutrition in November 1986 as two execs of the Fort Washington, Pa.-based unit were indicted by a federal grand jury in Brooklyn, N.Y., for conspiring to sell adulterated apple juice for infants. Niels Hoyvald, Beech-Nut president-ceo and John Lavery, VP-manufacturing at the company's Canajoharie, N.Y., plant were indicted for allegedly "trying to minimize a potential loss of $3.5 million" by delaying market withdrawal of the juice, made of various sugars, colorings and apple flavor rather than pure juice.

Ironically, Beech-Nut's advertising theme line at the time, created by agency-of-record Sherwood & Schneider, New York, was "Quality is our main ingredient." Beech-Nut, second runner in baby foods to Gerber Products Co., Fremont, Mich., was supported with $3.6 million in measured spending, down 5.3%.

In capitalizing on the trend toward fruit-flavored beverages, Nestle expanded its iced tea line with Nestea Ice Teasers, a cross between powdered soft drinks and iced tea, pitting it against General Foods' Crystal Light and Unilever's T.J. Lipton unit, both of whom introduced fruit teas at the same time. Nestle's introductory spending on the line, via JWT, was $8 million in 1985.

By 1987, however, the fruit tea market flattened out to $48 million—about half of what had been expected by Lipton. Although Ice Teasers took the No. 1 spot in fruit teas, with about 50% of the segment, it spent more heavily than the other players. Nestle spent $5 million on Ice Teasers in 1986, more than double Lipton's $2.4 million and GF's $1.7 million. Comparatively, Nestle's iced tea spending in 1986 was only $1.4 million.

In pet foods, Carnation's overall share in 1985 was 12.2%, up from 11.9% in 1985 and second only to Ralston Purina Co.'s 26.9%, according to Mr. Maxwell. Friskies Buffet was the third largest cat food brand by sales, followed by Carnation's Fancy Feast. Its dry Friskies brand ranked third behind Ralston's Cat Chow and Meow Mix, and Chef's Blend came in seventh. In dry dog foods, Carnation's Come 'N Get It, supported with less than $350,000 in 1986, nonetheless ranked sixth in sales, behind three Ralston brands, Gaines' Gravy Train and Grand Met USA's Alpo. In canned dog food, Mighty Dog came in third behind Alpo and Mars' Kal Kan.

Fancy Feast canned and Mighty Dog canned dog food were the biggest spenders in the Nestle pet food line-up in 1986, with $6.9 million and $5.8 million in measured media, respectively. Friskies dry cat food came in a close third with $5.7 million.

In September, 1986, Nestle moved its Juicy Juice fruit juice line, billing $4 million, to the Bloom Agency, New York, from Tatham-Laird & Kudner, Chicago. TLK resigned the account to pick up Del Monte's Hawaiian Punch, billing $8.5 million.

Libby, McNeil & Libby's produce products division was acquired in April 1986 by Len Judy, former Libby president, and other management at Chicago-based Libby. The line sold, including Salad Crunchies, Vegetable Batter and Stir Fry mix, was handled by Bloom Agency, Dallas, but was supported only minimally. Combined measured spending for the Libby's line of canned beans, pasta, salmon, meats and pumpkin still held by Nestle was $3 million in 1986, up 20% from the prior year.

Stouffer Foods, known primarily for single-dish frozen foods, expanded its line with Dinner Supreme, an eight-item line of entrees. In the overall frozen segment, Stouffer led the category with a 25% share for all its brands. Campbell Soup Co. held a close second with 22%, and ConAgra was third with 14.9% share. Stouffer's Dinner Supreme was supported with $3.1 million in measured media in 1986, while its frozen side dishes received $3.7 million. Lean Cuisine, its low-calorie frozen entrees, was backed by $13 million, up 8.3%.

Lean Cuisine, which was a runaway success in the low-calorie segment, has lately come under the gun from rival Heinz' Weight Watchers line. Weight Watchers has been inching up on Lean Cuisine's 13% share of the $3.7 billion single-dish frozen dinner category. Through 46 consecutive monthly share gains, Weight Watchers, which was once outsold three-to-one by Lean Cuisine, trailed its Solon, Ohio-based rival by only two share points by July 1987. Weight Watchers' advertising, themed "More Satisfaction," is handled by HBM/Creamer, Pittsburgh, also the Dinner Supreme agency.

Stouffer Hotels in February 1987 spent about half its annual budget on weather-related media buys in a new strategy. The $6 million account is handled by Wyse Advertising, Cleveland. The spots broke on cable's the Weather Channel, Cable News Network and on NBC-TV's "Before Hours" early morning news and weather show. Print buys included the *Wall Street Journal* and *USA Today*.

USA Today became a prime ad vehicle for Nestle Enterprises, when, in 1986, it contracted for exclusive sponsorship of that paper's weather page. The 255-ad, one-year package—a deal estimated at between $3.5-$4 million—was the largest single contract made by the Rosslyn, Va.-based Gannett paper. Nestle's food products were featured four times weekly, and Stouffer Hotels once a week.

Nissan Motor Co. Ltd.

RANK **47**

Tokyo

($ in millions)

Worldwide	1987	1986	% chg
Sales	23,675	25,918	(8.7)
Net income	322	447	(28.0)
U.S. advertising	180	163	10.8

Nissan Motor Corp. USA, a subsidiary of Nissan Motor Co. Ltd., Tokyo, will look to a new ad agency to establish its corporate identity in the U.S. this year. And a fresh stream of new products, including a new luxury car line to be introduced in the fall of 1989, is expected to bolster shrinking sales and income.

The parent, which does not break out sales figures for its U.S. subsidiary, reported worldwide earnings in fiscal 1987 ended March 31 of $322 million, down 28% from 1986, on sales of $23.6 billion, down 8.7%. Sales and earnings figures for both fiscal years were converted from yen to dollars at an average annual exchange rate of Y144.85 = $1.

Nissan also reported worldwide production for fiscal 1987 at 2,275,098 units, down 6.7% from fiscal 1986. In Japan, calendar year figures compiled by the Japan Automobile Manufacturers Assn. place Nissan's 1986 domestic production at 2,235,382 units—1,769,484 cars and 465,898 trucks—down 10.1%. In Japanese production Nissan ranks second, behind Toyota and followed by Mazda, Mitsubishi and Honda.

Changing market conditions have made it difficult for Japanese automakers to make a profit in the U.S. The appreciation of the yen since 1985 has cut deeply into U.S. profits, forcing them to go after higher profit margins with costlier "upscale" cars. Company-wide, Nissan has instituted cost-cutting procedures, streamlined the production process and redesigned parts to cut material costs.

Aggravating the situation for the Japanese has been the move of South Korea into the low end of the car market with the dramatic first-year success of the Hyundai. Other developing nations are expected to enter the less-expensive end of the market.

Squeezed by lower profits and the intense competition among economy models, Nissan will launch in the fall of 1989 a separate U.S. dealer network to market a line of luxury cars under the Infiniti nameplate. Models will include a V-8 engine, four-door sedan and a six-cylinder sports car with leather seats and four-wheel steering priced between $30,000 and $35,000. Infiniti dealers will be asked to make a multimillion-dollar investment for separate showrooms and sales facilities. Nissan expects to have between 60 and 70 signed up by January 1988.

The move makes Nissan the second Japanese automaker to establish a separate dealer network. Honda launched the Acura dealerships in 1986, and after a spotty start, sales have begun to perform well. Toyota also is expected to announce plans to import a luxury car line to the U.S. in 1988 for the 1989 model year.

Nissan continues to be dogged by its name. Nissan studies have shown that despite heavy advertising since it changed its U.S. name from Datsun in 1984, only 45% of the general public recognizes the Nissan moniker. That compares with 65% when its vehicles were called Datsun. This "identity" crisis was addressed upfront by Nissan's new agency, Chiat/Day, Los Angeles, which won the account in early August 1987 from William Esty Co., whose 10-year association with Nissan was terminated in July 1987. Chiat principals say they will give top priority to creating a strong "brand personality" for Nissan and ridding it of the confusing Datsun identity once and for all.

Import sales of the best-selling Sentra, priced at $6,399 for the standard five-speed, two-door sedan, accounted for 158,890 units, down 11.3% from 1985. Add to that sales of 52,602 U.S.-built Sentras. U.S.-produced Sentras and pickups (108,116 in 1986) from the Smyrna, Tenn., plant have enabled Nissan to import additional upscale models from Japan and meet the self-imposed restrictions of the Voluntary Restraint Agreement on all Japanese cars.

Unit sales of other imported Nissan models in 1986, compared with the previous year, were Maxima 112,756 (99,051), Stanza 67,804 (64,398), 300-ZX 52,936

Catch travellers on the move... and in the mood

TRAVEL PAGES. A complete travel and planning guide. Beautifully formatted . . . easy to use.

Travel Pages leads travellers straight to the advertiser for dining, hotels, special events and attractions . . . everything they need when they're away from home.

Travel Pages is reaching America's multi-billion dollar travel market with 1.5 million in circulation, and growing!

- 83% of our readers use *Travel Pages* to plan prior to trips.
- *Travel Pages* users average 5.2 pleasure trips a year.
- *Travel Pages* is being called a "major factor" in deciding where to travel.

Travel Pages now has editions for Florida, Arizona, Minnesota, Illinois, Michigan, Ohio, Wisconsin, Indiana and Iowa with plans to publish in many other key destination states soon.

(67,409), Pulsar 47,350 (49,816), 200-SX 45,952 (65,792).

As reported by Nissan, the 1986 unit sales of imported Nissan cars and trucks totaled 620,157 units—493,549 passenger cars and 126,608 compact trucks—down 8.8% from 1985.

The import total, when added to the company's domestic production, gave Nissan a calendar 1986 sales total of 769,702 units, down 7.9% from 1985. The company has a 6.2% share of the U.S. market car/truck market, behind Toyota at 8.9%, and followed by Honda at 3.5% and Mazda at 3.3%.

Nissan truck sales in the U.S., down 12.5%, represented 29% of all Nissan units sold in the U.S. in 1986, down from 30.7% the previous year. Truck production at Smyrna accounted for 43% of all Nissan trucks sold in this country during 1986. The company forecasts combined auto and truck sales of 1 million per year by 1990 in this country.

In spite of reports that the rising yen would result in an operating loss for its Japanese parent, Nissan continued with its 1987 ad plans as scheduled, based on a budget estimated at the previous year's level of $180 million. Measured media expenditures topped out at $142 million.

While facing up to a more competitive market with the introduction of three new models—the all-new Pulsar NX, the sports/utility Pathfinder and an all-new van, Nissan also continued its corporate name-change campaign (from Datsun) under the banner, "The Name is Nissan." In a two-way approach—print and TV—print addressed itself to specific models, building an emotional appeal for Nissan products, while TV spots focused on both product and corporate identity.

Nissan compact trucks accounted for more than $40.7 million in measured media spending, the most of any Nissan product, according to BAR/LNA. Most went into spot and network TV. As in 1985, truck promotions relied heavily on an interest rate subvention program designed to overcome high interest rates on financing.

The budget saw reduced spending on televised sports, especially football. Nissan skipped the 1987 Super Bowl because of what was termed "overexposure on the sport."

However, at the start of the 1987 model year, Nissan agreed to a multiyear sponsorship of coverage of National Basketball Assn. games by CBS-TV. In February, Nissan became the major sponsor of the Greater Los Angeles Open on the Professional Golfers' Assn. tour.

Spots highlighting the introduction of the new Pathfinder SE 4x4 sport utility vehicle broke in September as the company jumped off quickly in an effort to boost truck sales. Print ads headlined "breakaway" steered clear of the "Hardbody" theme of previous truck ads and stressed styling, roominess and plushness of the 4WD vehicle's interior. TV spots were run on sporting events, and a four-page preprinted insert was used in enthusiast magazines.

Nissan anticipates selling 30,000 Pathfinder E models, priced at $12,899 each, in 1987 model year, about 8% of the 400,000-unit sport/utility market. The vehicle accounted for $6 million in measured media costs (network and spot TV and magazines) during its fall launch.

Early 1987 also saw the introduction of a van whose interior creature comforts included swiveling/reclining captain's chairs and a cold/hot storage box. The van, based on the Japanese home market Largo, bears a strong resemblance to the Toyota van. Nissan projects 24,000 to 36,000 first-year sales.

New products like the Pathfinder and the van are expected to boost Nissan sales to 870,000 units for the 1987 model year.

Besides highlighting the three new vehicles, ongoing support was provided for carry-over products—the Sentra, which had a budget of $20.5 million in measured media, the Stanza at $9 million and the Maxima at $5 million. Once again, Maxima was positioned as a luxury/performance car with A-class luxury and Z-class performance, and Stanza was positioned as a quality/value entry.

The restyling of the 1987 Pulsar NX, priced at $11,399 for the XE two-door hatchback (5-speed), is another product of Nissan Design International in San Diego. With a change of the rear hatch, the car can be changed from sporty hatchback to convertible or a mini-wagon. New TV spots were used to reposition the redesigned Pulsar sports car to appeal to men aged 18 to 34.

Since its introduction in 1983, the Pulsar has the highest percentage (64%) of female buyers of any car in the U.S., sparking the nickname "the secretary's sports car." The company hopes to broaden the product's appeal while keeping its female customer base.

A redesigned version of the best-selling Sentra was on the receiving end of heavy promotion in the spring, with ad spending at levels comparable to the $20.5 million in measured media recorded in 1986. Network and spot TV accounted for about $15 million and magazines most of the rest.

Cash-to-dealer incentives on Stanza, Sentra and Maxima began in January, but Nissan told dealers it would not follow domestic automakers in lengthening warranties. Nissan started giving dealers $300 to $600 for each subcompact Sentra, compact Stanza and luxury Maxima that sold between Jan. 7 and April 2. The exact amount depended on their ability to reach certain sales goals.

Nissan's racing program, which showcases actor/driver Paul Newman in the Trans Am series, continued during 1987. Nissan reportedly will enter the Indy-car on Formula One circuits in the near future.

Noxell Corp., marketer of cosmetics, toiletries and household products including Cover Girl, Noxzema and Lestoil, generated slightly increased advertising spending in 1986, partly attributed to the launch of its Clarion line of cosmetics.

Introduced nationally in September 1986, the 85-item Clarion line of sensitivity-tested and fragrance-free products is designed for women with sensitive skin—a group Noxell estimates at more than half of all women.

Clarion is priced 20%-30% higher than Noxell's popular Cover Girl line. It includes foundation, lip and eye products, all of which are packaged with a system coded for color selection and coordination. In-store displays include a self-service computer to assist customers with personalized analysis.

Backed by $15 million in marketing support from SSC&B, New York, Clarion is "the most successful new product line in the market for decades," according to Jack Salzman, analyst for Goldman Sachs.

Lynne Hyman, an analyst with E.F. Hutton, says Clarion "is doing well. I think the expectation is that it will do $50 to $55 million this year." But she adds that Noxell was looking for sales closer to $60 million for Clarion.

According to a Goldman Sachs market study, most buyers rated the initial launch of the line as excellent, with heavy advertising support a key factor. The major problem with the line, according to a few buyers, is that it is too frequently out of stock. What's more, the Cover Girl line does not appear to have lost any shelf space to its new sister line. Nor is there any evidence that Clarion has cannibalized Cover Girl.

Total sales for 1986 were $439 million, based on the introduction of Clarion and increased market share for most of the Cover Girl line. Net income was $37 million, or $1.85 a share. Ms. Hyman predicts earnings per share of $2.10 in 1987 and $2.65 the following year.

In the toiletries division Noxzema Skin cream appeared on the shelves in a new pump container that Noxell says encourages increased consumption among current users. It also attracted some new users, which increased the product's market share.

A new blemish treatment product called On-The-Spot hit the market in March. Existing products in the line, Acne 12 and Clear-Ups, also posted unit and dollar growth.

Noxzema Aerosol Shave also gained share, with marketing aimed at men with specific skin and beard types. A shave cream for heavy beards came out in January, and an aloe and lanolin formula was introduced in June. The extra-sensitive shave cream was supported by separate campaigns directed at men and women; the campaigns were created by SSC&B.

The traditional liquid segment of the household cleaner market declined primarily as a result of the introduction of trigger spray products. Lestoil sales dipped, but profit margins remained high because of reductions in raw material costs. Ms. Hyman says, "Lestoil has been pretty flat, although I think it grew a little in the second quarter."

Athough dollar volume for Cover Girl slipped in several categories, it made overall gains against the rest of the market. "Cover Girl advanced, based on smart moves on their part and not-so-smart moves on their competitors' part," Ms. Hyman says. "Their advertising has always been very good; their marketing has always been very good."

Mr. Salzman says Noxell made a few small changes in the Cover Girl line but not enough to account for the changes in market share. "They're always keeping their line fresh and exciting," he says, "but it's coming from strong marketing. They've been strong in virtually every category. Their only weak category right now is lips."

Revlon led unit sales in lipsticks with a 20% share of the market. Maybelline held onto second place, but it dropped three points to a 13% share. Cover Girl rose three points during the same time period to claim 11% of the market, based on changes in the marketing plan for Continuous Color and continued strength in the Luminesse line.

Cover Girl advanced five points for a 26% share of mascara unit sales, while No. 1 Maybelline dropped four points to claim a 35% share. Revlon also dropped a point to finish with 9% of the market. Cover Girl's growth in this segment was due in part to the introduction of Clean Lash Washable Waterproof Mascara.

Maybelline topped Cover Girl for sales of eye pencils with 38% of the market, but it dropped three points from the previous year. Cover Girl gained two points to claim a 17% share. Revlon has 6%.

In the blusher market, Cover Girl is slowly stretching its lead over Maybelline. It gained one point for 25% of the market vs. Maybelline's two-point drop to a 20% share. Revlon was unchanged at 18%.

Maybelline tumbled eight points in the eye liner department but retained dominant share of the market with 29% of unit sales. Cover Girl, however, advanced seven points for a 23% market share. Revlon had 14% share.

The liquid makeup market was virtually unchanged in 1986, with Cover Girl on top with a 38% market share. That compares with Maybelline's 16% share and Revlon's 14% share.

Cover Girl and Revlon tied in the nail polish market with 17% of the market apiece. But, once again, Cover Girl increased four points while Revlon dropped three points. L'Oreal dropped two points, and Cutex was unchanged; each accounted for 9%. Maybelline was fifth with 6%.

Cover Girl is in third place for market share of eye shadows, but it advanced against its two main competitors. Maybelline was down three points to a 24% share; Revlon gave up four points to claim a 16% share. Cover Girl increased market share to 15% from 13% the previous year. More than 8 million women received free eye shadow samples in fall fashion magazines.

For loose powder sales, Cover Girl posted a commanding lead over Revlon, its nearest competitor. Cover Girl claimed 28% share vs. Revlon's 10%. Noxell attributed the gain to the successful introduction of Professional Finishing Powder, which became second in its market after just four months and exceeded initial sales projections.

In compressed face powders, Cover Girl increased unit sales to 53% of the market. Revlon was unchanged with an 11% share, and Maybelline slipped two points to a 9% share.

For total face makeup, Cover Girl had 37% of unit sales compared with 34% in 1985. Maybelline dropped to 15% from 17%, and Revlon surrendered one point for a 14% share.

Top of New England!

This Northeast market is one of America's most livable cities. The market is also ranked in the Top 10 of U.S. Metros in per household retail sales. It is an ADI Market which is the fastest growing in New England over the past 5 years. . .(growing at more than twice the rate of Boston, Hartford, Springfield, and Providence in population!)

The forecast through 1989 shows this market surpassing the growth of all other New England ADI's in population, households, total retail sales, and effective buying income.

It is the fastest growing ADI in one of America's fastest growing and more prosperous regions.

Where's this market that is tops in New England in growth? Shouldn't it be somewhere near the top of your New England media buy?

Nynex Corp., New York, set a strategy in 1986 of reaching into the four information industry markets—telecommunications, office equipment, information and support systems—and a fifth market of linking the four into integrated systems.

Nynex put its total advertising costs in 1986 at $117.4 million in its 10-K for media, research and agency work. The company did not report ad spending for 1985.

AD AGE estimates Nynex measured and unmeasured media spending at $112 million. Estimates for 1985 have been revised to $103 million to reflect a year-to-year 8.7% increase that is more characteristic of the industry. Nynex concentrated on its core business, the telephone network, in 1986, devoting 60% of $29.7 million in measured spending for seven media to its two main subsidiaries, New York-based New York Telephone, and Boston-based New England Telephone & Telegraph.

Nynex invested $2.1 billion to expand and upgrade networks of the two telephone subsidiaries in 1986, adding more than 50,000 miles of optical fiber lines.

Measured spot TV for New England Telephone increased 12.5% to $8.1 million in 1986. New York Telephone's measured spending jumped 48% in 1986 to $9.8 million, mainly in spot TV.

Because New York Telephone serves Nynex's most vital market, Nynex laid the groundwork for advanced voice, data and visual communications with brand awareness advertising, says Harriet Norris, director of corporate advertising.

Beginning 1986 with a user-stimulative campaign, "New York Lives on New York Telephone," agency Bozell, Jacobs, Kenyon & Eckhardt repositioned the advertising in June 1987 to focus on advanced network capabilities with a new campaign, "The power behind the phone." Nynex cut spending 20% on corporate general advertising in 1986, spending $2.7 million mostly in magazine and spot TV.

In office automation, Nynex increased spending 33% to $2.6 million—all in spot TV—in 1986 for Nynex Business Information Systems. Nynex has set a goal of becoming one of the nation's leading suppliers of networked computer and telecommunications equipment. This explains the acquisition for an undisclosed price of 81 International Business Machines Corp. Product Centers in 33 states and the District of Columbia on June 30, 1986. The centers were merged with 21 Datago Business Centers as Nynex Business Centers.

With 92 outlets in the U.S., Nynex is a powerhouse in company-owned office automation retail centers, ranking second only to San Jose, Calif.-based Businessland, with 94 outlets. Chicago-based Sears, Roebuck & Co. is third with 60 Sears Business System Centers., says Alice Brown, president of StoreBoard Inc., a Dallas-based industry consultant.

Revenues are another story, however, Ms. Brown says. Nynex does not release figures, but its operating revenues are believed to be well below those of Businessland, which had revenues for the year ending June 30, 1987 of $600 million, up 48% over 1986, she says. Nynex has to follow Businessland's lead by developing a strong outside sales force and paring back its high priced retail store fronts, which once were simply showcases for IBM, Ms. Brown says.

Nynex appears to be digging in, hiring James N. Turner, IBM's former VP-retail sales, among three other top IBM executives.

Nynex is looking beyond its territory for new uses of its information resources-directory assistance, customer databases and publishing. In late 1986, Nynex agreed to provide some of AT&T's billing and collection. Nynex began publishing three directories outside its territory. Nynex also purchased for undisclosed terms United Publishers Corp., Los Angeles-based independent directory publisher.

Measured spending for information resources in 1986 jumped 58% to $6.3 million, virtually all in spot TV.

Nynex boosted efforts to integrate products and services with the Feb. 25, 1987, acquisition for $107 million of Business Intelligence Services Ltd., a London-based computer software company specializing in financial services. In April, 1986, Nynex acquired Telco Research, Nashville, Tenn., a specialist in integrated telecommunications software.

Nynex also received approval in April 1987 from the FCC to enter the long-distance market by buying a stake in a transatlantic fiber-optic cable. Nynex hopes to acquire Private Transatlantic Telecommunications System Inc, Washington D.C., which has regulatory approval to provide a telephone and data link between New York and London. PTT is a 50% partner with Cable & Wireless PLC, London, in building two fiber optic cables at a cost of $300 million. The cables are scheduled to begin operating in 1989 and 1992.

Nynex successfully petitioned for the U.S. Justice Department for permission to begin transatlantic services, the first request by a regional Bell company to engage in services directed overseas. The request eventually requires approval from Judge Harold Greene, who oversaw the breakup of the Bell system, and who earlier this month banned Bell companies from entering the long-distance market within the U.S.

Intrastate access	962	1,045	(8.0)
Toll service	1,999	1,743	14.7
Other	1,326	1,220	8.7

Pacific Telesis Group dramatically increased measured media spending in 1986 to establish its brand name and boost usage of its network, and to tap into competitive markets for communications, information services and publishing.

Receiving the largest increase was corporate general promotion, up 162% to $6.8 million in seven-media measured spending, divided 66% spot TV, 33% magazine, 1% magazine. PacTel's total, including measured and unmeasured spending, was $87.5 million in 1986, up 42%. Totals include $31.1 million in spot TV, up 75%, and $8.9 million in measured newspaper, up 15%.

San Francisco-based Pacific Bell, PacTel's largest subsidiary, again dominated spending with $21.6 million in 1986 measured media, up 64%. Spending for Pacific Bell represented 62% of the seven media total, according to BAR/LNA. Almost all of the spending was for spot TV, supported by magazine and outdoor.

The California Public Utilities Commission continues to be a thorn in side of the Pacific Bell unit. CPUC, which is recommending rate reductions of up to $225.1 million a year retroactive to March 1986, ordered cuts totaling $191 million in March 1987 that PacTel cited as the main reason for a 3.8% slide in earnings to $272.3 million during the second quarter of 1987 on revenues of $2.8 billion. PacTel's first quarter profits were $293 million, up 7% over the same period in 1986, on revenues of $2.24 billion, up 1%.

Fritz Ringling, principal with New York-based Booz, Allen & Hamilton, says Pacific Bell "shot itself in the foot" in its dealings with CPUC. The company was ordered in mid-1986 to revise its "packaged selling" methods of marketing enhanced services. The commission charged that sales representatives were passing off as basic service a package that included extras such as call-waiting and call forwarding. CPUC also charged the company did not attempt to find out if customers were eligible for the Lifeline basic service, at $1.48 a month, which is designed for the poor and elderly. Particularly vulnerable were Hispanic and other minority customers because of language barriers.

"Pacific Telesis has one of the most conservative public utility commissions in the nation," says William Rich, senior analyst with Northern Business Information, a New York-based consultant. "It prevents them from being more competitive with the services they offer, from modernizing their systems to offering competitive services in non-regulated areas."

PacTel has been active in competitive markets for communications and office automation. Dallas-based Communications Industries, a marketer of paging and cellular services with operations in Dallas, Atlanta, Tampa and other markets was bought by PacTel for $431 million in 1985 and renamed PacTel Cellular. In December 1986, PacTel paid $316 million for cellular operations in five cities in Michigan and northern Ohio. Measured magazine spending for PacTel Mobile Access increased 117% to $420 million in 1986.

PacTel also is making moves to capitalize on international markets through a partnership with London-based Cable & Wireless PLC and C. Itoh & Co. of Japan. The partnership is vying for rights to build a second transpacific cable link between the U.S. and Japan.

"International presents some big growth opportunities. It's an area that all the Bell companies are looking at. So far, most are taking a slow, logical approach beginning in a consulting capacity for network design," NBI's Mr. Rich says. The regional Bell companies have been banned for the next three years from engaging in offering long-distance services (other than transmission) within the U.S.

In the market for office automation, PacTel InfoSystems acquired late in 1986 the western direct sales and services unit of the integrated office systems group of Northern Telecom. The acquisition gives PacTel a presence in 11 western states selling and servicing customer premise equipment. The purchase price was not disclosed.

The purchase solidify's PacTel's position in office automation through its 26 PacTel InfoSystems stores in California, Oregon and Washington, which include eight stores acquired in the May 1985 acquisition of Portland, Ore.-based Byte Shops Northwest.

In Jan. 1, 1986, Pacific Bell Directory became a separate subsidiary of Pacific Telesis. The company publishes 96 white and yellow page directories in California and Nevada. The subsidiary broadened its product line in August 1987 with six new directories geared to local small business in the Los Angeles area. The directories unit received $6 million in measured spot TV in 1986, up 12%.

J.C. Penney Co., the nation's third largest retailer and the third largest mail order company after Sears, Roebuck & Co. and Time Inc., for the second year held advertising increases below 5% even though both its earnings and sales showed marked improvement over 1985.

Penney reportedly improved the quality, presentation and merchandise mix of its weekly advertising circulars, a program it intends to expand by the end of this year.

In 1986, Penney spent $16.7 million in measured advertising to back men's and women's clothes, another $4.4 million for men's by itself and $2.7 million for women's. While the combined budget was up from the $15.8 million spent in 1985, both men's and women's individual budgets were down. However, general advertising, according to Leading National Advertisers, rose 9.4% to $26.7 million, and budgets for jewelry jumped 33% to $4.8 million.

Catalog operations were a strong contributor to Penney's record performance in 1986. While Penney store sales increased 6% to $12.8 billion, catalog sales increased 16.6% to $2.3 billion, and profits more than doubled. The $340 million increase in sales was achieved with 235 fewer catalog pages. The company attributed enhanced productivity to better presentation and organization, as well as fashionable but functional goods sold at competitive prices.

To address mediocre sale growth at its retail stores, Penney reorganized its marketing and merchandising operations this summer. Penney President David Miller was named vice chairman, and W. Barger Tygart, central regional VP, was named exec VP for merchandising.

As part of the restructuring, Penney also established four major merchandise categories: women's, children's, men's and home and leisure.

Each new merchandise unit will be responsible for buying and marketing functions for that category. And each will be headed by its own president: John A. McConville for women's; Thomas D. Hutchens for men's; James L. Hailey for children's, and James J. Kennedy for home and leisure.

The streamlined organization is expected to improve Penney's ability to respond quickly to changing consumer needs and tastes.

To date, the financial improvement begun in 1986 has continued into 1987. Fiscal first quarter net income declined 14% to $54 million as a result of an $82 million after-tax charge related to Penney's upcoming move of its headquarters from New York to Dallas' Plano, suburb, but profit from operations actually rose 56% and sales climbed 5.9% to $3.22 billion from $3.05 billion.

The relocation to Texas was one of the recommendations of a study begun in 1974 to reposition Penney for the future. Besides recommending that Penney move out of New York to give it easier access to its national store network, the study said Penney should develop stronger internal communications, encourage regional identities and restructure its merchandise and marketing mix to make both more compatible with regional consumer buying patterns.

In the 1970s and early 1980s Penney began implementing its new strategy by adding more fashionable apparel to its merchandise mix and modernizing its stores. The modernization continues, and, in the last year, Penney fine-tuned its merchandise mix to include a better balance of private label as well as designer brands so that Penney's core customers would not be turned off by too trendy or too expensive clothing. At the same time, it has targeted more fashion-aware customers such as the working woman, trendy teens and fashion-conscious men.

To further refine its merchandise mix, Penney's has continued to decentralize its buying programs. The company's satellite TV network, operating since July 1985, is now used in 175 locations, up from 165 last year. The network allows buyers to show clothes and other products to local stores, which can then decide what is suitable for their region's tastes.

Programs such as the satellite connection have been designed not only to better serve the consumer but to save Penney money. Savings are made in travel-related expenses and in the markdowns necessary when merchandise won't sell in a certain area.

The headquarters move to Dallas should also improve communication and reduce costs. Penney Chairman William Howell says, "The relocation will further enhance communications and reduce travel time by up to 50% between headquarters and our five regional offices. Approximately 50% of our people now work in central and southern locations. The remaining 50% are divided evenly between the West and East Coasts, putting Dallas at the halfway point."

The costs of relocating were projected at $140 million before taxes, taken as a one-time, non-recurring charge to earnings in the first quarter ended May 2, 1987. Reduced occupancy, labor costs, savings on travel and taxes, increased productivity and efficiency are expected to offset that expense over several years. Also, a permanent reduction of $60 million to $70 million in administrative costs is anticipated.

In 1987, Penney announced a $40 million investment in its startup of Telaction, a consumer-controlled, cable TV-delivered and home-phone-activated home shopping and information service. The system is testing in Chicago with 125,000 cable TV subscribers, and more than 40 companies are paying an undisclosed fee to participate in the test. These include American Express, Ticketron, Spiegel and Nash & Finch, a Minneapolis-based wholesale food grocer.

Telaction has come out in advance of three other videotex ventures: White Plains, N.Y.-based Trintex, which involves a Penney competitor, Sears, Roebuck; CNR Partners, New York, and Covidea, Jericho, N.Y.

Other areas of new business for Penney include its new subsidiary, Telemarketing Network Inc., which provides telemarketing services to other companies. Penney's network consists of 14 telemarketing centers established since 1982 as part of its catalog operation.

Another service is J.C. Penney Communications Inc. Through Penney's satellite TV network, companies can use this system for direct broadcasting via satellite to domestic and international audiences. Other services include videotape production and full-motion videoconferencing between New York, Pittsburgh, Atlanta, Dallas and Los Angeles; audio recording and mixing; graphic and slide art; meeting planning and management; employee communications programs; printed and electronic reference manual publishing, and communications research. Clients include General Motors, Squibb Corp., NBC, ABC and Saatchi & Saatchi.

Penney also has formed the J.C. Penney Travel Services subsidiary, which initially is marketing travel services to Chicago-area consumers. The service operates via the phone and is open 24 hours a day, seven days a week.

The Thrift Drug division, purchased by Penney in 1969, has been earmarked for expansion. One growth route is expected to be mail-order drugs for senior citizens.

Penney also is expanding into the specialty store business. When, in 1986, it bought a 20% interest in Alcott & Andrews, the regional specialty store chain, a spokesman said the investment "shouldn't be read as a desire on our part to get into the specialty store business." But

AMERICA'S Horse
Sundays
10:30 p.m. Eastern • 7:30 p.m. Pacific
On The Nashville Network
If more than one million viewers weekly with an average household income in excess of $39,000 fits your product, consider **America's Horse**, one of the hottest ideas on cable television this year.
America's Horse is the first weekly program targeted to the horse enthusiast — a rather fanatic group of people devoted to their horses, and to the products they use. And **America's Horse** is a buy that's right on the money for anyone's budget.
For advertising information, contact Don Treadway or Pete hale at (806) 376-4811.
America's Horse is produced by:
The World's Most Versatile Horse
AQHA
American Quarter Horse Association
2701 I-40 East • Amarillo, Texas 79168 • (806) 376-4811

subsequent purchases have disproved that disclaimer.

In April 1987, Penney announced it has signed a letter of intent to buy a 20% equity interest in Beeba's Creations, a San Diego-based junior sportswear supplier. Penney is now working with Beeba's to establish junior specialty shops in its stores and is planning free-standing stores that will sell the same private label coordinated apparel.

Penney also has made a capital investment in Los Angeles-based Stinu Corp.'s Units women's specialty store division. Notes Don Rhoden, president, "Our expansion program has been given a major impetus by Penney's capital investment, which is part of its strategy for participating in the specialty store segment of the retail business."

Soft drinks	3,588	2,725	31.7
Snack foods	3,018	2,847	6.0
Restaurants	2,684	2,081	29.0

PepsiCo is slicing ever larger shares of the business in its three chief segments: soft drinks, snack foods and restaurants. The company reports sales of $9.3 billion in 1986, a 21% gain over the year before.

Its Mandarin Orange Slice, though available last summer in only about half the U.S., nonetheless took the top spot in the orange-flavor segment of the soft-drink market. At a 24% share of market, Mandarin Orange has captured twice as many pocketbooks as archrival Coca-Cola's Minute Maid. PepsiCo scored another coup for Slice when the Slice blimp became the official dirigible of the Super Bowl, flying above the Rose Bowl and shooting pictures of the action.

PepsiCo further enhanced its business outlook with the $841 million purchase last October of RJR Nabisco's Kentucky Fried Chicken, leader in the fast-food chicken market. With it, PepsiCo became the largest restaurant system in the world, with 14,664 restaurants including Pizza Hut and Taco Bell outlets.

While Pepsi also picked up additional KFC units served by Coca-Cola, it lost a big client in the fast food industry in Wendy's, which in October 1986 switched its fountain allegiance to Coca-Cola from Pepsi. Wendy's, in explaining its decision, said PepsiCo had become a major restaurant competitor through its ownership in KFC.

PepsiCo also spent $591 million to buy MEI Corp., its third largest bottler, and $246 million for Seven-Up International from Philip Morris Inc.; Kentucky Fried Chicken from RJR Nabisco Inc.

PepsiCo remains a leader in the $6 billion salty snack food business with its Frito-Lay products claiming $3.5 billion of that market.

But it is soft drinks that account for most of PepsiCo's sales, nearly $3.6 billion in 1986. Pepsi claims to be the largest-selling soft drink in supermarkets, though Coca-Cola holds the edge in vending and fountain sales. PepsiCo, in its own analysis of market share, claims $12 billion of the $39 billion in U.S. soft drink retail sales.

But an analysis done by *Beverage Industry* finds Pepsi's cola brands lagging behind those of Coke. The magazine pegs Pepsi brands of cola at a 25% market share, while Coke is at 32.2%. Pepsi was only slightly behind, with its lead brand, Pepsi-Cola, Coca-Cola Classic garnered 19.1% of the market in 1986, compared with a 18.6% share for Pepsi. But overall, Coca-Cola's market share reached 39.8%, compared with Pepsi's 30.7%. Shares include all the different brands made by these two soda megacompanies, and compare with 38.6% Coca-Cola and 29.8% Pepsi in 1985.

PepsiCo is moving to close the gap. It got Burger King, the second-largest restaurant system in dollar sales in the country, to continue serving Pepsi products despite intense wooing from Coca-Cola.

PepsiCo is also serving its own drinks at its large stable of restaurants. The company reports a 20% share of the highly competitive pizza market, one quarter larger than its closest competitor, Domino's. PepsiCo also says it commands 45% of the $5.5 billion dollar quick service chicken segment with KFC. Taco Bell, the company reports, has over half of all the quick service sales in the $2.3 billion Mexican food category.

PepsiCo, which has the right of approval in the ownership transfer of independent Pepsi bottling franchises, in August 1987 nixed the planned sale by GenCorp of its RKO Enterprises operation to IC Industries' Pepsi-Cola General Bottlers, the second largest independent bottler in the Pepsi lineup. The combo would have become the largest independent Pepsi bottler. IC and GenCorp filed suit, which is pending. Analysts theorize that the PepsiCo move is a response to the concentration of bottling operations taking place at Coca-Cola, which acquired many of its bottlers in 1986 and formed Coca-Cola Enterprises, spun off as a publicly held company in 1986 (Coke retained 50% ownership).

In its 1986 10-K report to the Securities and Exchange Commission, PepsiCo reports spending $688.7 million on advertising worldwide, up 26% from the year before. PepsiCo says that figure includes all direct advertising costs, including time charges for broadcast and space charges for print. It also includes production costs.

The BAR/LNA multi-media service, which monitors seven media, says $72.8 million of PepsiCo advertising backed Pizza Hut and its delivery service. PepsiCo, which says the Pizza Hut campaign was working out, recently dropped Chiat/Day, Los Angeles, as its agency on the account. Pizza Hut says it was by mutual agreement and referred inquiries to Jay

How will you and your company be affected by the 112,000 MAJOR CHANGES in advertising last year?

(You'll find the answers in the NEW 1987 Advertising "Red Books"!)

Try one FREE for 15 days.

Order both now and SAVE $155.00.

The advertising business, both agencies and clients, may be the fastest changing business in the world. That's why 80% — or 112,000 — of the over 140,000 contacts in the NEW 1987 Advertising "Red Books" show changes from last year's editions.

This is your fastest, most reliable source of crucial information on over 17,000 corporations and 4,800 ad agencies — new names, addresses, phone numbers, budgets, media, and more. All complete, accurate, up-to-the-minute. You'll save time and discover hundreds of new money-making opportunities.

Only the *Standard Directory of Advertising Agencies* gives you all the essential facts on 42,500 agency decision-makers and 60,000 accounts *instantly*. And the new *Standard Directory of Advertisers* puts 71,000 influential client contacts *at your fingertips*.

Chiat of Chiat/Day. He had no comment.

Some in the advertising industry say the public and PepsiCo management as well were not responding to the Pizza Hut ads, many of which devoted their thrust to portraying the competition in a negative light.

Pizza Hut is second to Kentucky Fried Chicken in total dollars spent on a brand. KFC spending was pegged at $81.3 million. Taco Bell follows with $50.4 million.

Spending for Slice, both diet and regular, topped $32 million in 1986, up from $18.8 million in 1985. PepsiCo this year has also moved into the bottled water business with its Ice Mountain Maine Water, a division of its Great Spring Waters of America company. Tests are under way in Boston, Hartford, Providence and New Haven.

A PepsiCo spokesman, who says the company estimates per capita consumption of bottled water has increased 500% since 1980, says the company owns a mountain in Maine, Mt. Zircon in Rumford, which has been a source of bottled water since the mid-1800's.

Not everything PepsiCo has touched has, like Slice, meant a resounding success. Frito-Lay rolled out three products —Stuffers, a potato chip with dip inside; Rumbles, a granola ball; and Toppels, a potato cracker with melted cheese—and soon canceled them.

Pfizer Inc., best known among consumers for its heavily advertised consumer products lines such as Ben-Gay and Barbasol, ventured into a new advertising area in 1986—advertising ethical pharmaceutical products in consumer publications.

Pfizer broke into new territory in 1986 when it advertised Diabinese in the February issue of *Reader's Digest*. The one-page ad for the oral hypoglycemic drug marked the first time a pharmaceutical company had run an ad naming a prescription drug in a major magazine. The ad was an attempt to stall market erosion and to promote the brand name. The ad also ran in *50 Plus* and *Mature Outlook*. According to measured ad figures, Pfizer devoted a budget of $80,000 to Diabinese.

Pfizer's Roerig division also used ads for Glucotrol, a hypoglycemic, in *Golden Years*, a magazine targeted at the elderly in Florida. These campaigns result from the lifting of a moratorium on these types of ads by the Food & Drug Administration.

In Pfizer's consumer products division, its fourth largest segment in sales, spending remained strong behind Visine, up 5.6% to $13.3 million, according to BAR/LNA. Although Visine is the market leader in ocular decongestants, that segment of the market is in a competitive battle against ocular tears, and Visine will have a tough fight ahead, say industry analysts.

Media spending for the Barbasol brand was $1.9 million, down 26.9%. As a brand, including deodorants (launched in 1983), Barbasol's sales rose 15%.

Total spending behind Ben-Gay was also down, declining 15.9% to $6.9 million. Sales climbed 8%, boistered by line extensions including Ben-Gay Sports-Gel and Ben-Gay arthritis foam. The greatest spending was behind the ointment, although $3 million was earmarked for the sports gel. Ben-Gay, which is handled by McCaffrey & McCall, New York, will add Extra Strength Ben-Gay Sports-Balm in 1987.

For Desitin and Rid—other brandnames falling under Pfizer's consumer products umbrella—spending jumped from only $172,000 to almost $1 million. Rid is the market leader in the $50 million pediculosis market, with an estimated 50%-plus share in the over-the-counter segment of the business.

For Coty U.S., weak retail sales during Christmas 1985 dampened new orders. However, the $5 million ad launch of Lady Stetson, plus the Chateau Collection of fragrances, helped fuel a 17% sales growth for the division. The Chateau Collection was backed with measured spending of $3.3 million. Lady Stetson received just over $5 million in measured support —primarily in network TV. Total Coty brand spending, including Emeraude and Stetson, reached $23.2 million.

According to retailers, Stetson was the No. 1 mass brand of fragrances during Christmas 1986. Lady Stetson placed among the top eight women's fragrances at mass retailers. The division's Emeraude appears to be enjoying a resurgence in popularity. Some of that may be tied to an increased spending budget of $3.6 million, up 33.3%. For 1987, Coty will launch a new men's fragrance called Iron, to be backed by an estimated budget of $4 million.

Unisom, a sleep aid, experienced an increase of 15% in sales in 1986, aided by the successful launch of Unisom Dual Relief, a product that addresses headache and sleeplessness. Dual Relief received $2 million in support. Unisom sleep aid was backed by almost $5 million—a slight increase over 1985.

During the year, Pfizer, which had lost out in the bidding for Richardson-Vicks in 1985, purchased Infusaid Co. and Intermedics/Infusaid Inc. for $21 million, and paid $56 million for the remaining interest in Angiomedics Inc. Infusaid produces implantable and external infusion pumps; Angiomedics is a manufacturer of diagnostic and therapeutic products used in the treatment of cardiovascular disease.

Pfizer's healthcare business grew 14.4% in sales, outpacing all other Pfizer divisions. That segment accounted for 64% of corporate net sales.

Major drugs in the division include Feldene, Procardia, Minipress, Cefobid and Glucotrol. Feldene's sales rose 17% in 1986, to $509 million, to remain the world's largest-selling prescription anti-inflammatory drug. Sales of Procardia, a calcium channel blocker used in the treatment of angina, were up 23% to $269 million. Sales of Minipress, an alpha blocker, rose 12% to $233 million. Cefobid's sales jumped 23% to $178 million.

Diabinese sales declined slightly in spite of advertising, probably due to continued introductions of generic versions of Diabinese, which is no longer covered by patent. Sales of Glucotrol, an oral hypoglycemic, jumped 87% worldwide to $56 million.

The Pfizer Chemical Products division submitted its sweetening agent, alitame, to the FDA for marketing approval. Alitame is said to be sweeter than other sweetening agents, and it's reportedly easier to use in low-calorie foods for which artificial sweeteners are not currently used.

In Pfizer's agricultural division, Terramycin led the pack and helped contribute to a 7% increase in sales. In mid-1986, Rumatel, a dewormer, was launched.

There were numerous account changes at Pfizer, especially in the pharmaceutical, laboratory and Roerig divisions, where promotion is made very difficult by the specialized nature of the products. Carrafiello, Diehl & Associates, Irvington, N.Y., was dropped from the advertising roster, as was John Paul Itta Inc., New York, and Klemtner Advertising, New York.

There was less upheaval in the corporate suites with the management team of Chairman Edmund T. Pratt and Gerald D. Laubach, president, retaining most key personnel. That was a pleasant change following the blow in 1985 of losing pharmaceutical division President Sheldon G. Gilgore to G.D. Searle—a company Pfizer had unsuccessfully attempted to purchase in 1985.

Advertising growth at Philip Morris Cos. was minimal in 1986 as its General Foods division threatened to cut commissions and sought greater regional input in advertising and as P-M sold off its heavily-advertised 7UP unit.

PepsiCo was the intended home for 7UP at a price of $380 million, but the plan was scuttled by the Federal Trade Commission in January 1986 on antitrust grounds. Cutthroat competition in the $30 billion soft drink market prompted P-M's decision to divest 7UP, bought in 1978 for $520 million. 7UP's share has been declining annually to its current (in 1986) 5.2% share.

Dallas-based investment group Hicks & Haas ultimately bought the domestic-only operations of 7Up for $240 million. Added to H&H's Dr Pepper business purchased in 1985, the two give H&H a solid No. 3 share in soft drinks. In July 1986, P-M sold 7UP's international soft drink business to PepsiCo.

By far P-M's largest business is its tobacco products. With $12.7 billion in 1986 sales, P-M's cigarette unit sales grew 0.5% in a market declining at an annual rate of 2.1%. Marlboro, the No. 1 brand in U.S., with sales of more than $4 billion a year, continued to command 22.9% of the category in 1986. Measured spending for the Marlboro line topped $84 million, according to BAR/LNA, about equal with 1985 spending.

According to John Maxwell Jr., analyst with Furman, Selz, Mager, Dietz & Birney, New York, P-M's brands held 36.8% of market vs. 35.9% in 1985. Two other P-M brands were among the top 10 sellers—Benson & Hedges and Merit holding with 4.4% and 4.0% shares, respectively. Overall, rival R.J. Reynolds' brands held 32.4% of market, followed by Brown & Williamson with 11.5%, Lorillard with 11.5%, American Brands with 7.2% and Liggett & Myers with 4.0%.

Generic and low-price cigarette brands continued to grow, accounting for $876 million in sales, or 8.9% of the market in 1986. P-M competitor RJR's success with Doral, which gained a 1.3% share since its introduction in late 1984, encouraged P-M to roll out Cambridge Lights and Player's Lights 25's in 1986. Combined with its Century 25 line, P-M rival RJR held nearly 26% of all cut-rate cigarette sales, representing $225 million in sales.

By the end of the year, however, P-M had made strides toward evening the stakes. Its Cambridge and Players brands captured 11.6% of the off-price category. P-M had to spend heavily to carve its niche, spending $10 million in 1986 measured spending via agency Leo Burnett.

P-M put its $55 million ad budget for Benson & Hedges, the fifth largest selling cigarette brand, up for review in June. The brand had lost market share equaling about $100 million in sales over several years. Wells, Rich, Greene, New York, retained the account, fending off pitches from Backer & Spielvogel (now Backer Spielvogel Bates), agency for the $11 million Parliament business, and Burnett, agency for some $235 million in measured spending for Merit, Virginia Slims, Alpine, Saratoga, Marlboro and Cambridge.

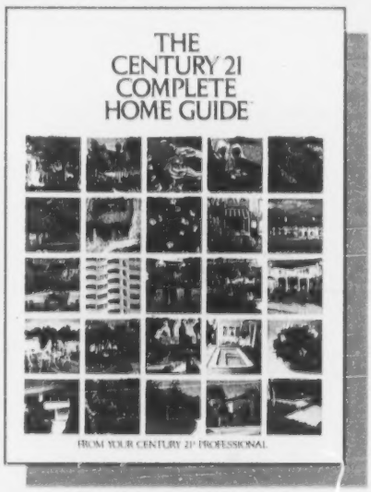
In May 1986, P-M's Milwaukee-based subsidiary, Miller Brewing Co., rolled out Miller High Life Genuine Draft. Miller, the nation's second largest brewer with a 21.3% market share, is led by No. 2 ranking Miller Lite (10.5% share) and No. 3 Miller High Life (5.9% share), according to Emanuel Goldman, partner at Montgomery Securities, San Francisco. Anheuser-Busch's Budweiser continued its chokehold on the market with 26.8% of all domestic beer production. Miller's shipments of 38.7 million barrels in 1986 was a 4.3% increase over the prior year, its first significant gain in four years.

Genuine Draft, handled by Backer Spielvogel Bates, New York, received $37.7 million in measured spending in 1986, compared to Miller Lite's $76.8 million, up 9.7% from 1985.

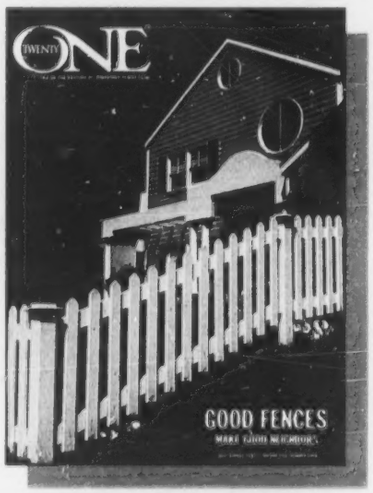
Miller High Life barrelage fell 14% as market share dropped from 7.1% to 5.9%. Still sporting the "Made the American Way" campaign begun in 1985 by J. Walter Thompson, Miller High Life was supported with $56.3 million in measured spending, down 10.2%.

Miller's second-tier price-brands, Meister Brau and Milwaukee's Best, also are handled by Backer Spielvogel Bates. Meister Brau received $11 million in measured 1986 spending, according to BAR/LNA, down 17%. Testing began on premium entry, Gettleman Lager Beer and on Plank Road Original Draft. Backer handles Gettleman and Chiat/Day, New York, handles Plank Road. Despite $3 million in

IT TAKES TWO MAGAZINES TO REACH THE RECENT HOMEBUYER DURING THEIR TWO MOST ACTIVE BUYING WINDOWS.



THE CENTURY 21 COMPLETE HOME GUIDE™ IS DELIVERED PRIOR TO THE MOVE, WHEN 23% OF HOME PRODUCTS ARE PURCHASED.*



TWENTY ONE® MAGAZINE IS DELIVERED SIX TIMES DURING THE FIRST YEAR OF HOME OCCUPANCY WHEN THE VOLUME OF HOME PRODUCTS PURCHASED IS UP TO 20 TIMES THE NATIONAL AVERAGE.**

The CENTURY 21® System is the largest residential real estate sales organization in the United States. In 1986 more than 700,000 families trusted CENTURY 21® Brokers with the largest purchase they will make in a lifetime—a house. Now they need your product to make it a home.

You can reach these new homeowners exclusively through The CENTURY 21® Corporate Sponsorship Program. This Program consists of two publications, The CENTURY 21 Complete Home Guide ™ and TWENTY ONE® Magazine. These publications reach the new homeowner during the two most important *buying windows, (1) prior to the actual move and (2) throughout the first year of home occupancy.*

This year over 700,000 copies of The CENTURY 21 Complete Home Guide ™ will be personally delivered by The CENTURY 21® Broker System prior to the actual move. The CENTURY 21 Complete Home Guide ™ is the only publication designed to reach the recent homeowner prior to the move when over 23% * of home enhancement products are purchased. . . . And this BPA audited home reference guide offers compatible editorial and advertising adjacency inside.

With an average circulation of 250,000 copies per issue, TWENTY ONE® Magazine is a follow up publication delivered after the move 6 times annually. During the first year of home occupancy the incidence of purchase of home products is up to 20 times ** greater than the national average.

Together, The CENTURY 21 Complete Home Guide™ and TWENTY ONE® Magazine deliver the most complete advertising program to reach recent homeowners in America.

spending for Plank Road, testing discontinued. Gettleman remains in test.

P-M's food sales for 1986 were $9.66 billion, the company's first full year of results from General Foods Corp. since it was purchased by P-M in 1985.

In June 1986, the GF unit shifted its Maxim and Mellow Roast coffee brands out of Ted Bates Worldwide (now Backer Spielvogel Bates) to Ogilvy & Mather, New York, as a result of Bates' acquisition by London-based Saatchi & Saatchi PLC. Another of S&S's units, Saatchi & Saatchi DFS Compton, handles rival P&G's High Point coffee.

Three months later, GF also moved from Bates $5 million in Log Cabin syrup billings and $20 million in Louis Rich turkey, luncheon meats and Good Seasons dressings advertising to D'Arcy Masius Benton & Bowles, New York.

The second move was said to be an indirect response to the acquisition, since GF felt it could not grow further with Bates, because of conflicts with other Saatchi agencies.

In November 1986, citing "cost efficiencies," Rye Brook, N.Y.-based GF consolidated its $60 million spot TV buying assignments at Grey Advertising and Ogilvy & Mather, both New York. As a result, Y&R and DMB&B lost $8 million each in spot assignments, but retained network TV daytime and prime-time buying, respectively.

GF also became one of the first advertisers on Rupert Murdoch's Fox Network, committing $750,000 for Joan Rivers' late night talk show.

In 1987, GF began considering cutting its agency commissions to below the 15% level. Its major agencies, DMB&B, Grey, Ogilvy & Mather and Y&R would be affected.

As a result, these agencies were said to be formulating contingency plans to take to GF that included a more relaxed conflict policy.

GF's bottom line growth was hampered by fluctuations in the international coffee market, which suffered from underproduction (and resultant high prices) in 1985, then from overproduction (and low prices) in 1986. Activity was particularly hot in the decaf segment, where GF went to war with Nestle. In early 1987, Nestle broke Taster's Choice spots hailing its natural decaffeination—and disparaging its competitors decaffeination process—via HBM/Creamer, Pittsburgh. GF then began a $20 million campaign for Sanka, the decaf market leader, touting its "pure mountain water and natural effervescence." Young & Rubicam, New York, handles Sanka. GF complained about the Nestle spot to the networks, which required Nestle to drop any mention of Sanka in its ads, and brought the spots to the attention of the National Advertising Division of the Better Business Bureau.

General Foods' brands held 37.8% of the regular coffee segment in 1986, compared to 27.5% for Procter & Gamble's lone entry Folgers, and 8.6% for Nestle's Hills Bros. brands. GF holds 42.6% of the instant coffee segment, according to Mr. Maxwell, compared to Nestle's 26.8% and P&G's 19.5%.

In December 1986, GF rolled national with Brim Roasted Buds, a new product that replaced freeze-dried Brim. The entire Brim line was supported with $10.4 million in measured media in 1986, down 29%. DMB&B handles.

In 1987, GF's Yuban faced a new competitor in the premium coffee segment: P&G's Folger's Colombian Supreme. Yuban, primarily a West Coast brand, was supported with $4.6 million in measured spending in 1986, up from $2.2 million. DMB&B handles. GF's Maxwell House Master Blend was also buffeted with competition when P&G introduced a high-yield brand, Folger's Special Roast Flakes, in March 1986.

By 1987 the failure of the International Coffee Assn. to maintain export quotas of coffee beans led to plummeting coffee prices. GF's Maxwell House, the No. 1 coffee brand with an 19% share in 1986, was particularly hard hit by this development, which forced it to increase promotional spending to the grocery trade at the expense of advertising.

Trying to raise coffee margins, GF began marketing a higher-priced gourmet whole bean roast coffee called Maxwell House Private Collection, to compete in the $330 million gourmet coffee segment. The product, supported by print only via O&M, received $1.2 million in measured spending in 1986. Its primary competition came from Montvale, N.J.-based Great Atlantic & Pacific Tea Co., which introduced Eight O'Clock Royale Gourmet, a 14-variety line, scheduled to roll national by year's end.

The first sign of a Maxwell House divided occurred in April, when Stephen Morris, division president, suddenly resigned due to "philosophical differences" with Robert Seelert, senior exec VP at GF. Mr. Morris was succeeded by Ray Viault, former pet foods division manager. Mr. Viault turned around the pet foods division (Gaines) prior to its sale to Anderson, Clayton & Co.

Ironically, GF's advertising cutback at O&M came not long after that agency had developed spots for Maxwell House Instant Coffee featuring youthful actors and actresses, including Justine Bateman and Mariel Hemingway. The commercials took top honors in ADVERTISING AGE's Adwatch Survey for October 1986, which measures top-of-mind advertiser awareness among the public.

Tampering again haunted GF in 1986. Jewel Food Stores, Chicago, received an anonymous call claiming sugar-free Jell-O packages in its Chicago stores had been laced with cyanide. None was found as GF pulled the products in Chicago and several other markets.

The Jell-O name was extended in the $150 million and growing frozen novelty segment in 1986. Jell-O Fruit & Juice Bars were moved into 80% of the country, and Jell-O Gelatin Pops joined Jell-O Pudding Pops. In early 1987 another GF franchise—Crystal Light Fruit & Juice Bars—joined the frozen novelty fray.

GF spent $10.1 million in measured spending on Jell-O Fruit Bars in 1986. Spending for Gelatin Bars was $5.6 million, down 37% from 1985. Frozen Pudding Pops were supported with $5.2 million in measured spending, down 42%.

The Jell-O name also moved from food to clothing as GF licensed the moniker for a line of children's sportswear to Garan Inc., marketer of Garanimals, for fall 1987. Marketing/Trade Communications handled the licensing effort.

GF's Post cereal lines, holding 12% of the $4.5 billion cold cereal category, continued to rank third behind No. 1 Kellogg (42%) and No. 2 General Mills (24.1%). The company moved to strengthen its position by reviving its Crispy Critters children's cereal with an effort breaking in August 1987.

GF also is reviving Sugar Bear, its mascot for Super Golden Crisp cereals, with an ad and promotion campaign sponsored with the American Film Institute. O&M handles Super Golden Crisp; the promotion was handled by Markham/Novell Communications, New York. Measured spending for Super Golden Crisp was $1.2 million in 1986.

In adult cereals, GF broke a new campaign via Grey Advertising for Post Natural Brand Flakes, estimated at $7 million. The spots targeted the over-50 age group with celebrities Steve Allen and "Golden Girl" Rue McClanahan. The company also extended its Post Fruit & Fibre with a peach-flavored variety in August 1987. GF's Fruit & Fibre held a 1.6% dollar share of the cold cereal market in 1986, third in the Post line-up behind Raisin Bran's 2.0% and Grape-Nuts' 1.7%. Measured spending for Fruit & Fibre was $15.3 million in 1986, down 11%. Grey handles.

Post held the second-largest share behind Kellogg of the bran/fiber segment in 1986, with 32.7% share.

In powdered soft drinks, GF's Kool-Aid, with a 70% share of the $800 million market, extended its line with Kool-Aid Koolers, a 20%-juice added aseptic drink. The rollout in August was supported with $10 million in advertising and $6 million in promotion, featuring teen rock group The Jets.

Although Grey is Kool-Aid agency of record, in July 1986 GF assigned a local TV campaign in New York to the Garth Group, a New York-based political consultancy. The assignment could prove to be a precursor for GF, which is trying to expand its businesses regionally beginning with a test in Denver. According to GF President-CEO Philip Smith, the test, if successful, could result in brands being handled by regional managers who would control a portion of the marketing, promotion and ad budgets traditionally handled by a home office brand manager. It could also result in local agencies handling local advertising and promotional campaigns.

GF also began a Dallas test of Supri, a calcium-fortified, sugar-free drink mix in five fruit flavors. Support is provided by TV and print ads, via O&M. Measured spending was $1.1 million in 1986. The company also tested Tang Fruit Boxes, an aseptic entry with 30% fruit juice, in the Southwest. O&M is the agency.

Lipton, Nestle and GF raced to market with fruit teas, a cross between iced tea and fruit-flavored powdered soft drinks, in 1986. GF markets its fruit tea under the Crystal Light name, introducing the line with $8 million in spending. By 1987, however, the market had failed to produce significant results, accounting for only $48 million in sales for all three brands, and GF took a distant second place in the segment with 25% behind Nestle's 50%. As a result, GF trimmed its measured ad spending for the line to $1.7 million in 1986. D'Arcy Masius Benton & Bowles, New York, handles.

In the prepared foods category, GF introduced three new lines in 1986. In the frozen dinner segment, the company via Y&R began a Rockford, Ill., test of Birds Eye Fresh Creations, frozen dinners packaged in a three-pouch cooking system. In fresh prepared foods, it regionally marketed Culinova, a pricey refrigerated dinner line, via a Hawthorne, N.Y. venture group of GF execs and DMB&B. And in shelf-stable foods, the company via Grey began testing a shelf-to-oven dinner, Impromptu.

GF also began marketing a frozen Ronzoni dinner line in 1986, handled by Y&R, and expanded its Ronzoni offerings with a refrigerated pasta and sauce line testing in Cincinnati.

Philip Smith, president of P-M's General Foods unit, was named chairman GF, succeeding James Ferguson as of Jan. 1, 1987. The following month, Mr. Smith was named a vice-chairman of the corporate parent. The succession suggested that Mr. Smith is a serious contender to succeed Hamish Maxwell, P-M chairman-ceo, now 60, when he retires.

Restaurants	2,764	2,663	3.8

Despite its first decline in net income in 16 years, Pillsbury Co. continued to increase—if moderately—its overall advertising and promotion budget in fiscal 1987 over the prior year as it made major changes in its agency lineup.

The sudden end to Pillsbury's 15-year streak of earnings increases was caused by problems in the restaurant division, associated restructuring charges in that division and a higher federal tax rate for the year. In the restaurant division, sales increase 3.8% and operating profits skidded 28% to $219 million for the fiscal year.

Results were better in the foods division, which showed a 6% increase in sales although a substantial 18.8% jump in operating profit to $246 million. In a restructuring that reflects the continual shrinking of its commodities business, Pillsbury moved this year to incorporate that segment into its foods division.

During calendar 1986, measured advertising rose 5.4% to $260 million—with 88% of total spent on TV alone, according to BAR/LNA, which monitors network TV and spot TV in addition to four other media. Of the TV expenditure, $165 million was spent on Burger King.

Nevertheless, Pillsbury spent less money on TV advertising in 1986 than it did in the previous year. BAR/LNA shows a 1% drop in spending between the two years.

Pillsbury itself reported it spent $570 million for domestic advertising and promotion in fiscal 1987, an increase of 1% over fiscal 1986. Worldwide advertising and promotion expenditures, which include some selling costs, remained comparatively flat, increasing only 3% to $637 million—considerably lower than the 28% growth from 1985 to 1986.

It was a quiet year for Pillsbury in acquisitions. "We're paying down our debt and digesting our fiscal 86 purchases," a company spokesperson reported. Pillsbury made the largest acquisition in its history in May 1985 when it purchased Diversifoods, an Itasca, Ill.-based restaurant holding company that included the nation's largest Burger King franchisee. Jeno's pizza, Joan of Arc canned goods and French's potatoes also came aboard in fiscal 1986.

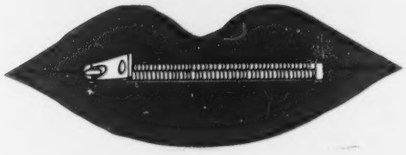
In consolidating its acquisition gains, Pillsbury was kept busy in fiscal 1987, especially in the restaurant division which showed signs in the second quarter of turning in a lower profit than expected.

The restaurant division breaks down into two segments: fast-food restaurants such as Burger King and Godfather Pizza, and full-service restaurants, such as Steak & Ale and Bennigan's.

During the past five years, restaurants have provided an increasing percentage of the company's operating profit, reaching the 60% mark in fiscal 1986. In fiscal 1987 that percentage dropped sharply to 47%, prompting one company executive to claim, "If you are not a little concerned, then you don't understand the situation."

Of Pillsbury's three major restaurant chains, only Godfather Pizza showed improvement. The pizza chain has pulled off a turnaround, with average restaurant sales

One of your best salesmen stands around all day and never says a word.



It's your point-of-purchase display. . .and it could increase your sales and market dominance. Discover how at POPAI Marketplace '87, Jacob K. Javits Convention Center, New York City, November 17-18-19, 1987.

The facts are in. Two-thirds of all brand purchase decisions are made in the store.* If you're not represented there with eye-catching, sales-stimulating point-of-purchase advertising, you could be losing this business.

That's why POPAI Marketplace '87 is a must. . .a pragmatic, three-day trade show designed to help you get the most out of your P-O-P investment.

POPAI Marketplace offers:

- More than a dozen seminar leaders trading insights and offering suggestions.
- CEO's and top executives from major consumer product companies reviewing their P-O-P experiences and expectations.
- Retailers from a broad range of outlets detailing the designs most useful to their stores and highlighting the best ways to gain their support.
- University researchers and analysts exploring P-O-P, and what makes one display a success, another a failure.

Then visit the exhibits of our POPAI members. They'll display more than 5000 of the newest, most exciting and effective P-O-P displays. . .ideas and concepts which can be implemented today, or elaborated in the future.

THIS SHOW IS A MUST FOR YOUR BRAND'S SUCCESS. November 17–19, Jacob K. Javits Convention Center, N.Y.C.

Admission is free to consumer product marketers, retailers and the business press. To register, send in your business card or registration request on company letterhead to Marketplace '87, POPAI, 66 North Van Brunt Street, Englewood, New Jersey 07631, (201) 894-8899. A Marketplace '87 kit will be sent to you upon your registration.

Register now or at the door. But be there to increase your market share.

POPAI Marketplace '87

*Ref: POPAI's 1986 Supermarket Consumer Buying Habits Study

up 11% from the prior year. By contrast, Burger King's average domestic restaurant sales were unchanged from 1986 and average unit sales declined 2%. Steak & Ale posted a loss in the fiscal year.

While the Restaurant Group was having a disappointing year, the Foods Group was having an excellent one. Market leadership, a diversified product mix and successful integration of prior-year acquisitions contributed to a 19% increase in operating profit to $246 million. The industry leader in microwave technology, Pillsbury continues to capitalize on this experience with new products.

Products in the Foods Group continue to dominate market share in most of their market segments. For example, in the prepared dough division, referred to by one analyst as the gem of the company, market share levels of key products reached 10-year highs.

Each of the company's major products in this division holds the No. 1 market position and all, with the exception of refrigerated biscuits, have at least 80% of market share. Pie crust, bread dough and cookies lead the charge with 99%, 96% and 93%, respectively.

The meals and snacks division has recorded steady growth in sales, volume and profit for the past three years from its diverse mix of product offerings: Totino's and Jeno's frozen pizza, Van de Kamps frozen fish, Pillsbury Microwave and Toaster branded products, and the Azteca line of refrigerated Mexican items.

In agency news, there were major shifts in accounts. Most recently, Pillsbury announced that its Burger King account, held by J. Walter Thompson USA, is up for review with JWT on the shortlist.

Earlier, Young & Rubicam took the $15 million Pillsbury cake mix and frosting business resigned by BBDO Worldwide because of an account conflict caused by its merging into Omnicom Group. Omnicom sister agency Needham Harper (now DDB Needham) holds the $35 million Betty Crocker account from General Mills. Pillsbury followed that move by also transferring to Y&R its $12 million microwave and toaster product accounts.

Procter & Gamble Co., in its sesquicentennial year, remained the largest national advertiser, although U.S. advertising and promotion expenditures dropped 14.3% to $1.4 billion during calendar 1986. Industry sources note that media expenditures dropped as the company realized savings from its first full-year integration of Richardson-Vicks Inc.

P&G, in the fourth-quarter of its fiscal year, ended June 30, 1987, set the stage for more vigorous growth, restructuring its worldwide manufacturing operations. The cost of restructuring reduced net income by $459 million. Excluding the impact of the reserve to restructure manufacturing operations, net earnings amounted to $786 million, up 11% over net earnings of $709 million the previous year.

John Smale, chairman-CEO, says, "Over the long-term, the restructuring program will result in a stronger, more competitive company and will set the stage for more vigorous growth in the current year and beyond."

A significant portion of the restructuring reflected a sharp curtailment of P&G's Duncan Hines ready-to-eat cookie manufacturing operations, which the company says is related directly to the infringement of P&G's patent technology by three major U.S. cookie marketers—Nabisco Brands, Keebler Co. and Frito-Lay. P&G three years ago filed suit against the three companies in U.S. District Court in Wilmington, Del., charging them with "unfair competitive practices" to obtain information about P&G's baking process.

P&G currently holds a 28.9% share share of the $250 million soft cookie segment, behind Keebler Co.'s 31.3% share for its Soft Batch brand and 38% for Nabisco's Almost Home and Chewy Chips Ahoy brands. Advertising for the Duncan Hines ready-to-eat cookie line was moved in April 1987 to Wells, Rich, Greene, from Grey Advertising, both New York. Measured media spending was $11 million, approximately half the 1985 measured media spending budget.

The restructuring also helps pave the way for P&G's transformation into a healthcare marketer. After spending close to $2 billion in the last five years to acquire Richardson-Vicks, Norwich Eaton Pharmaceuticals and some product lines from G.D. Searle & Co., P&G claims to be the No. 1 over-the-counter drug company. P&G President John Pepper says the company plans in the next decade to boost the ratio of profits from health-related products to 30% from its current 20% contribution level.

Vicks, which consolidated operations in Shelton, Conn., continues to operate as a separate P&G subsidiary, Richardson-Vicks USA, with its president William I. Bergman reporting to P&G's group VP for health and beauty care. John S. Scott, who headed Richardson-Vicks when it was acquired, remains chairman of the subsidiary. He reports to Mr. Pepper.

In June 1987, Vicks added the Bain de Soleil skincare line, acquired from the Revlon Group, to its category-leading Oil of Olay beauty fluid product line.

P&G's other major growth area centers on sucrose polyester, called olestra by the company. In May 1987, the company filed a petition with the Food & Drug Administration seeking approval to market the liquid, which reportedly looks, acts and tastes like a fat, but moves through the body without leaving behind any calories. Industry analysts say olestra could be a $1.5 billion product for the company. FDA action is expected within two years, when P&G would begin marketing olestra as an ingredient of its Crisco and Puritan oils, as well as using it to fry Pringle's potato chips.

P&G says a new unit volume record was established for the domestic consumer product divisions "despite a business climate that was particularly competitive." The company identifies dentifrice and deodorant categories, coffee and fruit juices as recording "notable volume and market share increases."

P&G's three core businesses—soaps and detergents, diapers and toothpaste—still contribute the major portion of sales and profits. And, despite a companywide spending drop, those categories received the greatest portion of measured media spending. According to 11 media measured, P&G advertising for 1986 totaled $883.9 million, down 4.5%. P&G still spends $456.3 million in BAR-measured TV expenditures, $114 million more than No. 2 advertiser Philip Morris Cos.

P&G in 1986 put action behind its tough advertising policies, pulling about $85 million in billings from Saatchi & Saatchi PLC's U.S. units due to conflicts resulting from the Saatchi acquisition spree. The New York agency, Saatchi & Saatchi Compton, which became Saatchi & Saatchi DFS Compton in a merger with sister agency DFS Dorland Worldwide, lost Crisco oil and shortening to Grey Advertising, New York, and lost the Duncan Hines baking mix line to Cunningham & Walsh, New York. Leo Burnett USA Chicago, picked up the Luvs disposable diapers account, and Jordan, McGrath, Case & Taylor, New York, won Bounty paper towels. Both Luvs and Bounty were former DFS Dorland accounts.

P&G's former VP-advertising, Robert Goldstein, who died in an Aug. 1, 1987 rafting accident in British Columbia, explained in an earlier interview that the company's actions were made "due to competitive conflict considerations arising from recent agency acquisitions. We have decided it is in our best interests to assign these brands to other P&G agencies."

Despite the "slap on the wrist" given to Saatchi, the agency still has about $120 million in P&G business, including Ivory, Tide, Cascade, Comet and Camay brands.

In March 1987, P&G appointed Slater Hanft Martin, New York, as the agency for Dramamine motion sickness treatment product and Icy Hot, a pain relieving ointment. Both former G.D. Searle & Co. products were merged into Richardson-Vicks as part of a consolidation and realignment of P&G's health and personal care business. Agencies for the two products had been unassigned since they were purchased in 1985. Slater Hanft Martin, an R-V agency which became a P&G agency as a result of the acquisition, also handles Percogesic, an aspirin-free pain reliever.

The company reversed a trend of declining market shares in 1985. Jay Freedman, household products analyst with Kidder, Peabody & Co., New York, says the company's industrywide market share for all household products rose to 37% from 35.8% at the end of 1985, with the majority of the increase traceable to new-product successes in disposable diapers (Ultra Pampers) and toothpaste (Tartar-Control Crest).

P&G also benefited from the continued success of Always sanitary napkins, which increased its market share to 18%-20% from 13% of the $1.5 billion category. Category leader Johnson & Johnson remains the No. 1 feminine hygiene marketer, with an estimated 38%-40% share. P&G in April 1987 introduced Always Slender for Teens, a thin maxi pad for teenagers, and rolled nationally Always Plus, with panti-protectors. P&G supported the eight-item line with $22.6 million in measured media spending, up 13% from 1985.

In the $3 billion U.S. disposable diaper category, P&G devoted $23.1 million in measured media spending for Pampers "Blue Ribbon" regular absorbency and $2.4 million behind Ultra Pampers thin, superabsorbent diapers, which incorporate a chemical compound that absorbs wetness into a "lockaway core," leaving the top layer next to baby's skin dry. Advertising for Ultra Pampers claims it's "the driest diaper ever made."

P&G in May 1987 began shipments of Luvs Deluxe, an upgraded, thin, superabsorbent premium diaper, to help stop the brand's continued share decline. Pampers and Luvs together hold an estimated 52% share, down 6.5 share points from mid-1986, with Luvs contributing only a 14% share of the total. Kimberly-Clark Corp.'s Huggies disposable diapers hold a 30% share, up 5 share points from a record low 25% share in mid-1986.

P&G suffered a further blow to its image as the untouchable leader in the category, losing a patent infringement suit filed last year against Irving, Tex.-based K-C, its primary competitor in the category.

The company's 1986 measured spending on its other consumer paper products dropped 18.5% to $23.7 million as P&G scaled back spending behind Banner, a value-priced toilet paper and paper towel line, Charmin and White Cloud bathroom tissues. P&G, the leading marketer of bathroom tissue, holds a 27.5% share of the $2 billion (manufacturers' level) category. The company in October 1986 introduced Charmin Free bathroom tissue with TV spots themed "Charmin Free, it's got plenty of nothing," and put a new stronger and thicker Charmin into limited distribution in southern states. Mini Bounty paper towels, a reduced size, 2-ply towel, also was put into limited distribution in western states.

P&G supported its Puffs facial tissues with $7.2 million in measured media spending, up 16.1% from $6.2 million last year. In this $1 billion category, P&G is the No. 3 brand behind Scott Paper Co. Kimberly-Clark's Kleenex is the undisputed market leader with an estimated 45% to 50% share.

P&G continued holding the leadership slot in the $300 million incontinence category, with a 58% share for Attends adult briefs, undergarments and pads. P&G supported Attends with $4.5 million in measured media spending, up from $1.05 million the prior year. Most of the spending increase supported the retail introduction of Attends undergarments. The incontinence market is skewed toward nursing home usage. Kimberly-Clark's Depend incontinence products hold less than a 20% share.

On the strength of its Tartar-Control Crest, P&G claims more than a 39% share of the $1 billion dentifrice category, up at least 7 share points from last year's low-30's share. P&G's primary competitor, Colgate-Palmolive Co.'s Colgate, holds a 23% share. Lever Bros.' Aim, at 7%, trails Beecham Products' Aqua-Fresh with 10.5%.

P&G supports Crest regular and Tartar-Control with $31.7 million in measured media spending, $22.1 million alone for

Tartar-Control Crest, positioned as "the dentists' choice."

In 1987, the company introduced Crest Super Cool for Kids, a mint-flavored toothpaste, and Peppermint Scope, an extension of its Scope mint-flavored mouthwash.

Measured media support behind Scope totaled $15.4 million, up 13.2%. Scope holds a 26% share in the $600 million category, behind Warner-Lambert's Listerine, with a 28.5% share.

P&G in August 1986 announced the introduction of Peridex plaque-removing oral rinse, the first dental-care product to get the much sought-after American Dental Assn. seal of approval for plaque removal. Although it currently is sold by prescription-only, analysts believe P&G eventually will market Peridex as an over-the-counter plaque remedy.

In the nearly $3 billion haircare category, P&G's Head & Shoulders dandruff shampoo remained the leader in the $1.29 billion shampoo segment with a 10.9% share and $18.6 million in measured media support. In September, the company introduced nationally a reformulated Head & Shoulders after testing a fresh-scent version in normal-to-oily and normal-to-dry formulations.

P&G introduced nationally Pert Plus, a combination shampoo and conditioner, and expanded distribution of Pantene haircare products from department stores to drug stores. Ads used the tag line, "Don't hate me because I'm beautiful." FCB/Leber Katz Partners, New York, handles the $10.5 million account.

P&G supported Ivory, Pert Plus, Prell, Lilt, Sassoon and Pantene with $68.3 million in advertising. The company holds a 26.9% share of the shampoo segment, down 3.9 share points, and a 16.4% share in conditioners, down 1.7 share points from the previous year.

P&G supported its Wondra hand and body lotion with $483,100 in measured media spending. The brand has a 4% share of the $500 million category. Oil of Olay, the leading facial lotion in the $450 million category with a 24.3% share, received more than $25 million in measured media support. The Bain de Soleil suntan products bought from the Revlon Group in June 1987 will give the company the third-leading position in the $400 million suncare category.

Acne preparation sales grew 2.1% during 1986, and new-product activity is expected to encourage further growth. However, sales of Norcliff-Thayer's Oxy outpaced P&G's Clearasil. Clearasil, backed with $5 million in measured media spending, holds a 19.1% share of food store sales, while Oxy has a 21.4% share of the more than $140-million acne preparation category.

P&G's measured media spending for its bar soaps slipped 4.7% to $51.7 million. P&G holds an estimated 35% share of the $1.2 billion category, with its Camay, Coast, Ivory, Lava, Monchel, Safeguard and Zest brands, down almost 2 share points from its 1985 36.9% share of the category.

P&G's 53.1% share of the $3.25 billion laundry detergent business came under increased pressure from Lever Bros.' newly introduced Surf liquid and powder detergent and new campaigns for Colgate-Palmolive Co.'s Dynamo 2, Fab and Fresh Start detergents.

However, P&G's Liquid Tide overtook Lever's Wisk as the leading heavy-duty liquid laundry detergent. Lever soon responded by introducing a reformulated Wisk that "wasn't just for collars."

In 1986, P&G introduced "Clothesline-Fresh" Tide powder to further counteract Lever's floral-scented Surf, as well as an Unscented Tide powder to appeal to consumers who don't want a noticeable scent. P&G also introduced a reformulated Lemon Dash liquid and powder detergent nationally.

In mid-1987 it expanded the test of Cheer Power Pouches from Atlanta, Ga., to Denver, Colo.

P&G supported its detergents with more than $114.5 million in measured media spending, with the Tide flagship brand receiving more than $30 million in measured media support.

The $450 million automatic dishwasher detergent market remains dominated by P&G's Cascade, although the brand for the first time in many years has dipped below a 50% share of the category. New liquid entries from EcoLabs, St. Paul, Minn., and Palmolive from Colgate-Palmolive Co. have taken share away from Cascade, which has responded with its own liquid variety. A lemon-scented liquid Cascade in mid-1987 was introduced into upstate New York test markets. P&G supported Cascade with $18.8 million in measured media support in 1986, up 18.2%.

P&G's Bounce sheet and Downy liquid fabric softener brands continued leading the $550 million category with a 52% share, although Lever Bros.' Snuggle sheets and liquid fabric softeners continued gaining market share with a combined 21.1% share, up from an 11.1% share in 1985.

P&G in August 1986 introduced "Deep Down Soft" Downy Liquid, rolling the reformulated brand nationally by early 1987. P&G currently is testing Bounce StainGard dryer sheets, which contain ingredients meant to help polyester and polyester-blend fabrics resist staining, as well as Downy dryer sheets, the first dryer-sheet extension of the "April Fresh" Downy brand. P&G spent more than $35.7 million in measured media spending, up 46.3%, behind its fabric softener brands.

In light-duty dishwashing liquids, P&G holds a 51% share of the $750 million category with its Dawn, Ivory and Joy brands, up 6 share points from its 45% share last year.

The company put more than $35 million of measured media spending behind the three brands, comparable to last year's support level.

In the $1 billion general household cleaning category, P&G introduced spray-bottle versions of Top Job, Mr. Clean and Spic & Span Pine Fresh into upstate New York test markets.

The cleaners, including Mr. Clean soft-abrasive and Comet cleanser, were supported with $31.5 million in measured media. P&G, the leading household-cleaner marketer, holds an estimated 23.8% of the category.

P&G backed its Citrus Hill franchise with more than $15 million in measured media spending in 1986. The company injected a shot of calcium into Citrus Hill orange juice brand, rolling nationally in mid-1987 Citrus Hill Plus Calcium in orange and grapefruit flavors.

P&G holds an 8% share of the $3 billion category with Citrus Hill, and it expects to increase its share with the new calcium-added variety.

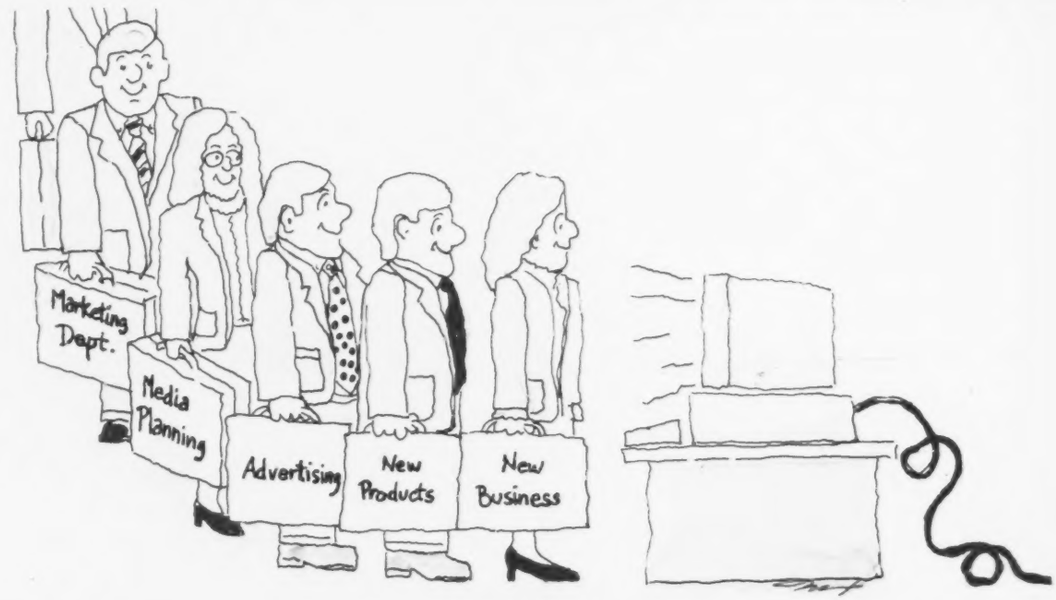
The new brand received the endorsement of the American Medical Women's Assn. (AMWA), and the seal will be carried on Citrus Hill Plus Calcium labels. Coca-Cola Co.'s Minute Maid is the No. 1 orange-juice marketer.

P&G and General Foods Corp. control more than 60% of the instant coffee market, and both are moving new technologies and brands into market. GF is rolling national with Brim Roasted Buds, while P&G is testing Folgers Singles, fresh-roasted and "freeze concentrated" coffee in individual coffee bags, in parts of Maine and West Virginia. With consumer interest skewed toward quick, convenient products, flavor improvements could help reverse a sales decline in the instant coffee market.

Coffee consumption, declining since 1962, now appears to be leveling off. Per capita consumption of instant coffee is about 0.4 cups per day, compared with 1.4 cups of ground coffee.

P&G's Folgers instant and ground coffees have an estimated 16.3% share, while GF brands have a 45.5% share of the $4.5 billion coffee category. The company supported Folgers with more than $38.5 million in measured media spending.

P&G in early 1987 added to its "finger-foods" marketing strategy in the $711 million baking-mix market with the introduction of three new Duncan Hines brownie mixes—turtle brownie, truffle brownie and cherry fudge—and three new "Bakery Style" muffin mixes. P&G ranks second to Pillsbury Co. in overall baking mix sales (including cake, brownie, muffin and bread mixes) and second to General Mills' Betty Crocker brand in the



Get On Line For Fast Ad Data.

LNA Introduces Computerized Multi-Media Systems.

There's never been a faster or easier way to find out who's spending what in which media.

Because BAR/LNA's Multi-Media Service, the only single advertising expenditure database for the seven media,* has just gone on-line.

So whether you're in marketing or media, developing new products or new business — getting on-line with us can put you ahead of the game.

With a few skillful touches of your computer keys, you can scout the competition. Target new clients. Analyze account tactics. Evaluate client strategies. And, because of our flexible software, you won't have to waste time wading through mountains of data to do it.

What's more, you won't have to wait for quarterly or yearly hard copy reports. You'll be on-line with the latest data as soon as we are.

There's simply no other market analysis tool like it.

So get on-line and stop losing time hunting for the vital ad expenditure data you need. Send in the coupon below or call us for all the details on LNA's on-line Multi-Media Systems.

For once, you'll be glad to get on line.

The Definitive Source For Competitive Advertising Data

* Magazines, newspaper supplements, network TV spot TV, network radio, outdoor and cable TV.

Yes! I want to be first on line with LNA's Computerized Multi-Media Systems.

$168 million brownie-mix segment.

P&G supported its Duncan Hines line, excluding its ready-to-eat cookies, with $18.1 million in measured media, down 47.7%.

P&G in late-1986 introduced a reformulated Puritan oil, changing from a soybean/sunflower blend to low erucic acid (glyceride) rapeseed oil, unofficially called canola oil. Puritan holds a 3.8% share of the $823 million salad oil category. As the leader in the category with a 21% market share, Crisco gets close to $15 million in measured ad spending annually, with another $20 million going to Crisco shortening.

P&G's Crush, Hires and Sundrop soft drink lines hold an estimated 2% of the $39 billion soft drink category, although Orange Crush is said to hold a 19% share of the orange-flavor segment. Crush was supported with more than $6 million in measured media spending last year. P&G sold its bottling operation to Johnson Coca-Cola Bottling Group.

In the $300 million cough remedy category, leader A.H. Robins Co.'s Robitussin and No. 2 Vicks Formula 44, a product of P&G's Richardson-Vicks unit, together have more than a 55% market share. R-V's Nyquil remains the leader in the $800 million cold remedy market with an estimated 12% share, followed closely by Burroughs Wellcome's Actifed and Sudafed brands, which together hold a 20% share of the category. Vicks cough drops hold 16% of the $1.25 million cough drop category. P&G supported its cough-cold remedies with more than $25.7 million in measured media spending.

P&G in mid-1986 discontinued marketing Encaprin, an encapsulated pain reliever which never managed to earn more than a 1% share of the $1.6 billion analgesic category.

Tomorrow'' brought to three the number of soap operas P&G has canceled in the last three years, joining ''Texas'' and ''The Edge of Night.'' P&G, like other major TV producers, is feeling the squeeze of higher production costs and network pressure to cut license fees. Industry sources believe P&G will get out of soap-opera production entirely, but will not give up its dominant position in daytime network TV.

B. Jurgen Hintz was named group VP with responsibility for beverage and food products, crushed products and soft drink bottling, succeeding Gerald V. Dirvin, who was named group VP overseeing paper and patient-care products, and worldwide coordination of the company's disposable diaper business. Mr. Dirvin succeeds Sanford G. Weiner, who died. Robert T. Blanchard was elected to succeed Mr. Hintz; he previously was VP-northern Europe.

Quaker Oats Co., represented by the pacifist ''Quaker man'' for a century, went cheerfully to war this year, boosting its marketing budget by almost 37% to fight off competitors and take new turf.

Quaker says it spent $961.1 million worldwide on marketing and advertising in fiscal 1987, up 36.6% over the prior year, according to its 10-K. Measured media and unmeasured advertising forms in the U.S. account for about 32% of the total, according to AD AGE estimates.

Quaker's aggressive plans were signaled by its acquisition of Golden Grain, San Leandro, Calif., and Anderson, Clayton & Co., Houston. The Golden Grain purchase, for $278 million, gave Quaker Rice-A-Roni and Noodle-Roni.

Chairman-CEO William D. Smithburg paid for Golden Grain in part by selling Quaker's specialty retailing business. The division, made up of Jos. A. Banks Clothiers, Brookstone and Eyelab, had difficulty competing with larger chains that enjoyed greater economies of scale.

With the acquisition of Anderson, Clayton's pet food lines (Quaker sold Anderson, Clayton's food businesses—Chiffon margarine, Seven Seas et. al.—to Kraft in May 1987), Quaker became the No. 2 U.S. marketer of pet food, behind perennial leader Ralston Purina Co., St. Louis.

Quaker's position in the growing premium canned dog food segment was boosted with the acquisition of Anderson, Clayton's Gaines line. Quaker's lead line has been Ken-L-Ration.

Quaker also bought Kretschmer Cereals, maker of Kretschmer Wheat Germ, from International Multifoods Corp. in November at an estimated price of $40 million. The sales and acquisitions reflect Mr. Smithburg's intention of returning to the core food business, and focusing on No. 1 and No. 2 brands.

The exception to the food-only rule is Quaker's Fisher-Price unit, one of the company's biggest success stories. Fisher-Price, producer of infant and pre-school toys, is searching out pre-teens with the new PXL 2000 camcorder, a toy that allows children to create their own 15-minute, b&w videos. The camcorder, to be introduced to shoppers this Christmas, will be marketed with a 4½-inch TV, which can be used as a monitor or as a standard TV. Fisher-Price predicts the pricy $200 system will be a best-seller.

Despite the vitality of the Fisher-Price division, Quaker continues its policy of focusing primarily on its U.S. Foods division, protecting its traditional turf and carving out new territory.

Quaker fired a shot at General Mills this year when it rolled national with its Ohs! cereal—a ring-shaped ready-to-eat product directly based on Big G's Cheerios. The Minneapolis-based food giant volleyed back hard, announcing plans to enter the $500 million hot cereal market with Total Oatmeal. General Mills plans to stress Total Oatmeal's vitamin fortification in an $24 million introductory campaign.

The new Total hot cereal was to include an on-box comparison with the vitamins and minerals in Quaker oatmeal, but Quaker scotched that with a lawsuit charging unfair use of its trademark. In an out-of-court settlement, General Mills agreed to stop using the ''Quaker man'' logo without a disclaimer. Quaker also announced plans to fortify one flavor of its Instant Oatmeal, countering Total Oatmeal's claim to ''more nutrition than any hot cereal.''

In the wake of the Total Oatmeal announcement, Quaker shot back with a $45.6 million hot cereal campaign, with Wilford Brimley as its new celebrity spokesman. Quaker denied any connection between the Total Oatmeal threat and the decision to make a 76% increase in TV spending behind hot cereal.

Quaker also beefed up advertising behind Gatorade, targeting the ''point of thirst'' in sports-related promotions and TV spots. That strategy has taken Gatorade from a $90 million-a-year business (which it was when acquired in the 1984 purchase of Stokely-Van Camp) to a brand with $300 million in annual sales. Gatorade benefited this year from the rollout of a lemon-flavored line extension. Quaker also announced plans to expand the category with Refresh, a lightly carbonated drink containing 25% fruit juice.

Bayer, Bess, Vanderwarker & Flynn, the Chicago agency that handles Gatorade, was one of the winners in a reshuffling of accounts following a slew of mergers. Jordan, McGrath, Case & Taylor, New York, took on hot cereals and some pet foods when BBDO merged with DDB Needham Worldwide, which handles a large amount of General Mills business.

Quaker also moved an estimated $55 million in business from Backer & Spielvogel when it was acquired by Saatchi & Saatchi. The Saatchi takeover rankled Quaker because other Saatchi agencies handle a combined $150 million in business for General Mills. In the shuffle, Bayer, Bess won Cap'n Crunch, Corn Bran, Ohs! and Kretschmer Wheat Germ.

Quaker lost ground in the cold cereals market in 1986, dropping from 7.7% of the dollar market in 1985 to 7.4% in 1986, according to John C. Maxwell Jr., analyst with Furman Selz Mager Dietz & Birney, New York. Cap'n Crunch remained its leading player with a 3.1% share of market for both years.

There was some shuffling in-house at Quaker as well. With the resignation of Hedric E. (Pete) Rhodes, exec VP-U.S. Foods, Quaker decided to reorganize its entire U.S. and Canadian Grocery Products area. The U.S. Foods area now is limited to cereals and convenience foods. A new unit, Grocery Specialties and Market Development, was added; the new unit includes responsibility for U.S. grocery product sales. The Diversified Grocery Products continues to have responsibility for pet foods and foodservice, and takes on the Golden Grain division.

Other products	386	143	170.0

Ralston Purina, which started life in 1894 as an agricultural animal feed company, a few years ago began transforming itself into a consumer package goods company. Last year, with the $1.42 billion purchase of Eveready Battery Co. in June, followed by the jettisoning of its domestic agricultural products subsidiary in October, the process seemed nearly complete.

Chairman William Stiritz says more than half of Ralston Purina's assets have been added since 1984—and businesses that made up 28% of its assets at that time have since been divested. He says branded consumer products are expected to account for at least 90% of operating profit in the near future, up from about 70% three years ago.

The purchase of Continental Baking Co. in 1984 and Eveready last year also helped reduce the company's reliance on the $5.6 billion pet foods category, generally regarded as a mature market. Ralston Purina leads the industry with a 27.3% share, according to analyst John C. Maxwell Jr., of Furman Selz Mager Dietz & Birney, New York. However, it faces tough competition from Quaker Oats Co., which vaulted into pet foods' No. 2 slot when it added Anderson, Clayton & Co.'s Gaines products to its lineup late last year.

Ralston made a bid for Anderson, Clayton, too, but Quaker topped its offer in what one analyst described as a defensive move. Had Ralston acquired Anderson, Clayton, it would have controlled 33.5% of the pet food market, nearly three times the share of the next competitor, Nestle's Carnation unit. Some observers think the Federal Trade Commission would have nixed the deal, and they say Ralston dropped out of the contest because it feared a long antitrust dispute. Others say Ralston simply didn't want to pay a premium price for Anderson, Clayton, which cost Quaker about $800 million.

Ralston Purina's ad spending in measured media dropped 16.4% to $178 million in 1986. Spending was noticeably down or absent in 1986 for Purina cat food in which measured spending dropped 32% to $27.2 million, the divested Jack in the Box restaurants on which Ralston spent $13.2 million in measured media in 1985, and S'mores Chewy Granola Bar, discontinued in 1986 after Ralston spent $7.6 million in measured media on the product in 1985.

The biggest part of the decline came from network TV, down 24% to $97.6 million.

The $3.45 billion dog food market grew only slightly last year, but Ralston continued its strategy of trying to grab extra shares by segmenting the market and placing products in as many niches as possible, especially at the high-margin levels. Since January, it has introduced Purina Gravy (to compete with Gaines' Gravy Train), Purina O.N.E., a superpremium dry dog food, and Purina Pro Plan, a superpremium line of cat and dog foods sold through veterinarians' offices and specialty outlets. Bone Appetit, Ralston's first entry in the canned dog food category, seems to be stalling out. It has been in test in Houston and Pittsburgh since March 1986. Ralston spent $53 million in seven measured media on dog food, about same as in 1985. The heavy ad expenditures went to Chuck Wagon, Dog Chow, Hi Pro, Kibbles & Chunks, Lucky Dog and Puppy Chow.

The $2.17 billion cat food market faces a healthier outlook, with growth pegged at about 5% this year and beyond. Ralston's Cat Chow maintained its dominance of the dry segment in 1986, and Alley Cat made strong gains. The company introduced a new premium dry food, Smart Cat, in November. Cat food pulled $27.2 million in measured spending, with the larger chunks backing Tender Vittles, Meow Mix and Cat Chow. Cat food pulled $40.1 million in measured spending in 1985.

Pet foods generated nearly $1.4 billion for Ralston in fiscal 1986, but bakery products are its biggest business, with sales of $1.66 billion. Ralston's Continental Baking Co.—the nation's largest wholesale baker of fresh goods—introduced several new products in the past year, including Wonder Light bread and Wonder Soft 100% Whole Wheat, Wonder Family Italian, Hostess Choco-Bliss snack cakes and Hostess Chocolate Pudding Pies. As an extention of Wonder Bread, which received $6.2 million in measured advertising in 1986, down 15%, Wonder Light got $2.5 million. Home Pride Bread, however, was the largest advertised bread at $7.6 million, up 73%. The entire Hostess line received $14.3 million, up 51%.

According to Bakery '86 Red Book, published by Chicago-based *Bakery Production & Marketing* magazine, breads contribute 45% of Continental's sales; rolls and buns 15%; cakes 15%; doughnuts 10% and pies 5%. Continental leads the bread market, followed by Anheuser-Busch's Campbell Taggart.

Meanwhile, Hostess leads the $1.24 billion snack cakes and pies segment with dollar sales estimated at more than 30%, but this highly competitive category saw only a 2% growth in 1986, according to *Snack Food* magazine.

In March Ralston took the last two Continental accounts away from Ted Bates, New York (now Backer Spielvogel Bates), and gave them to Tatham-Laird & Kudner, Chicago, which got Hostess, and Grey Advertising, New York, which took the Beefsteak bread account. Wonder Bread had moved from Bates to TLK in May 1986.

Ralston recently resold Wayne, N.J.-based Drake Bakeries Inc. to a management group just a year after picking it up from Borden Inc. The price of the leveraged buyout was $176 million. Ralston paid $115 million for Drake in July 1986. An antitrust suit filed by Philadelphia-based Tasty Baking Co. had prevented Ralston from integrating the regional snack cake company into its Continental Baking subsidiary.

Eveready Battery Co., which Ralston bought from Union Carbide in June 1986, leads an industry that's growing at 7% to 9% per year, and some analysts believe it will become Ralston's biggest business in the future. Industry sales, now at nearly $3 billion, are expected to top $3.8 billion by 1990. Ralston claims to own 60% of the domestic dry-cell battery market and 30% worldwide, with Dart & Kraft's Duracell the only major competitor.

Eveready will bring out two new products for Christmas: the Energizer Gift Mate, a battery with a holiday-decorated casing to be used as a gift companion and Clear Mate, a standard-size flashlight with a clear plastic body. Eveready received $25 million in measured ad backing in 1986, compared with $27.6 million under Union Carbide in 1985.

Ralston is the fifth largest cereal marketer behind Kellogg, General Mills, General Foods and Quaker Oats. It commands a 6% brand share of the $5 billion cold cereal market, says analyst John Bierbusse of A.G. Edwards & Sons, St. Louis. Ralston is one of the industry's largest producers of private-label cereals.

During 1987 Ralston introduced Fruit Islands, a presweetened cereal for children, and Honey Graham Chex, an all-family cereal. The company appears to be moving away from licensed children's cereals, having recently discontinued Rainbow Brite, Ghostbusters, Nerds and Cracker Jacks. Ralston put Chex Snack Mix into national distribution in April, but abandoned the granola bar market by dropping its only entry, S'mores Chewy granola bars. Chex cereals are backed more extensively than other Ralston cereals, receiving $7.5 million in measured media in 1986, up 71%.

Seafood, which accounted for $270.8 million in company sales, isn't getting much ad play at Ralston. Chicken-of-the-Sea tuna's market share has dropped steadily from 31% in 1981 to less than 20% last year, and no agency currently is assigned to the brand. Heinz' Star-Kist, which has been gaining ground gradually, last year controlled an estimated 36% share of the $1.4 billion market.

Revlon Group

New York

($ in millions)

Worldwide	1986	1985	% chg
Sales	2,600	2,120	22.6
U.S. advertising	149	179	(16.6)

Molding, shaping, streamlining—words that apply to cosmetics use also apply to the corporate activity of this cosmetics giant one year after a daring takeover by Ronald O. Perelman, then chairman and ceo of Pantry Pride Inc.

Mr. Perelman's commitment to molding, shaping and streamlining Revlon Group's presence in the market seems to be paying off, as Revlon, which is second only to Avon in mass market cosmetics, improved its share of supermarket dollars in 1986.

According to Salomon Brothers cosmetics industry analyst Diana Temple, Revlon continued to improve its food store share into the first quarter of 1987. Nail polish share rose to 12.3% from a 10.7% share in 1986 and 9.7% share in 1985. Lipstick share increased to 12.7% during the first quarter; it had been 11.6% in 1986 and 10.6% in 1985. Face cream share, which was 3% in 1986 and only 1.5% in 1985, continued its market gains into the first quarter of this year. Revlon's improved performance in individual product categories applied as well to the success of its Natural Wonder line, according to Ms. Temple.

Natural Wonder received $1.3 million in measured media spending in 1986, and Revlon mascara got the single largest measured push of all products in 1986 with $4 million in spending, according to BAR/LNA.

A new campaign for Revlon, designed by photographer Richard Avedon, debuted in December. The theme is "The most unforgettable women in the world wear Revlon." Several older products have been revived or rejuvenated to lend additional familiarity to the famous Revlon name. Charlie, the 13-year-old mass market fragrance, remains a best-seller in the $2.5 billion retail fragrance market, as it continues to appeal to a target audience of women in their 20s. Charlie moved to a new agency last year, Hill, Holliday, Connors, Cosmopulos, New York, and was supported by $3.6 million in measured spending. Charlie had previously been handled in-house.

A dormant fragrance was revived when Revlon relaunched a reformulated version of Intimate in April 1987. The fragrance is being promoted to a 10-to-20-year-old audience, backed by a $5 million advertising budget. A musk version of Intimate was introduced a year earlier.

Scoundrel fragrance received a younger, "naughty girl" spokeswoman: Soap-opera actress Susan Lucci of "All My Children" replaced actress Joan Collins.

Mark Goldstein was named Revlon's new VP-marketing, worldwide fragrances/skincare products. Under his leadership, Revlon is seeking to find market niches for the company's 10 fragrance brands that are specific enough not to cannibalize each other.

Two new fragrances were launched under the Borghese banner's new Giardini de Montecatini line in March of this year.

Revlon made a foray into the children's market in February 1987 when it unveiled Care for Kids Mousse baby shampoo, plus personal-care implements such as toenail and fingernail scissors. Joan Lunden, co-anchor of ABC's "Good Morning, America" was signed as spokeswoman. The category is led by Johnson & Johnson's Baby Shampoo, which holds an impressive 5%-plus share of the overall $3 billion haircare category.

After acquiring Max Factor, Almay and Halston a year ago from International Playtex, Revlon has continued to add to its holdings. To that end, J. Eric Hanson was named senior VP-mergers and acquisitions. He had held a similar position at Hanson Industries.

During its flurry of acquisitions, Revlon settled a dispute that had been simmering since the buyout. Two of the three principals who had bid for the Revlon business and had lost to Mr. Perelman and his holding company, McAndrews & Forbes, received $21.3 million from Revlon to resolve all claims to the company and to end all litigation. The third principal, the investment firm of Adler & Shaykin, agreed to accept $23.7 million from Revlon to settle its claims.

Revlon made an unsuccessful bid to acquire the 86.1% share of the Gillette Co., Boston, that it did not already own, for between $3.8 billion and $4.1 billion. Gillette dug in its heels and managed to wrestle out of the deal, though at some cost. According to the terms of the agreement hammered out between the two personal-care product companies, Gillette paid Revlon a premium of $558 million to buy back its own stock from Revlon, which amounted to 13.9% interest. Revlon, which netted $34 million in the arrangement, promised not to buy Gillette stock for the next 10 years. Despite the agreement, Mr. Perelman made yet another attempt in August 1987 to purchase Gillette.

Gillette wasn't Revlon's only target. The company in 1986 tried to take over Transworld, a hotelier and food vendor, and CPC International, a food processor.

Successful bids didn't come until March 1987, when Revlon completed its acquisition of the Germaine Monteil subsidiary of Beecham Group PLC, a U.K.-based multinational company. Beecham had for some time been sending out signals of its intent to sell U.S. Germaine Monteil because it felt the unit had not been performing up to par. The Monteil acquisition marked the second time in a year that Beecham and Revlon did business. Beecham purchased Revlon's Norcliff Thayer subsidiary a year earlier for $395 million.

In June 1987, Revlon set its sights on the major brands of the Charles of the Ritz division of Yves St. Laurent International S.A. Soon to be finalized, the deal gives Revlon ownership of such brand names as Alexandra de Markoff cosmetics, which are sold in department stores, and mass market lines like Jean Nate, Enjoli and the Dynasty fragrances, in addition to the Charles of the Ritz product entourage. Revlon already has agreed to sell one of its soon-to-be-acquired names from the purchase, the Bain de Soleil sun treatment line, to Procter & Gamble's Richardson-Vick's division for an estimated $125-$150 million.

Not neglecting its vision-care segment in 1986, Revlon bought Frigitronics Inc. of Shelton, Conn., for about $116 million. Frigitronics, specializing in eye-care and surgical products, fits well in Revlon's existing Barnes-Hind and Coburn Optical subsidiaries.

In personnel changes, Arthur I. Cohen became exec VP-advertising of the Revlon Beauty Group, replacing Sanford Buchsbaum, who left to form his own agency, Stevens & Buchsbaum. Arnold Zimmerman became president of Revlon Beauty Group I, replacing Ben Sottile. His goal will be to restore Revlon to a premier position in department stores.

Since F. Ross Johnson was named ceo of RJR Nabisco in August 1986 the tobacco and food company has been in a state of perpetual change. The company headquarters is being moved to Atlanta, Heublein Inc., the wine and liquor business, has been sold, the corporate structure reorganized, and RJR announced test of a smokeless cigarette.

When the move from Winston-Salem, N.C., to Atlanta, to be completed this month, was announced in January 1987, it prompted speculation that tobacco would no longer be RJR's dominant industry. RJR, however, says the move is for administrative reasons. "RJR Nabisco needed to assume the role of a holding company, a separate parent company, to give the individual units more flexibility and elbow room," says a spokesperson.

RJR also has experienced extensive internal changes since the beginning of the year. Two months after Mr. Johnson, the former Nabisco president, became RJR Nabisco's new chief, his predecessor J. Tylee Wilson announced he would resign his post as chairman several months earlier than expected. Mr. Wilson had originally planned to continue serving as chairman of RJR until June 1988. RJR would not elaborate on Mr. Wilson's early departure, but other industry sources say Mr. Wilson had become little more than a figurehead in the wake of Mr. Johnson's sweeping changes.

Shuffling continued in March 1987 when retired RJR executive J. Paul Sticht was brought back to succeed Mr. Wilson as chairman. Many say the appointment of Mr. Sticht was made, in part, as a stabilizing influence in the months of changes.

The company kept homing in on its tobacco and food business in 1986 and early 1987, as it continued to divest fastfood and non-tobacco operations. It sold Kentucky Fried Chicken to PepsiCo, Canada Dry and Sunkist to Cadbury Schweppes PLC in 1986, and in early 1987 sold Heublein Inc.

These divestitures have influenced RJR Nabisco's 20% decline in measured advertising spending in 1986 from 1985, while RJR Nabisco recorded worldwide sales up 29% over 1985 and a 19.1% growth in net earnings from continuing operations. The year-to-year difference of $131.1 million between 1986 and 1985 spending in the seven media monitored by BAR/LNA is basically accounted for by the absence of spending in 1986 of the divested operations. Gone from the 1986 spending totals was Kentucky Fried Chicken, which spent $76.4 million in 1985, and Canada Dry and Sunkist fruit drinks, which recorded expenditures of $12.4 million and $7.2 million, respectively, in 1985.

During 1986, RJR remained the No. 2 U.S. cigarette marketer with 32.4% of the market, up from 31.6% last year. The small share gain was the company's largest annual increase since 1975. Philip Morris Cos. widened its lead slightly, growing from 35.9% to 36.8%. Sales on the tobacco side at RJR were up 6% to $4.7 billion and earnings from operations reached $1.4 billion, up 13%.

However, none of Reynold's major brands scored significant share increases in 1986, as measured advertising on most brands declined. Winston's market share dropped from 11.4% in 1985 to 11.3% in 1986. Winston Lights Box 100s was introduced and distribution of Winston Lights Box King cigarette was expanded to become available to consumers throughout the country. The company spent $42 million in measured media advertising the Winston brand, down 13.4%, according to BAR/LNA, which monitors seven media.

Spending on all cigarette brands actually is a good deal higher than BAR/LNA, because RJR Nabisco spends heavily ($50.4 million) in national newspapers—a popular cigarette medium—which is not broken out into brand spending by Media Records, the monitoring service for newspapers.

Vantage cigarettes' share dropped from 3.3% to 3.2%. Vantage introduced new packaging in an effort to bolster the brand's high-quality contemporary image. Measured media spending was $35.5 million for Vantage, down 9%.

Doral, the country's first branded cigarette to sell at generic level prices, had strong results with sales up almost 70% from last year, now holding 2.1% of the overall cigarette market. In January 1987, Reynolds Tobacco USA introduced Doral in three new styles—Doral full-flavor 85s, Doral full-flavor 100s and Doral ultra-lights 100s. Measured spending was only $280,000 in 1986.

Century, the first U.S. brand to offer 25 cigarettes at the same price as traditional 20-packs is outselling all other 25-per-package brands. The success of Century and Doral made Reynolds Tobacco USA the leader in the savings segment with a 33% share of market. Reynolds spent $3.5 million on Century, down from $11.4 million in 1985.

In the market segment targeted to consumers seeking the lowest possible tar and nicotine levels, Reynolds Tobacco USA's share increased 1.9 points due to the performance of Now cigarettes. Now drew $24.8 million in measured advertising, up 15.9%. It achieved a 1.16% share of market, up a tenth of one per cent from 1985.

Camel's share held at 4.3%. In March 1987, Camel Filter 100s were introduced in selected sales regions representing about 28% of the country. The Camel brand received $20.7 million in measured

spending, down 39.1%. More received $19.3 million in measured ad spending, down 27%, as market share rose to an estimated 1.4% from 1.3% in 1985.

Also in March 1987, Reynolds Tobacco USA began test marketing Magna in the savings segment of the cigarette market. The brand, introduced in 10 areas of the country, is available in full-flavor, box and lights styles. Tests also will begin in 1988 on perhaps RJR's most revolutionary product—a "smokeless" cigarette. When lit, warm air is emitted from a carbon segment at the tip of the cigarette and passes through tobacco, tobacco extract, flavorings and glycerine before exiting as smoke to be enhaled by the smoker.

Salem, the nation's leading menthol cigarette, also dropped from 7.9% to 7.8%, while measured advertising dropped 10% to $32.4 million for the brand.

The foods line of business includes operations of Nabisco Brands Inc. and Del Monte Corp. Food sales were $9.2 billion, up 49% from last year, an increase principally credited to the inclusion of a full-year of results from Nabisco Brands Inc. Earnings from operations increased to $820 million vs. $549 million the previous year.

Heublein, the beverages unit was sold in early 1987 to Grand Metropolitan PLC, the British conglomerate, for $1.2 billion. Heublein had been profitable, and a spokeswoman for RJR says the sale reflected the company stategy to focus on tobacco and food operations. "We want to home in on what we do best," she says.

Nabisco Brands introduced 18 new cookie and cracker products, presented under the heading of New Stars. They include two new crackers, American Classics and Quackers, as well as several line extensions such as Fudge Covered Oreos and new flavors of Almost Home. RJR Nabisco spent $284.1 million in measured spending advertising food products, according to BAR/LNA.

Nabisco backed its crackers with $31.8 million in measured advertising, with Wheat Thins ($9.3 million), Ritz Crackers ($9.4 million) and Better Cheddar Crackers ($5 million) drawing the larger expenditures. Cookies received $38.3 million in 1986, up 18.9%.

Nabisco Shredded Wheat, backed with $19.4 million in measured spending, up 61.7% from the prior year, built its dollar market share in cold cereals from 4% in 1985 to 4.1% in 1986, while the other participants in the category, Shredded Wheat 'n Bran and 100% Bran, maintained their cumulative 0.9% share.

Del Monte measured spending dropped 5.7% to $24.7 million, with Fruit Snacks receiving the largest backing—$10.6 million ($4.2 million in 1985) among the brand. Del Monte pulled back from spending in the "trend" areas such as Lite Canned Fruits, $3.5 million in 1986, down from $7.1 million, and Salt Free Canned Vegetables, down to virtually nothing from $4.7 million in 1985.

In confectionaries, Nabisco maintained its joint promotion for Butterfingers and Baby Ruth candy bars with $7.5 million in measured spending, although the expenditure was down 9.6%.

Carefree gum pulled the big ad dollars among chewing gums with $10.5 million, the same as in 1985. Bubble Yum, regular bubble gum and sugar-free, received $4.2 million, down 26.3%. Life Savers regular candy and sugar-free pulled $8 million, up 5.3%.

Planters line of nuts was backed with $11.6 million in measured media, up from only $3.7 million in 1985.

A-1 Steak Sauce continued to be heavily advertised, at levels just above $12 million for both 1985 and 1986.

There were no advertising account moves in 1987 among Nabisco agencies.

RJR's tobacco products did see some account shifting though, with the Salem account moving from William Esty Inc. to FCB/Leber Katz Partners, NY. More went to Young & Rubicam, N.Y. from FCB/Leber Katz Partners. Ad spending for tobacco products was $179.9 million.

In June 1987, RJR announced H. John Greeniaus, exec VP of Nabisco Brands Inc., and president of International Brands, had been named president-ceo of Nabisco Brands Inc., and president-ceo of R.J. Reynolds Tobacco USA and had been given the additional title of chairman of R.J. Reynolds Tobacco USA.

Mr. Greeniaus reports to James O. Welch Jr., vice chairman of RJR Nabisco and chairman of Nabisco Brands Inc. Charles J. Chapman, previously president and chief operating officer of Nabisco Brands, was named to the new position of president, Nabisco Brands North America. Replacing Greeniaus as president of International Nabisco Brands is Peter N. Rogers, previously president of Nabisco Brands USA.

RJR assigned the Planters & Life Savers operation to R.J. Reynolds Co. from its current reporting structure in Nabisco Brands USA. The Planters and Life Savers business is headed by Martin L. Orlowsky, president, who reports to Edward A. Horrigan, vice chairman of RJR Nabisco and chairman-ceo of R.J. Reynolds Tobacco Co.

In addition, Del Monte Corp. will report to Mr. Welch. Del Monte, headed by President and Chief Operating Officer Paul J. Bott, previously reported to Robert J. Carbonell, senior exec-VP and chief administrative officer, RJR Nabisco.

Continuing to develop more of the value-added products for which it is noted, Sara Lee Corp. in 1986-87 claimed market-share leadership in several major categories.

Sara Lee, whose total U.S. advertising spending dropped 5% in 1986 to $271.6 million, largely because of cutbacks in print, claims market leadership in its big categories—frozen baked sweet goods, Hanes and L'eggs women's hosiery, Jimmy Dean and Hillshire Farm sausage and Kiwi shoe-care products. In other areas, its ranking is either very high, as in Hanes men's underwear (where it is No. 2 to Fruit of the Loom) or it has a high-profile position in its field, as in Fuller Brushes, Coach Leatherware, Electrolux vacuum cleaners, Aris Isotoner gloves and Bali bras.

The big marketing push at Sara Lee is on branded products. And the company is moving to use its full spectrum of distribution channels and interconnects its companies to gain efficiences.

For example, Hanes Hosiery, Winston Salem, N.C., recently applied New York-based Aris Isotoner's lycra-spandex stretch fabric to making women's panty hose. And rather than seeking exposure through national media, leaving the local promotion to local retailers—the more common hosiery-marketing practice—Hanes went directly into 20 markets across the U.S. with outdoor, both painted and poster, plus local market magazines such as city magazines. Start of the $1.6 million campaign was in October 1986; both Long Haymes & Carr, Winston Salem, and DFS Dorland (now Saatchi & Saatchi DFS Compton), New York, have contributed to Hanes Isotoner advertising.

In January 1987 Bali began test marketing what it terms a "revolutionary" new line of four brassieres and three pant-

Get a clear shot at your target market in Florida.

If your media buy in Florida works on a "Hit or Miss" strategy — odds are you're going to get burned. The Tampa Tribune puts you right on target.

Compared to other Tampa Bay newspapers, The Tampa Tribune has:

- more 25-49 year old readers
- more readers in top level occupations
- more readers with a $35,000+ employment income
- more food buyers spending $150+/week
- And a 95% exclusive readership

In Florida's #1 market — in terms of population, households and effective buying income — The Tampa Tribune is the clear choice.

To reserve your ad, call General Advertising Manager Joe Gess, at (813) 272-7447.

The Tampa Tribune

©The Tampa Tribune, 1987

ies made of Isotoner fabric. Current testing is in Boston, Dallas and San Francisco, where local magazine print carries the message. In Boston, TV is supplementary. Saatchi & Saatchi DFS created the advertising.

At L'eggs, a reverse cross-breed is underway. That big hosiery maker, in marketing its first-ever non-hosiery product, is expanding its Sheer Energy pantyhose technology to gloves that gently massage the hands. The gloves carry the Sheer Energy brand and will debut in November 1987. Saatchi & Saatchi DFS Compton is the agency for L'eggs, along with Burrell Advertising, Chicago. And the same tough standards that Inspector 12 applies to Hanes men's underwear now go for the new line of Hanes Her Way ladies cotton panties, Hanes' first entry in women's undergarments. (Hanes says about 70% of its men's underwear is now purchased by women.) Ads, in print, from Long, Haymes & Carr, kicked off in May 1987.

Integration also has come to the company's food units. Kitchens of Sara Lee, Deerfield, Ill., in July 1987 introduced its Sara Lee Snacks, five varieties of microwaveable, single-portion, hand-held entree or sandwich items. These are sold retail at convenience stores for "a meal on the go." Also in July this year, piemaker Chef Pierre Inc., Traverse City, Mich., introduced for foodservice use an eight-item line of microwaveable, hand-sized "sandwiches to go." They include four breakfast items with eggs and four lunch versions such as a reuben complete with corned beef and sauerkraut. In addition, Chef Pierre made a July 1987 introduction of its frozen foodservice Tarts, a line of four hand-sized desserts in raspberry, blueberry, peach and lemon.

Sara Lee's meat companies also are moving onto the convenience store carryout counter. Hi-Brand Foods, Peachtree City, Ga., is marketing its Burger Fleet 100% beef patty in a bun and its line of 12 Biscuit Fixin's sandwiches in a biscuit, both microwaveable.

Underlying these product integrations are Sara Lee's moves to begin coalescing its companies into workable product groups. The company transferred the marketing and sales responsibilities of Chef Pierre to Kitchens of Sara Lee in 1987. Both operations make frozen baked goods. Rudy's Farm, Nashville, Tenn., packer of a line of sausage and biscuits, now includes in its jurisdiction R.B. Rice of Summit, Mo., a sausage packer. Hillshire Farm Co., New London, Wis., and Kahn's & Co., Cincinnati, cooperate in advertising and other marketing efforts. With Jimmy Dean they are Sara Lee's national meat marketers in contrast to the corporation's many regional retail and foodservice meat suppliers. In mid-1987, two Sara Lee packers of Italian-style and other processed meats, Gallo Salame, San Francisco, and Galileo Capri Salami, San Lorenzo, Calif., combined operations to form a new company, Gallo/Galileo Salame.

This July, Sara Lee pulled together three of its companies into a strategic business unit called Hosiery Group of Sara Lee Corp., based in Winston-Salem, N.C. Participants include Hanes Hosiery, L'eggs and Hanes DSD, the latter a distributor of L'eggs and other Sara Lee and non-Sara Lee products. Chairman/ceo is Weldon Schenck, who moves up from the presidency of Hanes Hosiery. President/chief operating officer is Walt Pilcher, formerly L'eggs president. John Piazz, former L'eggs marketing VP, is the new L'eggs Products president, and Phil Hiscock is new Hanes Hosiery president, moving from the same post at Hanes DSD.

In a related efficiency move that crosses business segment lines, Fuller Brush Co. moved its headquarters from North Kansas City, Mo., to Winston-Salem to take advantage of the efficiencies of growing Sara Lee operations there, which, for example, include in-house advertising services.

Most Sara Lee divisions showed strong growth in operating income for 1987. For U.S. Consumer Foods, Sara Lee's biggest segment, operating income was up 40.7% to $184.9 million. Consumer Personal Products bettered its operating income figure by 23.5%, rising to $178.6 million in 1987. International Consumer Foods made a 39.3% jump in operating income to $98.1 million. Consumer Household Products made a modest operating income gain, rising 2.4% to $120.4 million. Foodservice was almost flat in operating income, making about $49.8 million both years.

In acquisitions, Bil Mar Foods, Zeeland, Mich., was acquired in May 1987. Bil Mar, with distribution in the Midwest, produces Mr. Turkey brand turkey products and other table-ready meats at retail and Bil Mar brand for foodservice customers. Seitz Foods, a Midwest luncheon meat and hot dog producer based in St. Joseph, Mo., was acquired in July 1987.

Other additions were Green Hill Inc., a sausage-maker selling in the Mid-Atlantic region; Landlock Seafood Co, which distributes fresh and frozen seafood; Ralston Foodservice, added to Standard Meat Co.; Ozark Salad Co., added to R.B. Rice, and Wolferman Inc., Kansas City, Mo., an English muffin maker.

After divesting six branches last year, Sara Lee's big entry in the $73 billion foodservice industry, PYA/Monarch, based in Greenville, S.C., added four new distributors.

In December 1986, Sara Lee acquired the 86% balance of Nicholas Kiwi of Australia not acquired in its 1984 purchase. Kiwi sells in more than 145 countries. Sara Lee is working to make its personal care and household care line mesh with Intradal, the Dutch personal-care products producer which is strong in Europe.

Early in 1987, Sara Lee bought 24% of Europe's biggest hosiery maker, DIM S.A., Paris, for $86 million.

Sara Lee's big divestment was its sale in January 1987 of Popsicle Industries Inc., Englewood, N.J., to Gold Bond Ice Cream Inc., Green Bay, Wis. for an undisclosed sum. Popsicle is the market leader with about a 17% share of the frozen novelty confection field. A Sara Lee source explains that frozen confections, with their need for a dedicated distribution system and an extra-cold environment, did not fit in with the company's systems for frozen baked goods.

While personal products advertising was off for the year, food advertising dollars were strong. Popsicle spending, in the Sara Lee count for the last time in 1986, was $6.7 million, up 15% from 1985. The company's commitment to Popsicle's success was evident in the measured media backing it gave, 66% higher than 1986 spending of $4.02 million for its new Bagel Time bagel entry (that product's first full year of spending) and 1% higher than combined spending of $5.98 million in 1986 for Kitchens of Sara Lee's brand new Hearty Fruit Muffins, its croissants, frozen cakes and other desserts. Kitchens of Sara Lee in 1987 holds a 39% share of the frozen baked sweet goods market, up from 38% in 1986.

The bulk of the bagel spending, up nearly fourfold from 1985, was for network TV. Croissant ad spending, largely on network TV, was down sharply in 1986, to $1.98 million vs. $6.1 million in 1985.

Sara Lee's meat expenditures jumped an impressive 71% to $25.4 million in 1986. The advertising relies heavily on spot TV because most of the producers are regional. The national meat companies among them spend heavily on network TV. Hillshire Farms spent $8.8 million on network TV, promoting products including its new 6-inch bun-size wieners and its new Mild and Country Smoked Bacon packed in convenient one-pound sizes.

For 1986, Hanes and L'eggs hosiery advertising was down 31%, to a combined $42.3 million. Separately, Hanes spending was off 29.3% to $16.6 million, and L'eggs was down 32.4% to $25.7 million. The L'eggs hosiery lines currently hold a 48.6% share of market, compared with 47.9% a year ago. Hanes hosiery is the leader in department and specialty stores and currently holds a 40% share of market, down from 42.4% in 1986, a drop that reportedly puzzles Hanes management since shipments have been high. Bali spending dropped 150% to about $646,000 in the seven-media media totals compiled by BAR/LNA. Aris Isotoner advertising was up sharply, rising 30% in 1986 to $14.2 million. Hanes Underwear leaped 83%, reaching $19.9 million.

Major management changes at Sara Lee in 1986 included Robert E. Elberson moving from president/chief operating officer to vice-chairman of international operations; John B. McKinnon advancing from exec VP to president in charge of all U.S. operations, and Paul Fulton, formerly senior VP in charge of all Hanes divisions, moving up to senior VP in charge of all packaged apparel and frozen baked goods operations.

Schering-Plough, which pulls the lions share of its sales and earnings from ethical drugs, continued to build market strength in its consumer product lines, particularly Fibre Trim diet aid product and DuraSoft contact lenses by spending 18.6% more on advertising in 1986 than in 1985.

Fibre Trim, Schering-Plough's natural diet aid product, helped boost company over-the-counter sales by 28% in 1986. Introduced in December 1985 at a cost of $25 million, Fibre Trim is the largest single advertised product in S-P's lineup. Its measured media expenditure in 1986, according to BAR/LNA, was $16.5 million, which is expected to double in 1987, partially because of a calcium-added version introduced in December.

Also in 1987, a new OTC ophthalmic pharmaceutical, Ocuclear Eye Drops, was launched in January, backed by $10 million, largely network TV and print.

St. Joseph aspirin got a line extension, an aspirin-free liquid fever reducer, as did Drixoral with Drixoral Plus—a combination of symptom relief that includes a pain reliever and fever reducer in a long-acting OTC cold medication. Drixoral, formerly a prescription drug, is tied with Smith-Kline Beckman's Contac for No. 4, with a share of 8% in $1.1 billion cold-remedy market. Procter & Gamble's (Richardson-Vick's subsidiary) Nyquil leads with a 12% share, followed by two products from Burroughs Wellcome, Actifed (10%) and Sudafed (9%).

The company says expectations have been met for the first full year on the market for Afrin nasal spray and Tinactin antifungal medication. Afrin spending was boosted in 1986 to $3.5 million, up from $176,200, and Tinactin to $4.5 million, up from $1.7 million in 1985.

Maybelline cosmetics fought off strong competition from Noxell's Cover Girl at the beginning of 1986, coming out with an 18% share of the $2.43 billion color cosmetics category, down from 20.9% the prior year. Cover Girl claimed 15%.

Although Maybelline sales were down for the first three quarters and for the full year, they began to move upward again in the fourth quarter as product introductions and new advertising reached the market—a pace continued into 1987.

Maybelline launched 14 new products in the first quarter of 1987. Two of them, Maybelline aerosol mousse makeup and Eye Pearls eye shadow, were the first of their kind to reach the U.S. market.

Overall, Maybelline received $35 million in measured media support in 1986. Maybelline mascara received the largest expenditure of $9.1 million, down 5.2%; $4.9 million was spent on nail color, even with 1985, and $4.5 million supported Moisture Whip Lipstick, up 55%.

DDB Needham, Chicago, was named the major agency for the Maybelline USA division with an estimated $40 million in 1987 billings, replacing Ted Bates Advertising (now Backer Spielvogel Bates).

Suncare products turned in a record sales performance, largely because of the introduction of several new and reformulated products. The Coppertone line, which drew $4 million in measured media, down 27.2% from the prior year, was reformulated and repackaged in 1986, while Tropical Blend introduced a waterproof oil. Coppertone launched a spray version of sun protection for the tan-with-protection market, one of the groups of sun-conscious consumers the company had identified a year earlier. Water Babies, a non-stinging suncare product, entered the children's market. Solarcaine added a cooling aloe vera spray version, while a neon-tinted waterproof sunscreen, called Zinka, appealed to the fashion-conscious.

The Dr. Scholl's footcare line maintained its No. 1 market position as sales rose by 13%, to $135 million. The company expects to complete the sale of Scholl International during the third quarter. European Home Products PLC will pay Schering-Plough $160 million for the European, Latin American and Far Eastern portions of the Scholl business. Schering-Plough will retain the U.S., Canadian and Caribbean business. Dr. Scholl's products drew $6.9 million in measured spending, up 7.8% in 1986.

Wesley-Jessen, Schering-Plough's vision-care subsidiary, saw its sales skyrocket by 200% from $40 million in 1986. Company sources attribute the boost in sales to the enormous success of the DuraSoft 3 Colors soft contact lenses, which in one year have amassed a 15% share of the $450 million contact lens market. First to alter the appearance of any eye color, the product appealed to the fashion-conscious. It was backed by $8 million. DuraSoft 3 is being bolstered by new line extensions. A hazel opaque color version already has appeared on the market, while at least three other colors are on the drawing boards.

Pharmaceuticals account for 65% of Schering-Plough's sales. Several of these products—including Nitro-Dur, Theo-Dur, Lotrisone, Proventil and Normodyne—turned in especially strong performances, contributing to a 20% increase in pharmaceutical sales. Theo-Dur, an asthma medication, is the company's leading prescription product, with 1986 sales exceeding $120 million worldwide. Another asthma prescription medication, Proventil, had 1986 sales of $79 million, a 36% increase over 1985. The company expects total Proventil sales to exceed $100 million in 1987. A long-acting version of this product, Proventil Repetabs, was introduced in August.

Two cancer medications, Eulexin and Intron A, continued to be sold in the U.S. and abroad. Combined sales for the two products could hit $100 million by 1990, according to Rudolph C. Carryl, analyst with Value Line Investment Survey.

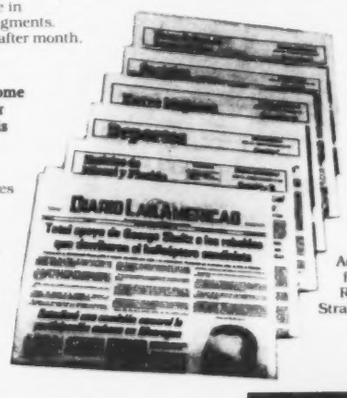
Our Market Closed Higher Today.

While some markets keep moving up and down like yo-yos, Diario Las Américas' Hispanic market keeps moving up in an ascending curve in virtually all market segments. Day after day. Month after month. Year after year.

Readership is up. Income is up. Spending power is up. And the future is looking up.

Diario Las Américas' Hispanic market scores high above the Dade County average in income not just for Hispanics, but for the overall market.

What's more, almost all of our readers own cars, most own their own homes and the vast majority use credit cards. In short, it's a growing, dynamic, affluent market that's surging ahead in many different fields — an American success story written every day in Spanish.



That's why blue chip companies like AT&T, P&G, Colgate Palmolive, Ford and American Express invest in the pages of Diario Las Américas.

Whether they're selling consumer goods or cars, financial services or communications, they know they can get a solid return on their advertising dollars in the pages of Diario Las Américas.

For complete information about the upscale Diario Las Américas audience, call Enrique J. Pérez, Advertising Director, and ask for your free copy of Diario's Reader Profile, conducted by Strategy Research Corporation.

Advertising	95	109	(13.3)

While Seagram Co. Ltd., Montreal, continued to prosper, the wines and spirits marketed by its principal U.S. subsidiary, Joseph E. Seagram & Sons, New York, suffered from an overall slump in the U.S. industry brought on by lower consumption, increased competition and the need to support product lines with heavy promotional dollars.

The slump is reflected in a decline in operating income in the U.S. from $14 million in the fiscal year ended Jan. 31, 1986, to a loss of $67 million for fiscal 1987. Part of the loss included $35 million in restructuring costs related to the sale of some of its U.S. wine business and reorganization of its U.S. spirits marketing division.

The company has stepped up its advertising and sales promotion spending worldwide, boosting its fiscal 1986 outlays 10.3%, to $344.2 million for fiscal 1987, an increase reflected largely in stepped up spending in the wine and spirits cooler categories.

Seagram Co. Ltd., controlled by Canada's Bronfman family, is the world's largest producer and marketer of distilled spirits and wines, with affiliates in 27 countries. The company also owns a 22.5% stake in E.I. du Pont de Nemours & Co., from which it folded into its net income $154.1 million in dividends and $169.1 million in unremitted earnings in fiscal 1987.

In April 1987, Joseph E. Seagram & Sons reorganized its House of Seagram unit, replacing the House's four national spirits companies with a single sales force, one marketing unit and centralized finance and administration. House of Seagram is the New York-based company's domestic marketing arm for distilled spirits and wine coolers. The four companies, Seagram Distillers Co., 375 Spirits Co., Perennial Sales Co. and Summit Sales Co., in effect, were eliminated.

The group that markets Seagram's wine coolers, Seagram Beverage Co., was unaffected by the reorganization, and it remains inside the House of Seagram but separate from the spirits unit. It is headed by C. Richard Coffey, president. Also not affected by reorganization were the subsidiaries that market California and imported fine wines: Seagram Classics Wine Co. and Seagram Chateau & Estate Wines Co. Both are separate from the House of Seagram and no longer under Seagram Vintners, which was dissolved with the sale of Seagram's mass market wines.

The restructuring is meant to fine tune Seagram marketing on the local level where grocers, liquor store chains and large independent stores have grown highly influential in retailing of distilled spirits and wines.

The big ad money at Seagram in 1986 chased the wine cooler market in which it spent $26.7 million on Seagram's wine coolers with $16.3 million of that total spent on Seagram's Golden wine cooler. These were among the few products that received greater measured spending in 1986 compared with 1985, when companywide measured spending was 13.4% higher.

The $1.2 billion wine cooler industry is dominated by the big ad spenders. According to *Impact*, M. Shanken Communications' New York-based trade journal for the wine and spirits industry, Seagram, with three cooler entries, held a combined estimated share of 13.6% in 1986 (up from 9.3%). This compares to Gallo's Bartles & Jaymes 22.9% (17.5% in '85), Brown-Forman Corp.'s California Cooler, 17.5% (26.8% in '85) and Canandaigua Wine Co.'s Sun Country, 14% (13.8% in '85). Seagram and Gallo both supported their coolers with $30 million in advertising, while Canandaigua spent $29 million, and Brown-Forman spent $25 million.

Seagram's original and premium wine cooler brands were joined in 1986 by Golden wine cooler, whose sales rose to 4 million cases as a crooning Bruce Willis, of ABC-TV's hit series "Moonlighting," became spokesman for the brand. A spirit-based line of coolers, Seagram's Golden Spirits, also was introduced.

Among its spirits, the biggest Seagram ad outlay in measured media went to Seagram's Crown Royal Whisky. Ad spending of $6 million, up 3.4% from 1985, backed the premium brand, which had case depletions of 1.3 million, down 1.5% from 1985, according to *Impact*. Crown Royal and Seagram's V.O. Canadian Whisky together amassed a combined 62% share of the premium whiskey market. V.O.'s measured spending of $3.4 million was down 49%.

Seagram's Extra Dry Gin remained a top-seller with a 20% share of U.S. gin sales, backed by $3.2 million in measured support, down 17.9%. Seagram cut media spending 55% to $1.3 million for Seagram's Imported Vodka, which experienced a sales decline of 38%.

Chivas Regal premium scotch, which holds a 60% share of its category, was supported by $3.2 million in measured media spending, down 39.6%. Advertising, directed to a consumer who now consumes less spirits, stated, "Drinking less? Then drink better." The brand's first full-scale campaign targeted to blacks was launched by Mingo Jones, New York. Ads feature such well known people as Diahann Carroll as "Regal Women."

Seagram reassessed its role in the wine industry with the March sale of its mass market wine holdings, leaving the company to concentrate on two wine product categories—premium wines, which it considers to be the most successful segment of the wine business, and wine coolers.

Its popular-priced wine brands—Taylor California Cellars, Taylor New York, Great Western, Gold Seal Wines, Partager, a French table wine brand, and Paul Masson (to which the company retained Canadian rights)—were sold for $220 million to newly formed Vintners International Co. Seagram now focuses on such premium brand names as Domaine Mumm, Sterling Vineyards and Bandiera Winery.

As a result of the sale, Seagram Classic Wine Co. has relocated to San Francisco from New York, while Seagram Vintners was dissolved. Former Seagram Vintners chairman Abdallah H. Simon, now serves as chairman of Seagram Chateau & Estate Wines Co., which remains in New York. Brands in this group include company-owned Sandeman ports and sherries, Perrier-Jouet champagnes and Torres Spanish wines.

In May of this year, the Seagram Co. Ltd. committed $12 million to create an industry-sponsored insurance group to provide liability insurance to spirits and wine retailers. Retailers have been affected by rising insurance liability premiums connected to driving-while-intoxicated accidents and related incidents.

Sears, Roebuck & Co., after successfully diversifying into the growing consumer financial services arena, intends to strengthen its position as the nation's leading retailer by adopting a specialty retailing veneer.

Sears, which reported a worldwide advertising budget of $1.129 billion, up 15.8% from 1985, largely advertises in the U.S., according to a spokeswoman. Sears says its worldwide ad figure excludes catalog costs but includes $500 million for the Merchandise Group's newspaper budget, spent largely on local run-of-press and preprint newspaper ads, and $250 million for the Merchandise Group's broadcast budget. Allstate accounts for $26 million; Coldwell Banker, $10 million; Dean Witter, about $13 million, and more than $35 million for the Discover combination credit/financial services card.

Sears would not further identify what additional costs are included in its worldwide ad figure. Often overhead expenses such as salaries, office costs, rent and travel are included in published figures.

Newspaper preprints continue to be the chain's major advertising medium, and Sears remains ranked as one of the largest network radio advertisers, with a budget of more than $47.6 million in measured media spending.

In 1986 Sears began paying more attention to the Merchandise Group, the division which made it the world's largest retailer. The group includes 807 general retail stores, 24 smaller-sized stores, 658 catalog sales outlets, 52 specialty paint/hardware stores, 59 computer stores and 107 company-owned surplus stores.

Sears also franchises in-store dental, optical and photographic departments in many locations. As of July 1987, franchised dental centers operated in 74 Sears stores, while more than 600 optical centers were located in nearly every major market.

At each of its retail locations, an average 60.6% of 1986 merchandise sales were charged on Sears credit cards, compared with 62% in 1985. Although this percentage declined, a company spokeswoman says the difference was because more charges were made on the company's Discover Card. The Discover Card is Sears' key to cross-sell financial services and investments.

The Merchandise Group's retail credit and international operations in 1986 represented 61% of the company's $44.3 billion total revenues, down slightly from a 65% contribution in 1985. The company says domestic merchandising revenues improved 2.5%, primarily due to stronger sales of housing-related merchandise and apparel.

In 1986, Michael Bozic, formerly president of Sears Canada Ltd., was named chairman-ceo of the Merchandise Group, with the directive to modernize the unit. Mr. Bozic's strategy is to make Sears more of a specialty retailer; his first move was to buy Eye Care Centers of America Inc., a 42-store optical chain based in San Antonio. Mr. Bozic brought in former Sears executive Al Goldstein to oversee

FREE IDEA.

An established agency giving away a free idea? There has to be a catch.

Actually, there are two.

First, we'd like you to see some of the ideas we've been paid for. Big ideas that paid off for leading national advertisers like General Foods and Pepsi. Plus, an award winner for Wilkinson Sword. And more.

Second, we'd like you to tell us about your product, objectives, and goals. Then, we'll come back with a free idea that'll pay off for you too.

And, we're willing to bet, for us.

BRENARD ADVERTISING & PROMOTION

Call Craig Brenard today at 212-645-0077.

the company's specialty retailing strategy.

Mr. Bozic intends to upgrade the chain's 807 general merchandise stores to appeal to more fashion-conscious consumers. The strategy includes creating focused clothing "shops," such as McKids for children's casual clothing and Trader Bay, a young men's shop.

One of the Merchandise Group's main objectives is to get more "core customers" into Sears stores. A core customer is defined as one who has a Sears credit card and/or is a regular catalog shopper. A company executive says a typical Sears store gets 65% of its retail sales from 50% of the households in the market.

Last year the Merchandise Group opened 24 small and medium units, designed to serve markets with populations of 75,000 to 100,000, and Sears plans to have 15 more opened by the end of 1987. Many of the 10,000-sq. ft. stores sell Sears appliances and other hard goods exclusively.

Sears in late 1986 consolidated its estimated $125 million broadcast account at Ogilvy & Mather, Chicago. O&M had handled the estimated $75 million Sears appliances, tools and hardlines account, while DDB Needham, Chicago, handled the $50 million apparel account.

The consolidation reflected Sears' restructuring of its field management organization into three zones—North, Temperate and Sunbelt—thereby putting more emphasis on regional marketing programs. A Sears exec says it merely was a recognition "that people in different parts of the U.S. want to buy different goods."

Sears in mid-1987 announced it had agreed to extend its participation in QVC Network Inc.'s home-shopping cable TV program to March 31, 1989. West Chester, Pa.-based QVC has the exclusive TV rights to sell Sears' products.

Sears has expanded into insurance through its Allstate Insurance Group, Northbrook, Ill.; real estate via Coldwell Banker Group, Los Angeles, and stocks and other securities through the Dean Witter Financial Services Group, New York.

Sears remains optimistic that its nearly two-year-old Discover Card can hold the full range of financial services together—from credit to car loans, insurance policies to home mortgages.

The Sears Financial Network, Sears' umbrella name for Allstate, Coldwell Banker and Dean Witter, contributed more than $844 million in profits to Sears' 1986 net income of $1.351 billion. The members of the network each have primary responsibility for promoting the affiliation with Sears.

Allstate made a subtle change in its ad theme during 1986, adding "Leave it to the good hands people" as a preface to its "you're in good hands with Allstate" theme, now nearly 30 years old. Leo Burnett USA has handled the account since 1957. Current budget is about $30 million.

Allstate profits of $750 million on revenues of $12.638 billion helped boost Sears' corporate bottom line in the wake of somewhat disappointing results in the merchandise group.

Allstate is moving away from promoting its products as a convenient way to shop in Sears stores, instead focusing on outside agent locations, which represent the bulk of its business. Allstate has found its biggest success in the property-casualty insurance sector, in which it ranks second to State Farm Mutual Insurance Cos., Bloomington, Ill.

In 1986, Dean Witter Financial Services Group, New York, reported revenues of $3.415 billion but posted a $37 million loss due to the cost of introducing the Discover Card. However, the unit reported a profit of $37.1 million in the first six months of 1987. Discover Card, with more than 15 million cardholders, should begin showing a profit by 1988, says Dean Witter Chairman-CEO Philip Purcell, who notes Discover is well on its way to achieving its 1987 objective of becoming the leading card issued by a single bank. More than 617,000 merchants, including K mart, the nation's second-largest retailer, now accept the card.

J. Walter Thompson USA, Chicago, handles Discover's estimated $50 million account. An ongoing campaign concentrates on selling the practical benefits of using the combination credit/financial services card.

Although Dean Witter's bottom line is improving, a report issued by Paine Webber indicates Dean Witter's average return on equity, 7.7% in 1986, was below the 11.3% average return for national full-line companies. To improve its rate of return, Dean Witter is moving into investment banking, hoping to help fund takeover deals. Last spring, the brokerage house established a $250 million fund for investments in acquisitions in which it is a principal.

Dean Witter also sold 50 Sears Savings Bank retail branches in California to Citicorp. The company says consumer financial services will continue to be offered through the Sears Financial Centers.

Dean Witter, through Lord, Geller, Federico, Einstein, aired a new "You're somebody at Dean Witter" campaign, which featured celebrity siblings giving testimonials about the service they received. The first two siblings featured were TV director Dick Carson, younger brother of TV talk-show host Johnny Carson, and college coach Eddie Payton, younger brother of Chicago Bears running back Walter Payton.

During 1986, Coldwell Banker Real Estate Group continued to expand its market coverage and penetration. Earnings were up 9.8% and revenues jumped 21.3%. In 1986, Coldwell Banker sold 313,000 homes, an estimated 9% of all resale homes sold in the U.S., compared to a 1.3% market share when Coldwell Banker was acquired by Sears in 1981. The company expects its market share to hit 10.8% in 1987, or 350,000 home sales.

Sterling Int'l	781	657	18.9

Sterling Drug Inc. concentrated on its healthcare and consumer product core sectors in fiscal 1986, not only by increased advertising in those areas, although slightly, but through acquisition.

Sterling acquired Thompson & Formby Inc., which makes waterproofing and wood-refinishing products that will complement Sterling's Lehn & Fink's Minwax Co. It also purchased Woodroof Laboratories, which produces patented biosynthetic burn wound dressing that will provide Sterling's Winthrop Pharmaceuticals with entry into the category. Sterling also divested Hilton-Davis Chemical Co., an operation peripheral to its core.

Lehn & Fink, which accounts for 30% of worldwide sales by virtue of dominating the household and "other" products segment, funneled its largest measured advertising expenditure for a brand, $26.6 million, into Lysol. The total, however, was a decline of 27% from 1985. Lysol encountered an overall sales reduction from 1985, which the company credits largely to a heavy year-end sell in the previous year.

Some brand extensions under the Lysol banner had promising starts. Lysol Direct, a multi-purpose cleaner hit the national market in April 1986, supported by $4.5 million in measured spending, mostly network TV. Several Lysol products registered market-share gains such as Lysol deodorizing cleaner and Lysol toilet bowl cleaner. Lysol remained the market leader in its category. Love My Carpet received $2.4 million support, down 33%. Spending the previous year had been higher as a result of the addition of a "new ultra-fresh scent" to the line.

Results at d-Con were mixed. The increased sales of rodenticides were not enough to offset lower sales of d-Con insecticides which were affected by competitive pressures. As a brand, d-Con holds 10% of the $700 million household insecticide market. It trails market leader S.C. Johnson's Raid with about 50% and American Home Products' Black Flag with about 20%. The line was extended to include d-Con Mouse-Prufe II with improved anti-coagulant properties.

Measured spending behind d-Con was down 50.9% to $2.6 million in 1986. Several new products have debuted under the d-Con umbrella, including Logic, a fire ant killer, and d-Con mouse killing station.

Sales were particularly strong for Minwax's newer products such as Minwax Polyshades and Minwax high performance wood filler. The acquisition of Thompson & Formby Inc., with sales of $50 million, adds several growing brands. Already the leader in its field, Thompson's Water Seal scored double-digit sales increases and was backed by a $6.3 million budget.

Mop & Glo liquid floor wax was reformulated in 1986, although it received measured ad backing of only $2.1 million, down 34%.

Lehn & Fink's personal products continued to gain steam during 1986. In spite of a 9.3% dip in measured spending to $4.9 million, Ogilvie haircare products maintained a strong lead in the hair perm market. Ogilvie perms snared the top spot two years ago and have not given up that lofty position. According to a 10-month Nielsen track of perms in 1986, Ogilvie has 21.4% of the perm business, outpacing Unilever's Rave with a 13.7% share, Gillette Co.'s Toni with 12.4%, Procter & Gamble's Lilt with 11.4%, L'Oreal with 9.2% and Bristol-Myer's Kindness (from its Clairol line) with 4.4%. Spending for Tussy antiperspirants, a minor contender in the category, continued to decline—from $3 million in 1985 to only $276,100 in 1986.

The proprietary products division had a stellar year with almost all products recording gains. In addition to greater unit movement, the company enacted other cost-control programs which boosted the bottom line. For example, Glenbrook moved from a geographically oriented sales force to a customer-focused one. As a result, sales to key accounts rose sig-

THE NAME BEHIND THE BIG NAMES

nificantly.

Bayer aspirin, marketed by Glenbrook Laboratories, held its own in the highly competitive analgesics category. Called in advertising "The wonder drug that works wonders," Bayer has reaped the benefits of physician awareness of the use of aspirin in prevention of second heart attacks and strokes. Glenbrook has taken this message to healthcare professionals through a medical advertising campaign. Thirteen million booklets concerning health facts about heart ailments were distributed to physicians and 30 million heart attack fact books were distributed to pharmacies last year. Sterling was granted approval in October 1985 by the Food & Drug Administration to advertise to and advise the health profession on the use of aspirin to prevent heart attacks in certain high-risk individuals.

Measured spending behind Bayer jumped 18.6% to $15.4 million. Bayer's challenge has been to retain its share against a host of ibuprofen entries. Glenbrook has opted for ibuprofen only in its Midol formulations.

Bayer's market share of the $2 billion category came in at about 10% in 1986, but it has been as high as 20% and as low as 7%.

Panadol received $11 million in measured support, a drop of 18.5% from 1985. The challenge of competing with market leader Johnson & Johnson's Tylenol continues to be an uphill battle. Analysts peg Panadol's market share at under 5% vs. J&J's 25%-plus. Panadol's positioning as an acetaminophen-based product was increased following February 1986's tampering episodes that again involved Tylenol. Children's Panadol has had greater success in cracking the market. Its measured spending of $4 million was down slightly from 1985.

In the $53 million menstrual remedies market, Glenbrook's Midol is the market leader with over 51% share, well above Pamprin's 30% and Premensyn's 13%, both products marketed by Chattem Inc. Spending behind Midol soared 76% to almost $7 million in 1986. Some $3.3 million of that went to support Midol 200, the new product featuring ibuprofen.

Creative new advertising helped boost Glenbrook's laxative products marketed under the Phillip's line, which received $5.5 million in measured spending, up 56%. Part of the spending included a new campaign for Milk of Magnesia that helped push Phillip's market share from 7.7% to 8.2% of the $625 million laxative market. A shift to saline laxatives could stimulate growth for Phillip's Milk of Magnesia in 1987. During 1986, Sterling also began to market Haley's M.O. to the 5.7 million laxative users who also experience hemorrhoids. Haley's is a combination of milk of magnesia and mineral oil.

The Stri-Dex medicated skin-care name was kept in front of teens with a measured expenditure of $3 million, up 17%. Stri-Dex is No. 3 in a market with an 11.8% share. Leader is Beecham Group's Oxy with a 23.7% share, followed by Procter & Gamble's Clearasil, 22.8%, according to A.C. Nielsen. During 1986, Stri-Dex was extended to include anti-acne cleansing pads in a larger size.

Neo-Synephrine became known as a line with a dosage strength for every member of the family. It was the only brand to show unit growth in the 1986 flu season. The product was backed with $2.1 million in measured spending, up 23.5%.

To augment sales of the Winthrop division's pHisoDerm, two line extensions are on tap. One is a pHisoDerm baby cleanser; the other is a cleansing bar. Launched in 1986, pHisoPuff disposable puffs go head-to-head with 3M Co.'s Buf-Pufs facial cleansing sponges. Spending behind the entire line, despite the extensions, declined 10.8% to $3.3 million.

Among pharmaceutical products, Sterling currently produces Danocrine, the leading medicine for endometriosis, and the popular Omnipaque, a product used in vascular procedures and which outsells the competition by about two-to-one, according to the company.

There were several management changes in 1986 including a turnover in marketing personnel within Glenbrook Labs. Robert Kinelski is now VP-marketing, replacing Robert Perlman.

Sterling solved its trademark case with Bayer AG when Bayer paid Sterling $25 million to buy back partial rights to the Bayer trademark, ending a prohibition dating from the end of World War I. Bayer, which invented aspirin, will still be barred from selling consumer products under its own name in the U.S. Sterling acquired the trademark after Bayer's assets in the U.S. were confiscated at the end of World War I.

Stroh Brewery Co. RANK **63**

Detroit

($ in millions)

Worldwide	1986	1985	% chg
Sales	1,499	1,502	(0.2)
U.S. advertising	129	113	13.9

Stroh Brewery Co. continued to redefine itself as a "beverage company" in 1986, as it rolled out Sundance, an all-natural sparkling fruit juice, to help ease the sting of industry-wide flat beer sales.

Additionally, the family-owned Detroit brewer introduced a non-alcoholic malt beverage, Barbican, in 1986, and purchased a share of Sleeman Brewing Co., a Canadian brewery, in May 1987, opening the Canadian market to some of its beer brands. Stroh's malt-based White Mountain Cooler was the fifth-ranked entry in the $800 million cooler market, carving out a 10% market share in 1986.

Stroh Brewery continued to hang onto its No. 3 ranking among U.S. brewers in 1986, despite a slip in market share for the second consecutive year.

Stroh's beer shipments were down from 23.4 million barrels in 1985 to 22.8 million in 1986, according to Emanual Goldman, analyst with Montgomery Securities, San Francisco. Stroh's sales dipped 0.2% to $1.499 billion in 1986. This ran counter to the industry, which experienced a slight movement from 178.7 million bbls. to 181.9 million, ending a three-year decline, according to beer analysts. Anheuser-Busch Co., St. Louis (No. 1), increased its shipments by 6% to 72.3 mil-

lion bbls. in 1986. Miller Brewing Co., Milwaukee (No. 2), was up 4% to 38.7 million.

In 1986, Stroh's share of the total domestic beer market slipped to 12.5% from 13.1% in 1985. The brewer's 1984 share was 13.4%. Industry behemoth Anheuser-Busch increased its share of the domestic market from 38.1% in 1985 to 39.7% in 1986; Miller Brewing rose slightly, from 20.8% to 21.3%.

Stroh's entry in the soft-drink market, Sundance, was rolled out into seven new markets in the summer of 1987, after a one-year introductory run in California. There, according to John Bissell, VP of Stroh's special products division, sales of the 70% fruit juice-30% sparkling water beverage topped the $12 million mark. Stroh supported the introductory campaign with $7 million in California. The company is spending an estimated $70 million in advertising for the national rollout, which takes Sundance into New York, Chicago, Washington, Philadelphia, Phoenix, Detroit and Miami. The company expects first-year national sales to reach $80 million.

Stroh expects Sundance to become a major player in the fast-growing juice-added soft-drink market, a segment that grew to a 5.3% share of the total soft-drink market from only 1.4% in 1985. That segment is dominated by PepsiCo's Slice, which is 10% fruit juice. The theme for Sundance's ad campaign—"It's a Natural Time for a Sundance"—mimics Van Morrison's "Moondance," a pop song of the '60s. TV spots, with their high-gloss production standards and reflective tone, are aimed at the upscale consumer. The product is premium-priced at $2.50 for four 10-ounce bottles.

Stroh's malt-based White Mountain Cooler increased its market share from 6% in 1985 to 10% in 1986, generating about $80 million in total sales, according to Mr. Bissell. Stroh spent an estimated $14.3 million on its 1986 White Mountain ad program.

Stroh's flagship, Stroh's premium brand beer, continued to struggle as a national brand. In 1986, the Stroh's premium brand held only a 2.8% share, down from 2.9% in 1985 and considerably below its market share prior to its 1984 national rollout, according to Benj Steinman, executive editor of *Beer Marketer's Insights*, a beer industry newsletter. Budweiser dominates the brand charts with a 26.8% share, up from 26.1% in 1985.

Media expenditures by the 136-year-old brewer slipped 2.7% to $46.9 million in 1986, according to BAR/LNA. Support for Stroh's premium brand dropped from $34 million in 1984 to $26.5 million in 1985 to $22.9 million in 1986. By comparison, Anheuser-Busch posted $294 million in media expenditures, which accounted for 46% of total expenditures by the major brewers. Anheuser-Busch's support of its own flagship brand, Budweiser, increased 17.2% to $108.4 million in 1986.

Shipments of Stroh's largest-selling brand, the popular-priced Old Milwaukee, remained even at 7.6 million bbls., according to Mr. Goldman. He reports that media expenditures for the Old Milwaukee brand were up slightly, from $13 million to $13.1 million. Old Milwaukee had made some initial market gains after Stroh's 1982 purchase of Schlitz Brewing Co. But by 1986, Old Milwaukee's market share was back to 18.1% of the low-priced popular beer segment, or 1981 levels.

Meanwhile, the Schlitz brand continued its decline, as media support for the venerable brand fell from $7.5 million in 1982 to just $300,000 in 1986. Schlitz Malt Liquor's market share slipped from 39% in 1984 to 33.6% in 1986. Media support for Schlitz Malt Liquor dipped 65% to $2 million in 1986.

Tandy Corp.

Ft. Worth, Texas

($ in millions)

Worldwide	1987	1986	% chg
Sales	3,452	3,036	13.7
Net income	242	198	22.6
U.S. advertising	262	187	40.3

Tandy Corp. last year revamped its computer product line and told its sales force to don white shirts and ties for visits to corporate customers. Today, the Fort Worth, Texas-based electronics company is winning respect and credibility from corporate buyers, although the battle is far from over.

Industry analysts generally laud Tandy as a solid, profitable company. Sales have picked up after nearly three years of lackluster performance. For its fiscal year ended June 30, 1987, Tandy's earnings were up 23% over the same period a year ago.

But uncertainty still revolves around Tandy's business products division.

In August 1987, Tandy marked the 10th anniversary of the company's first computer introduction with a gala celebration in New York. The event was beamed via satellite to Dallas and Anaheim, Calif., where managers and sales force executives were meeting.

At the anniversary celebration, Tandy introduced new computers and two upgraded machines. The company also introduced a host of new products, including a new cellular telephone and two new printers.

The new products are the most extensive additions to Tandy's computer offerings and are intended to give customers more computer power and options at lower prices, say Tandy officials.

"They've substantially strengthened their product line with the new line of personal computers. You should see momentum building between now and Christmas. They do have some difficult comparisons coming up in November and December, however. Tandy had a high number of shipments of personal computers last year; to beat those numbers by a wide margin will be difficult," says Eugene Glazer, VP-research, Dean Witter, New York.

Of the other new products, Mr. Glazer says the portable CT-300 phone is a potential hot item. The lightweight, handheld cellular telephone weighs only 28 oz. and retails for approximately $1,499.

"There are other products similar to Tandy's new telephone, but not at this breakthrough price," says Mr. Glazer.

Long acknowledged as a prime maker of computers for hobbyists, Tandy is trying to increase computer sales among large and small businesses. However, Tandy faces stiff competition from IBM Corp. and Compaq Computer Corp.

Tandy's direct business sales force has encountered difficulty in closing some corporate sales, a setback traceable to the inexperience of the newly formed force. Analysts say the cost of carrying a 1,500-person sales force without resulting sales places Tandy in an uncomfortable situation.

"Obviously, Tandy's strength is in walk-in sales through regular retail outlets. The national sales force has gone more slowly than planned, but it's a new type of business for the company. It will take a while to figure out the right formula to make it successful," says Dean Witter's Mr. Glazer.

Positive factors for the year include the popularity of the Tandy computer line, the introduction of the transportable cellular telephone, the launching of about 800 "Technology Stores" among its 5,000-Radio Shack outlets and the expansion into name brand electronics retailing.

The name brand stores have been integrated, and an ambitious expansion of SuperCenters has been initiated. The first hub of SuperCenters began operating in the Fort Worth area in the fall of 1985. Hubs in San Jose, Calif., Denver, Tampa, Fla., and San Antonio followed. During 1987, openings are planned in Houston and Kansas City, with a target of 300 stores by year end.

The remodeling of Radio Shack stores, which began in 1984, continues. The look of the store has changed from a "nuts and bolts" image to the sleek "Technology Store" image. "We're upgrading the look to make it match what we sell," says Ed Juge, director of market planning.

Central Advertising, Tandy's in-house agency, bills approximately $200 million and employs 150 people. All advertising is handled through Central, with the exception of some production. Radio Shack has never had a formal outside agency of record since the company began in 1921.

Tandy spends 47% of its ad budget on newspaper advertising, both local and national. Direct mail comprises 30% of the budget.

Advertising specifically for Tandy's Radio Shack stores drew the largest expenditure in measured media in 1986. Some $15.5 million was funneled into the line, mostly in network TV and network radio. This was up 19% from 1985.

The Tandy 1000 computer system received spending of $6.1 million, down 15.3% from 1985; the Tandy 3000 system received $8.3 million, up from $1.5 million; and the Tandy computer systems in general tallied $8.5 million, up from $2.8 million. Computer system advertising is weighted toward network TV, with substantial amounts also in magazines.

COME TO RHODE ISLAND AND SEE IF YOUR CHICKEN CAN FLY ACROSS AMERICA.

A company like Weaver doesn't launch new products on a wing and a prayer. To find out how their new chicken specialties would fly nationally, they rolled out their Zesty Wing line extension in Rhode Island. Because Rhode Island's a near-perfect microcosm of America. With demographic and economic profiles that are remarkably close to the national norm. What's more, the market's virtually immune to media spillage. And it's extremely cost-efficient. You can reach practically everyone in the market through Rhode Island's only major newspaper. At a CPM that's mere chicken feed. So if you're introducing something new to America, don't run around like a chicken with its head chopped off. Come to Rhode Island. Call Bill Peckham at 401-277-7172 or write and ask for our free test market information kit.

Merger frenzy in 1986 made Houston-based Texas Air Corp. bigger than Texas. Counting all of its operations, Texas Air now ranks as the nation's largest air carrier with combined market share of 21.3% based on enplanements at all airports during the first quarter of 1987. That compares with Delta's Air Lines's 13.4% share, following its December 1986 merger with Western Airlines, and the 13.2% share of United Airlines.

In November 1986 Texas Air completed its biggest acquisition to date, Miami-based Eastern Air Lines, at a cost of about $600 million. One of four original trunk airlines, Eastern added the tremendous strengths of its routes, modern aircraft and computerized reservations systems. Eastern continues to operate as a wholly owned subsidiary of Texas Air.

At year's end, Texas Air completed its acquisition of Newark, N.J.-based People Express, parent of People Express Airlines, Britt Airways, Provincetown-Boston Airlines and Frontier Holdings, for about $125 million.

In February 1987 Texas Air plunged its Continental Airlines unit into near chaos by merging People Express into its system, strengthening Continental's presence in the key markets of Newark and Denver. In April 1987, in an internal transaction Continental purchased People Express, New York Air and Rocky Mountain Airways for $765 million from Texas Air, a holding company, merging the public identity of all three under the Continental name.

AD AGE's estimate of measured and unmeasured media spending in 1986 for Texas Air, including combined media from continuing operations of Eastern and Continental, and Continental's newly merged companies, was $172.5 million in 1986, down 23% from 1985. Nearly 65% of the total was for $109.6 million in measured spending for 11 media, down 10% from 1985.

Eastern claimed most of Texas Air's seven media measured spending with $18 million in 1986, down 17%, according to BAR/LNA.

Measured media for People Express was $4.1 million in 1986, down 38%, divided almost equally between spot TV and magazine. Measured seven media totals for Continental were up 59% to $1.5 million in 1986, according to BAR/LNA.

Measured newspaper spending from continuing operations of Continental, Eastern and the merged carriers fell 8% to $63.4 million in 1986. Measured spot radio fell 18% to $18.1 million.

The Continental unit benefitted the most from Texas Air's acquisitions of People Express and Frontier and the integration of New York Air's operations, all of which accounted for a 102% growth in available seat miles from February 1986 to February 1987. Continental solidified its position in Denver, where it now ranks a close second to United. Continental is the largest carrier in Houston, Newark, New Orleans and Washington, D.C.

In mid-1987, Continental also added Newark-London service, formerly operated by People Express, in addition to a number of long-haul routes to Europe and the Pacific. Continental's route system now stretches from London to Sydney, Australia, with 1,500 flights per day.

But the growth has not been easy on Continental, which emerged from a three-year bankruptcy reconstruction on Sept. 2, 1986, with one of the lowest operating cost structures in the industry. Problems merging Continental's route system with those of non-computerized People Express, and its assortment of bankrupt and near-bankrupt companies, created "pure chaos" for Continental, analysts say. Fare wars at its Denver hub during the first seven months of 1986 also hurt Continental's profits.

Continental took a net loss of $23.9 million on operating revenue of $646 million in the first quarter of 1987, compared with a loss of $13.6 million on revenues of $441 million for the same period in 1986. For the second quarter of 1987, which includes consolidated results of People Express, New York Air and Frontier Holdings, Continental took a loss of $71.1 million on revenues of $956 million. That compares with a loss of $56.8 million on revenues of $457 million for the same period in 1986.

Despite downward pressure on revenues as a result of introducing MaxSaver discount fares in the first quarter of 1987, Continental's passenger yields improved from the inclusion of short haul routes belonging to New York Air and People Express. Yield is a critical measure of the revenue gained from flying one paying passenger one mile.

Second quarter 1987 yields improved 4.8%. The key element in improving Continental's profitability lies in further strengthening of passenger yields, according to a report on Texas Air by Julius Maldutis, airline analyst for New York-based Salomon Brothers. "Continental literally cannot afford to engage in predatory pricing policies," Mr. Maldutis writes.

If Continental refrains from predatory pricing, he predicts a loss for 1987 of $31.2 million on operating revenues of $3.9 billion, and a profit in 1988 of $92 million on operating revenues of $4.3 billion.

New York-based N W Ayer, hired in October 1986 as Continental's new agency, replacing Scali, McCabe, Sloves, New York, plans to focus more on image advertising than retail price promotion for Continental late in 1987 and early 1988 in keeping with a general industry trend toward rising fares, sources say.

Eastern's net income improved to $2.1 million during the first quarter of 1987 on operating revenues of $1.17 billion, compared with a net loss of $110 million on $1.1 billion in revenues for the previous year's period. For the second quarter of 1987, Eastern had net income of $27 million on revenues of $1.16 billion, compared with a loss of $44 million on revenues of $1.1 billion for the same period in 1986.

Assuming Eastern engages less heavily in discount fare pricing, Mr. Maldutis predicts Eastern will show a profit of $23.5 million in 1987 on revenues of $4.1 billion, and a profit of $68.9 million in 1988 on revenues of $4.2 billion.

William Dowse, VP-advertising at Eastern, says advertising was heavily retail-price-oriented in 1986, with some quasi-institutional advertising, such as the combination of Eastern and Continental's frequent flyer and bonus programs early in 1987. But the industry is slowly weaning itself from reliance on discount selling, and is gradually setting prices based on service and quality, he says.

For the first six months of 1987, Texas Air took a loss of $139.7 million on revenues of $4.2 billion. The figures are not comparable to 1986. However, the disappointing results led to the resignation of Thomas Plaskett, president-ceo of Continental. For the full year, Mr. Maldutis is predicting net income of $25.8 million on revenues of $8.9 billion in 1987, and income of $153.7 million in 1988 on revenues of $9.4 billion.

Analysts are not certain how a September 1987 proposal by a task force composed of state attorneys general would affect broadcast advertising for discount fares, such as Eastern's MaxSaver.

In a draft of the proposal, obtained by AD AGE, airlines would be required to disclose orally all restrictions in broadcast ads that include fare information. Although the document has not been made public, it is believed to be one of the most sweeping attempt by states to regulate airline advertising and is likely to be challenged by the airline industry.

Time Inc. faced the year with new approaches to old challenges while boosting total ad spending by 22%, most of the increase going into the promotion of its cable operations and Time-Life Books.

Time decreased its reliance on the home-grown approach to finding new titles in 1986 and opted for the less risky business of joint ventures. This shift in strategy reflects corporate management changes and the increasingly competitive

environment of magazine publishing.

In 1986, magazine publishing accounted for 42% of the company's revenues, but the sector grew only 6.3% in revenue while declining 8% in operating income—the latter including a charge of $32 million to cover staff reductions and other expenses relating to the demise of *Picture Week*.

In July, Time named Nicholas J. Nicholas Jr. as its new president and chief operating officer, replacing J. Richard Munro, who moved up to chairman of the board and remaining ceo. Following this, Kelso Sutton and Reginald Brack switched positions. Mr. Sutton now heads the book group, and Mr. Brack heads the magazine group.

Under the new regime, the magazine division has acted decisively in dropping marginal projects and expanding into new areas with joint venture partners. In May 1987, Time announced the sale of *Discover*, the monthly science magazine, to Family Media Inc. for $26 million. Until early this year, the company pledged continued commitment in the face of lackluster prospects. In 1986, it redesigned the magazine and bought out two competitors, *Science Digest* and *Science 86* to give *Discover* a boost. According to one estimate, Time lost $50 million on *Discover* since its inception in 1980.

Picture Week, the most recent major casualty, did not live as long. After 15 months of testing, Time pulled the plug on the mass-market weekly aimed at women. Time, nonetheless, has not abandoned its efforts to grab a larger readership among women. Through a joint venture with Working Woman Inc., Time has acquired a 50% interest in *McCall's*, *Working Mother*, and *Working Woman*.

In an heretofore uncharacteristic venture for Time, it linked up with entrepreneurial publisher Robin Wolander to put out *Parenting*, targeted to an affluent and educated audience. These additions complement the company's 1985 acquisition of the Southern Progress Co., which publishes *Southern Living*, *Southern Accents*, *Cooking Light*, *Creative Ideas for Living* and *Progressive Farmer*.

Time has ceased courting—at least for now—very narrow audiences. Under the direction of Mr. Brack, it dropped several new titles in various stages of development and testing, including *New York/New Jersey/Connecticut Real Estate* and *Home Office*, both controlled-circulation magazines. *Leisure* and *Quality* were also nipped in the bud.

In a bold move, Time acquired the educational publisher, Scott, Foresman & Co. for $520 million. Although some industry observers criticized the deal as being overpriced, others believe the buy is a sound investment, which will pay off in the long run by lessening reliance on magazine publishing.

Like other media companies contending with the general decline in revenue, Time has responded by reducing staff and cutting back on operations. However, spending in 1986 rose about 22% in 1986. The major share of this went to promote magazine subscriptions for its top three publications: *People*, *Time*, and *Sports Illustrated*.

According to BAR/LNA, *People*'s advertising for subscriptions rose to $18.5 million in 1986, up 3.4% from 1985. Time laid out $15.8 million to promote subscription sales for its flagship newsweekly, *Time*. This was about a 7% increase from 1985. Not far behind, *Sports Illustrated* spent $13.9 million, up 42%, to advertise subscriptions. *Life* received $1.9 million, up 73%, and *Money* got $1.2 million, down 8%. Altogether, measured ad dollars for the Time Inc. magazines and their related products totaled nearly $44 million.

Significant increases in advertising appeared for Time's cable operations. Measured spending for Home Box Office pay service shot up 65% to $16 million, and spending for HBO and Cinemax cable TV grew to a combined $2.3 million from only $610,800 in 1985. Time also began advertising HBO videocassettes in 1986, with an expenditure of $1.5 million.

Measured spending for Time-Life Books climbed 15% to $24 million in 1986. Less dramatically, measured spending rose 2.3% to $4.4 million for the Book-of-the-Month Club and declined 5.7% to $729,400 for the Book-of-the-Month Record and Tape Club.

The overall media ad mix relied most heavily on spot TV and magazines. Spending in magazines rose by about 17%, while spot TV increased 21%. Spot radio also figured more prominently in 1986, going from $383,200 to $4.5 million, and network radio, not used in previous years, drew some support.

Time Inc. reported a 7.4% increase in revenue during the first quarter of 1987, along with a 8% drop in net income, primarily traced to seasonal losses at its newly acquired Scott, Foresman & Co. The company also recently named Jason McManus, managing editor of *Time*, to succeed Henry A. Grunwald as editor in chief of Time Inc. Mr. Grunwald, who will reach the mandatory retirement age of 65 this year, has been nominated to be the U.S. ambassador to Austria.

"WHAT'S BLACK & WHITE AND READ ALL OVER IN A TRIANGLE...AND HAS THE POWER OF T.V. FOR LESS MONEY?"

ANSWER:

North Carolina's Research Triangle Newspapers deliver more audience for a lower CPM than T.V. in a booming market. So if you're selling cars, groceries, liquor, wine, beer or almost anything else, the Triangle's Newspapers are the best advertising answer.

TOLLFREE: 1-800-221-4596

How much did the nation's biggest advertiser spend on each of its brands?

Toyota Motor Corp.

RANK 40

Toyota City, Japan

($ in millions)

Worldwide	1987	1986	% chg
Sales	38,211	36,754	4.0
Net income	1,546	1,868	(17.2)
U.S. advertising	209	172	21.4

Toyota Motor Sales USA, a subsidiary of Toyota Motor Corp., Japan, unveiled its largest ad budget in 1986. In the process, the company strengthened its position as the leading car and truck importer in the U.S., despite severe competition in the marketplace and the yen's soaring value.

Toyota Motor Corp., the parent company whose fiscal year is reported in the accompanying box, attributed the dip in profits to the exchange loss caused by the sharp appreciation of the yen. Figures for the comparable fiscal years, ended June 30, were converted at the rate of Y165 = U.S.$1.

Toyota currently ranks third in worldwide auto production—behind General Motors Corp. and Ford Motor Co.—with a total of 3,645,733 vehicles produced in Japan in calendar 1986.

More than half of Toyota cars and trucks are exported worldwide. A record 1,965,138 units, plus 302,490 knockdown sets, were sold in overseas markets during fiscal 1986. The export figure includes 1,231,610 passenger cars, up 8.2% from the previous year. Exports to North America rose 14.8%, to 1,097,946 units. Passenger cars accounted for 62.8% of the vehicles shipped to the region.

Toyota's plans to capture 10% of the world's auto market by the 1990s, a marketing concept the company has dubbed Global 10, call for improving its modest 3% market share in western Europe as well as in Japan. But the U.S. is the key to making Global 10 a success. Toyota marketers report that for the company to seize 10% of the world market, it must have a 10% share of the U.S. market.

In the U.S., Toyota sales topped the million mark for the first time in calendar 1986, reaching a total of 1,024,305 units—647,436 cars (including 7,281 U.S.-built Corolla FX-16s) and 384,150 compact trucks—up 7.2% from a year earlier. The total represented an 8.9% share of the U.S. market, up from 6.7% in 1985, and a 31.5% share of the import market. Toyota ranks first among Japanese car importers, followed by Nissan at 22%, Honda at 12.4% and Mazda, 11.6%.

The company also led importers in total truck sales with an 8.2% share of total U.S. light truck markets, followed by Nissan at 4.8%, Mazda 3.3%, Isuzu 1.9%, Suzuki 1% and Mitsubishi 0.76%.

Despite record sales in fiscal 1986, Toyota is forecasting a 2.3% decline in car shipments for 1987 and a 4.8% drop in revenues. This is because of the strong yen, which has appreciated 40% against the dollar in the last year. A strong yen narrows the margin between the return Toyota gets on its cars and trucks in the U.S. and the cost of producing the vehicles in Japan. The U.S. is Toyota's most lucrative market.

Further squeezed by self-imposed quotas under the Voluntary Restraint Agreement, Toyota has followed Honda, Nissan and Mazda in constructing U.S. production facilities to assure itself an adequate supply of cars in the market.

Toyota and General Motors operate a joint venture plant called New United Motor Mfg. Inc. (NUMMI) in Fremont, Calif., which builds Toyota's Corolla FX and FX-16 models and Chevrolet's compact Nova. Currently, Toyota is building an $800-million plant in Georgetown, Ky., which will produce the upscale Toyota Camry ($14,168 for a top-of-the-line LE 5-door wagon). Capacity will be 200,000 units per year when the plant begins production in mid-1988. At that time the company will also start up a $400 million facility at Cambridge, Ont., which will make up to 50,000 Corolla class cars per year.

Two of Toyota's rivals are marketing upscale luxury cars in the U.S. or have announced plans to do so with separate dealer networks—American Honda through its Acura division and Nissan with its upcoming Infiniti. Toyota has yet to make a formal announcement of its plans to form a second luxury car division in the U.S., but it is planning for one.

However, Toyota already has identified 100 key Toyota dealers who will get first shot at the unnamed new franchise. It reportedly will open the 1989 year with three luxury-performance car lines and eventually set up 250 to 300 new dealerships. Size of the introductory ad budget is expected to be $30 million. Another agency may be chosen to handle the new division, but no advertising decisions have been announced yet.

The Toyota Corolla model, with sales of 152,137 units, was once again the company's best-selling line in the U.S. Sales of the Corolla were down 16,241 units from 1985. Toyota's second best-seller, the Camry, came in at 151,767 units sold, up 23,635 from the previous year. The Camry was followed by the Celica at 106,731 units and Tercel at 76,914.

Of the company's $181.7 million in measured advertising in 1986, 55% went for cars, 45% for trucks. Media was dominated by spot and network TV at 69%, newspapers 12%, and magazines 11.8%.

New introductions for the 1987 model year included the sporty subcompact Corolla FX-16, the low-price leader Tercel (at $5,848 a head-on competitor with South Korea's Hyundai) and new Camry sedan and Camry Wagon models. Besides the new launches, all of which had heavy ad support, Toyota pushed redesigned Celica and Supra models.

Toyota went into the launches in the fall with a 21-spot ad package which was its largest ever. Heaviest media weight was given the Camry, followed by promotion of the Tercel.

The Toyota reputation for quality was further enhanced when an independent study by J.D. Power & Associates, Westlake Village, Calif., gave Toyota six of the 10 top positions in a survey of the most trouble-free cars in the U.S. The Toyota Camry took the No. 1 ranking in the survey, a fact not overlooked in its advertising during the 1987 model year.

The popular Camry accounted for $15 million in 1986 measured media spending, 70% evenly split between network and spot TV, the rest in magazines.

While a shortage of Camrys at dealerships is a problem, at least until the company's Kentucky plant comes on stream in 1988, supplies of the U.S.-built Corolla FX-16 are plentiful, although demand for the car continues to be soft.

Rollout of the FX-16 began with the "getaway" commercial which broke on network and spot TV in fall 1986, supported by the use of Screenvision in theaters and some sports arenas. A second phase spot for the FX focused on its position as the lowest priced Corolla and its roominess, emphasized by a driver dressed as an astronaut in space.

The low-end Tercel models, priced at $5,848 for the EZ three-door liftback model, accounted for $7.6 million in measured media spending in 1986, most of it in spot and network TV, supported by a modest print campaign in magazines.

At mid-year, Toyota introduced a sporty two-door Tercel coupe to broaden the Tercel's appeal to entry-level buyers. Toyota expects to sell 26,000 Tercel coupes, base-priced at $6,548, in the 1987 calendar year.

Carryover TV spots on the top-of-the-line Supra continued the animation creative approach. A total of $12 million in measured media was spent on Supra in 1986. Unit sales of the $20,000 Supra hit 32,823 in 1986, up 28%.

With the price of the two-wheel drive standard pickup now at $6,598, up from $5,998 in 1985, Toyota no longer features low price as a selling point in its truck advertising. This was a category that accounted for about $35 million in measured media expenditures during 1986. As the company looked for a bigger share of the sport/utility truck market, the SR-5 Turbo model, priced at $18,568, got featured treatment in its own TV spot and a full-page ad run in enthusiast magazines.

The company continued its use of celebrity spokespersons. For the third straight year it made use of pro golfer Lee Trevino to pitch the full line of trucks and vans. Actor Eli Wallach continued to discuss qualities of fun and toughness of the truck line, and actor Martin Sheen, long used as voiceover for cars, pitched autos.

Acquisition-minded Unilever rebuffed in an attempted takeover of Richardson-Vick's in 1985, rebounded in 1986 with a $3.1 billion in cash buyout of personal products giant Chesebrough-Pond's, thereby gaining the ground it had lost to archrival, Procter & Gamble, which had won the race for R-V.

The holding company, Unilever, with joint headquarters in London and Rotterdam, acted as a white knight for Chesebrough, which was facing a hostile takeover from American Brands.

The Chesebrough acquisition may have whetted rather than sated Unilever's appetite for U.S. businesses, because Unilever was rumored as a suitor for both International Playtex and Gillette Co., although neither deal materialized.

The melding of Chesebrough into Unilever caused an inevitable reshuffling of both Lever Bros.'s marketing personnel and the company's ad agency roster.

The ultimate winners in the agency review, finalized in February were Unilever's U.S. agencies Ogilvy & Mather and McCann-Erickson. Ogilvy picked up the lion's share of ad billings, with an estimated $55 million of Chesebrough's $70 million.

O&M gained $13 million in Aziza billings; $17 million in fragrance billings; $6.5 million from Pond's; $8 million in Cutex; $250,000 from Erno Laszlo skincare products and $9 million in haircare product billings. McCann won an estimated $14 million in Vaseline billings.

On the losing side was Waring & LaRosa, New York, which lost Aziza and Cutex, but retained Ragu and Adolph's food products, valued at $19 million. William Esty Co. lost both fragrances and Elizabeth Taylor's Passion perfume, the latter of which had been won from Chesebrough only a month earlier. Lowe Marschalk Inc. also lost the $8 million Q-Tip account to O&M.

In all, Chesebrough products were backed with $78 million in seven measured media in 1986, virtually the same as in 1985, according to BAR/LNA.

Power on the corporate executive side of personal products appeared to shift from Lever to Chesebrough, as evidenced by the appointment of Gary Mallock, Chesebrough's Health and Beauty Products division president, to head a $700 million combined personal products unit of Chesebrough and Lever. The appointment clouded the future of Wayne Nelson, Lever's wunderkind personal products division president who had turned around the company's toothpaste business. Mr. Nelson, a P&G alumnus, joined Lever on the heels of its R-V loss to P&G and had been heralded as Lever's trump card against its Cincinnati-based rival.

Patrick Choel, Lever VP personal care business was named to VP marketing for the combined operation, moving to Chesebrough's Greenwich headquarters.

The acquisition also left two directors running different North American businesses. The two are Gordon Stevens, Lever Bros. chairman, and Morris Tabaksblat, chairman Unilever U.S., who in early 1987 succeeded Ralph Ward as Chesebrough chairman-ceo. Observers say it is unprecedented for Unilever to allow a redundancy such as two directors, and favor Mr. Tabaksblat, 49, for the top post.

Also as a result of the acquisition, Chesebrough's unprofitable G.H. Bass Shoe division and Prince tennis racket business, long-rumored for divestiture, were put on the block.

Prince was sold in June 1987 to Brentwood Associates, Los Angeles-based leveraged buyout firm. Bass was sold to Phillips-Van Heusen in July 1987 for $79 million. Unilever also put Stauffer Chemicals, acquired by Chesebrough for $1.25 billion in 1985, up for grabs.

Chesebrough's U.S. operation is virtually the same size as Unilever's big U.S. operating unit, Lever Bros. U.S. sales for Chesebrough were $2.28 billion, up 23.7%, compared with worldwide sales of $2.73 billion, up 21.8%. Its worldwide net income was $159 million up 94.1%. Sales at Lever Bros. were a record $2.48 billion, up 18%, although it recorded a net loss after taxes of $18.6 million, substantially lower than the $38.6 million projected by the company as a result of investment spending.

In mid-1987 Lever unleashed a powerful weapon—new drug approval from the Federal Drug Administration for its fluoride Extra Strength Aim—in the $1 billion dentrifice war with P&G and Colgate-Palmolive. Hard-hitting spots by Aim agency SSC&B, New York, which won the account from O&M the previous year, began touting Extra Strength Aim's fluoride superiority. One spot shows a Colgate tube being squeezed out under running water in a basin with the voice-over, "Sorry, Colgate. Looks like your 20 years of maximum fluoride protection is going right down the tubes." A second spot says, "No matter how hard you try, you can't squeeze as much cavity-fighting fluoride out of Crest as you can out of this." Shown is a tube of Extra Strength Aim.

P&G disputed Lever's claim, unsuccessfully, at the FDA and both Colgate and P&G took the ads to the National Advertising Division of the Better Business Bureau. All three advertisers gave conflicting reviews of independent studies at the NAD, and Lever, which issued a statement it stood by the truthfulness of its advertising, nonetheless said the spots had run their course.

While Colgate appears to be retreating in the fluoride arena to concentrate on the tartar-control ability of its Colgate Tartar Control brand, P&G is fighting on both fronts.

Although Lever asked both Colgate and P&G to drop their fluoride-superiority claims, only Colgate complied. P&G leads the dentrifice market with a more than 39% share for its Crest lines, followed by Colgate's 23%. Aim still holds the No. 4 spot, with 7%, below Beecham Products' Aquafresh, with 10.5%.

Measured spending for Aim in 1986 was $9.6 million, down 9.4% from 1985. Lever spent $3.3 million on its Aim toothbrush in 1986, according to BAR/LNA Inc.

Lever Bros. and P&G remained staunch contenders for the lead in the $3 billion detergent battleground in 1986. Lever's Wisk maintained its No. 1 share in the liquid detergent category, with a 7.6% share, while Tide liquid moved up to 5.3%. P&G's Tide still holds the No. 1 spot in the powdered detergent market, with a 19.1% share. BBDO Worldwide, New York, handles Wisk.

Lever's Surf, which increased distribution to 33% of the country in 1986, climbed to a 5.9% share (in both powder and liquid forms). Surf liquid, with distribution in only 15% of the country, holds a 7.5% share in its markets—making it the No. 2 brand. Lever said it would increase Surf's distribution to 50% of the country in 1987. The brand is billed as removing "both dirt and odors."

The company also lent an established brand name in liquid detergent, Wisk, to the $2.1 billion powdered detergent segment with a Houston test in 1986. In its test market, powder Wisk attained a 6.5% share. Measured ad spending for powder Wisk in 1986 was $551,000.

In the summer of 1987, Lever dazzled the competition with a summerlong traveling firework exhibition for Wisk staged by Bellport, N.Y.-based pyrotechnics experts The Grucci Bros. During that period, the company spent $10 million in combined advertising and promotion for the brand, including a new TV campaign pointing up the all-purpose cleaning power of New Wisk, a move away from the heavy-duty ability of its long-running "ring around the collar" claims. Total measured ad spending for Wisk in 1986 was $22.8 million, up 33.3% from the previous year. Spending for both liquid and powder Surf was $12.7 million, more than double 1985's measured spending of $5.7 million.

Volume for laundry detergents in the U.S. increased by 18%, the company says, attributing the gain to new product lines and extensions.

Although P&G beat Lever to the punch with Tide Multi-Action sheets, a combination detergent, whitener and fabric softener, Unilever is marketing a detergent and bleach mixture in a water soluble pouch in Paris. The product, called Apollo, will be moved to the U.S. if the test is successful.

Lever's Snuggle fabric softener, which attained a 13.6% share of its category, softened its spending to $12 million, down 21.6%. Lever rolled national in 1986 with its Snuggle softener sheets, and increased measured spending fourfold to $12.2 million, up from $3.2 million. Snuggle sheets had a 7.5% share in 1986. SSC&B handles.

Lever lost some ground to Colgate-Palmolive, as that company's Palmolive liquid automatic dishwashing detergent beat Lever's Sunlight liquid automatic to market. Sunlight had been testing in Milwaukee and Phoenix in preparation for a national launch in mid-1986, but production problems held up its entry into the $550 million segment. As a result, Lever spent only $106,100 on Sunlight liquid dishwasher detergent in 1986. The powder version was supported with $10.2 million in measured spending, according to BAR/LNA. BBDO, New York, handles Sunlight.

In the $1 billion bar soap category, Lever's holds the largest collective share with its brands, and Dove is the No. 1 soap in the category with a 13.9% share. Dove was supported with $12.2 million in measured media via Ogilvy & Mather, New York. Caress, with $10.3 million in measured support, is handled by BBDO, New York, and Shield with $4.9 million via SSC&B.

Lever began testing its Trust brand deodorant in southern markets in 1986, its first entry in that category. The company also extended the Close-Up name to a lip balm product during the year.

Unilever's Thomas J. Lipton unit, Englewood Cliffs, N.J., acquired Wyler's powdered drink mix from Borden Inc. in a swap which gave Borden Lipton's Pennsylvania Dutch Egg Noodle lines. Analysts say Lipton's marketing muscle should build Wyler's—the perennial No. 2 to General Foods' powdered drink business—while strengthening Lipton's position in convenience teas, an allied category.

Lipton says the acquisition expanded its powdered soft drink business more than four times.

Lipton also heated up the $900 million side dish market by overtaking General Mills' Golden Grain division's Noodle Roni as the No. 1 noodle side dish. Lipton spent $2.1 million in measured spending for its Pasta & Sauce line in 1986, and $6.4 million for the Rice & Sauce line, up from $3 million combined for the two brands in 1986. Bozell, Jacobs, Kenyon & Eckhardt, Chicago, handles the side dishes.

Lipton increased its side dish offerings to 40 in 1987 with Potatoes & Sauce and Lipton Cool Side Salad Dishes, a direct challenge to GM's Betty Crocker potato lines and Suddenly Salad cold side dish line.

The fruit snack war became stickier when Lipton spent $24 million to introduce three new fruit snacks in 1987. Sunkist Fun Fruits holds the No. 1 position in the $225 million fruit snack segment, but a 10% share of the larger wholesome snack segment, which includes granola bars, where Lipton has no entry. General Mills holds a 15% share of the larger category, a big dip from its 1985 share of 23%.

During 1986, the popularity of fruit rolls weakened, while the bite-size fruit snack market grew. Fruit rolls/bars dropped 16.8% to $108 million in retail sales while bite-sized fruit products, such as Big G's Fruit Wrinkles, grew from $5 million to $96 million. Lipton, whose strength in the segment in 1985 had been dependent on Sunkist Fruit Rolls, adapted to the trend and in 1986 tested Creme Supremes, a yogurt-covered, bite-sized fruit snack which rolled national the following year.

The company also began testing Sunkist Fruit Surprises, an embossed fruit roll, in Boston and began national distribution of Flavor Tree Fruit Nibbles, an unsupported yogurt-covered snack.

The company also introduced Fun Fruits in new shapes, including letters, animals and numbers, to appeal to the 4-to-7-year-old age group.

Lipton spent $5.8 million on its Sunkist Fun Fruit line in 1986, up 70.6%. For the Creme Supreme rollout, however, the company says it would spend an additional $24 million in 1987. FCB/Leber Katz Partners, New York, handles.

Lipton says its sales gains in 1986 were led by the side dish and fruit snacks lines. Net sales for Lipton in 1986 were $1.30 billion, up 2.4%. Net income for the division was $91.5 million, up 13.8%.

The competition turned healthy in the margarine market, where Lever's Promise and RJR Nabisco's Fleischmann cut right to the heart of the matter. Lever broke a $18 million campaign for Promise themed "Get Heart Smart," pointing up the low-cholesterol properties of the brand. Three weeks later Fleischmann's broke a spot in which a 30-year-old man discusses his recent heart attack.

The Promise campaign, via McCann-Erickson, New York, helped the brand to vault from a 1% national share to a 6% share in its 11 regional markets, prompting the company to roll national by late 1986. Fleischmann's held an 8% share nationally. Tatham-Laird & Kudner, Chicago, handles Fleischmann's, which had earlier been positioned to consumers aged 50-plus.

By the end of 1986, Lever had taken the lead overall in the margarine segment, with nearly 30% of the market, although Kraft's Parkay brand is the brand leader with 16%.

Lever spent $9.7 million on its Shedd Spread in 1986, down 5.8%. Shedd holds a 12% national share. The company spent $4.8 million on Imperial, a premium brand with an 8% share, up substantially from $1.6 million in 1985 measured spending, according to BAR/LNA. Stone & Simons, Southfield, Mich., handles Shedd's Spread; Ogilvy & Mather, New York, handles Imperial.

In 1986 Lipton, along with powdered soft drink competitors Nestle and General Foods jumped into fruit teas. All three companies spent an estimated $8 million each to introduce the combination iced tea/powdered fruit-flavor drinks, but by 1987 the market had failed to achieve satisfactory results.

Lipton, the No. 1 convenience tea marketer with a 42% share, attained less than a 25% share of the $48 million fruit tea segment. Nestle, with a 20% convenience tea share, leads the fruit tea segment with a 50% share. GF's Crystal Light Fruit Teas holds a 25% share of the segment, but has no iced tea entry.

As a result of the fruit tea flop, Lipton says it will concentrate on its core convenience tea business and divert the bulk of its spending there, where it has gained considerable share at Nestle's expense. Fruit teas will be supported primarily in heavy iced-tea consumption areas, with minimal national exposure beyond consumer promotional events in 1987. As a result, measured spending for fruit teas dropped to $2.5 million in 1986. Ally Gargano/MCA, New York, handles.

In convenience teas, Lipton targeted soft-drink consumers with fast-paced national advertising featuring athletes winding down with an iced tea. The company also ran a consumer promotion offering consumers 20% off a pair of Reeboks at Athlete's Foot stores with four proofs-of-purchase of the teas. SSC&B, New York, handles.

In hot teas, Lipton rolled national with its decaffeinated tea bag. SSC&B, also handles.

RANK **29**

U.S. Government

Washington

($ in millions)

U.S	1986	1985	% chg
Advertising	306	259	18.2

Spending by the U.S. Government rose 18% to $306 million in 1986, largely a result of budget hikes by military advertisers and the U.S. Mint. The government is likely to spend significantly more this year, since several new advertising campaigns have been added for such diverse issues as immigration and AIDS awareness.

But the main news of the year centered on the military, which spends two-thirds of the government's ad budget. In 1986 military advertising increased 16% to $206.6 million, but the Department of Defense says it intends to decrease its total budget by 25% by 1991.

Also, four service branches, accounting for more than $130 million in billings, changed agencies in the last 12 months.

Another major government advertiser, Amtrak, had 1986 spending rise only slightly to $28.9 million and is expected to keep at the same levels. It's still rolling a TV campaign focusing on the romance of train travel, via DDB Needham Worldwide.

The U.S. Postal Service's 1986 advertising budget fell 16% to $33.4 million, but postal officials expect to spend more in the coming year to reflect Postmaster General Preston Tisch's desire for more aggressive marketing. In 1988 the USPS will review its contract with Young & Rubicam.

The federal government's 1987 total also gets a boost from a $10.7 million campaign by the Immigration and Naturalization Service, which earlier this year awarded the 18-month assignment to the Justice Group, Los Angeles.

Campaigns to inform illegal aliens and employers of the new immigration law broke in July, using the theme "Working for a better America" and starring Robert Stack and Hector Bonilla, a Mexican actor.

This year military advertising is expected to decline to $191.3 million, despite a dwindling pool of 18-year-olds, recruiters' prime targets. The numbers of 18-year-olds will fall through 1992, when there will be only 3 million of them, down 25% from 1978.

Military advertisers who changed agencies in recent months are likely to experiment with new campaigns in 1988. The Army, Navy, Air Force and National Guard all switched allegiances this year.

The reviews were marked by heated competition, especially the exhaustive Army search, which called the biggest guns to the field and ended with 19-year account veteran N W Ayer as a casualty.

In November, weeks before the decision on the Army's $500 million, five-year contract, the Army suspended Ayer from government business, essentially throwing it out of the review. The Army said it had evidence that Ayer had allegedly inflated time cards and rigged bids. It also held Ayer responsible for the conduct of an Ayer VP found guilty of embezzling $60,000 from a subcontractor.

Ayer's suit against the government for the suspension is still pending. Young & Rubicam, New York, won the contract in January.

In August 1987, the Navy pulled up its 12-year anchor at Ted Bates Advertising (now Backer Spielvogel Bates) to dock with BBDO Worldwide, New York. The series of changes began in August 1986 when the Air Force landed at Bozell, Jacobs, Kenyon & Eckhardt, leaving D'Arcy Masius Benton & Bowles, its agency of 27 years.

BJK&E also snared the National Guard's account, which DDB Needham Worldwide resigned after six years.

Only the joint military advertising account, in review in 1986, remained at incumbent Grey Advertising. The Marine Corps was the only military service not up for review in the past year. J. Walter Thompson USA isn't slated to defend its three-decade hold until its five-year contract expires in 1990.

While new campaigns aren't slated to break until early 1988, the Army says it will keep "Be all you can be," adding as a secondary slogan, "Get an edge on life."

The Air Force will keep "Aim high," while unveiling new executions next year, and the National Guard is still developing its advertising. The Navy is considered likely to drop its 12-year "Live the adventure" theme since most of the agencies that vied for the account, including BBDO, recommended against it.

Recruiting efforts overall achieved the same high levels as in 1985. The Navy lagged slightly behind the other services in enlisting high school graduates, however.

The Army wants a $104 million budget for 1988, up from the $97.9 million it expects to spend this year. In fiscal 1986, it spent $105.3 million, with $8.8 million going to the Army Reserve Officers Training Corps.

The Navy has been hardest hit by budget cuts. Its budget plummetted 48% to $17.6 million this year. It sought to shift $10 million from a different Navy department into its ad budget, but Congress didn't go along. It seeks an increase to $25 million in 1988.

The Marine Corps' budget increased 14% to $19.6 million in 1986 and is slated to remain at that level for the next two years.

The Air Force budget fell 3% to $16.3 million in 1986, and will rise to $16.8 million in 1987. It asked for $15.7 million in 1988.

The Army National Guard's budget rose 31% to $11 million, and the service expects to spend $14.5 million this year and the same level in 1988.

The Air National Guard's budget rose 22% to $2.8 million, and it intends to stay at that level for the next several years.

The joint services ad budget dropped 7% to $17.2 million, but it will spend $21.3 million in 1987 and ask for $33.5 million in 1988. Results of the advertising mix test, which calculated that the Department of Defense could advertise more efficiently by beefing up the joint services budget, was slated for release this month.

The Coast Guard, part of the Department of Transportation, is spending about $500,000, and in 1987 switched to CSI Productions, Hyattsville, Md., from Thomas Buffington & Associates, Washington.

In 1986, the largest addition to government spending was the U.S. Mint's $32 million campaign for Statue of Liberty commemorative coins.

Sales from the coin raised more than $82 million to restore the 100-year-old statue. Grey Advertising handled the campaign, using the theme, "Keep Liberty in mint condition."

Grey's success earlier this year won it the $8 million campaign for the U.S. Mint's bullion coin, the American Eagle. A domestic and international print campaign uses the theme "American Eagles. An investment you can actually hold."

The U.S. Mint hopes to issue a commemorative coin annually. This summer it began selling the U.S. Constitution coin, celebrating the bicentennial. Backer Spielvogel Bates, New York, breaks TV and print advertising in September, using the theme, "Hold onto the promise." The campaign is expected to approach $20 million in billings. Sales from the coin may raise $55 million.

Still in the formative stages for 1988 is another Olympic coin, this time for the 1988 Olympics in Seoul and Calgary. Congress is still considering the authorizing legislation.

Public service advertising by the government in 1986 fell 17% to $6.7 million. Much of the drop came at the Advertising Council, whose government billings dropped 32% to $1.3 million in 1986, because government advertisers cut their budgets.

But the Council expects to handle $2.4 million in government campaigns in 1987, including a $600,000 campaign for the bicentennial of the U.S. Constitution and $20,000 in startup advertising for the 1990 Census.

The Council in 1987 broke a new campaign for the Interior Department, asking America to "take pride" in public lands; the TV spots star actors Clint Eastwood and Lou Gossett Jr. In July it accepted a $250,000 assignment from the Internal Revenue Service for a campaign explaining tax reform.

Also boosting the public service arena in 1987 was the creation of a $2 million campaign for AIDS awareness, which the Centers for Disease Control in August awarded Ogilvy & Mather, Atlanta.

US Sprint Communications

Shawnee Mission, Kan.

($ in millions)

Worldwide	1986	1985	% chg
Sales	2,132	1,800	18.4
U.S. advertising	102	55	88.0

US Sprint Communications, a joint venture of GTE Corp. and United Telecommunications Inc., celebrated its first birthday on July 1, 1987, and there was cause for jubilation: Revenues, the customer base and market share were up over 1986.

Industry experts say that in order to survive in the long-distance marketplace, US Sprint will need to amass a 7% share of market. US Sprint, whose market share was 4% in 1985 —behind AT&T's 85% and MCI's 8%—stepped up promotional efforts, improved quality and poured most of its advertising budget into TV, resulting in a growth in market share to 6.6% by the end of 1986. Then in September, further rejoicing was sparked by a court ruling banning the regional Bell companies from entering the long-distance business.

Competitor MCI likewise improved its market position with a 10.6% share, while the apparent loser was AT&T, whose market share dropped to 80.2%, according to Glenn Powers, senior analyst with the New York-based market research firm, Northern Business Information Inc., publisher of the U.S. Telecommunications Market Report. Company objectives are to gain a 10% share by 1990.

A chance for greater market stability may result from the ruling early this month that continued the ban on regional Bells to operate long-distance services. The ruling, expected in many quarters, came from Judge Harold A. Greene, who presided over the AT&T breakup.

Currently, US Sprint's eight divisional offices serve more than 5 million customers, double the customer base in less than a year. The company attributes part of the dramatic upsurge to a promotional sales effort, the "Charter Customer Sale." This year Sprint launched its "U.S. Daylight Savings Time Sale" promotion, which promises a 10-month discount in service for new and eligible existing customers who sign up between July 17 and Sept. 30.

The promotion is being sweetened by an across-the-board rate reduction of 4.5%, which US Sprint filed on July 6, 1987, in order to keep its rates lower than those offered by AT&T. Since the January 1984 breakup of the Bell System, long-distance rates have dropped by about 30%. As of last year, when it was formed as a separate entity, Sprint has reduced its own rates three times, for a total of 20%, in addition to the most recent request.

The growing customer base, however, has a negative side. Growth has been so rapid that US Sprint has been forced to lease expensive lines from AT&T to service the business. This in part has generated higher losses than initially projected.

Price is one way to attract new business, but customer demands for quality have influenced the building of US Sprint's nationwide all-digital, fiber-optic network. The 23,000-mile system is expected to be complete by year's end at a reported cost of $3 billion.

In a national TV campaign that broke March 30, a singer in New York breaks a glass bud vase in Los Angeles through voice power and the clarity of the fiber-optic technology. J. Walter Thompson USA handles the account.

US Sprint expects 95% of its calls to be handled by its fiber-optic system by the end of the year. AT&T and MCI also are hurrying to build fiber-optic networks.

Because 55% of US Sprint's revenues come from business customers, TV advertising is directed to male-oriented shows. In 1985, the company's advertising appeared almost exclusively in spot TV markets. Last year, Sprint pumped $25 million into national TV while reducing its spot TV spending 29% to $36.9 million.

In the seven media monitored by BAR/LNA, US Sprint spent $68.4 million for the full calendar year in 1986, compared with $46.7 million while under the GTE umbrella in 1985.

To add to customer convenience, Sprint introduced a travel card service, "Foncard," similar to those offered by competitors. The card increases nationwide access to US Sprint's services.

Even though it is difficult for smaller long-distance companies to establish overseas links because of AT&T's dominance of the market, US Sprint has made 40 countries accessible. Together with the recent introduction of an 800 number-service and other operator services, US Sprint claims it is the "only full-service provider competing with AT&T." Sprint's strategy is to continue to challenge its mammoth competitor in pricing, service and quality.

Robert H. Snedaker Jr. was named president of US Sprint this July. Mr. Snedaker had been the chief operating officer and vice-chairman of United Telecommunications Inc. He succeeded Charles Skibo, who resigned.

Volkswagen of America, a subsidiary of Germany's Volkswagen AG, faced two marketing challenges in 1986 that have carried over into 1987: re-establishing itself in the crowded low-end market and enhancing the identity of its entire line of automobiles.

A 24% increase in advertising spending for 1986 reflected the Troy, Mich.-based subsidiary's readiness to mount an attack on both fronts.

The Fox, which made its debut in early 1987, is VW's answer to the Hyundai Excel from South Korea, as well as low-end entries from both Japanese and Detroit manufacturers. Hyundai sold 168,882 units in 1986 while Yugo, for instance, sold 35,959, GM's Chevrolet Sprint 60,983, and Chrysler's Plymouth-Dodge Colt 45,094.

VW hopes the Brazilian-made subcompact, priced at less than $6,000, is designed to attract first-time buyers and families who already own two or three cars. Sales of the Fox, which is offered as a two- and four-door sedan and station wagon, are expected to total 50,000 to 60,000 units for the first full year. The company originally had projected sales of 70,000 units, but was forced to scale down that figure due to delivery problems from Brazil.

Ads for the Fox have played off the legacy of the Beetle, the popular, low-priced model which VW used to establish itself in the U.S. Yet the ads positioned the Fox as a contemporary car, not just today's Beetle. One magazine spread showed the back half of a beetle on the left and a Fox on the right. Underneath the cars, the copy read "An idea whose time has come and gone. Has come again."

While VW executives concede that sales of other models could be cannibalized by Fox, they hope that 85% of Fox sales will come from buyers who otherwise would not have bought a Volkswagen. It is also hoped that these buyers will eventually trade-up to higher-priced VW models, such as the $13,000 Jetta.

Despite several price increases because of the drop in the exchange rate and increased competition, sales of all VW models in 1986 declined only 0.4%, to 217,231 units. Late in 1986, company officials predicted 1987 calendar-year sales will jump to between 250,000—270,000 units. However, as a result of the slumping auto market, VW now projects sales of between 225,000 and 230,000 units for 1987.

VW's share of both the import and total U.S. car market by unit sales shows signs of slipping in 1987. During the first half of this year, the shares dropped to 5.5% and 1.9%, respectively, compared to 7.45% and 2% over the same period in 1986. Newcomer Hyundai by comparison held a 1.5% market share of U.S. unit car sales and ranked 10th behind 8th-place VW.

VW's effort to shed its single-car image, which market-watchers say is essential if the automaker is to successfully compete against higher-priced European imports, also continued through late 1986. Despite the emergence of the Fox, "We are not going to become the Fox car company as we were the Beetle car company," says William A. Gelgota Jr., VW manager-advertising.

The cover of a 12-page magazine spread drew on the famous VW "Think small" ad by using the VW logo and the line "If this makes you think small, think again." Subsequent spreads urged the reader to "think fast" for the Scirocco 16V; "think smart" for the Jetta; "think ahead" for the Golf; "think big" for the Vanagon minivan, and "don't think at all" for the Cabriolet convertible. "Now what do you think of Volkswagen?" posed the copy on the back page of the spread.

A series of 30-second TV spots that broke in October 1986 during NBC's World Series telecast echoed the same theme. In one spot for the racy 16-valve Scirocco, a disapproving mother tells her son, "Your father used to own a Volkswagen. It was a nice little car. This is not a nice little car."

Ads for 1987 models also attempted to establish a distinct identity for each car. Spreads for the Scirocco 16V, the GTI 16V and the new Golf GT emphasized the cars' speed and power. An ad for the Golf GL urged the reader to "Join the American Autobahn society" and stressed the model's durability. A spread for the Jetta compared its investment value to that of Mercedes and BMW.

Mr. Gelgota says ad campaigns for the 1988 model year, via DDB Needham, will focus on strengthening the VW brand name as a whole. This strategy, he says, is designed in part to boost the automaker's "niche products"—the Scirocco, Quantum, Cabriolet and Vanagon.

Network and spot TV accounted for roughly 55% of the measured national budget for 1986, jumping 42% and 23%, respectively. Magazine spending, representing almost 30% of measured spending, rose roughly 4%. Although VW's

Note: Dollars are in thousands.

marketing plans for 1988 are still under wraps, Mr. Gelgota says there will be some major shifts in media usage.

Under the new Tactical Marketing Association program, VW began matching dealer ad group contributions dollar for dollar. Previously, it was up to dealer associations to initiate requests for matching funding on a program-by-program basis. As a result, co-op ad funds available to its dealers in the 1987 model year were expected to at least double. It is estimated that co-op spending in 1987 will come to $25 million.

After years of consideration, VW began assembling Jettas at its Westmoreland, Pa., plant in October 1986. The Jetta, VW's most popular U.S. model, joins the Golf and the derivative GTI as the only cars assembled at VW's sole U.S. plant. Although the move was spurred by high-demand for the Jetta, overall production dropped 13.2% due to slumping Golf sales. VW also closed its only stamping plant in South Charleston, W. Va., and now receives the majority of its stampings from Volkswagen de Mexico.

For Audi of America, a division of Volkswagen of America, hopes for a strong 1986 were shattered when driver complaints about alleged incidents of unintended acceleration with the 5000-S model became widespread.

After selling a record-breaking 74,061 units in 1985, overall 1986 sales dropped 19%. Market-watchers predicted the slide would continue into 1987. Throughout the controversy, Audi denied there was a mechanical defect and did little to make amends with the buying public. Mounting pressure from the National Highway Transportation Safety Administration and consumer groups led the company in January 1987 to recall 250,000 of the cars produced between 1978 and 1986 to install a device designed to prevent a shift from "park" to either "drive" or "reverse" unless the driver's foot was pressing on the brake.

This past spring, backed by an $80 million marketing program, Audi began taking steps to rebuild its tarnished image and restore the public's faith in its product. The effort included a program that offered 150,000 owners of 1984-86 5000s a $5,000 rebate towards the lease or purchase of a 1987 5000 and factory-to-dealer cash incentives, ranging from $500 to $2,500, on 1987 Audi 4000s.

In July, Audi kicked off a six-month, $30 million media campaign that will include a series of radio, TV and print ads stressing the same theme: "They say the car you drive says a lot about you. We think the kind of people who drive our cars says a lot about Audi." The ads feature consumers and well-known personalities discussing their personal experiences as Audi owners.

Audi's efforts appear to have paid off through the first half of 1987. During the first three months of the year, sales totaled 6,533 units. Over the next three months, which corresponded with the rebate program, sales almost tripled to 18,354 units. In addition, Audi executives predict the company can maintain sales of 5,000 units a month once the 1988 models are introduced.

Meanwhile, the company announced that following a facelift, successor cars to the 5000s series will be introduced as the Audi 100 and Audi 200 in an effort to internationalize model names. The 1988 versions of the 4000 will be introduced as the Audi 80 and Audi 90.

Observers say the public perception crisis that plagued Audi has had little effect on Volkswagen of America because most car buyers are unaware of the relationship between the two companies.

Decreased spending on movies and the sale of one of the company's biggest advertised businesses—MTV Networks—cut overall advertising at Warner Communications by 25.8% in 1986.

Warner, however, continued to show strong growth, reporting record profits in three of its largest media spending businesses: filmed entertainment, recorded music and cable.

Encouraged by its positive financial picture, Warner went on a shopping spree buying an interest in Cable Value Network, the large cable home shopping service in the U.S. WCI also received warrants to purchase up to 1.18 million common shares of C.O.M.B., a leading marketer of off-price consumer products and founder of CVN.

WCI rescued the Cannon Group, from bankruptcy, reaching an agreement with the film producer to purchase convertible preferred stock of Cannon and secured notes of certain Cannon subsidiaries for an aggregate price of $50 million in cash. Warner also got North American distribution rights to 21 films.

The company acquired a 50% interest in Gulf & Western's domestic motion picture theatre operation, consisting of 472 screens around the country. Warner Bros. agreed to license to HBO the pay TV rights to all of its motion picture releases over the next five years. That could add about 50¢ a share to Warner's earnings on an annual basis.

Absent from the Warner measured media totals of $34.1 million, down 30.5% from 1985, was MTV Networks. Warner spent $5 million advertising the network in 1985, according to BAR/LNA. MTV along with Showtime/The Movie Channel were sold in 1986 to Viacom Inc., which had owned one-third of the cable TV network.

During 1986, Warner's filmed entertainment division reported operating income of $172.2 million, up 7.5%, on a growth of 4.2% in sales. To promote its films, Warner spent $25.5 million in measured media—most heavily in network and spot TV—down 30% from 1985. For example, this compared to MCA Inc's. Universal Pictures which spent $38 million on 12 films, down 9.5% from 1985.

Warner's domestic box office revenues reflected the film industry's renewed growth. The company has 16% of the gross box-office receipts, No. 2 to Paramount's 23% share. "The Color Purple" was Warner Bros. most successful film of 1986. The film, which received 11 Academy Award nominations, generated more than $95 million in domestic box-office sales during the year.

Other Warner Bros. pictures generating more than $40 million in 1986 included "Cobra," starring Sylvester Stallone; Clint Eastwood's "Heartbreak Ridge;" and "Police Academy 3: Back in Training." Early second quarter results from Stanley Kubrick's "Full Metal Jacket" are encouraging.

As part of its filmed entertainment division, Warner Home Video, increased revenues by more than 35%. Sales should continue to climb in 1987 with inclusion of North American home video rights to 21 Cannon films.

Warner's recorded music division revenues grew 25% as operating income climbed 33.6% to $150.6 million. Big sales contributors were Madonna, Paul Simon and David Lee Roth.

Atlantic Records continued to grow with sales from superstar Phil Collins whose 1985 release "No Jacket Required" sold an additional two million units worldwide in 1986, for a two-year total of almost nine million units. Anita Baker's first major label recording "Rapture" was Elektra/Asylum/Nonesuch's most successful 1986 release.

Warner's publishing division, consisting of Warner Books, DC Comics, *Mad* magazine and Warner Publishing Services had a 9% growth in revenues although operating income declined 17.5% to $11.3 million as weak newsstand sales continued to hurt DC Comics and Warner Publishing Services.

Sales	1,747	1,962	(11.0)
Operating profits	531	(94)	664.9
Advertising	549	469	16.9
Division sales	**1986**	**1985**	**% chg**
Health care	2,041	2,240	(8.9)
Gum & mints	678	626	8.3
Other products	384	334	15.0

Despite a year of declining sales and earnings, Warner-Lambert continued heavy support of its healthcare and gum and mint lines and strong new product development as advertising grew 16.9% to $549 million in the U.S.

W-L, which reports spending $693 million worldwide on advertising in 1986, up 10%, attributes 35% of its sales in 1986 or nearly $1 billion to non-prescription products subsegment of its healthcare division. Ethical products is the other subsegment. Together, they accounted for 64.5% of worldwide sales.

In this over-the-counter subsegment there is heavy new product movement. Benadryl anti-allergy medicine passed Schering-Plough's Chlor-Trimeton to become the No. 1 allergy medication. W-L transferred Benadryl from prescription to over-the-counter sale in 1985. In 1986, supported by heavy media spending of $11.9 million, up from introductory levels of $3.5 million in 1985, sales of Benadryl hit $60 million, up 47% from 1985. Benadryl is presented for cross-use in the colds category in print, TV and radio.

Sinutab, W-L's sinus remedy, broke new ground in 1986 with Sinutab Nighttime, a bedtime sinus formula without alcohol or sugar. Aided by this new entry, sales for the full Sinutab line increased 14% to $48 million. Media spending, however, declined 5% to $7.8 million for the line, according to BAR/LNA.

In what could be the next wave of health supplements, W-L's Parke-Davis division introduced Promega, a dietary supplement containing natural fish oil—a nutrient credited with lowering cholesterol levels. W-L is estimated to be spending $10 million to advertise the new entry, which competes with Squibb Corp., Carter-Wallace and Thompson Medical Co. A line extension, Promega Pearls, was introduced in June 1987.

W-L also introduced calcium-rich cherry flavored Rolaids. The Rolaids line had sales of $83 million in 1986, up 2%. Media spending grew 16.8% to $13.9 million, mostly in network TV.

The company has in test Concentrin, a liquid cough syrup that is supported with an in-store cough symptom analyzer that allows customers to pick the cough "additive" to supplement the product's suppressant qualities, whether it be nasal decongestant or expectorant. The company is preparing to launch Suplical D, a chewy calcium supplement flavored with vanilla.

Halls cough tablets, W-L's largest selling product that claims about 50% of the market, had sales of $215 million, a 9% increase over 1985. Media spending dropped 15% to $6.7 million.

Warner-Lambert's Listerine continued to lead the $600 million U.S. mouthwash market with a 28.5% share, although it currently faces heavy competition from No. 2 Procter & Gamble's Scope (26% share) which introduced Peppermint Scope nationally in early 1987. Media support for Listerine's was $24.6 million, up slightly.

Worldwide sales of gums and mints increased 8% in 1986. In the U.S., sales went up 3% despite a sluggish market. W-L's leading gum Trident sugarless, held its No. 1 position with sales of $151 million, up 12% from 1985. Trident was supported by a new advertising campaign which claims that chewing Trident helps fight dental decay. Trident built back its media spending in 1986 with an expenditure of $19.2 million, up 23.9% from 1985, a year in which advertising had dropped 12%.

Ad spending on Sticklets gum, billed in advertising as "Skinny Sticklets . . . Fat with Flavor," in the year after its introduction grew to $10 million, up 19%.

The other products division consisting of Schick razors and blades and empty hard gelatin capsules had overall sales growth of 15% although a decline of 4% in U.S. sales as the market softened for permanent blades and tampering incidents cut into the sale of OTC capsule products.

Other	37	26	42.3

Wendy's International in 1986 found itself squeezed by two tough forces: the formidable task of returning sales to the high levels achieved during the heyday of the "Where's the beef?" campaign in 1984-85 and the difficulty of doing so in the midst of a general slump in the fast-food market.

The result has been a number of significant changes made in Wendy's top management, in its operations and in its marketing strategies. But as its top executives have cautioned impatient stockholders and uneasy franchise operators, the turnaround will take longer to achieve than did the meteoric rise in sales three years ago.

Systemwide (company and franchised-stores) sales for Wendy's rose 2% to $2.75 billion in 1986. Company revenues were up 1% to $1.14 billion, but the company reported a net loss for the year of $4.9 million compared with a net gain of $76.2 million in 1985.

A continuing problem has been the erosion of average per-store sales. That systemwide average was $767,000 in 1986 (the average for company-owned stores was a bit higher: $783,000) down 9.6% from 1985's $848,000 and off 11% from the 1984 high of $861,000.

Since marketing and advertising programs are funded largely by operator contributions, Wendy's media spending decreased in 1986. Total measured spending was $83.7 million, down 5% from the previous year.

Ad spending in all media except cable TV showed varying degrees of decrease. Network TV spending was down 6%; spot TV 3%; spot radio 16%; outdoor 27%. Only cable TV expenditures increased to $587,000, up 44%.

In order to regain the sales momentum Wendy's experienced in the early 1980s, the company has made changes in its menu, advertising, personnel and management structure.

One menu change that did not produce the hoped-for sales improvement was Wendy's breakfast program. In an effort to differentiate its morning meal from that of other restaurant chains, Wendy's offered made-to-order omelets and toast-based sandwiches (rather than English muffins or biscuits).

The made-to-order system may have been a quality improvement but proved an operational detriment that slowed service. Breakfast was made an optional menu segment for operators, and many franchisees dropped it. Wendy's since has been testing different breakfast possibilities, including biscuit sandwiches.

Faring better have been Crispy Chicken Nuggets and the Big Classic. Wendy's introduced its chicken nugget variation in June 1986, backing the rollout with an advertising campaign from Lockhart & Pettus, New York, its black-consumer agency.

The Big Classic, introduced in September 1986, is less a new product than an attempt at changing consumers' perceptions. Like Wendy's Single hamburger, the Big Classic is a quarter-pound hamburger patty dressed with lettuce and tomato. The major difference is that it is served on a "corn-dusted kaiser roll" rather than a bun. But its primary purpose was to refute consumers' misperception that McDonald's Quarter Pounder and Big Mac and Burger King's Whopper are bigger sandwiches and bigger values than Wendy's hamburgers.

Wendy's has been thinking small as well as big. In 1987 it began testing small, inexpensive hamburgers (i.e. smaller than the Single), comparable to those served by competitors. Again the aim was to change consumers' perceptions of Wendy's, this time fighting the notion that Wendy's is more expensive than competitors.

That product was rolled into several company-store markets and is expected to be available nationally by early 1987.

But perhaps the most significant menu change was the decision in October to switch its fountain allegiance to Coca-Cola from Pepsi. The move came shortly after PepsiCo acquired Kentucky Fried Chicken Corp., Louisville, from RJR Nabisco.

The addition of the No. 1 fried chicken chain gave PepsiCo three major restaurant-chain holdings (with Taco Bell and Pizza Hut), and, as Wendy's Chairman Robert Barney explained in a full-page ad in the *Wall Street Journal*, made PepsiCo a "major restaurant competitor."

To bolster local marketing programs, Wendy's and its operator co-ops systematically have reviewed most of the local agency relationships and moved accounts in many instances over the past year.

But national advertising has been a problem as well. Rebecca Barfield, analyst at First Boston, New York, told investors that Wendy's "underperformance is due to lower advertising budgets than its competitors, lack of advertising focus and no clearly defined image."

Wendy's sales slide had put it on the defensive, resulting in a wide variety of advertising messages to support its menu changes. Those messages came from national agency of record DFS Dorland, New York (now Saatchi & Saatchi DFS Compton), black-consumer agency Lockhart & Pettus and sales-promotion agency Impact, Chicago (which produced TV creative for Wendy's more aggressive children's meal programs).

In October 1986, three days after reporting a third-quarter loss of $47 million and plans to dispose of 164 unprofitable stores, Wendy's abruptly—and without a formal review of alternative agencies—announced that DFS had been dropped. Creative responsibility for its $50 million national account was returned to Dick Rich, the New York-based creative guru who had developed the "Hot 'n Juicy" campaign in the 1970s.

That change proved to be unpopular with franchise operators and was short-lived. The one campaign Mr. Rich created for Wendy's was an unusual series of commercials themed "Give a little nibble." Featuring a variety of people grabbing chunks of meat from a huge, suspended hamburger, the spots failed to provide the immediate sales boost that had been promised and further alienated Wendy's franchise community.

In May 1987, Exec-VP William Welter resigned from the company. His successor, former DFS exec Charles Rath, immediately began looking for yet another creative direction.

It took barely a month for the new Wendy's marketing team to award the national account to Backer & Spielvogel, New York (now Backer Spielvogel Bates).

In August 1986, James Near was named president of the company. A former Wendy's operator who had been serving as president of Wendy's Sisters Chicken & Biscuits unit, Mr. Near succeeded Ronald Fay, who retired as Wendy's president and chief operating officer.

Following the resignation of Executive VP-Company Operations Richard Postle to become a franchise operator, Wendy's revamped its operational structure to give regional management a greater ability to closely monitor and improve the operation of stores in their areas.

As part of its resolve to refocus attention on improving service and sales at its domestic Wendy's stores, the company in 1987 sold its Sisters International unit to its Cleveland-based franchisee, SIS Corp. Most international Wendy's operations, with the exception of Canada (where the company acquired the franchise-holder), have been sold, and further overseas expansion is on hold.

Another result of Wendy's sales slide was a concurrent decrease in the price of its stock, leading to rumors that the company is vulnerable to acquisition. Anheuser-Busch and Coca-Cola have been most often named as suitors, with the possibility of a takeover by a U.K. company also raised occasionally. But Wendy's management continues to work to achieve a change in its fortunes rather than a change in ownership.

Advertising	98	82	18.0

Despite its conservative persona, William Wrigley Jr. Co. this year surprised the $2.5 billion gum industry by introducing a five-stick pack of gum for 25¢. The intro, the company's first since it introduced Extra Sugar Free gum in 1984, marked a turning point for the company that usually takes its cues from the competition.

The competition, which includes Warner-Lambert's American Chicle Group, in 1986 concentrated on marketing 15 and 17-stick packs of gum to die-hard gum fans. Wrigley's strategy was to instead attract the occasional gum chewer or to tempt non-chewers to try its gum with-

out having to make a bigger investment. The move certainly couldn't hurt. Sales for sugared varieties of gum have declined 40% since 1980.

Wrigley, whose measured advertising rose a dramatic 19% in 1986 over the prior year, will advertise its new five-stick pack with a trailer at the end of its established brands' TV commercials, which virtually remain the same. The five-stick pack, dropped by Wrigley in 1972 when it introduced the seven-stick pack, will be offered in Spearmint, Doublemint, Juicy Fruit and Big Red. Consumers will pay the same price per stick of gum with the reduced pack. The seven-stick pack usually retails for 35¢.

Wrigley continued its "Double your pleasure" campaign for Doublemint; ads were updated most recently in 1984 to feature twin women dressed in green. Doublemint remains the world's No. 1 sugared gum brand with an estimated 15% of the market. In 1986, Doublemint received about as much advertising support as Spearmint, which had always been the company's most advertised brand. Wrigley in 1986 spent $23.3 million on Doublemint, up 49% from 1985, and $23.1 million on Spearmint brands, up 7.4%.

Wrigley Spearmint Gum's overall ad budget is up 16% from last year. While the company continues to use the "Get a little lift" theme introduced in 1985, commercials in 1987 featured Dennis Conner, the skipper of the Star's & Stripes yacht that won the America's Cup. The commercial is not expected to be carried over into 1988.

There were no changes in the Juicy Fruit campaign, themed "The taste that's gonna move ya," which was launched in 1983. In 1986, measured media spending for this brand grew 7.4% to $11.6 million.

Big Red cinnamon-flavored gum posted its sixth straight year of volume gain. Its growth rate surpasses that of any of Wrigley's big three brands. Spending for the Big Red campaign, themed "Long lasting breath freshness," remained at $7.5 million in 1986, down 2.6% from 1985.

Freedent is the only Wrigley brand so far in 1987 to get a new ad campaign. While the brand's selling point continues to be that it doesn't stick to most dental work, commercials now stress the brand's ability to freshen breath and moisten mouths. In 1986, Wrigley cut Freedent's ad budget 35% to $2.6 million, keeping the theme "The one that takes the stick out of gum."

In 1986, Wrigley again spent less than $2 million on measured media spending through DDB Needham Worldwide, Chicago, which handles Wrigley's faltering Hubba Bubba bubble gum and brands marketed by its Amurol Products Co. division. Trying to stimulate Hubba Bubba sales, Wrigley introduced a cola-flavored line extension in 1986 in test markets in the South.

Big League Chew was the only Amurol brand to receive significant ad support in 1986. Ad spending was approximately $1 million, compared to $670,000 the year before.

Despite finding the market sluggish for its office products, Xerox Corp. continued to emphasize the marketing of this area of its business in 1986 and 1987 by pushing desktop publishing and copiers, although it stopped marketing personal computers.

Xerox, which is getting much better results from its financial service sector than office equipment, continues to support its office products with heavy advertising —including more than $10 million for a new corporate campaign that broke on network TV this July.

Xerox reported in its 10-K spending $194 million worldwide last year on advertising, up almost 10% from 1985. Of the total, Xerox indicates it spent $127 million in the U.S., up 3.4%. Xerox says these figures represent all costs of advertising, including such indirect costs as support of a department and developing, printing, mailing and distributing sales brochures and other marketing material. AD AGE estimates Xerox spent $43.4 million in measured media advertising in the U.S. and an additional $49.3 million in unmeasured advertising. The total of $92.7 million was off 28% from 1985 estimated expenditures.

The major reason for the decline in measured spending was lack of a corporate campaign in 1986. In the prior year period, Xerox spent $21.6 million on corporate advertising. The hiatus also occurred at a time Xerox was switching from DDB Needham, New York, to Ted Bates Advertising (now Bicker Spielvogel Bates), New York.

The new TV and print campaign, bearing the theme line, "We document the world," uses the company's products to emphasize document processing.

For 1986, the BAR/LNA multi-media service pegged Xerox seven-media spending at $33.3 million, down 22.2% from 1985. Network TV received $20.3 million of the 1986 total, and magazines got $12.4 million.

Xerox spent the most—$11.6 million—on electronic typewriters, according to BAR/LNA. It spent more than $6 million each on copiers and desktop publishing. The company spent only $2.1 million on copiers in 1985 and only launched its desktop publishing system in 1986.

During 1986, Xerox introduced in January the Xerox Documenter, a desktop publishing system that combines Xerox 6085 workstation and Xerox 4045 Laser CP. In September 1986 it brought out its Ventura Publisher Edition series—a page composition software for PC users, and added eight new features to the system in March 1987. Xerox abandoned its faltering personal computer business in 1987, and will sell PCs only as part of its desktop publishing system. Analysts say profit margins on the personal computers have been little to none.

Other new products introduced include a facsimile terminal that uses copier paper and can store documents in memory for later transmission, and a scanner that allows input of both text and graphics into PCs.

Xerox, which has a 20% share of the electronic typewriter market, in early 1987 reached an agreement with Brother Industries Ltd., the Japanese marketer of typewriters primarily for small-business and home (Xerox is basically a high-end marketer), to make and sell several electronic typewriters designed by Brother. Brother in turn will receive rights to sell daisy-wheel printers designed and made by Xerox.

During 1986, returns from Xerox's office equipment segment remained static as after-tax profit rose 3% to $88 million and revenues of $2.72 billion, up 8%. The company says it misread the market earlier in the year and had boosted the segment's work force by 500 people to meet anticipated demand. However, when demand slackened instead, the payroll was cut by 1,200 through attrition and dismissals.

The unit that carried Xerox during 1986 was its Crum & Forster Co., which mainly writes commercial insurance in the U.S. and Canada. Crum & Forster advertising expenses amounted to $1.1 million in the year, about the same as in 1985. The unit contributed $189 million in 1986 to Xerox's income from continuing operations. It is part of Xerox Financial Services, along with the investment banking firm of Van Kampen Merritt and the Xerox Credit Corp. Xerox continues to add to the segment. In July 1987 it said it would purchase Furman Selz Holding Corp., a New York research, brokerage and investment banking firm, for $110 million.

This year Xerox sold its 51%-owned Rank Xerox unit in South Africa to Altron Group, a South African electronics company. Xerox, one of the last supporters of an American corporate presence in South Africa, appeared to succumb to pressures from anti-apartheid forces in the U.S. and abroad.

After 62 years under the direction and ownership of two families, Zale Corp. was acquired for $574 million at the end of 1986 by a partnership formed by Peoples Jewellers Ltd. of Toronto and Swarovski International Holdings A.G., a Zurich-based maker and marketer of jewels and crystal.

The sale came despite repeated rebuffs by Peoples and its president Irving Gerstein, who had been sparring with Zale Corp. for more than six years. He was elected Zale president-ceo as soon as the partnership had completed its $50-a-share tender offer.

Mr. Gerstein had persisted with a strategy of building Peoples holdings and then making a series of offers in 1986. As the second largest jeweler in Canada, with more than 300 outlets, Peoples was ready to explore new turf even if it meant nipping at the largest U.S. jewelry retailer, with more than four times as many stores.

Peoples made Zale three offers it could refuse before joining with Swarovski to make its fourth. The final tender offer, completed at the end of December 1986, came from PS Associates C.V., a Netherlands limited partnership jointly owned by Peoples and Swarovski.

The sale ended a 35-year relationship between Zale Corp. and Bloom Agency, Dallas. Bloom handled the then $20-to-$25-million Zale Jewelers account, which was handed to Peoples' agency, Saffer Advertising/Toronto, after the takeover.

Zale Corp. also severed ties with Saunders, Lubinski & White, the Dallas agency that had handled its $2 million account for Mission Jewelers, when it sold the 62-store chain to Barry Jewelers in May. Mission, with stores in Alabama, Arkansas, Louisiana, Mississippi, Missouri, New Mexico, Oklahoma and Texas, reported annual sales of $20 million. Zale, under previous owners, had done business with Barry, selling its four Bohm Allen Jewelry Stores in Utah in June 1986.

Bozell, Jacobs, Kenyon & Eckhardt, Dallas, continues to handle advertising for Zale's carriage trade stores, Bailey Banks & Biddle Jewelers.

The new owners of Zale Corp. inherited a company that already had made moves to improve profitability. Zale Corp. closed its fiscal 1987 on March 31 with income of $7 million, up from a loss of $61 million in fiscal 1986, on sales of $1.1 billion, about the same as the previous year. Much of the loss in 1986 was attributed to a $120 million writedown of inventory and the anticipated sale of several units. Because of the sale, fiscal 1987 was divided into the nine months of 1986 prior to the sale and the three months under new ownership. The nine-month reporting period included about $18 million in expenses related to the acquisition and $39 million in gains due to the sale of its international units.

After the Zale Corp. acquisition was completed, the new owners moved quickly to consolidate Zale's trio of divisions. Management of the Zale division, the Bailey Banks & Biddle division and the Diamond Park Fine Jewelers leased departments was reorganized to divide administrative work by function without having separate groups for each division.

Under the reorganization in January, each of six division heads reports to Mr. Gerstein. The divisions include merchandising and marketing, stores and operations, administrative, finance, planning, human resources and manufacturing.

Zale under Mr. Gerstein's leadership closed its 35-year-old New York manufacturing facility and moved the New York distribution center to Irving, Texas. About 100 of the 400 New York employees were transferred to Irving. Zale also closed its Puerto Rican manufacturing arm, which employed about 350 people. The company eliminated its corporate marketing department, laying off 15 to 20.

In late February, about 125 more employees were laid off as the reorganization went into effect. The company now has about 1,100 employees at its Texas corporate headquarters.

Feeding cats and dogs

In Europe, dogs and cats are king—there are 50 million of them—but until recently pet owners preferred feeding them table scraps. Quaker Oats and others have helped change that. Half of Quaker's total International Grocery Products' business in 1986 was in pet foods, and the pet food market in Europe accounted for 60% of Quaker's sales in Europe in 1986, or nearly $500 million in sales. Quaker now has 15% of the profitable $3.4 billion European pet foods industry.

Saatchi adding debt to options

By JON LAFAYETTE
and LAUREL WENTZ

NEW YORK—Saatchi & Saatchi stunned the financial community again last week by announcing it intends to continue its ambitious acquisition program, even if it means borrowing money to buy companies. That is a tactic the U.K. conglomerate has carefully avoided in the past.

In addition, any future acquisitions will be made without the help of Anthony Simonds-Gooding, chairman of Saatchi & Saatchi Co.'s Communications division, who unexpectedly resigned last week.

Mr. Simonds-Gooding played a key role in the company's many acquisitions, including last year's historic takeover of Ted Bates Worldwide, and subsequent agency consolidations.

He resigned to join a British satellite communications company.

Saatchi & Saatchi Holdings USA Chairman Andrew Woods, at a meeting with securities analysts here, said the company would review whether "we should make [future acquisitions] on the basis of debt, equity or both."

In the past, Saatchi has paid for its acquisitions with cash generated from operations or through selling shares in rights offerings on the U.K. stock market. Saatchi still has about $330 million in the

Eight-day, $20M debut for Jeep-Eagle

Chrysler sets blitz

By RAYMOND SERAFIN

HIGHLAND PARK, MICH.—Chrysler Corp. will launch its new Jeep-Eagle division with a late December eight-day ad blitz intended to establish both the division and the new Eagle brand name.

Chrysler will pump an estimated $20 million, including merchandising tie-ins, into the effort, which will conclude with the introduction of the upscale intermediate sedan, Eagle Premier.

Chrysler Chairman Lee Iacocca has agreed to appear in launch ads, said Joseph Cappy, the former president-ceo of AMC who now is Chrysler group VP, Jeep-Eagle marketing. "We've got somebody better than Santa Claus," he said, referring to the scheduled Dec. 22 start of the media campaign.

Mr. Cappy, speaking at Chrysler's 1988 product preview here recently, said the ad blitz will begin with "teaser" ads. William Esty Co., Southfield, handles Jeep-Eagle.

Chrysler is positioning the Eagle line of passenger

Florida fidgets over tax

By STEVEN W. COLFORD

TALLAHASSEE, FLA.—Chaos reigned in the Florida Legislature last week, thwarting advertiser hopes of immediate relief from the state's 5% ad tax and fraying nerves within the advertiser/agency/media triumvirate battling the 90-day-old tax.

But if the ad industry didn't win the immediate tax relief it seeks, it nevertheless saw enough encouraging signs to expect that Florida lawmakers, this week or next, will liberate—perhaps begrudgingly—advertising from the state's controversial tax.

See related editorial, Page 16.

"Both House and Senate seem dedicated to a resolution that does not include [a tax on] advertising," said American Advertising Federation Senior VP Wally Snyder. "How long it's going to take them to get there is something else."

Based on last week's brief session, Florida's Senate gravitates toward repealing the tax on advertising and other professional services, while the larger, more diverse House appears to prefer revising it to exclude advertising. Either way, the ad industry likely will get its wish, although there was enough inter-

How industry forces fared in ad-tax fight

By STEVEN W. COLFORD

NEWS ANALYSIS

It was a brilliant October day in Virginia's Shenandoah mountains last fall, and William Sutherland was ruining it.

Here he was at the annual conference of the Association of National Advertisers, sporting an "AX THE TAX" button on his lapel and *chastising* the ANA's rank-and-file for failing to take seriously a big problem brewing in Florida.

Mr. Sutherland thought it his duty to bear bad tidings, even on so glorious a day. He was, after all, the executive director of the new State Legislative Alert and Action Coalition, formed by the ANA and the ad industry's two other principal trade groups, the American Advertising Federation and the American Association of Advertising Agencies.

In his mind, if there was anything the ad industry needed to be alert to and act upon, it was Florida's proposed law to tax services, including advertising.

The blunt-talking ex-Marine sat down to less than thunderous applause when he finished his speech. Three months later he was fired, his fate sealed, sources say, when Dan Jaffe, ANA senior VP-government affairs, rose to tell the same meeting that the ANA *was too* taking the Florida matter seriously.

The spectacle of two association officials in public disagreement was a shaky start for an industry facing its biggest political battle since the late 1970s, when it fought Federal Trade Commission Chairman Michael Pertschuk to a standstill over children's TV advertising regu-

Highlights

IBM may enlist Hawkeye 4

IBM Corp. wants to give its "M*A*S*H" campaign a shot in the arm, administered by none other than Dr. Benjamin Franklin "Hawkeye" Pierce. Richard Lord, chairman of Lord, Geller, Federico, Einstein, New York, IBM's agency, said the leading computer company "is optimistic" about signing "M*A*S*H" TV series star Alan Alda for the campaign.

The naked truth 6

Lear's has found it can do very well, thank you, without *The New York Times*. Two weeks ago *The New York Times Magazine* rejected an ad for the forthcoming magazine because it depicted a woman naked from the waist up with her arms folded across her chest. The *Times'* advertising acceptability department banned the ad on "the grounds of taste." Undaunted, *Lear* began running the ad in trade publications. *Lear* Publisher Michele Magazine said initial response to the ad from advertisers has been strong.

Campbell Soup regroups 26

Campbell Soup Co., hit hard by competition in frozen foods and soups, will go "back to basics" next year with a marketing strategy highlighted by a slowdown in new-product activity and a new direction for its Le Menu frozen-food line. The plan also calls for a reallocation of the bulk of its ad spending to core brands and a restructuring of its business groups.

Clouds on airlines' horizon 28

Proposed airline ad guidelines from a state attorneys general task force could prompt the carriers to abandon the use of broadcast for price-oriented ads. The National Association of Attorneys General task force on the air travel industry believes airlines should be required to disclose orally all restrictions in broadcast spots that include fare information. Industry sources suspect the issue eventually could be decided in the courts.

P&G dashing to the rescue 88

Procter & Gamble Co. is aiding a village in Kenya by tying in a promotion for its powder detergent, Dash, on the popular variety show it sponsors in Rome. The project, code-named "Missione Bonta," or Operation Goodness, aims to provide schools and wells for Kiongwani, a drought-ridden settlement 100 miles south of Nairobi.

INTERNATIONAL

Japanese thrilled by Michael Jackson 80

Michael Jackson—on his first worldwide tour—made a Steven Spielberg-like debut in Tokyo, magically emerging from an opening in the stage floor and then singing and dancing virtually nonstop for the next two hours before a sold-out audience of 38,000. At the same time, Pepsi-Cola Co. is creating Michael Jackson-mania around the world with an army of promotional events designed to boost the cola marketer's share against Coca-Cola.

Nicaragua may license TV stations 76

At least two groups—businessmen and anti-government broadcast journalists—are petitioning the government for licenses to operate the first independent television stations in Nicaragua since 1979. All broadcast media in the country have been strictly censored since the Sandinistas came into power.

NFL strike drains nets of millions

By VERNE GAY

NEW YORK—With the National Football League players' strike barely a week old, the Big 3 TV networks already have suffered major advertiser defections representing millions of dollars in ad revenues.

The list of defectors is expected to grow this week, as the networks begin canvassing ad agencies for support if NFL-sanctioned "replacement team" games, staffed by non-union players, are broadcast.

Although Miller Brewing Co. has indicated it will sponsor those games, the likely answer from many others will be "no."

Two major automakers—Ford Motor Co. and Chrysler Corp.—already have said they will pull their ads from any games played by non-union players.

The major auto companies reportedly are concerned that their sponsorship of such games, scheduled to begin Oct. 4, would be interpreted as anti-labor. Ford last week completed a major agreement with the United Auto Workers, and the other automakers are in the midst of union negotiations.

The issue of whether to advertise in the so-called "scab" games is expected to be a contentious and complex one. The games are expected to get poor ratings, and advertisers seeking the typical NFL audience almost certainly will want to bow out.

NFL advertisers may legally be bound to honor their sponsorship agreements if the networks run the non-union games, according to some sources. Other sources, however, said the networks could not expect them to.

"It's a question of the spirit of the deal vs. the letter of the law," said one agency executive. "I bought NFL football, not scab games. It could get very messy."

"Legally, I don't think the networks can hold us [to our NFL sponsorship agreements]," said B.F. Mullins, Chrysler's director-sales and marketing/public relations. "I'd be really surprised if they did hold us to it. If they only offer us the alternate football games, we're not going to buy."

"We will not be advertising on any NFL scab games," John Vanderzee, ad manager of Ford Motor Co.'s Ford Division, said. "We're working with the networks right now to check some alternative packages. But at this point we have no plans to advertise on those games."

At press time, only CBS had decided to broadcast the replacement games. The other networks were undecided about whether they would carry the games, and uncertain whether they had to. NFL officials, however, said the networks would have to run the games.

"The networks have said nothing to us that would indicate they will not carry the games," said Val Pinchbeck, director of broadcasting for the NFL.

"The type of client who will go in [to the replacement games] is the type concerned with cost-efficiencies," said Stephen Grubbs, senior VP-director of national TV buying, BBDO Worldwide, New York.

Sources indicated such clients could include other automakers, especially imports, as well as financial-service organizations.

Agency sharks circle Disney

By WAYNE WALLEY

BURBANK, CALIF.—Like sharks that smell blood in the water, entertainment-minded ad agencies started circling Walt Disney Co. last week after the departure of Young & Rubicam's entertainment division president.

Gordon Weaver, the Y&R official, will join the De Laurentiis Entertainment Group as a member of its Office of the President.

Historically, in Hollywood, such executive-level changes signal ad agency reviews. But Disney executives said it is "extremely premature" to discuss the status of Y&R Entertainment, the studio's agency since 1985 (AA, Jan. 31, 1985), even though sources confirmed several agencies have contacted Disney.

Mr. Weaver and Y&R exec VP Steve Rose, both former marketing executives at Paramount Pictures Corp., were instrumental in the agency's landing the estimated $60 million account, largely because of their ties to Disney Chairman-CEO Michael Eisner, Paramount's former president. Y&R's contracts with Messrs. Rose and Weaver expire Dec. 31.

"In the normal course of time we may evaluate our options, but we do not plan to at this time," a Disney spokesman said.

"As long as Disney is at Y&R, I will be here," Mr. Rose said.

That won't stop agencies from trying to pitch Disney, which now commands a 12.7% domestic film box-office share for 1987. Disney is third among major studios, trailing Paramount and Warner Bros.

Mr. Weaver, 49, anticipates that Y&R will release him from his contract before the end of the year. At DEG, he will become one of three members of its new Office of the President, with DEG President Frederic Sidewater and Stephen Greenwald, the president of the company's corporate division.

DEG awarded what it claims will become a $50 million media-buying account to BBDO Worldwide, Los Angeles, nearly four months ago (AA, June 8). Mr. Weaver said he doesn't plan an agency review.#

Pinch hitter scores for Wendy's

By SCOTT HUME

A pinch hitter has parked one in the seats for Wendy's International.

The fast-food chain's advertising was among the 10 best-recalled campaigns during August, according to the latest adWatch survey of advertising awareness. Wendy's, which hasn't placed among the top 10 since January 1986, held the No. 7 spot last month.

All that is good news for Wendy's and its operators, but the irony is that the "Hamburger A" TV commercials Wendy's has been running nationally lately are not the work of its current agency, Backer Spielvogel Bates, New York, nor of Dick Rich Inc., which BSB succeeded earlier this year. The spots were created last year by what was then DFS Dorland, is now Saatchi & Saatchi DFS Compton and which lost the Wendy's account last November.

When the Dick Rich-created "Give a little nibble" campaign fell flat and Mr. Rich was excused in favor of BSB, Wendy's found itself with a problem: What to run while BSB finishes its new "the best burgers in the business" campaign that is expected to break early next year (AA, Sept. 14).

The solution was to dust off the "Hamburger A" commercials, a witty series of spoofs of test-market focus groups. In each of the spots, a researcher asks people whether they would prefer "Hamburger A," the juicy, freshly made Wendy's hamburger that is clearly the correct choice, or "Hamburger B," which has reconstituted onions, has been held under a heat lamp and has other undesirable qualities. The continuing twist is that the subjects of the test keep picking Hamburger B, for a variety of silly reasons.

Dublin, Ohio-based Wendy's made the "Hamburger A" spots available to franchise co-ops, some of which ran them locally, but the commercials had not aired nationally until earlier this summer. That's a shame, because they appear to have registered with consumers.

Surprisingly, while the Wendy's commercials were well-recalled when the 1,000 adults polled last month were asked to name the first advertising of any kind that came first to their minds, "Hamburger A" failed to boost Wendy's score when consumers specifically were asked which fast-food advertising they recalled first.

As always, McDonald's Corp. dominated fast-food advertising recall, getting 41.4% of first mentions in the August poll (taken before the "Mac Tonight" campaign ran nationally). Burger King Corp. placed second with a share of 16.9%, down 2.6 points from its 19.5% share in the July survey.

Wendy's remained in its traditional No. 3 spot with an 8.6% share of first mentions, down from 10.2% the previous month. It faces a problem with which nearly every other restaurant chain can sympathize: Even if consumers love your advertising, they think of McDonald's first when it comes to fast-food.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all heard, read or seen in the previous 30 days. Consumers are queried on the first ad they recall overall and then in a variety of product areas. During August, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers are attributable to more than sample variation.

In other changes of note in the August survey:

- IBM Corp.'s advertising needs some help in the **computer** category. The so-called "M*A*S*H reunion" campaign that made such a splash when it was launched is losing consumer awareness.

In April, IBM's awareness score jumped nearly 10 points to 23.7% of first mentions, pushing it ahead of longtime leader Apple Computer. It's been downhill since then. After dropping 2.4 points in July, IBM's share fell another 2.5 points in August to an 18.8% share.

Apple, which was reduced to a 21.1% share when the new IBM spots broke, has since rebuilt its share and retaken first place. It garnered 29.1% of first mentions in the August survey. Radio Shack was third last month with a 3.1% share.

- Bartles & Jaymes had a bad month in the **wine & coolers** category, but the big gainer was its parent company E&J Gallo Winery rather than cooler rival Jos. E. Seagram & Sons.

Bartles & Jaymes' share of first mentions fell 4.3 points to 11.9% in August, dropping it to the No. 2 spot behind the 12.5% of first mentions given Gallo's wine advertising. Riunite was third with 9.1%, California Cooler fourth with 2.8% and Seagram wine coolers fell to the No. 5 spot with 1.9%.#

IBM hopes for Hawkeye

By CLEVELAND HORTON

IBM Corp. wants to give its "M*A*S*H" campaign a shot in the arm, administered by none other than Dr. Benjamin Franklin "Hawkeye" Pierce.

Richard Lord, chairman of Lord, Geller, Federico, Einstein, New York, IBM's agency, said the leading computer company "is optimistic" about signing "M*A*S*H" TV series star Alan Alda for the campaign.

"We've always had plans to work with Mr. Alda," Mr. Lord said. "A contract has not been signed, but the desire is there."

Mr. Alda will be in Canada through November filming a movie called "A New Life." His publicist would neither confirm nor deny the negotiations.

A. Alda

Armonk, N.Y.-based IBM used a "M*A*S*H" ensemble to introduce the Personal System/2 line of personal computers earlier this year (AA, April 6). The campaign replaced the series of Little Tramp spots featuring a Charlie Chaplin look-alike, which focused only on Big Blue's PC line.

Since the campaign's introduction, IBM has expanded its use of the seven former "M*A*S*H" actors to plug its typewriters and minicomputers, as well as its PS/2 line.

An IBM spokeswoman said "we have said from the start that we'd use the ensemble wherever it was appropriate."

The "M*A*S*H" effort immediately increased consumer awareness of IBM. However, since the first appearance of the spots, awareness has dropped steadily. In contrast, Apple Computer, the No. 2 PC marketer, has recaptured awareness consistently since April. *(For complete awareness results, see story above.)*

While LGFE's Mr. Lord would have preferred to bring Mr. Alda into the picture sooner, the actor apparently signed a five-year contract with Atari Inc., then a Warner Communications subsidiary, in 1983. That contract should expire this year.#

PRODUCT MOVERS 621 AVENUE OF THE AMERICAS NEW YORK, NEW YORK 10011

Low media costs make fees more feasible

If we were an Anglo shop, we'd bill more than $40 million," says George San Jose, president of San Jose & Associates. Instead, the Chicago-based shop bills more than $4 million.

The discrepancy springs from media economics. "The commissions from Spanish-language media are one-tenth that of general market media," he says.

While hispanic media is comparatively low cost, hispanic agencies have to pay their staff salaries commensurate with those of general market agencies. "Our media director puts together a national program that will bill about $1 million," says Paul Casanova, president of Irvine, Calif.-based Casanova, Pendrill Publicidad. "The general-market agency media director puts in the same amount of time and develops a $30 million media program. The personnel costs are the same, yet we're getting 15% of $1 million while they bill 15% of $30 million."

Even outside the media department, hispanic agencies confront a more labor-intensive process. It takes more time and effort to produce a $75,000 spot than a $500,000 spot, says Daisy Exposito, VP-general manager of Young & Rubicam's New York-based Bravo Group, "because you can't hide behind the production values of a $500,000 spot."

For this reason Bravo—and most any hispanic agency—would rather operate on a fee structure. "For most clients, you can't cover your costs if you structure along billings," she says.

The billings structure at Hispania, J. Walter Thompson's New York-based hispanic division, is determined by the client, says Caroline Demy, senior VP-general manager. "Obviously fee is best. But J. Walter has never questioned the method of payment."

The push on the general-market side toward fee income could make this a moot point in the future.

"If you're not on a commission system the discrepancy doesn't matter," says Duke Miller, exec VP, director-client services, Tampa, Fla.-based Louis Benito Advertising.

Another trend may balance the books even for those now billing on commission. "Hispanic media costs, particularly in Miami, are inching up," says Isaac Lasky, VP, Southfield, Mich.-based W.B. Doner and Co.'s hispanic division. "There may even come a time when agencies will want to be paid on commission."

LATINS ARE SOLD ON IT.

Sábado Gigante is the top rated network show on Spanish TV.

It's a game and entertainment extravaganza that keeps more than 8 million Hispanic-Americans glued to their TV sets every Saturday night.

It's attracting the attention of a lot of major advertisers, too. Like General Foods, Hershey, Procter & Gamble, Anheuser-Busch, Coca-Cola and Beatrice Foods. And, in addition to big numbers, it offers an exciting merchandising and promotion program.

So if you're trying to sell America's booming Hispanic market, what better way than on the number 1 rated show on the number 1 rated Spanish network, the UNIVISION Spanish International Network.

For details, call Joe del Cueto, Sales Manager, Sábado Gigante, at 305-285-4038.

SABADO GIGANTE. THE NUMBER 1 RATED SHOW ON SPANISH TV.

Demands

(Continued from Page S-1)

be comparatively few agencies serving the market," she says, adding that small independents may find their strength in servicing small and hispanic-owned businesses.

The recent activity has Richard Dillon mildly amused. "We're going to bill about $40 million this year," says the president of Newport Beach, Calif.-based Mendoza, Dillon & Asociados. "We're the largest agency in this market, yet we rank as the 199th largest agency [overall]. To a major general agency, it's peanuts. They can't get excited about a division that pulls in $5 million or $10 million."

The major agencies that have entered the market have not presented much competition, he says, because they don't support their hispanic divisions.

"If big agencies are going to get involved they should buy hispanic shops but let them manage themselves. If the general-market account group rides herd and controls the hispanic division's activity, it's back to the same problem of the general market element restricting hispanic budgets."

The likelihood of that happening is too real, says Mr. Casanova. "We want to stay independent so it's not a case of the dog wagging the tail."

General-market divisions have an advantage in easy access to the mother agency's client list.

"It helps them get a foot in the door," says Mr. Dillon. But, he adds, they have to maintain their distance.

Despite both Burnett and Doner starting in-house operations, Ms. Zubizarreta says most agencies find it easier to buy an existing shop. The problems, she says, occur in pushing that division to adapt to general market agency standard operating procedures.

Jesse Wilson, exec VP of Chicago-based San Jose & Associates, says when an Anglo mentality is projected onto hispanic shops, "it never seems to work."

(Continued on Page S-6)

Editor's note: Stories not identified by a byline written by Ed [illegible], senior edit[illegible]

Practitioners preach regionalization

Licking their chops describes the response hispanic market agencies and Spanish-language media have had to regionalization, the latest buzzword in marketing.

The hispanic market qualifies for both of marketing's most recent fixations. There's no denying it's niche marketing at its most basic. Now that companies are breaking marketing efforts into regional approaches, they are bound to discover 86.3% of all U.S. hispanics live in 33 areas of dominant influence and that the top 10 hispanic ADIs are home to 62% of U.S. hispanics.

"You can't do anything in Southern California or Dade County without an hispanic component," says Jesse Wilson, exec VP, San Jose & Associates, Chicago. "In this market, national accounts really are a series of spot placements."

Lotus Hispanic Reps, a New York-based radio ad sales company, already has seen a positive ruboff from regionalized efforts, says President Richard Kraushaar. "Regional offices are saying they've got to put money toward the hispanic market when 30% of their sales are generated by hispanics."

The regional shift has restructured decision making, says Ken Ocepek, Univision's Chicago-based Midwest sales manager. "Rather than have the gurus who don't travel to these markets making marketing decisions based on outdated research, we're seeing the guys in the field given more authority."

Agencies also have seen the sweet rewards of the change. "We had been dealing with Frito-Lay corporate for 2½ years," says Paul Casanova, president of Irvine, Calif.-based Casanova, Pendrill Publicidad. "But the program finally got off the ground when the [regional staffs] became more responsible for sales and marketing efforts."

Mr. Wilson says San Jose will target companies that are focusing on re[illegible]al efforts. He predicts the move toward regionalization will create greater agency activity in areas that have large hispanic populations and smaller agency communities. "The next hot area for agencies is Southern California," he says.

The regional shift also may help put to rest one of the industry's oldest debates. Agencies long have argued about the benefits of regionalizing creative work to address an area's predominant nationality group vs. a national approach using neutral images and "Cervantes Spanish." Those backing regional creative efforts talk about their greater impact on targets, who like to see their distinct nationalities reflected in ads; others argue that the added production costs don't justify separate executions and regionalizing creative strategies further confuses clients.

Although it's important to be aware of regional differences, "when you're putting together a national program for a national client it can be very inefficient," says Mr. Casanova. "Anheuser-Busch may have the money to back it up, but not many companies are in the market at that level." The creative approach question is an issue raised primarily by local shops, he says. "For obvious reasons, they love it."

Tere Zubizarreta, president of Miami-based Zubi Advertising Services, quickly identifies herself as a believer in the regionalized approach. "Borden's is advertising ice cream in Miami and calling it *nieve*, which is what Mexicans call ice cream, but what Cubans call snow. So they're selling snow at the local grocers.

"Marketers don't create commercials geared for Bostonians and run it in Mobile, Ala." The hispanic market is not so different from the general market that the same rules don't apply, she says.

The arguments have remained unchanged and probably will until advertisers make them unnecessary. When Campbell Soup Co. reorganized its marketing program along regional lines, no one was happier than Carlos Rossi, president-ceo of Conill Advertising, Campbell's New York-based agency. "It made the whole question unimportant."

Demands

(Continued from Page S-8)

to dispose of a Y&R client's general-market strategy if it doesn't work for the hispanic market.

"We have the best of both worlds," Ms. Esposito says. "We have Y&R's resources if we need them, and we can have a non-Y&R client and have absolutely no interaction with 285 Madison."

Ms. Demy also taps into JWT's resources. "We can do a more sophisticated job as opposed to a small boutique. They can't afford to subscribe to all of the support services we can tap into, which allow us to move more quickly," she says.

Both general managers admit to experiencing problems with general-market account teams. "They don't want to lose billings," Ms. Demy says, "and they may tend to think of us as another agency because of that mentality. But we're being recognized as an element of the team."

Ms. Esposito says Y&R clients that show an interest in using the hispanic division are told they need two separate budgets, "not that they should sacrifice their general market budget for Bravo." She says she can understand why general-market account supervisors try to keep a client from going into segmented marketing if they think it would detract from general market efforts.

"Maybe two years ago, the general account team would have seen this as a threat. Now they see it as an opportunity," says Isaac Lasky, VP-hispanic marketing at Doner's new division. Clients were asking them about the hispanic market, he says, and they couldn't offer answers.

"We're not taking away from what clients are doing in English," he says. "This is a totally new effort that should result in more billings."

Still, Mr. Rossi suggests general market agencies have a hard time giving their hispanic units the autonomy and respect they deserve. Although Conill is a wholly owned Saatchi subsidiary, the arrangement is strictly financial, not operational. "The only client conflicts we have are the ones we make ourselves." He says in-house divisions are too dependent on the general market sides' operations.

"The big names in the general market aren't really the big names here," he says. "I don't think the general-market agency executives really care about their hispanic divisions."

If they did, Mr. Rossi warns, watch out. "The rules of the game would change overnight. I don't think it will happen, but if it does there suddenly will be a major new player." Most independents live in fear of this, he says.

Whether a major agency can command the market depends on its level of commitment. "If the hispanic division is a poor

(Continued on Page S-12)

Demands

(Continued from Page S-10)

cousin, and hispanics aren't in management, they won't go anywhere," says Ms. Haar.

Because hispanic budgets are concentrated among relatively few companies, any account shifts could restructure the pecking order. And while Burnett has said its hispanic division will service only P&G clients, even a reallocation of P&G's budget—rumored to account for 10% to 15% of total Spanish-language media spending—would send shock waves through agencies.

"If any one of us gets that next big account, we will leapfrog over the others," Mr. Rossi says. One agency could have 10% of the total hispanic business, he says, and "the rest will realize they no longer are what they once were."

The independents then either will merge or restructure along the lines of general-market shops, Mr. Rossi says. Messrs. Garrido and San Jose say they already have done the latter, calling themselves second-generation independent hispanic agencies.

But it's just as important to establish a relationship of some kind with general-market shops, says Mr. Casanova. "We have a relationship with Dancer where we can talk directly to the client and implement our programs and the agency can oversee what we're doing and make suggestions. They serve the client's needs, we get the business and maintain our autonomy."

But independence may be easier to talk about than maintain. Although she says she does not want to give up any autonomy, Ms. Zubizarreta says she will listen to offers. "Everybody has a price," she notes.

Those intent on remaining independent don't suffer any delusions that they may be a dying breed. "Who knows," says Mr. San Jose, "in five years we could be the largest independent. We also might be the only one."

ETH-ICS/n 1: a set principles or values: a system of dealing with what is good and bad with moral duty and obligation ....see Lotus Hispanic Reps

New battle lines drawn

Equality means different things to different people. When Spanish-language media executives and hispanic agency people dream of equality, they envision a day when the percentage of corporate America's hispanic marketing budgets equals the percentage of U.S. hispanics. With an estimated 18.9 million hispanics in the U.S. in 1987, in their perfect world they would receive 7.5% of U.S. marketing dollars.

Reality again falls short of the ideal. According to an analysis performed by New York-based Telemundo Group, Spanish-language TV pulled in $184 million in 1986, or .8% of total TV revenues.

"Invariably hispanic budgets are underrepresented in terms of population," says Roger Pisani, exec VP, managing director, New York-based Publicidad Siboney, because hispanics are influenced by general market media.

This, says Ken Ocepek, Univision's Chicago-based Midwest sales manager, is the latest in a long line of barriers thrown before Spanish-language media. "Research has shown hispanics buy their products, will continue to speak Spanish and enjoy Spanish-language media. Now they subscribe to the theory that hispanics can be reached through general market media anyway, so there's no need to bother with Spanish-language media."

Hispanics at home with Spanish

Language spoken in specific situations

	At home	At work	Socially
Spanish	71.7%	35.8%	54.5%
English	10.4	30.0	18.0
Both	17.9	34.2	27.5

Source: Strategy Research Corp.

It's not that hispanics don't watch "Cosby"—"Yankelovich told us years ago that they spend 50% of their media time watching English-language TV"—it's that the issue should be advertising related, he says. "While spots may be seen, they don't score any copy points, particularly spots that are based in humor or are sung and danced to. The advertiser would be better off throwing a slide on the screen and doing a voiceover."

Because advertisers' perceptions are its reality, however, Siboney is conducting a study on general market advertising's effect on hispanics who speak mostly Spanish in the home vs. its impact on fully bilingual hispanics. "All hispanic agencies are trying to quantify a number of areas, and the impact of Anglo advertising is one of them," says Mr. Pisani.

The role of English-language media is more accepted, says Arturo Villar, publisher, *Vista*, an hispanic-oriented Coral Gables, Fla.-based English-language newspaper supplement. He offers as proof *Vista's* distribution and advertising track record. The supplement started in September 1985 with 12 newspapers and two ads; this month 27 papers carried *Vista*, and its August edition pulled 17 ad pages.

"Spanish-language media wanted to ignore the fact that some hispanics prefer to read English," he says. "Now they say, 'Yes, of course, you must use Spanish-language print, radio and TV and English-language print. In fact, some have become strong allies to *Vista*. We've been able to prove to skeptics that this market segment wasn't reached."

The size of the segment is debated. Miami-based Strategy Research Corp. reports that 43%, or 8.1 million, of the 18.9 million U.S. hispanics speak English well or very well. In comparison, 85.8% of the hispanic population speaks Spanish well or very well.

The figure for English-speaking hispanics is higher, Mr. Villar says, based on *Vista's* experience in creating a sample group of U.S. hispanics who read English well or very well.

MISTAKES TO AVOID WHEN MARKETING PACKAGED GOODS TO SOUTHWEST HISPANICS.

1 The #1 mistake you can make is assuming that one Hispanic in the U.S. is just like another.

There are Cuban-Americans. Puerto Rican-Americans. Mexican-Americans. And so forth. And while Spanish is a common denominator for all of them, there are differences. In word usage and meaning. In cultural traditions and experiences. Even in food. Luckily, these Hispanic sub-groups tend to be clustered geographically. And Hispano-Southwest lives right in the middle of one that's extremely attractive to marketers: southwest Mexican-Americans, who are concentrated in Texas, California, New Mexico, and Arizona. We specialize in reaching them. Not only through packaged goods "image" advertising. But through community grassroots programs. And our in-depth understanding of the supermarket and mass retailing industries. Including broker networks, promotions and merchandising.

So if you're held responsible for sales results, it would be a mistake not to keep reading.

2 Mistake #2 is figuring the southwest Hispanic market is no big deal. A "fad". And that it's not worth your time to find out what the other 11 mistakes are.

If that's your attitude, what can we say? Except that you'll be sorry. We'll be philosophical. And your competition will be ecstatic. On the other hand, if you prefer profits over mistakes every time, drop us a note on your corporate letterhead and request our brochure. Send it to Patrick (just call him "Pat") McGeeney. And yes, we know. That name sure doesn't sound Hispanic. (Mistake #3 in the brochure will tell you why that's OK.)

HISPANO ■ SOUTHWEST

Buck passing hinders better research

By Linda Cecere

It's no secret greater emphasis is being placed on improving hispanic research. But the interest has yet to translate into major corporate financial commitments, and the issue rests on who will foot the bill for bigger and better consumer studies and syndicated research.

Linda Cecere analyzed the hispanic newspaper market in the Aug. 11, 1986 Special Report.

Abbott Wool, senior VP, media director, New York-based Cadwell Davis Partners, and Spanish Radio Advisory Council chairman, says hispanic research companies are getting more aggressive as demands for better service rises. Mr. Wool says the ad industry in general is getting more active in developing custom hispanic research and syndicated services.

Yet a critical lack of support remains, resulting in the field's slow development. Only some $20 million is spent on hispanic research annually, he estimates. In comparison, the top 46 U.S. research companies' 1986 revenues totaled $1.9 billion.

■ *Clients want better numbers but don't commit funds; major researchers' efforts fall short*

A major reason for the funding gap is corporate mistrust of hispanic research methodologies, a situation exacerbated by lack of faith in U.S. Census Bureau numbers and estimates of the undocumented alien population. Research companies specializing in the market perform handsprings to provide believable, valid results, yet always are held up to questioning on sample size and the market universe.

Research sources often don't provide large enough samples to convincingly measure hispanic media or product consumption, says Marianna Reges, manager-media research of New York-based Bristol-Myers Co.

"We have told [major Anglo research services] we're very interested in broadening Hispanic coverage," she says. However, non-hispanic markets are the primary source of business for major research suppliers including A.C. Nielsen Co., Arbitron Ratings Co. and SAMI/Burke.

"Too often hispanic research is used as a disaster check on commercials or decisions already completed," says one hispanic researcher. "I don't think advertisers and the larger Anglo research firms take it very seriously. Smaller not-so-flashy firms need more work and encouragement in order to survive."

Richard Amundsen, director-hispanic markets, Atlanta-based Coca-Cola Co., says those not-so-flashy companies have done a good job of researching and defining the market. Miami-based Strategy Research Corp.'s door-to-door studies of 10 major hispanic markets "very reliably establish brand preference, consumption rates and penetration," he says. Coca-Cola also uses SRC's STAR TV ratings service and is awaiting results of a product movement study performed by Nielsen.

Peter Roslow, director-marketing, New York-based Telemundo Group, says syndicated product usage data, ratings services and competitive ad expenditure surveys will exist in the next decade. "Credibility will improve as support for hispanic research and services increases from the big consumer companies."

The support will come, says Henry Adams-Esquivel, VP of San Diego-based Market Development Inc., a full-service company specializing in what it calls "transcultural marketing." "If U.S. companies don't do more transcultural marketing, they'll lose market share."

Dale Dauten, head of Westlake Village, Calif.-based Research Resources, says increased attention from big players will have little effect on independent hispanic research companies. "The specialty shops will continue to have appeal as the budgets—and the stakes—get bigger."

Richard Tobin, president of SRC, the leading full-service hispanic research company, agrees. "This is not a horse race," he says.

Some general market research thoroughbreds are showing greater interest in the hispanic market, however. AGB Television Research, the U.S. subsidiary of AGB Research PLC, London, purchased Hicksville, N.Y.-based Information & Analysis in 1983. Although the subsidiary initially focused on electronic media research, hispanic-oriented studies now account for 50% of the business, says Harvey Morrow, VP-general manager.

The company was selected to conduct the pilot study of the Chicago radio market by the Spanish Radio Advisory Council as part of its effort to develop a national syndicated ratings service. Originators of the SRAC concept, New York-based Caballero Spanish Media and Lotus Hispanic Reps and Harlingen, Texas-based Tichenor Media Systems, say the ratings service would have more credibility with advertisers than existing services.

"Coverage of Spanish radio stations in the existing rating books is not consistent," says Eduardo Caballero, president of the radio organization that bears his name. "They make a good effort, but we think measurement of Spanish media should be separate. If the advertisers and their agencies set the research criteria themselves, it will have credibility." Representatives from McDonald's Corp., Procter & Gamble Co., Bristol-Myers, Young & Rubicam and J. Walter Thompson participate in the council; hispanic media and agency representatives observe.

The Arbitron diary method has come under fire from critics. David Lapovsky, Arbitron's VP-research, says his company's hispanic sampling, which combines diary and meter methodologies to measure radio, is large enough to offer a fair measurement.

Diary alone is used to rate TV. "The diary has its shortcomings," he concedes. "But if it's administered properly, it can be an acceptable tool."

Arbitron places three phone calls to hispanic households vs. one to Anglo households to encourage participants to complete and mail in their diaries. The company also pays hispanics more to participate in the surveys.

For the time being, hispanics will not be covered separately via ScanAmerica, the Arbitron and SAMI/Burke people meter service that now is available in Denver, Mr. Lapovsky says. "Our basic commitment is to the total market, although it is possible to measure a sizable ethnic population if a subscriber requests it."

SAMI consultant Alan Miller says a larger number of clients are looking to segment consumers in key hispanic markets to determine regional preferences. Focus groups are conducted and individual stores in specified ZIP codes are surveyed to define local shopping patterns.

Mr. Miller says the 60 stores covered provide a large enough sample to measure reliably.

Battle lines

(Continued from Page S-12)

He pegs the English-speaking hispanic population at 10.4 million or 55% of the total market.

But Mr. Villar admits the debate will rage on. "I don't think anyone will be able to tell how effective general market media reaches hispanics."

Common sense suggests that as the U.S. hispanic population grows, both the Spanish and English-speaking segments will enlarge. This could create a niche for a new agency structure, says Luis Salces, exec VP of Chicago-based OMAR Inc.

"The market will segment more along generational lines vs. nationality lines," he says. "There is an opportunity to create a second generation of agency that attends to the needs of that [generational] market segment."

Lionel Sosa, president of San Antonio-based Sosa & Associates, ties Spanish and English-language creative executions and media placements to generational and acculturation factors. Critics suggest that San Antonio's multigenerational hispanic market does not represent the immigrant-fueled U.S. market.

San Diego-based Market Development Inc. reports that regardless of generational status, hispanics respond to Spanish-language advertising. After being exposed to Spanish-language advertising, 58% more hispanics said they would consider using canned or frozen foods; 56% more said they would consider buying a full-size auto.

"As a member of the new generation, I see its potential as a target," says Marcelino Miyares Jr., OMAR's director-client services. "But the need to address more typical hispanics will remain. Spanish is still the emotional language."

WE LIVE THE NEW YORK HISPANIC MARKET

Right on 177th Street, not on Park Avenue, but in the heart of our Community, and we know it's upside-down. The Hispanic Market in New York has more than 20 Hispanic sub-cultures; it's the most difficult Hispanic market to reach in the country. We know, because we live it, we see it and WE REACH OUT TO IT, all sub-cultures of it, all generations, and all classes. There's an event for one or all of your Marketing Needs,

"FMH, meeting corporate marketing objectives while serving our community"

10th Annual
HISPANIC WORLD'S FAIR
July 15-17, 1988, Jacob Javits Convention Center
New York City

It's the largest indoor Hispanic event in the country. Major entertainers attract thousands of Hispanics to a product marketing and consumer retail festival.

7th Annual
HISPANIC LEADERSHIP BREAKFAST
March 31, 1988-Tavern on the Green
New York City

Top New York Leaders speak and address controversial economic, social, and political issues concerning Hispanic affairs then answer questions from an interested audience made up of community groups, corporate representatives, and small businesses.

4th Annual
NEW YORK STATE/FMH MINORITY
BUSINESS DEVELOPMENT CONVENTION
September, 1988-New York Penta Hotel

As the largest minority business-to-business convention in the northeast, this non-profit product exhibition is designed to promote minority contracts with corporations and independent government agencies.

4th Annual
HISPANIC CORPORATE ACHIEVERS
SCHOLARSHIP BANQUET
April 8, 1988-The Plaza Hotel, New York City

A non-profit event created to assist promising Hispanic students who are economically disadvantaged, but would like to pursue corporate careers. This event also honors successful Hispanic corporate executives to serve as role models to the students as well as the community.

FMH RAMOS GROUP
717 West 177th Street, Suite 7

A Division of FMH/Ramos Group
(212) 923-2020

"Acceptability of numbers is a nebulous thing. If you have a lot of satisfied customers, then you have acceptability."

Syndicated services are becoming increasingly important as clients emphasize regional operations, he says. But SAMI does not plan to get involved in qualitative research.

Despite increasing hispanic market activities, Peter Benziger, head of hispanic research for Greenwich, Conn.-based Moran & Tucker, says the biggest problem is convincing companies to invest in hispanic research. Hispanic research studies usually cost $15,000 to $25,000, he says; Anglo studies typically cost $80,000.

"Sampling also is a tough problem, especially with the telephone," Mr. Benziger says. "Plus, few hispanic research companies have the manpower or analytical expertise to cope with larger studies."

But they offer clients one important benefit: a knowledge of hispanic culture that many general market companies lack, says Rosanna Stoll, president of Chicago-based Metrica Marketing Group. "You can't become an expert in hispanic culture overnight." AA

Making sense of the morass

Caroline Demy feels no envy for clients attempting to select an hispanic agency. "It's a real morass out there," says the senior VP-general manager of New York-based J. Walter Thompson's Hispania.

Clients will find an incredible variety of capabilities and structures—one to 40-man independent shops, affiliated agencies, general-market agencies with hispanic divisions or capabilities. Like general-market agencies, however, the trend among many hispanic agencies is to provide full services.

"Some clients think they need somebody who knows the language and can put somebody hispanic on the air that won't offend anyone," says Carlos Rossi, president-ceo of New York-based Conill Advertising. "What they actually need is a full-service agency that can handle promotions, media, research, merchandising, creative—all the angles."

Again imitating the general market, the push is on promotions. Chicago-based San Jose & Associates will be involved in about 200 promotions this year, says President George San Jose. "We do more promotional activities than most agencies, which gives us a competitive advantage with a client who recognizes this area as being important."

Promotions are extremely important in the hispanic marketplace, says Roger Pisani, exec VP, managing director, Publicidad Siboney, New York. "I'm amazed at how effective promotions are in the hispanic market vs. the general market." Siboney, like other hispanic agencies, recently established a separate promotions division.

"Almost uniformly, our promotions have had outstanding results," he says. A recent sweepstakes promotion for Palmolive liquid detergent directed at Miami's hispanics resulted in a 40% increase in total volume for the entire area vs. a similar period the previous year.

Historically, hispanic promotions have been goodwill-oriented gestures tied to community events, "which is nice, but we're paid by clients to deliver case sales," Mr. Pisani says. "We won't have simply a float in a parade. We build in an incentive to purchase. We want the good will of the community, and we want the cases."

Achieving the first objective naturally leads to the second, says Tony Torres, director-market development at Chicago-based Burson-Marsteller. "With hispanics, consumer good will take them into product sales." The goodwill factor always will exist because companies don't target hispanics just to make sales, he says.

Burson-Marsteller's entrance into the market four years ago highlighted the growing importance of public relations and promotion in the hispanic segment—and caused agencies to take a harder look at their promotional capabilities.

"The next phase is specialization," says Daisy Exposito, VP,

(Continued on Page S-16)

The main events

Top hispanic special events

	Attendance (000)
1. Calle Ocho, Miami	1,500
2. Puerto Rican Day Parade, NYC	1,000
Hispanic Day Parade, NYC	1,000

A divorce among the marriages

At first it appears California's recently passed English-only language law has made a powerful impression on McCann-Erickson. While more general market agencies are acquiring or starting hispanic divisions, last November McCann-Erickson divested itself of Los Angeles-based La Agencia de McCann-Erickson, which subsequently became La Agencia de Orci.

In addition to resolving questions of minority ownership, La Agencia wanted to operate without the overhead of a large organization, says Richard Edler, exec VP-general manager of McCann-Erickson/Los Angeles. "Decision-making is much more efficient without the overlay of a large corporation," agrees Hector Orci, La Agencia's president.

He also says he now is able to prospect freely for clients without worrying about conflicts with McCann accounts. "The greater the autonomy and independence, the better the prospects for success."

As part of a larger company, Mr. Orci says, other priorities often get in the way of servicing a client. The operating arrangements of Conill Advertising and Publicidad Siboney, which are given long leashes by Saatchi & Saatchi and Foote, Cone & Belding, respectively, are the best, he says.

Mr. Orci's experience has had an impact on other independent hispanic shops. "When agencies talk to us about acquiring independents, they claim that it will be strictly hands off, that we'll be able to maintain our identity--everything sounds hunky-dory," says Paul Casanova, president of Irvine, Calif.-based Casanova, Pendrill Publicidad. "But look at Hector Orci. It sounds great when you can say, 'I'm a part of McCann-Erickson,' but there must be something wrong with it."

Mr. Orci simply says "life as an independent is terrific," and that he has no plans to sell or reintegrate with another agency.

Over at McCann there are no plans to acquire or start an hispanic division. In fact Mr. Edler may prove to be the most forward thinking of all mainstream agency executives involved in the market.

McCann is putting together fully bilingual account groups and creative teams that are equally adept at servicing a client's general or hispanic market requirements. "It's strange that as we work to assimilate ethnic groups in society, we separate them at agencies.

"There shouldn't be an agency within an agency, which La Agencia was." Separate hispanic divisions not only are unnecessary, he says, but anachronistic.

"McCann is able to walk up to a client and say we can take your campaign anywhere in the world. If we can do it in 135 countries, why can't we do it here?"

Minority issue has major impact

The U.S. Army is supposed to be prepared for battle. It received an opportunity to prove its combat readiness when New York-based Bravo Group was named the Army's hispanic agency in January.

Lionel Sosa, whose San Antonio-based agency had handled the Army's hispanic work as an N W Ayer subcontractor, complained at the time that the Army should use an hispanic-owned shop. Bravo was assigned hispanic duties when Young & Rubicam, its parent company, won the account from Ayer.

While the law stating that federal government contractors should use in-house capabilities whenever available overruled minority vendor considerations, independent hispanic shops have a distinct advantage in chasing some government and corporate business.

"We can now look for business among accounts that require an hispanic-owned shop," says Mr. Orci. "State contracts and some client companies have this requirement, and there was some business we were effectively closed out of as a division of McCann."

Mr. Edler says the ability to compete for accounts stipulating minority ownership was a major element in the decision to spin off La Agencia. "La Agencia was competing for the California lottery account, and the key question asked was,

Morass

(Continued from Page S-15)

general manager, Young & Rubicam's Bravo Group, which works with the Y&R PR subsidiary on projects. "It's already happening."

For example, San Antonio-based Sunbelt Sales Promotion has specialized in promotions and special event marketing since 1980. Clients have included Procter & Gamble Co., General Foods and H.J. Heinz Co., among others.

"Some agencies want to do it all," Ms. Exposito says. "but we believe you can't be a jack of all trades." Agencies can cover the bases, but when clients need to develop a complex promotional program they should call an expert, she says.

"We work with Bravo when the need arises," says Bronna Lipton, New York-based VP-manager of Burson-Marsteller's hispanic media and marketing services division. "It's a cumulative approach, an integrated approach."

Burson-Marsteller has extensive contacts with key hispanic community "influencers" and organizations, she says, and focuses on community marketing by reaching hispanics through their local leaders. "We're providing a different service than the agencies," Ms. Lipton says, adding that there's room for everybody in the market.

"It's a question of scope," she says. "Our focus is not primarily on advertising."

Mr. Torres says Burson-Marsteller does have one advantage over other specialists. "We provide a grass-roots approach, which is given by local agencies, but they cannot provide clients with simple movement of programs into other markets" serviced by the shop's satellite offices. Burson-Marsteller works to create project continuity in terms of both expanding them into national efforts and continuing them over time.

Burson-Marsteller became interested in the market because it knew it could fill a developing niche early, says Charles Farley, senior VP. "Others are evolving to promotion. We'll take the competition as it happens."

The hispanic division, he says, is as profitable as any of Burson-Marsteller's other operations, and has as much if not more potential. "The hispanic market still is undermarketed. Sometimes it's tough to bring them into the market, but it's pretty persuasive when the client attends a promotional event and sees the reaction on people's faces."

Hispanic Newsbriefs

(Continued from Page S-19)

Ami Co., General Foods Corp., Kal Kan Foods, Kraft Inc., Procter & Gamble Co., Quaker Oats Cos. and Riceland Foods, among others. It also has helped Certified establish relationships with some stores, says Mr. Newman.

It was easier than expected to bring the independent grocers into the co-op arrangement, he says. "It's a way to give these stores some ammunition they need to compete. They realize they need help in merchandising and promotion," Mr. Newman says, "and that they can bring product to the floor at a competitive price."

With the program generating an anticipated $500,000 to $600,000 annually, Mr. Newman says he has created a win, win, win, win situation for WTAQ, WSNS, Certified, retailers and advertisers.

War waged over the wires

On June 11 San Diego-based Market Development Inc. raised some eyebrows when the research company announced that 85% of U.S. hispanics own telephones.

The MDI study, based on an analysis of 1980 U.S. Census data, is starkly juxtaposed to findings reported in Miami-based Strategy Research Corp.'s "1987 U.S. Hispanic Market Study."

SRC says only 69% of U.S. hispanic households have telephones, and only 31% have listed numbers.

MDI's findings added fuel to a fiery controversy on whether the telephone can be used to accurately sample hispanics.

Henry Adams-Esquivel, MDI's VP, says the study shows that telephone surveys can be reliable and offer better sample controls at a lower cost than door-to-door surveys. Richard Tobin, SRC's president, says that his costs are virtually the same whether SRC performs phone or field interviews, "because our field force is all set up." He says clients may pay 3% more for field studies.

Critics of the MDI study point to its basis in 1980 Census data.

"Those who dispute the position of the Census as the 'bible' . . . are prone to inaccurate findings that can cost marketers million of dollars in off-target decisions," Mr. Adams-Esquivel says.

Mr. Tobin says the Census process creates too many barriers to accurately measure hispanics. "This is an Anglo methodology." Hispanics who filled out the long-form, which contained questions concerning phone ownership, do not accurately represent baseline U.S. hispanics, he says, "who are predominantly foreign born or oriented. A very small proportion of people returned it."

Mr. Adams-Esquivel counters that methodology and not acculturation is the issue. He says that if the Census sends out a Spanish-language questionnaire and does not receive a response, an interviewer is sent to perform an in-home survey.

The Census Bureau confirms that households that don't return forms receive phone or in-home follow-ups. Some say this is policy, but not practice.

Even returned forms cannot be assumed accurate, Mr. Tobin says, because hispanics' legendary sense of pride may alter results. "The Census asked if they had a phone. We've done research studies that show they'll answer yes if they have access to a phone down the street or in their apartment building or in a previous home. Hispanics tend to say yes in response to socio-economic questions that place the family in the most positive light.

"What the Census didn't ask," he says, "is whether they would speak with a stranger on the phone and answer personal questions. That's the key issue." SRC, which has tracked hispanic phone ownership for more than 10 years, reports 90% of hispanic respondents prefer face-to-face interviews.

Client opinion on the methodology issue is divided. Marianna Reges, media research manager, New York-based Bristol-Myers Co., prefers telephone surveys. "They tend to underestimate and are more believable than door-to-door studies, which tend to overestimate."

Getting their wires crossed

U.S. hispanic phone ownership

Market Development Inc.	85%
Strategy Research Corp.	69%

Richard Amundsen, director-hispanic markets for Atlanta-based Coca-Cola Co., places more faith in bilingual door-to-door surveys. He says telephone methodologies can be used in cities with higher socio-demographic levels.

Research Resources employs both methods, but favors door-to-door, says Dale Dauten, head of the Westlake, Calif.-based company. Although clients generally prefer phone studies, he says they reach only some 45% of hispanics without using costly random digit dialing techniques.

A recent survey by Hicksville, N.Y.-based Information & Analysis for the Spanish Radio Advisory Council used both telephone and door-to-door strategies to gauge Chicago hispanics' radio listening habits. The results did not determine which technique works best, says Harvey Morrow, VP-general manager.

Supporting Ms. Reges' statement about response levels, about 86% of those interviewed at home said they listen to Spanish radio vs. 56% of those interviewed by phone. But the SRAC survey also indicates why the debate continues. Although the Census reports 81.5% phone penetration among Chicago hispanics, 50.6% of those surveyed in-home by Information & Analysis did not own phones.

The company is re-interviewing the door-to-door respondents by telephone this month because of what Mr. Morrow calls a vote-casting problem.

Whether a basic methodology can be agreed on is still in question.

MDI and SRC stand behind their findings. Educated clients remain the best judges of which methodology meets their needs. *—Linda Cecere*

KTNQ hits the big leagues

Los Angeles hispanics no longer have to play the California Lotteria to win big money.

KTNQ-AM, became the area's first radio station—hispanic or otherwise—to give away $1 million to one lucky listener.

"You have to be in the big leagues to do this," says Ken Wolt, the station's president and general manager.

The contest punctuates the Spanish-language station's new-found power. KTNQ and its sister station, KLVE-FM, earned a combined 7.9 market share according to the latest Arbitron ratings survey, and have the second-largest 25 to 54-year-old audience in Los Angeles.

"Most people don't realize that if the hispanic population here was considered a city by itself, it would be the fifth largest city in the nation," Mr. Wolt says. But these figures didn't elude Honolulu-based H&G Communications, which bought the two stations last year for $40 million and was certain better programming targeting 25 to 54-year-old hispanics and bigger promotions would yield ratings results.

H&G Communications knew better programming and big money promotions would help KTNQ.

So both stations changed formats while giving away hundreds of prizes until management decided on the $1 million contest last April.

On Aug. 29 during a live broadcast from the Ahmanson Theatre, the station gave the first of 50 annual $20,000 payments to Delfilia Carrafco, a 23-year-old mother whose name was selected from 350 semi-finalists. To sustain interest, the station started a second $1 million giveaway, making those who entered the first contest immediately eligible for the second.

"People thought we were crazy to do this because Hispanics don't enter write-in contests," Mr. Wolt says. "But with more than 2 million entries, I think we've smashed that preconception." *—Wayne Walley*

Hispanic Market Tour

Despite ideal population mix, city fights for test market recognition

When it comes to hispanic test marketing, Chicago can't claim it's the Second City. Or third. Or fourth.

National advertisers head toward Houston, Los Angeles, Miami and New York to test products even though none of them reflect the overall U.S. hispanic market as well as Chicago. "Chicago is closest to the national breakout of hispanics, so testing here would give an advertiser a true picture of buying habits," says Marta Miyares, president, OMAR Inc., a Chicago-based ad agency.

Chicago's almost 800,000 hispanics make it the sixth largest U.S. hispanic market, according to Strategy Research Corp., Miami. "Plus, this city is No. 2 in terms of hispanics' average income." But she says she does not know of any real hispanic test marketing in Chicago. "Because Chicago has so many hispanic nationalities, advertisers are afraid they will turn one or more groups off," says Athena Sofios, VP, general manager of Evanston, Ill.-based WOJO-FM. "We reassure them you can address hispanics in one voice because Spanish is a language, not a format."

A common complaint, she says, "is that Chicago doesn't have enough media for a successful test market." Also, says Jesse Wilson, exec VP, San Jose & Associates, testing in Chicago is more expensive than buying media in a little Texas town.

While Ms. Sofios concedes this point, she says Chicago test results would be more accurate because of its demographic diversity. "And Chicago is still less expensive than L.A. or New York," she says.

Chicago's hispanic media has matured only recently, says Kathy Nicolini, national sales manager for local Univision affiliate WSNS-TV, making it "a tough job to raise the consciousness of advertisers and the major agencies."

The city's product distribution patterns also may appear intimidating, says Ken Ocepek, Univision's Chicago-based midwest sales manager. "As far as product distribution is concerned, Chicago often is perceived as being too unwieldy. The hispanics are spread out in Chicago, and that makes it a logistical problem because an advertiser needs an enormous number of stores to get adequate distribution."

Ms. Nicolini says the fact that hispanics are spread out over the city in concentrated pockets is a plus. "That means we have an excellent urban/suburban mix."

Mr. Wilson says clients who achieve the right distribution level still would have difficulty measuring results. "Now we have a strong media market," he says. "The only problem remaining is how does a client track the results? The research industry is not developed."

Chicago has had one recent success: a study by the Spanish Radio Advisory Council to test interviewing techniques. An impressive group of major advertisers and general market ad agencies joined Spanish radio stations and ad agencies in choosing Chicago as the project's test market.

"Chicago was selected as the test market because it has a very good Spanish radio market and a good cross-section of hispanics," says Peter Roslow, director-marketing, New York-based Telemundo Group, and former VP, general manager, Information and Analysis, the Hicksville, N.Y.-based company that performed the study.

"We feel Chicago is a valuable test market now," says Ms. Nicolini. "But advertisers are sticking to traditional test markets, like Miami, so convincing them that Chicago is for them will take some time."

Nicaraguans add new flavor to Miami's mosaic

When Miami-based WQBA-AM debuted in 1966 it let the market know where it stood, calling itself *La Cubanisima*, the most Cuban.

"Who knows," muses George Hyde, general manager, and regional VP of Susquehanna Broadcasting Co., "maybe I'll have to change it to *La Nicaraguenisima* some day" to reflect the growing Nicaraguan population.

"We're certainly not about to abandon our slogan, however," he says, and with good reason. Cuban-Americans head 68.7% of South Florida's hispanic households, according to Miami-based Strategy Research Corp. But that figure is down from 78.1% in 1985, while the number of Central American heads of households increased from 9.3% in 1985 to 16.4%.

The influx of Nicaraguans is so marked, Enrique Perez, advertising director, Miami-based *Diario las Americas*, devoted a paragraph in a just-completed promotional brochure to talk about the group's impact. "The reason is that after Cubans, Nicaraguans are our second largest group of readers.

"They also are becoming good advertisers," he says. "They are becoming a factor in the economy."

Estimates place the area's Nicaraguan population at 75,000 to 100,000. *La Estrella*, a monthly newspaper for the Nicaraguan community, reports a 25,000 circulation. The number of Nicaraguans could rise rapidly now that the Justice Department has granted Nicaraguans political refugee status, which makes it easier for them to obtain work permits.

Both Messrs. Hyde and Perez see some similarities between the Nicaraguan immigrants of the 1980s and their Cuban forerunners. "The Cuban influx is unique because of the educational, economic, professional and entrepreneurial status of the immigrants," Mr. Hyde says.

"There's a certain amount of that in the new Central American immigrants."

And while they can't match the demographics of the area's Cuban segment, Mr. Perez anticipates that will occur. "The demos will get stronger. They're at the same level as the Cubans were in the '60s."

We sell like 'el.'

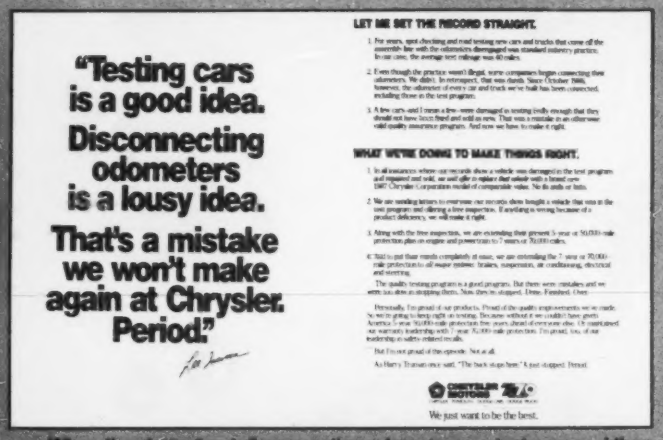
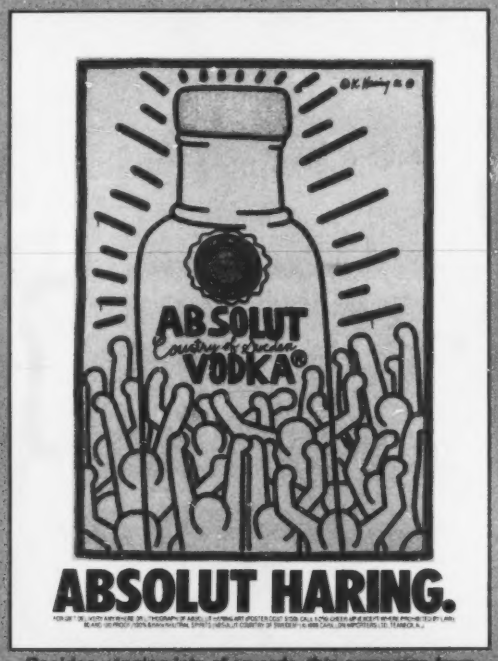
BEST OF PRESS



"Testing cars is a good idea.
Disconnecting odometers is a lousy idea.
That's a mistake we won't make again at Chrysler. Period."
LET ME SET THE RECORD STRAIGHT.
WHAT WE'RE DOING TO MAKE THINGS RIGHT.
We just want to be the best.

When the story about disconnecting odometers on test cars and then selling them as "new" broke, Chrysler Corp. looked bad. This ad, which ran just after the story broke, helped Chrysler look a lot better. By admitting it was wrong, with no ifs, ands or buts, Chrysler undoubtedly saved itself many millions of dollars in lost sales. Credit Bozell, Jacobs, Kenyon & Eckhardt, Detroit, with coming through under pressure. Copywriter: Don McKechnie; art director: Ron Bacsa.



Besides winning lots of awards, this campaign from TBWA, New York, is selling "lots of bottles" for Carillon Importers. It's running in magazines as well as newspapers. Creative directors: Arnie Arlow, Peter Lubalin; copywriter: Evert Cilliers; art director: Geoff Hayes; artist: Keith Haring.

When United Brands wanted to call attention to its sponsorship of the Pan American Games, Cato Johnson, New York, came up with this gold-medal solution. Creative supervisor and copywriter: Al Werben; art director: George Lamboa.

The day after Pepsi's Fountain Beverage Division learned they were keeping the Burger King business, they told the world about it with wit and style in this page ad, executed at lightning speed by Tracy-Locke of Dallas. Copywriter: Diane Forman-Semetc; art director: Kevin Lory Mote; art: Cat Pak Studio.

The boom in healthcare advertising has produced some excellent advertising. Much of it, like this ad for Chicago's Ravenswood Hospital Medical Center, is done in-house. We especially liked the headline. It may be "home-made," but most agency people would be proud to have written it. Creative director: Rod Neavelll; copywriter: Greg Waters; art direction: Parkside Graphics.

Best of Press selections are made by Advertising Age with the help of Hank Simons, VP-creative director of the Newspaper Advertising Bureau, and James Dunaway, VP-information of the bureau. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review to: Best of Press, c/o AA's New York bureau.

Autos pace July

NEW YORK—Advertiser spending during July in major-market daily newspapers in 16 categories climbed 9.3% to $252.8 million, according to the ADVERTISING AGE Flash Report. That increase was fueled by strong spending for new cars, amusements and food stores.

The new-car category, up 38.4% in June, climbed 61.2% in July vs. the same month last year, to $28.5 million. The amusements category, after a 3.3% dip in June, was up 18.2% to $41.9 million. Food store ad spending, up 7.7% in June, jumped 17.5% in July to $35.4 million.

Other categories posting major growth in July were general-merchandise stores, up 7.1% to $31.2 million; radio-TV-phonographs-records, up 9.6% to $19.2 million; and banks and trust companies, up 21.4% to $6.9 million.

Spending by department stores remained weak, down 9% to $57 million. Cigarette advertising continued to plummet, tumbling 54.3% to $1.5 million. Cigarette spending was off 50.7% in June.

Other categories posting advances in July were publishing and media, up 2.7% to $7.6 million; public service utilities and communications, up 15.8% to $4.7 million; computer stores and supplies, up 8.5% to $4.3 million; alcoholic beverages, up 3.5% to $2.1 million; computers, equipment and services, up 28.9% to $1.3 million; and cameras, photo supplies and services, up 13.1% to $473,000.

The stock, bond and investment house category dropped 16.5% to $1.3 million, and airline spending was unchanged from a year ago, at $9.4 million. The Flash Report is based on linage measurements by Media Records here in 29 daily and 22 Sunday newspapers in 15 major markets.#

Cereals report crisp gains

Products for adults increase

By JOHN C. MAXWELL JR.

The cold-cereal industry had another record year in 1986, with volume up 4% to 2.26 billion pounds. In dollars, the market was up 11% to $4.94 billion.

It is obvious the industry will be well over $5 billion this year. A price increase on the order of 3% was put into effect during the later part of the first calendar quarter.

We believe volume increases will be on the order of 4% in 1987.

The main growth area in 1986 was the adult products, though the children and all-family areas grew nicely. Battle Creek, Mich.-based Kellogg Co.'s products such as Nutri-Grain, Just Right and Raisin Squares were particularly noteworthy.

Kellogg, General Mills, Ralston Purina Co. and Nabisco Brands continued to gain share to the detriment of the Post division of General Foods Corp. (Philip Morris Cos.).

In the first quarter, Minneapolis-based General Mills seemed to be leading the way, particularly with new products. The company's new Ice Cream Cones is in the 1% zone. Raisin Nut Bran, which was introduced in 1986, is running close to a share point. In addition, Oatmeal Raisin Crisp has rolled out nationally.

Kellogg, which is off about a share point in the first quarter from the 1986 average, may reverse the trend with the introduction of Pro Grain, targeted toward athletic adults. This new product is being backed by a $30 million budget.

Chicago-based Quaker Oats Co.'s Oh's was heavily promoted and looks very good. The company is now marketing Quaker Oat Squares, an adult cereal with appeal for the whole family.

St. Louis-based Ralston seems to be doing very well with its short life-cycle cereals, though certainly Almond Delight may be longer lived with more than a half-share already.

Nabisco, East Hanover, N.J., appears to be getting more aggressive in its marketing and has rolled out several new items, including Shredded Wheat'n Bran and a Fruit Wheats line.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

P&G Italian promo helps Kenyan village

By CLAIRE PEDRICK

ROME—Procter & Gamble Co. is aiding a village in Kenya by tying in a promotion for its powder detergent, Dash, on the popular TV variety show it sponsors here.

P&G's two main competitors in Italy—Henkel and Unilever—are sponsoring rival TV shows this fall and have increased the prize money to attract more viewers.

The P&G project, code-named "Missione Bonta," or Operation Goodness, aims to provide schools and wells for Kiongwani, a drought-ridden settlement 100 miles south of Nairobi.

"The idea came to us after we heard about an appeal from some Italian missionaries based in Kenya," said Enrico de Toma, public relations director at P&G here.

The appeal was announced in a TV campaign that broke Sept. 26 on the Italian state network's RAI Uno channel. Leo Burnett Co., Milan, which handles Dash, prepared the campaign. The first screening of this fall's "Fantastico" variety show will be Oct. 3.

P&G has pledged $750,000 to cover the initial stages of the program. The rest of the money—an estimated $3.25 million—is expected to come from customers. A card in each Dash box will ask for a contribution of 75¢.

TV viewers will be updated through a weekly linkup with Kiongwani during "Fantastico." The popular Saturday evening variety show on RAI Uno attracts more than 10 million viewers.

In Italy, TV sponsorship is dominated by the big three detergent marketers. P&G's Dash is the biggest seller.

On Sept. 25, Henkel's Dixan detergent teamed up with the Silvio Berlusconi-owned Canale 5 for a series of 16 "Festival" gala shows. Henkel will put up a record $1.5 million in prize money for contestants, including a minimum $750,000 at the end of the series.

Hosting the show will be one of Italy's most famous TV personalities, Pippo Baudo, who earlier this year moved from RAI to Canale 5.

On Thursday nights on the same channel, TV veteran Mike Biongiorno will present a rival variety quiz show, "Supermike," sponsored by Unilever's washing powder Bio Presto, also with a prize of $750,000.

TV sponsorship is an expensive business in Italy. Each of the 16 Henkel-backed "Festival" programs will cost around $6.5 million to stage. Production companies share in the cost of the programs with the sponsors.

"Sponsoring a TV show can easily cost as much as a major ad campaign, but it involves the viewers and continually focuses attention on the product," said Paolo Girone, president, Essevi, a Milan agency.

Sponsorship of a quiz show keeps the product in front of the viewers throughout the program. Not only are spots run during commercial breaks, but the company's name appears on the set of the show and is mentioned several times during the program.#

BK enters Ayer era

'Have it your way' concept returns at troubled chain

By PATRICIA WINTERS

Burger King Corp.'s decision to move its $200 million advertising account to N W Ayer ushers in a new era of maturity for the beleaguered fast-food chain.

With New York-based Ayer as its new partner, the 5,179-unit chain will return to its roots with a theme that incorporates what it has defined as its key differences from archrival McDonald's Corp.: broiling, quality food and the "have it your way" concept.

See related editorial, Page 16.

Ayer's interpretation of those elements and its focus on "human contact"—the agency's motto—are what won it the prize account against competitors D'Arcy Masius Benton & Bowles and J. Walter Thompson USA, the 11-year incumbent.

Declining Burger King sales are what sources close to the review say lost the account for JWT, despite an impressive presentation by the agency.

Ayer's job now is to provide a clear direction to help reverse those slipping sales, which have hurt the income picture for parent Pillsbury Co. In fiscal 1987, ended May 31, Minneapolis-based Pillsbury disrupted a 15-year earnings streak with a net income decline of 13% to $208 million. Operating profits for its Restaurant Group (including BK, Steak & Ale, Bennigan's and Godfather's) fell 28% to $219 million.

"The restaurant side of Pillsbury had a giant profit decline while the food side is strong," said John McMillin, food analyst with Prudential-Bache Securities, New York. "It's like the swan and the ugly duckling."

Pillsbury last week brought back William Spoor, 64, who retired as board chairman two years ago, as chairman of its executive committee. John Stafford, 50, remains company chairman, ceo and president. Pillsbury's stock price rose after Mr. Spoor's return, reflecting the belief he has been asked to address the Restaurant Group's problems. There is speculation he may urge the Pillsbury board to cut its losses by spinning off the entire Restaurant

N W Ayer and Burger King toast their new relationship: from l., R.J. Trutz, BK exec VP; Jerry Siano, Ayer vice chairman; Charles Olcott, BK president; Keith Gould, Ayer senior VP; and Dominick Rossi, Ayer exec VP.

Ayer, JWT face challenges

By JON LAFAYETTE

The history-making move of Burger King Corp.'s $200 million account puts the heat on two of the nation's oldest ad agencies.

For now, winner N W Ayer is basking in the glory of winning the largest advertising assignment to change hands. It is a big boost for the New York-based agency, which was last in the spotlight in 1986 when it lost the $100 million U.S. Army recruiting account amid government accusations of bid-rigging, time-card inflation and kickbacks.

But the honeymoon with its newest and biggest client will be brief. The agency quickly must organize to handle a complex assignment and its work must bring results in the competitive fast-food field *(see box on Page 103)*.

At the same time, account loser J. Walter Thompson Co. also finds itself under pressure. The strain of losing a highly visible client comes on top of the executive turmoil that led to the agency's takeover by London-based WPP Group earlier this year. The agency once again must cut costs, which means firing

L.A. Shake 'n Break

Quake rattles ad agency offices

By JENNIFER PENDLETON

LOS ANGELES—Chiat/Day's headquarters at the Biltmore Hotel has "cracks all over" after the earthquake that jolted southern California Oct. 1. But like other ad agencies, it suffered little serious damage.

"We didn't have to cancel any meetings," said General Manager Greg Helm. "A couple of bookshelves fell over, and there was lots of plaster on the floor. But it's business as usual."

The agency offices—seven miles from the Montebello epicenter of the quake that measured 6.1 on the Richter scale—were evacuated for about an hour, but by 9 a.m. C/D's staff was back at work. The quake hit at 7:42 a.m., just as rush-hour began.

Staffers at McCann-Erickson Worldwide's office also had to leave their building. Exec VP-General Manager Richard Edler bought breakfast for his staff at a nearby eatery, and all were back at work by 10 a.m.

> *"It's all made us skittish and crazy."*
> **—John Littlewood**
> **Ayer/Pacific**

There was no damage other than a few overturned filing cabinets.

Chuck Reynolds, senior VP-general manager of HDM, was leaving his house when it happened.

"I was walking out the door, and the door decided to move," recalled Mr. Reynolds, who stayed at home to "watch the pool whitecap."

Tony Raymond, VP-account supervisor at DJMC, also was at home when the quake struck. When he headed for the office, the drive was harrowing in the final stretch, he said. "It took 45 minutes to go two blocks."

Dan Pearlman, president-ceo of Pearlman/Wohl/Olshever/Marchese, made it to his agency's Century City office in time for a client meeting, but his partners—held up in snarled traffic—didn't.

The quake, lasting 10 to 15 seconds, was substantial enough to cause many people to wonder whether this might be the long-feared "big one"—the great quake seismologists predict likely will

Last Minute News

GE/RCA electronics account up for grabs

INDIANAPOLIS—GE/RCA Consumer Electronics is reviewing agencies for its $20 million GE, RCA and Dimensia consumer electronics account. The business had been split between Leo Burnett USA, Chicago, and BBDO Worldwide, New York. Burnett on Oct. 2 resigned the $15 million RCA and Dimensia business, citing the review and new compensation arrangements. BBDO, which handles the $5 million GE consumer electronics account, as well as GE appliances, will be in the review. The company plans to select three other agencies this week to pitch the business.

Suave goes to Bayer Bess

CHICAGO—Helene Curtis Industries selected Bayer Bess Vanderwarker & Flynn for its $10 million Suave haircare, antiperspirant and skincare account. Backer Spielvogel Bates previously handled.

Disney considers media move

BURBANK, CALIF.—Walt Disney Co. may move its estimated $60 million account to a media-buying service to reduce its commission fee, sources say. Disney officials met with Y&R Entertainment, its current

Highlights

The race is on 12
Nissan Motor Corp. USA is scrambling to complete its 1988 model-year campaign less than two weeks away from its scheduled start. As of last week, the auto importer was waiting to see the first finished TV spots and print ads breaking Oct. 19. The ads—stressing image rather than hard sell—mark the first Nissan effort from Chiat/Day.

Gerber's new addition 52
Food industry analysts are watching closely to see whether Gerber Products Co.'s new chairman, David Johnson, sustains the company's recent drive to expand its general-merchandise lines. The company's Gerber Products Division is gearing up general-merchandise marketing, but Mr. Johnson's extensive background in the food and package-goods industries is fueling speculation that Gerber will return its emphasis to baby-food marketing.

The grapevine grows 56
Those high-stepping California raisins are appearing in a new promotion for Hardee's Food Systems, which ordered 15 million 1-inch replicas of the California Raisin Advisory Board's dancing raisins for a monthlong promotion of its Cinnamon N' Raisin Bisquit. Hardee's also may use the raisins in other ways.

Ad review 88
When John Houseman became front man for Smith Barney Inc., it was the right idea at the right time. Now Leo McKern has taken over, and this is also the right idea at the right time. We're talking about two extremely right advertising ideas rooted in one essential premise: that most of us have an extremely wrong idea about the retail brokerage business. The "profession" has achieved an aura bordering on glamor. That's amusing, because peddling stocks and bonds is about as glamorous and sophisticated as operating a toaster oven.

Saying it in black and white 100
During commercial breaks this fall, you may wonder whether there's something wrong with your color TV: There's been an upsurge recently in commercials shot in grainy black and white. The trend, which started last year when many advertisers went heavily into b&w print campaigns, is the latest attempt by agencies and advertisers to stand out from the crowd.

INTERNATIONAL

Colgate, Henkel in joint venture in France 76
The joint venture of Colgate-Palmolive Co. and Henkel KGaA to manufacture and market Henkel's newly acquired Cotelle household cleaning products line in France will give each of the companies a much-desired entry into that important market.

Revived 'La Prensa' a hit with advertisers 78
Potential advertisers have been rushing to Nicaragua's *La Prensa* since the anti-Sandinista newspaper was given the green light to resume publication, the first major step by the Sandinistas to comply with the Central American Peace Accord.

ISL Marketing wins Soccer Cup rights 78
Lucerne, Switzerland-based ISL Marketing, in a major coup, has won exclusive marketing and sponsorship rights for the 1994 and 1998 Soccer World Cup. But the award has sparked threats of lawsuits by Sport-Billy, Stuttgart, W. Germany, and Telemundi, Monte Carlo, two companies shut out by ISL.

OTHER NEWS

Dow Chemical Co. may use its friendly acquisition of haircare marketer Lamaur as a springboard for more consumer products buyouts in the U.S. and abroad, an industry analyst says. Page 28.

Edward Lowe Industries is beating Clorox Co. to the punch by introducing nationally an upgraded version of its Kitty Litter. Lowe is backing the rollout of Kitty Litter with Healthguard with an $8 million-to-$10 million TV and print campaign. Page 49.

Fisher-Price on Oct. 19 launches a $3 million TV and print campaign to introduce its much-heralded children's video camcorder, expected to be the first in a line of adolescent electronics from the company. Page 90.

For the self-appointed "industry guru" of the wine and spirits trade, the industry is not enough. Marvin Shanken, founder and president of M. Shanken Communications, has redesigned *The Wine Spectator* as a slick consumer magazine to draw more readers and a wider range of advertisers. Page 97.

Woody Harrelson is taking a break from Beantown for Surf City. The dull-witted but lovable bartender on NBC's "Cheers" isn't leaving the show, but he's spending part of his off-camera time as celebrity endorser for beach accessories marketer Son International. Page 100.

SPECIAL REPORT

***Corporate Image Advertising**—Today's corporate image advertising is a far cry from the visionary messages of the past. Mergers, acquisitions and corporate restructuring have colored the corporate image, putting the emphasis on a corporation's bottom line, its business fundamentals and, often, its products. Starts after Page 58.*

'Memories' will kick off DCI projects

By PATRICK REILLY

NEW YORK—Peter Diamandis' newly minted Diamandis Communications Inc. plans a spring launch of a nostalgia/history magazine called *Memories*.

P. Diamandis

It is one of three new publications planned by Mr. Diamandis, who pulled off the largest magazine purchase in history when he paid $650 million in a leveraged buyout of CBS Magazines.

Mr. Diamandis completed the purchase last week. He had been president of CBS Magazines.

The new company Mr. Diamandis heads as president-ceo also plans to sell as many as six of the 21 consumer magazines he bought from CBS Inc. and, eventually, acquire broadcast properties.

To finance DCI's expansion, which Mr. Diamandis said will include "lots of acquisitions," the company will make a public stock offering in the next one to five years.

Before that, company stock will be sold to a "platform group" of key editors, publishers and department heads, Mr. Diamandis said.

"I believe in a wide distribution of ownership," he said in an interview.

But first on the agenda is the divestiture of several profitable DCI magazines to help defer the cost of the buyout, which sources said amounts to an annual debt payment of $70 million. All of DCI's 21 special-interest consumer magazines are in the black, though "some only marginally so," Mr. Diamandis said.

"We are not being forced to sell, but with $650 million in debt, to divest and restructure is the historical wisdom of LBOs," Mr. Diamandis said. "I am interested in lots of acquisitions, but for now I've got to sell some. But I won't sell a magazine unless I get a home-run deal."

His goal in divestiture is to bring in more than $200 million in revenue by selling no more than six titles. In any case, Mr. Diamandis plans to give up no more than $80 million in annual ad revenue from the magazines he sells.

"I have to consider what DCI will look like after divesting," he said. "I want to have something left to work with."

The list of potential buyers is vast. It includes Cahners Publishing Co., a U.S. subsidiary of U.K. publishing giant Reed International; Playboy Enterprises; a rich sailing enthusiast who said he simply wants to own DCI's *Yachting* monthly; and a long list of leading U.S. and foreign publishers.

Industry observers and several U.S. publishers said that foreign publishers, helped by a favorable exchange rate, will have an advan-

Wave of future?

General Mills will test home-delivered meals

By BETH AUSTIN and SCOTT HUME

General Mills is combining its grocery and restaurant expertise in a new venture that could have significant impact on both industries.

Order In, a "dinner delivery service" in Eden Prairie, Minn., near General Mills' Minneapolis headquarters, today begins distributing menus, taking phone orders and delivering microwaveable dinners to homes and offices, said a spokesman for General Mills Restaurant Group, which is overseeing the venture.

The development of home-delivered meals specifically designed to be cooked in microwave ovens sets the Order In concept apart from other restaurant delivery services, such as Domino's Pizza.

If successful, it would put General Mills ahead of crosstown rival Pillsbury Co., which also has been looking at ways to marry its restaurant and grocery-product businesses.

Burger King USA President Charles Olcott told industry analysts earlier this year he planned to take advantage of parent Pillsbury's food expertise, "especially in the areas of pizza and freezing/microwaving technology."

Charles Henderson, VP-marketing at Pillsbury's Godfather's Pizza, confirmed that it "has been looking at the possibilities of [delivering] microwaveable pizza, but we've put it on the back burner."

McDonald's Corp. Senior VP Thomas Glasgow said at the company's annual meeting that it is evaluating such technology in its research facilities. Oak Brook, Ill.-based McDonald's is the world's largest restaurant chain.

The International Foodservice Manufacturers Association predicts total restaurant sales will grow only 3.7% to $132.7 billion in 1988, after rising 4.2% in 1987. Part of the sluggishness in growth is attributed to consumers' increased purchase of frozen microwaveable entrees.

The spokesman for Order In would give few details on the operation and would only describe the menu as mainstream.

Blaine Sweatt, who previously shepherded the development of General Mills' 52-unit chain of Olive Garden Italian restaurants, is believed to be in charge of Order In.

Ad plans could not be determined. Grey Advertising, New York, handles other General Mills Restaurant Group chains, including Red Lobster, York steakhouses and Olive Garden.#

Freakies back in cereal bowl

By BETH AUSTIN

Freakies is back, but only the name is the same.

After a decade off grocery shelves, Ralston Purina Co. has returned to the children's cereal wars one of its first entries in the segment.

Freakies first appeared in 1974 as crunchy corn-based rings represented by seven characters who lived in a tree. It stayed on the market until 1977, when it was withdrawn along with a line extension called Fruity Freakies.

Ralston today breaks TV advertising for new Freakies, a disc-shaped, honey-sweetened, multigrain cereal with added marshmallows in seven different colors.

Commercials portray the marshmallow figures as seven animated characters from the planet Freakon. Wells, Rich, Greene, New York, which helped introduce the product in the early '70s, also handles the reincarnated brand.

A spokesman for St. Louis-based Ralston declined to reveal ad spending plans for new Freakies. But Ralston and competitors have been spending heavily on recent introductions.

General Mills, Minneapolis, this year is spending $22 million for its Ice Cream Cones presweetened cereal (AA, Dec. 1).

"The Freakies are seven fun-loving characters whose sole mission is to bring fun back into breakfast," the Ralston spokesman said.

The seven characters—Tooter, Sweetie, Grumble, Hugger, Hot Dog, Ace and their leader, Boss Moss—"ride through space atop their cereal spaceships, which they ride like surfboards," he added. "They listen to surfing music and speak in Dr. Suess-style rhymes."

The cereal, which began reappearing on grocery shelves in August, is Ralston's latest entry in the "marshmallow-added" group, the fastest-growing subsegment of presweetened cereals, according to the spokesman.

Presweetened cereals account for 40% of the $5 billion ready-to-eat cereal market and are the fastest-growing category.

Ralston has introduced only one other children's cereal this year, Fruit Islands, a multicolored, multigrain natural fruit-flavor cereal with real apple bits.#

Court adds to toy-TV show woes

By SARA E. STERN and STEVEN W. COLFORD

The battle over children's television may be decided in the marketplace rather than at the Federal Communications Commission.

While the FCC is expected to enforce a court ruling that toy marketers put their names on shows based on their products, low ratings already are forcing toy companies out of the entertainment business.

The U.S. Circuit Court of Appeals for the District of Columbia last week overturned a 1984 FCC ruling that allowed toy marketers to produce TV programming based on their toys without on-air acknowledgment of their involvement.

John Kamp, FCC director of public affairs, said the ruling did not mean the court considered such children's shows to be program-length commercials, the common complaint against them.

He said similar disclaimers are attached to game shows and other TV programs where a company has performed a service in exchange for name mention, and said he expects the FCC "will likely require such things on these sorts of [children's] programs."

The FCC had said such acknowledgment was not required as long

Pet foods collar modest gains

By JOHN C. MAXWELL JR.

The pet-food industry made modest gains in 1986, up 3.6% in dollars, compared with 3% in '85 and 6.7% in '84.

As has been the case for some time, the cat-food segment paced the industry, up 4.8% in dollars; the dog-food segment was up 2.8%.

This trend parallels the explosive growth in the cat population, which hit 56.2 million in 1986, 53% over the 1980 level.

The dog population increased by a little more than 10% during the same period and has stabilized in recent years at 51 million.

Companies that have concentrated on cat food had meaningful share points. Kal Kan Foods, Ralston Purina Co. and H.J. Heinz Co.'s Star-Kist Foods unit are prime examples, with pretty much everybody else losing share. The exception was Quaker Oats Co., which gained mainly because it acquired Gaines Foods in 1986.

The biggest jump is in the treat area, with dog treats up 19.2% and cat treats up 6%.

In terms of unit trends, the canned dog-food market was down 3.5%, with maintenance products down 7.5%. The premium canned-food area was off only slightly.

Dry dog food was down more than 2%, with maintenance down 2.5% and premium down 2%.

One trend is that increasingly products are being sold outside the grocery store. We anticipate at least 25% of dry dog food and 10% of canned dog food are sold through channels such as veterinarians.

Moist dog food was down 9%, with soft dry food down more than 15%.

In the cat-food segment, canned food was up 5%, with the gourmet section comprising about 85% of the total, up about 6%. Dry cat food was up 7% to 8% and moist was down 5%. Cat treats began to grow in 1986, up almost 10%, while the maintenance portion declined 1.3%.

Once again, St. Louis-based Purina led the way in dollar volume increases and also was up 0.6 share points. Chicago-based Quaker, because of the acquisition of Gaines, jumped to the No. 2 position, nosing out Carnation, Los Angeles, which lost 0.1 share points, as did Alpo Pet Foods, Allentown, Pa. Both Kal Kan, Vernon, Calif., and Star-Kist, Long Beach, gained share, 0.9 and 0.5 points respectively.

Purina came out with a new dry dog food called Savor, which looks interesting. Alpo reintroduced its Alamo brand. In addition, Purina brought out Bone Appetit canned dog food and Catviar canned cat food. It also introduced Hardy Chew in the dog-treat area.

Purina had several interesting new products in the cat-food area, with dry Pro Plan, Catviar and Smart Cat.

Most growth activity appears to be in the dog-treat area, with Beef Bites from Alpo, Marrow Bone from Kal Kan and Pup-peroni from Quaker.

The hot area in the cat arena is the emergence of the 3-ounce ultra-gourmet brands. The two products are Carnation's Fancy Feast and Star-Kist's Amore, which together have jumped to more than a $200 million market in a little more than two years.

Purina still ranks as the leading pet food marketer with a 27.3% share, followed by Quaker Oats with 13.1%, Carnation with 12.0%, Kal Kan with 9.3%, Star-Kist with 8.3%, and Alpo with 7.0%. #

Merger craze colors image

By Lori Kesler

Most corporate advertising these days looks like it's wearing a three-piece suit and carrying a calculator.

The visionary images of yesteryear are fading fast as more companies choose to stake their reputations not on their plans for a better tomorrow, but on their bottom lines today. Corporate ads have turned serious. They get straight to the financial point. Industry observers agree that for now, at least, the frill is gone.

"Today's corporate ads are a far cry from the feel-good messages of the past," says Tom Garbett, a Waterford, Conn.-based corporate ad consultant. He says companies no longer subscribe to the notion that "you should improve your corporate image just because it's good for you." The prevailing opinion today is more pragmatic, almost hard-bitten, he says. "The idea now is, 'Let's get my image right so I can sell product.' "

The Golden Age of "feel-good" corporate advertising peaked nearly 12 years ago when "we weren't under economic attack from foreign competition," says Barry Biederman, chairman and creative director of Biederman & Co., a New York-based ad agency. "A corporation's biggest concern in those days was making people feel happy about the company," he says. "Anybody who tried that approach today would be a laughing stock."

He says society's attitudes have changed since then, too. Now, instead of criticizing big business as they did in the 1970s, "people worry about jobs and major corporations' ability to keep afloat. This dictates a more down-to-earth approach."

Experts agree that the acquisition wave

Merger craze colors image

(Continued from Page S-1)

sweeping through corporate America during the past few years has left its mark on corporate advertising. According to Chicago-based merger consultants W.T. Grimm & Co., there were 3,336 corporate acquisitions in 1986, valued at $173 billion.

"Corporations discovered almost nobody's safe from takeover," says Terry Hill, senior VP-executive creative director, Brouillard Communications, a division of J. Walter Thompson Co. in New York. He says the advent of the junk-bond market spurred the urge to merge, and the current administration's hands-off policy also helped pave the way for big-company buyouts.

"In the last 10 years, one out of six *Fortune* 500 companies disappeared as independent entities," he says. "If you're a ceo —and that's who we deal with in corporate advertising— you're constantly looking over your shoulder. It's a tremendous distraction."

Typically, the ceo tries to block takeover attempts by keeping stock prices up. That, in turn, affects the way he thinks about corporate advertising. For example, a diversified company may try to raise its stock value by having corporate ads spotlight growth categories, such as electronics, rather than holdings in stagnant industries such as steel.

And a company that doesn't deal in consumer products may feel, for the first time in its history, a mysterious need to introduce itself to the world. In fact, Mr. Garbett says many corporate officials "suddenly get religion" after a close call with a corporate raider. "They decide it's time for the company to become better known and understood for its true value," he says.

Meanwhile, the popularity of corporate advocacy ads and soft-edged image ads has diminished as companies have become more concerned about appearing fiscally fit, says Michael Winkleman, editor of *Public Relations Journal*, New York.

In the current takeover environment, he says, "it behooves a company to be seen as lean and mean." A year ago, the *Public Relations Journal* noted a trend toward using cartoons in corporate advertising. Mr. Winkleman says although the advertisers who used them —Goodyear Tire & Rubber Co., Trinova Corp., Grow Group— were pleased with results, the campaigns have spawned few imitators. The cartoon ads apparent' "were seen as too much fun—not serious enough. It was a very short-lived trend," he says.

Wall Street's highly charged acquisition atmosphere has affected corporate advertising in other ways, too. Mr. Hill detects an emerging pattern of corporate ad campaigns that simply "tell the world what you do." He says the ITT campaign —which explains the company's diversification with the slogan "It is ITT"—exemplifies such a strategy.

This kind of ad style stems from a "need to tell financial analysts you know what you're doing," he says. "It's strategically sound, but amazingly flat-footed and plodding."

Experts note the current economic times also are spawning corporate ads with a stronger marketing orientation. "Today's ceo is a very anxious person," says Mr. Garbett. "He wants to look like he's cut all the fat out of his company, and the corporate campaign is supposed to look like it has no fat, either."

As a result, many corporate ad campaigns are turning into hybrids that showcase the company as a provider of quality products and services as well as a place with a bright financial future.

Mr. Biederman says corporate advertising is being used more often as a vehicle to move goods, a trend he believes stems inevitably from pressures to cut costs. "Corporate advertising traditionally hasn't paid its own way," he says. "So now the people involved are trying to kill two birds with one stone. They rationalize that if they're actually selling something, then corporate advertising can be called a justifiable expenditure."

Mr. Garbett recently examined corporate ads from 100 leading companies and found 84 strongly sales-oriented. "They're using the image of the company to make the sale," he says. "That doesn't mean they aren't also trying to make themselves better known to investors. Lots of companies will spend one-half to $1 million annually for that purpose. Bu the really big corporate spenders—such as AT&T, General Motors and Ford—also are going for product sales."

Most financial experts routinely deny being influenced by corporate ads, and one insider says there is no evidence to prove advertising has any direct effect on a stock's price-earnings ratio. But Mr. Hill says in a study conducted by his agency that financial analysts and portfolio managers did admit to being influenced by a company's reputation. "Advertising," he says, "is one way a company builds a reputation."

Meanwhile, the most obvious trend to roll out of the current merger craze is an unprecedented flood of name-change ad campaigns. The first six months of 1987 saw a record 919 corporate name changes, up 59% from the same period a year ago, according to identity consultants Anspach Grossman Portugal, New York.

A few of the recently renamed corporations include Navistar International Corp. (alias International Harvester Co.); Primerica Corp. (from American Can Co.); Trinova Corp. (formerly Libbey-Owens-Ford Co.); Unisys Corp. (created from the merger of

Primerica hitches its wagon to a star

By Roberta Reynes

Picture John Wayne: the Stetson hat, creased face, white teeth, his fingers resting lightly against the leather holster. Beside the cinematic Old West's most famous face, copy announces: "Sometimes the name you grow up with doesn't fit you anymore."

Your eyes drift across the spread. "That's why American Can has changed its name to Primerica." Small print adds that Mr. Wayne changed his name, too.

Wags may wonder what John Wayne has to do with selling financial services, Primerica Corp.'s main business. But the ad has been a huge success. Primerica cites a Starch INRA Hooper report showing it scored either first or second in reader recognition in the issues of *Barron's*, *Business Week* and *The Wall Street Journal* in which it ran.

Roberta Reynes, a New York-based free-lance writer, specializes in financial reporting.

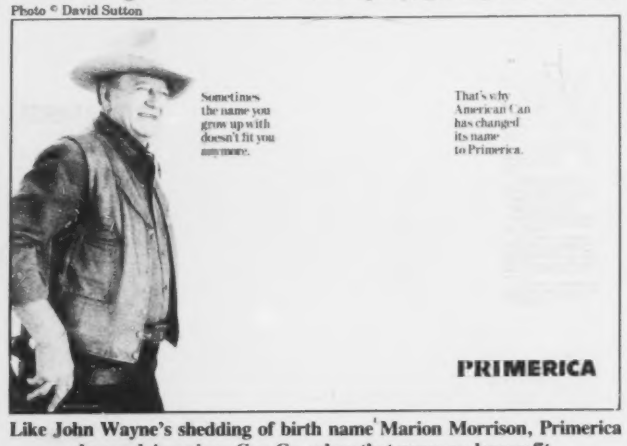
The attention-grabbing ad heralded the company's transformation: It had divested its packaging business, moved into specialty retailing and increased its financial services operations. Quite simply, the old corporate moniker and identity no longer fit.

American Can Co. was founded in 1901 and, a half century later, still made only cans. Slowly, it began adding other forms of packaging, such as plastic containers and paper products.

With hindsight, one can see that a significant moment in the evolution of the Greenwich, Conn.-based company occurred in 1975, when Kenneth Yarnell was hired away from Wall Street's Donaldson, Lufkin & Jenrette to form a mergers and acquisitions team.

Next, Chairman-ceo Bill Woodside concluded the businesses the company was in promised slow growth. Enormous infusions of capital would be required to remain competitive with, say, a Procter & Gamble Co. in paper products. In 1981, Mr. Woodside announced his intention to restructure the company, getting out of chemicals and manufacturing and into the service sector, the fastest growth area of the gross national product.

Photo © David Sutton



Sometimes the name you grow up with doesn't fit you anymore.
That's why American Can has changed its name to Primerica.
PRIMERICA

Like John Wayne's shedding of birth name Marion Morrison, Primerica dropped American Can Co. when that name no longer fit.

Meanwhile, Mr. Yarnell's M&A activities had brought Minnetonka, Minn.-based Fingerhut Corp., a direct marketer, into the fold at American Can. And Gerald Tsai Jr., a legendary Wall Street maven, had written Mr. Woodside suggesting a joint venture linking Associated Madison Cos., the New York insurance company in which he owned a controlling interest, and American Can in a direct-marketing effort. Mr. Woodside sent Mr. Yarnell to New York to call on Mr. Tsai.

As the two talked, the focus of the deal shifted: American Can would purchase Associated Madison, and Mr. Tsai would move to Greenwich, too.

Mr. Tsai's star rose quickly.

(Continued on Page S-8)

Merger craze colors image

(Continued from Page S-2)

Burroughs Corp. and Sperry Corp.); and UNUM Corp. (from Unionmutual Insurance Co.).

When a company takes a new name, it has to start rebuilding its image, so mounting a major corporate campaign to accomplish this becomes almost routine, says Mr. Garbett, adding that "the whole thing's gotten fairly predictable."

Many companies have restructured themselves through acquisition and divestiture and then taken new names to reflect their new identities.

Mr. Garbett says companies also change their names to improve their image. Several communications companies, for example, have dropped the word "telephone" from their names. "They're all trying to make themselves an acceptable resource so the business person thinks he's buying from a modern, 'with-it' telecommunications company, not from a stodgy old phone company," he says.

But experts say the name-change game can get risky when it creates meaningless monikers with no built-in equity. "Many names don't mean anything—and that's intentional," says Mr. Hill.

"Companies have been hurt by having names that did say something: American Can no longer made cans and International Harvester made more than harvesters.

"I can understand what they're doing, but sometimes I think they miss a prime chance to communicate through their names," he says.

Mr. Garbett also sees mixed results in the grab bag of new names. He says "it's almost silly for companies to start all over" when they could better build on the old name.

"So many of the new names are relatively bland and sterile," he says. "And they don't tell what a company does. Of course, the corporations don't want labels because they want to be free to do anything. But somewhere along the line, the companies have focused so much on their internal needs that they've forgotten the consumer," adds Mr. Garbett.

Most insiders are hoping for calmer times ahead. Mr. Biederman says the corporate ad industry has been hurt by the recent period of restructuring because "tough times make tough choices, and when budgets are tight, corporate advertising tends to be in the expendibles column."

Mr. Hill says acquisition fever and the name-change frenzy should subside as rising stock prices, a tougher government stance and a slower junk-bond market take their toll. "Eventually," he says, "we'll go back to business as usual, when ceo's will start managing for the next 10 years instead of the next 90 days."

What Image Does Your Front Line Personnel Project?

Do your employees look professional? Do they project confidence? Does your internal and external corporate image lack clarity? Are your public contact people recognizable? Advocacy approach past its prime

By Janice Steinberg

The 1970s were considered boom years for advocacy advertising. Stimulated by a distrustful public that suspected big business of profiting from the oil crisis, and by activists who charged them with despoiling the environment, companies like Mobil Oil Corp., United Technologies Corp. and others found "op-ed ads" and "advertorials" perfect weapons for fighting back and taking stands on controversial issues.

Advocacy advertising is far less prominent in the 1980s. Opinion is divided, however, on whether there is less of it, or it simply is attracting less attention than it did a decade ago.

"There hasn't been a lot of [advocacy advertising] since Ronald Reagan was elected president," says Fred Leslie, corporate advertising sales manager at *The Wall Street Journal*, New York. "One of his early platforms was to get government off the backs of business. So there weren't as many major [business-related] issues being discussed or voted on by Congress," he says.

Janice Steinberg, a San Diego-based free-lancer, writes frequently for Special Report.

He estimates that advocacy ads represented 2% of the *Journal's* annual advertising pre-Reagan. He puts the current figure at less than 0.5%.

"I think a lot of groups that used advocacy advertising prior to the Reagan administration felt they had a warmer friend in Washington," says Barry Biederman, chairman-creative director of Biederman & Co., a New York-based agency. "They've used lobbying activities rather than the advocacy advertising they would have used [before]."

However, Tom Garbett, a corporate ad consultant based in Waterford, Conn., says the level of advocacy advertising hasn't changed—it has always been low.

"Advocacy advertising never happened as big as anybody thought it did," says Mr. Garbett. "There used to be a bit more of the 'Let's get famous by taking public issues and discussing them' [ads than there are today]. But at no time could you count more than a dozen active corporations doing advocacy advertising."

He says the decrease in advocacy ads in publications like *The Wall Street Journal* indicates tighter targeting—toward congressmen, military leaders, etc.—rather than a dramatic drop in advocacy advertising overall.

Eyes on the olive branch, but arrows at the ready.
F-15 Eagle
DOUGLAS
IT'S THE DIFFERENCE BETWEEN HELP COMING AND HELP COMING IN TIME.
MCDONNELL DOUGLAS

McDonnell Douglas' corporate image and advocacy ads represent about 4% of the company's ad budget.

Among the leading corporations in advocacy advertising, the story is mixed as well. Mobil continues to do "op-ed" ads, with roughly the same mix of corporate image and advocacy ads, but has reduced the frequency because of downturns in the oil industry and the rising cost of advertising linage, says a company spokesman.

Stamford, Conn.-based United Technologies, another advocacy pioneer, halted its regular advocacy ad schedule more than a year ago. "It's not that the issues have disappeared," says Christine Rothenberg, assistant director-advertising and marketing support. "It's just that we feel an advocacy ad is more useful if, instead of sticking to a fixed schedule, we speak out on a particular issue when we think it's important."

United Technologies' new policy is to run issue ads on an "as needed basis," says Ms. Rothenberg. The company hasn't run any since November of last year when it addressed the trade imbalance.

Belt-tightening is the reason New York-based W.R. Grace & Co. didn't produce an advocacy TV commercial in 1987 after making an annual, issue-oriented spot in each of the previous six years, says Fred Bona, corporate VP-corporate communications.

"We went through a very significant restructuring and ended up losing $472 million last year. Business reasons caused us to curtail our entire activity in advocacy advertising," he says. "It hurt. We felt that our advocacy advertising had become a standard that other people looked to."

In "Baby," Grace's controversial 1985 spot, two bureaucrats entered a hospital nursery and presented a newborn baby with a $50,000 bill—the amount it owed the government because of the deficit. The theme was reprised in 1986 in "The Deficit

HOT LINE
"GET ME THE LEADERSHIP IN WASHINGTON"

There's more than one way to reach Washington's leadership, but none more **powerful** or **efficient** than **The New Republic Policymakers Edition.**

Powerful because The New Republic is the respected weekly journal of authoritative and informed news analysis and opinion with influence where it counts most.

It reaches the highest levels of government from Foggy Bottom to Capitol Hill, from the White House to the Pentagon.

Efficient because The Policymakers Edition targets only Washington area readers, providing a "rifle shot" marketing opportunity which many corporate advertisers have found highly effective – and so will you.

At $2,750 per page it is also the best value available in delivering "the minds that matter."

If you want the leadership in Washington, call the **Policymakers Hotline now: (202) 331-7494.**

THE NEW REPUBLIC
POLICYMAKERS
EDITION

Primerica

(Continued from Page S-4)

Financial services became more and more important to American Can, and, along with specialty retailing, accounted for 80% of its $149 million in 1985 profits.

Definitive news followed soon after: On July 17, 1986, American Can Co. announced it would sell its packaging operations, and its name, to Triangle Industries, New York. Mr. Tsai, 58, already had been tapped to take Mr. Woodside's job as chairman-ceo on the latter's retirement in early 1987.

Mr. Tsai, in turn, would name Mr. Yarnell, 44, as president-chief operating officer in July 1987. The first six months of Mr. Tsai's ascendency also would see the acquisition of Smith Barney, a New York investment banking and brokerage company, and Mr. Yarnell's declaration that Primerica is on the lookout for even more financial services companies.

Late last summer, as the corporation faced being both can-less and name-less, a team headed by JoAnn Heffernan Heisen, VP-corporate affairs, began to search for a new identity in earnest.

Mr. Tsai himself played a major role. First, he ordered a computer printout of all possible combinations of four letters. "The resulting 800,000 item list weighed 5 pounds, but produced no name," recalls Ken Koprowski, director-corporate communications.

Soon, Lippincott & Margulies, a 41-year-old New York company specializing in corporate identity work, had plunged into the project. Early meetings between the American Can and Lippincott teams produced guidelines: The consultants would work with coined words derived in part from the word "American." And they would pursue names that suggested at least one of the following attributes: quality, value, performance, strength, vision, responsibility.

By late November, a list of almost 500 names submitted by Lippincott & Margulies had been honed to 13 finalists: Amdex, American Enterprise, Ameriprise, Ameristar, Amshare, Axam, Dynax, Equistar, Primerica, Roex, Sharex, Xaco, Xamex, Xamco, Xamic and Xelex.

Mr. Tsai strongly favored names containing "X" and, in fact, his favorite was "Xelex."

Such active participation by ceos of major corporations is the rule, rather than the exception, according to Clive Chajet, president of Lippincott.

"This process reaches the emotional heart of a company," he observes. "The name is such a significant part of one's identity, and it has such a powerful influence on the company's image. The chairman is always intimately involved."

Mr. Chajet—whose favorite name was Primerica—says the toughest part of the assignment was to "create a new identity that would include some element of the extraordinary heritage the company enjoyed, while at the same time signaling a new and very different message." The challenge was heightened by the fact that very few derivations of the word America were still legally available.

By early 1987, Marquardt & Roche, Stamford, Conn., the corporation's longtime ad agency, was wrestling with creating a name change campaign that was interesting.

"*The Wall Street Journal* showed us a collection of name-change ads," says Jim Marquardt, president. "We were struck by how similar, basic and boring they were. We began searching for a way to arrest people's attention and, therefore, be more successful in registering the name change.

Ten leading consumer magazines in corporate ad pages

Trials," a futuristic scenario directed by "Blade Runner" director Ridley Scott. In a dimly lit courtroom, Dickensian in its air of privation, a gray-haired man faced an adolescent prosecutor who demanded to know why his generation did nothing to halt the deficit. Both spots were created by Lowe Marschalk, New York.

"The Deficit Trials" received national attention last spring when CBS-TV and NBC-TV refused to run it, and ABC-TV accepted it only from midnight to 12:30 a.m. Grace hired Joseph Califano, former Carter administration secretary of Health, Education and Welfare, to press its case with the networks. In August, CBS agreed to air the commercial if Grace would omit one line that the network felt advocated a proposed balanced budget amendment. By that time, however, Grace had used up the commercial's $1 million media budget on cable and local TV.

At St. Louis-based McDonnell Douglas Corp., corporate image and advocacy ads—both product-specific and advocating a strong national defense—are up, representing about 4% of the company's current ad budget, says John Bickers, the company's ad director.

When the U.S. Air Force selected McDonnell Douglas to build a new carrier and funding dragged, the company responded with advocacy ads created by J. Walter Thompson USA, Chicago. Mr. Bickers says the company tried to make the influential public aware of the carrier's importance in having a meaningful defense system. "We're now about to move into production, he says."

McDonnell Douglas runs its advocacy ads in the Washington newspapers, opinion-leader publications and the U.S. military newspapers. Like W.R. Grace, the company has trouble placing its issue spots on network TV.

Some observers say we may be seeing more advocacy ads on TV since the repeal of the Fairness Doctrine. Network representatives, however, say the Fairness Doctrine has never been the reason they have rejected certain ads, and that whether the repeal sticks or Congress reinstates the doctrine, their policies are unlikely to change.

"We haven't accepted advocacy advertising for the simple reason that we feel it would allow those with the biggest wallets to have the loudest voices," says George Schweitzer, VP-communications, CBS-TV, New York.

Ralph Daniels, VP-broadcast standards, NBC-TV, New York, says, "When we talk about controversial issues and the presentation of views on those issues, we feel they're best covered in news and public affairs programming."

Although some traditional advocacy advertisers are putting less money into issue ads, a number of new players have come on the scene. This May, brokerage house Drexel Burnham Lambert introduced a campaign promoting the value of high yield "junk" bonds to the economy. The $600,000 series of 11 ads ran through early this month in *National Journal*, *The New York Times*, *The Wall Street Journal*, *The Washington Post* and other publications.

Some suggest that associations may be picking up advocacy efforts where corporations have left off. "You're seeing more and more associations that represent companies doing the advocacy advertising for them," says Edward Erhardt, ad director of the Washington-based *National Journal*, which carries only corporate image and issue ads. "There's less of a tendency for companies to go out on a limb about an issue."

Although relatively few corporations are actively involved in advocacy, Mr. Bickers says it can be one of the strongest types of advertising. "I think advertising is at its most effective when you're overcoming misconceptions or minsinformation," he says. "You have to select the right media and get on at the right time to reach the audience, but advocacy advertising is not a shot in the dark." AA

"We thought of other stars besides John Wayne. But he has both stature and a particular connection with America. Cary Grant, or whoever, wouldn't be quite the same. Wayne projects determination, independence and strength."

Blackburn & Associates, a New York graphic-design company, became the third outside tributary to the project, developing graphics standards, such as how to use the corporate endorsement line, the letterhead, etc.

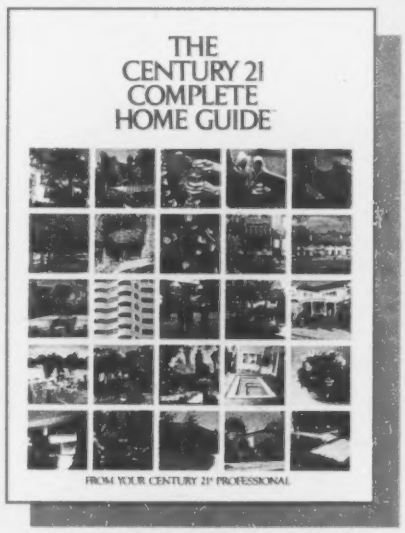
The print campaign, supported by radio spots in five major markets, broke the day after shareholders approved the new name on April 28. The schedule: from two to six insertions, depending on the periodical, in *Barron's*, *Business Week*, *Forbes*, *Fortune*, *Institutional Investor*, *Investor's Daily*, *The New York Times*, *USA Today*, *The Wall Street Journal*, and other publications.

The John Wayne ads were followed by a second print phase that detailed the company's business fundamentals and leadership position. Primerica is considering a third phase.

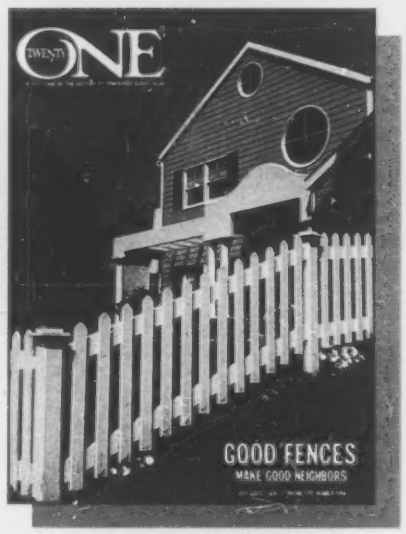
The tab for advertising to date runs about $3 million. Lippincott & Margulies' services cost Primerica $200,000, and Blackburn's, $70,000.

While the financial community is a focal point of communication efforts in a name change, Wall Street doesn't necessarily move on the news. In the case of Primerica, it didn't move at all. The restructuring that triggered the rechristening had been well publicized, and that knowledge already was reflected in the company's stock price.

IT TAKES TWO MAGAZINES TO REACH THE RECENT HOMEBUYER DURING THEIR TWO MOST ACTIVE BUYING WINDOWS.



THE CENTURY 21 COMPLETE HOME GUIDE™ IS DELIVERED PRIOR TO THE MOVE, WHEN 23% OF HOME PRODUCTS ARE PURCHASED.*



TWENTY ONE® MAGAZINE IS DELIVERED SIX TIMES DURING THE FIRST YEAR OF HOME OCCUPANCY WHEN THE VOLUME OF HOME PRODUCTS PURCHASED IS UP TO 20 TIMES THE NATIONAL AVERAGE.**

The CENTURY 21® System is the largest residential real estate sales organization in the United States. In 1986 more than 700,000 families trusted CENTURY 21® Brokers with the largest purchase they will make in a lifetime—a house. Now they need your product to make it a home.

You can reach these new homeowners exclusively through The CENTURY 21® Corporate Sponsorship Program. This Program consists of two publications, The CENTURY 21 Complete Home Guide ™ and TWENTY ONE® Magazine. These publications reach the new homeowner during the two most important *buying windows, (1) prior to the actual move and (2) throughout the first year of home occupancy.*

This year over 700,000 copies of The CENTURY 21 Complete Home Guide ™ will be personally delivered by The CENTURY 21® Broker System prior to the actual move. The CENTURY 21 Complete Home Guide ™ is the only publication designed to reach the recent homeowner prior to the move when over 23% * of home enhancement products are purchased. . . . And this BPA audited home reference guide offers compatible editorial and advertising adjacency inside.

With an average circulation of 250,000 copies per issue, TWENTY ONE® Magazine is a follow up publication delivered after the move 6 times annually. During the first year of home occupancy the incidence of purchase of home products is up to 20 times ** greater than the national average.

Together, The CENTURY 21 Complete Home Guide™ and TWENTY ONE® Magazine deliver the most complete advertising program to reach recent homeowners in America.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

P&G widens power base

Adds category managers

By LAURIE FREEMAN

Procter & Gamble Co., in a reorganization that could affect ad agencies and their commissions, has created a new tier of executive decision-makers to oversee products grouped by category.

The new structure was disclosed internally last week in a 12-page memo to employees of the Cincinnati-based marketer. It represents the first manifestation of P&G's yearlong experimentation with brand-management system revisions (AA, April 20).

The company's brand managers, however, are not affected directly by the change.

The move signals a decentralization of authority from the division level, where VPs formerly wielded total authority for all divisional products, to a sublevel of general managers accountable to them.

P&G acknowledged as much when a spokeswoman characterized the change as shifting "more decision-making down to the operating levels."

"P&G has found that the [retail] trade doesn't think in terms of brands," said Gordon Wade, a former P&G brand manager and now principal of the Cincinnati Consulting Group. "They think in terms of categories, and whether [their store] is getting its fair share of the profit dollars. To them, it doesn't matter if those sales are coming from Tide, Cheer or Bold, just as long as they make a [detergent] sale."

Although P&G declined to describe the restructuring further, a P&G staffer said that, in the detergent division, three category general managers have been named. One will handle laundry products; another will have dishwashing products (including light-duty liquids and automatic

Dennis Franklin Holt has risen from poverty to power.

Western's Holt driven to build buying empire

By JENNIFER PENDLETON

LOS ANGELES—He is probably one of the most powerful men in advertising on the West Coast. But power isn't a subject Dennis Franklin Holt likes to talk about. He'd rather wield it quietly.

And wield it he does. As president-ceo of Western International Media, he controls more money spent on spot TV than any other media buyer nationally. That means Western buys more spot TV in the U.S. than Foote, Cone & Belding Communications ($367 million), J. Walter Thompson Co. ($358 million), Young & Rubicam ($324 million) and D'Arcy Masius Benton & Bowles ($299 million).

Word around town is that Western is in line for an estimated $50 million worth of Walt Disney Co. media buying, now at

Family and school situations are the subjects of new TV commercials for the Apple II line, via BBDO.

Apple gears new spots to managers

Mac branches out

By CLEVELAND HORTON

Apple Computer is moving out of the boardroom and into the workplace with six new TV spots for its Macintosh computer. The commercials, breaking Oct. 17, are part of the company's $58 million ad campaign for 1988.

The new Mac spots and a new Apple II campaign that starts today are the first Apple commercials under the direction of Steve Hayden at BBDO Worldwide.

Mr. Hayden, now BBDO executive creative director, created Apple's "1984" blockbuster Super Bowl commercial while at Chiat/Day, Los Angeles. He joined BBDO in 1986, shortly after the agency won the Apple account. BBDO's New York and Los Angeles offices handle Apple's advertising.

To build on the high level of viewer awareness of Apple's current commercials, the Cupertino, Calif.-based personal-computer marketer is maintaining the "slice of reality" look of BBDO's first Mac campaign.

But while the previous campaign was aimed at ceos, the new spots illustrate how the Macintosh improves the professional lifestyle of managers through a series of vignettes.

Joe Pytka directed the new spots as well as some of

Highlights

Liquor spots may go on ice 12
A campaign is under way to close one of the only broadcast outlets for liquor advertising: Spanish-language TV stations. A coalition of 19 groups says it will ask liquor marketers to stop buying time on hispanic stations and ask the stations to stop accepting the business. If that doesn't work, the coalition will pressure the stations. Liquor commercials have been appearing on Spanish-language stations without incident for almost a decade.

Tuning in to New Age 37
A new age for New Age seems to be dawning. The soft instrumentals and jazz music—characterized by some as "Yuppie Muzak"—often is touted as the radio format of the future. But with the help of a distributor beaming a New Age program by satellite to affiliated stations nationwide, it's becoming the trend of today. Radio industry sources predict at least one station in each of the Top 100 markets will change to the New Age format by yearend.

Campbell's traveling on European plan 40
Campbell's U.K. Ltd. is entering the European frozen-food market with two product lines adapted from the U.S. and later plans to launch a series of new frozen products. This month Campbell's is introducing frozen soups in Britain and a line of vegetables and seafood in pastry in November.

Isuzu looking for last laugh 66
American Isuzu Motor Co. is committed to another full year of lying. The auto importer plans to stick with its "Liar" campaign, featuring actor David Leisure as Joe Isuzu, at least through the 1988 model year. This decision comes despite industry skepticism that the entertaining campaign may be a one-line joke wearing thin.

Winners among the sinners 82
Harper's will show, in next month's edition, that when it comes to advertising sin, the top U.S. agencies are up to the challenge. The moral morasses that Gary Hart, Ivan Boesky and the Rev. Jim Bakker have waded through recently got the *Harper's* editors to thinking: Why not ask the leading ad agencies to develop a campaign promoting the Seven Deadly Sins —avarice, envy, gluttony, lust, pride, sloth and wrath? The results will be published in *Harper's* November issue, hitting newsstands later this month.

INTERNATIONAL

Unilever cleans up in Madrid 68
Unilever is repositioning its Luminoso dishwashing liquid in Madrid after only 18 months on the market to win a bigger share of a category it dominates elsewhere on the Continent. This is Unilever's first dishwashing liquid entry in Spain.

Making up in Japan 69
Just three years after introduction, cosmetics for men have become so popular in Japan they now account for an estimated 15% of Japan's $1.4 billion cosmetics market. Some link the success of male cosmetics to the growth in unisex fashions, health and fitness.

South Africa in the sights 70
A group of 20 South African businessmen, identified only as the South African Business Community, is funding a $1 million international advertising campaign to persuade the international community not to isolate their country. Ads show different black-and-white animals through the sights of a gun and compare their struggles for survival to that of South Africa, which is under fire for apartheid, its policy of racial segregation.

OTHER NEWS

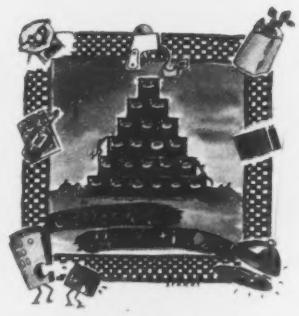
The new fall season ratings war is young, but the Big 3 networks already have midseason reinforcements. ABC and CBS probably will need to call up the most reserves for midyear, agency sources said. Page 46.

Prudential Insurance Co. of America is offering consumers four pieces of the "Rock" in a new campaign that stresses service, departing from Prudential's previous focus on products. The campaign underscores the importance of the company's 20,000 agents. Page 48.

There's a whole lotta kissing going on in General Motors Corp.'s 1988 divisional car advertising. Of course, there's always been a whole lotta kissing going on in cars, never mind car ads. And since GM divisions develop their ads independently from each other, it's partly coincidental that new TV spots for Chevrolet, Cadillac and Pontiac all feature music and visual montages, with those montages including smooching scenes. Page 84.

Cool it, California. Big-talking Texas has its own wine cooler. Hill Country Cooler is marketing Frischer, the first Texas-produced wine cooler made only with Texas wines. Page 90.

SPECIAL REPORT



***Grocery marketing**—As marketers snap up small, entrepreneurial companies to fill hot-selling niches, grocery retailers are expanding their space to accommodate a robust increase in new products, both food and non-food items. Mix in the space demands of expanded departments such as on-site bakeries, delicatessens and floral departments, and supermarkets are taking a much more critical look at what items will move or not, putting ever more pressure on grocery marketers to come up with the right selections. Starts after Page 52.*

Jitters rising over economy

An Advertising Age roundup

U.S. marketers and ad agencies appear to be shifting ad strategies and cutting costs as concerns mount about renewed inflation and an economic downturn.

Last week's huge stock-market decline and gloomy economic forecasts of a recession next year

Staff cutbacks at JWT, TLK, P. 98

are sending jitters though the industry, according to an informal ADVERTISING AGE survey of executives.

This is occurring despite the anticipated quadrennial ad-spending upturn from elections and the Olympics.

"Businesswise, confidence levels are high. But if you look deeper you sense an uneasiness in financial markets," said Joseph Wahed, senior VP-chief economist, Wells Fargo Bank, San Francisco. "It's a feeling I've never felt before. People expect inflation. They're panicking."

The degree of concern varies among product categories, with food industry observers, for example, less worried than more vulnerable service businesses.

Many agency executives are preparing for the worst.

"We have not heard voices of doom," said Joel Hochberg, president of DDB Needham Worldwide's Chicago office. "On the other hand, the reality is that major clients are vigorously scrutinizing budgets," a practice he said has intensified in recent years.

"The business is much tighter than it's ever been," he said, "and it's harder for agencies to turn a profit."

Mr. Hochberg said DDB Needham plans no staff cutbacks in Chicago, but other agencies there and elsewhere are pruning their ranks in greater numbers.

In the Southwest oil belt, agencies already have felt the ef-

(Continued on Page 98)

Politics hold up Fla. ad tax repeal

By STEVEN W. COLFORD

Advertisers awaiting the inevitable—relief from Florida's 5% tax on services—are consoling themselves with the belief that state politics is the only stumbling block remaining.

This week Florida's 40 senators and 120 representatives will return to Tallahassee for another try at hammering out a compromise.

The need for yet another legislative stab at the ill-fated tax became necessary when Gov. Bob Martinez promised to veto what the Legislature sent him last week—a bill exempting most of advertising but retaining the tax on most other services.

Gov. Martinez wants the whole tax repealed and replaced with another revenue source to make up for the estimated $750 million the services tax would have brought in.

Separately, Beatrice Cos., Johnson & Johnson, Kimberly-Clark Corp., Procter & Gamble Co. and Rust-Oleum Corp. resumed, at least in part, buying spot time in Florida, said Blair Television VP Leo McCourtney.

Oakland, Calif.-based Clorox Co., the first advertiser to drop Florida from its spot-buy list after the tax was adopted July 1, also has resumed advertising, said Jim Donnelley, general sales manager, WCPX-TV, the CBS affiliate in Orlando. Clorox VP Fred Reiker, however, insisted the company had not resumed any spot purchases in Florida for Clorox liquid bleach.

"For those who have come back, their levels are not where they were," Mr. Donnelley said. "I think it will take at least a year for them to return to where they were before. And for some, it might never; advertisers might take that money

(Continued on Page 96)

Industry plans PR effort

Airlines attack

By JENNIFER LAWRENCE and STEVEN W. COLFORD

After months of public outrage over deteriorating service, the airline industry is planning a public relations campaign to pressure the federal government to improve the air traffic control system.

The nation's top airline executives have solicited proposals from eight PR agencies to form a strategy to make this a national priority.

Budget for the long-term campaign has not been set, but it is expected to be a multimillion-dollar effort. In addition to PR and lobbying, paid advertising will be used.

The agencies are: Burson-Marsteller; Daniel J. Edelman Inc.; Doremus Porter Novelli; Hill & Knowlton; Manning Selvage & Lee; and Robinson, Lake & Lerer, all New York; Fleishman-Hillard, St. Louis; and National Strategies & Marketing Group, Washington.

While several air carriers have responded to public criticism through individual service-oriented ad campaigns (AA, June 29, *et seq.*), this is the first cooperative effort to mount an industrywide campaign.

By explaining how the air traffic

West Coast News, P. 98.

Ad-sales ratios by industry compiled

OAK BROOK, ILL.—Compiling data from more than 5,000 10-K reports filed by publicly held companies, Pansophic Systems has created its advertising-to-sales ratios report for about 250 industries.

The table on this page is part of Pansophic's "1987 Ad$ Forecasts," which includes ad-to-gross margin ratios and advertising growth rates by industry for 1986 and '87 and forecasts for 1988.

In addition, the study forecasts 1988 advertising investments for more than 4,000 individual companies, rates advertising effectiveness for the companies and their industries and measures ad spending stability.

In the advertising-to-sales ratio table shown here, the various industries are categorized by Standard Industrial Classification code numbers.

Figures show combined advertising expenditures reported for companies in the categories as a percent of total sales reported for the categories, and as a percent of gross margin (net sales minus cost of goods sold). It also shows the percent of ad expenditure growth for 1986 compared with 1985.

Pansophic notes that cautious interpretation is required because the data were compiled from financial statements rather than media auditing services.

What expenses are included under advertising expenditures filed in 10-K reports may vary from company to company. The reports typically include both media expenditures and such related expenditures as costs of collateral literature and production. And in some categories, the figures include catalog advertising, point of purchase and direct mail.

Pansophic also notes that within many industry sectors, individual companies may spend significantly more or less than the average indicated.

Many large companies are in several fields, yet are listed in only their primary industry sector.

A related distortion also may result because a large subsidiary may not be included in the industry in which it competes.

Finally, a few large companies are privately held and their figures are not included.

The forecast portion of Pansophic's report predicts food companies will lead all industries in advertising expenditures in 1988 with $8.6 billion. Retail department stores are expected to take second place with $4.7 billion, followed by motor vehicles at $4.5 billion.

Among the industries expected to show major percentage increases in advertising investments next year are ship and boat building, with a growth rate of 58.5%, and knitting mills, with a growth rate of 49.2%.

Other high advertising growth industries predicted by the study include aircraft parts, up 31.7%; gold and silver ores, up 27.6%; dental equipment supplies, up 26.7%; radio, TV and music stores, up 24.3%; and real estate agents, up 22.4%.

Among individual companies, Pansophic forecasts combined worldwide expenditures for Unilever will top the list in 1988 with an advertising total of $2.4 billion, ahead of Philip Morris Cos. at $2 billion. Procter & Gamble Co.; Sears, Roebuck & Co.; General Motors Corp.; and Ford Motor Co. all are projected to top the $1 billion mark in ad expenditures, with RJR Nabisco expected to come in just below $1 billion.

Among the top-spending Japanese companies, Honda is expected to spend $796.9 million in advertising next year, followed by Matsushita Electric at $584.4.

Pansophic, a leading packaged software company, acquired "Ad$ Forecasts" from Schoenfeld & Associates in February 1986. A copy of the 184-page study is available for $325 ($300 prepaid) from the Pansophic Systems office at 1550 Northwest Highway, Park Ridge, Ill. 60068. #

Stores juggle space, specialties

By Julie Liesse Erickson

Food marketers and retailers are juggling cost, quality and variety to satisfy today's more demanding shoppers.

On both sides, these concerns have led to a dichotomy. Despite devoting more space than ever to upscale services, non-foods and premium-price items, supermarket operators realize they also need to maintain low-price dry groceries.

Price is still the No. 2 criterion for consumers deciding where to shop, according to a 1986-1987 study by Columbus, Ohio-based Impact Resources, a market-research company specializing in retail industries.

Impact surveyed more than 105,000 consumers in 16 U.S. markets. Of those respondents, 34% said location is a concern when selecting a supermarket. Some 32.9% listed price as a factor, and 24.8% cited product selection. Quality and service were distant Nos. 4 and 5, at 21.7% and 16%, respectively.

Manufacturers, for their part, are capitalizing on the power of established brand names—through line extensions and licensing ventures. Food products and beverages accounted for 7% of the U.S. licensing industry's $54.3 billion in 1986 sales, according to the Scottsdale, Ariz.-based "Licensing Letter."

At the same time, marketers are using entrepreneurial mystique to capture the consumer's imagination.

Food giants including Kraft Inc. and Pillsbury Co. are snatching up small companies—All-American Gourmet, Tombstone Pizza, Dove Candies, Haagen-Dazs and the like—to cultivate specialty product success.

Acquisitions such as Borden Inc.'s estimated $100 million purchase of Anaheim, Calif.-based snack-food marketer Laura Scudder's (AA, Sept. 28) position companies for regional marketing. Scudder's apparently completes

Space, specialties juggled

(Continued from Page S-1)

Borden's national network of regional snack companies, which includes The Snacktime Co., Indianapolis, and Chicago-based Jay's Foods.

"There's not much room in the middle any more—the industry has witnessed real polarization," says Lex N. Gamble, managing director of New York-based Kidder, Peabody & Co.'s Consumer Products Finance Group.

"It's a game of biggies and the entrepreneurs. It's hard to find middle-size companies any more, partly because capital is available to lubricate change of ownership."

He also sees this bipolar approach in specific segment battles and product introductions. "Once a market segment develops greater concentration, moves are being made to enliven it; witness the cereal market," he says. "If a category's big and has just a few players, new product activity tends to be very high.

"On the other hand, if it's highly fragmented, there's a lot less activity."

Chicago-based *New Product News* reports there were 20% more new food and drug products introduced in the first half of 1987 than in the comparable '86 period. Among food groups, the largest increases were reported in beverages, dairy products, entrees, processed meat and poultry and side dishes. Product introductions in non-foods categories rose 24%.

According to *NPN*, particularly active food categories include fruit drinks, ice cream and frozen novelties, frozen fruit and juice bars, frozen entrees, gourmet mustards and all microwave products.

New products keep supermarket inventory growing; in 1986, the average number of items in the store increased 13.7% to 19,857, according to the Washington-based Food Marketing Institute, a trade association representing more than 10,000 grocery retailers.

To accommodate new items and expanded service departments—on-site bakeries, delicatessens, service seafood, floral departments and periodical displays—retailers are building larger stores.

The average size of a newly built supermarket was 43,800 square feet in 1986, up 9.5% from 1985, according to FMI. Last year, store closings in the U.S. exceeded openings, continuing a trend to reduce what FMI calls "overstoring."

With average after-tax store profit, however, falling to 1.12% in 1986, from 1.19% in 1985, supermarket operators are more cautious than ever about stocking their shelves.

"Manufacturers are rushing in—not testing as they once did. There's virtually no time at all before the product is off to the retailer," says Steve Weinstein, editor of Stamford, Conn.-based *Progressive Grocer*, a supermarket trade publication.

"That leaves the retailer continually in a quandary. Will the new product succeed? Is it backed by all the things it's supposed to have? Does it have a slotting allowance? Does the product's potential justify reslotting shelves?"

As supermarket operators have come out of the closet in demanding slotting allowances and promotional dollars in return for stocking new items, they've created the opportunity for what Mr. Gamble calls "power marketing at the retail level.

"The big trend is the emergence of the retailer as a controlling factor in the success or failure of new products.

"This involves three things: First, the retailer's become more sophisticated in reading product movement and thus has more control over the situation. Second, he's become more demanding in requirements for getting a product on the shelf."

Finally, Mr. Gamble says, "The supermarket operator has become a lot more critical to the success of a new product because the manufacturer doesn't have the same knowledge base and market force he had become used to."

In addition to widespread dependence on scanner-delivered data, large retailers also are using market research to better know their customer base in each region and tailor services and promotions, such as frequent-shopper programs.

A 1987 FMI study shows that one-third of supermarkets have created departments for specific groups of customers; 32.1% of respondents said they were designing ads for specific groups of customers.

That interest in meeting customer needs translates into a different ad emphasis for many retailers. Allen Bildner, chairman-ceo of Kings Super Markets, West Caldwell, N.J., and new chairman of FMI, says, "We are moving from purely price [advertising] to demographics and psychographics."

Supermarket operators' limited shelf space, their growing demands on manufacturers and their improved access to sales information "have combined to make the trade a much more potent factor in the life of a new product," Mr. Gamble says. AA

PRESSURE YOUR COMPETITION
LIKE THEY'VE
NEVER BEEN PRESSURED BEFORE!

INTRODUCING PRESSURE MARKETING FOR 1988

Welcome a fresh new strategy that puts pressure squarely on the competition in a way that they will find hard to monitor and even more difficult to neutralize.

It's called **Direct Pressure Marketing**™, and its roots come from **JFY Audit America**®, the nation's largest builder of customized brand user audiences.

For the past six years, we have been working quietly with some of the country's largest packaged goods companies under confidential arrangements that have dramatically changed the way they confront competition today.

In one case, **Direct Pressure Marketing**™ began in 1980 and has expanded each year without interruption. In fact, it now represents an important share of this advertiser's annual corporate marketing budget of several hundred million dollars.

And, they have been our oldest and largest customer.

To arrange a private, confidential and quietly informal disclosure meeting with our top management, call or write today. We'll show you just how vulnerable your competition can be, and how you might best apply **Direct Pressure Marketing**™ to your benefit.

Call or write today:

Promo links TV show, advertisers

Effort battles toy-backed shows

By JAMES P. FORKAN

World Events Productions has devised an instant-winner game-card promotion to give TV stations airing "Saber Rider & the Star Sheriffs." The promotion represents an attempt by World Events to compete with syndicators of toy-supported cartoon series.

Many toy-inspired animated series in barter syndication can leverage station clearances with the attractive promise of tie-in promotions from toy giants such as Hasbro Inc. and Mattel Inc., said Brian Lacey, VP-general manager at St. Louis-based World Events.

Lacking such clout for its new space western series, World Events developed the game card and gave it and supporting materials to its carrier stations without charge.

"The stations are partners with us and can make money" by selling the sweepstakes package to local advertisers, he said.

Among the accounts committed to this local marketing effort are Wendy's in Sacramento, Calif.; Rax in Gainesville, Fla.; Show Biz in Dallas; Arby's in Minneapolis; and Pancho's in Memphis, Tenn. Toy retailers, including Toys "R" Us in Atlanta, are participating in some markets.

The broadcasters have been selling the card package to local advertisers for between $5,000 and $40,000, Mr. Lacey said. Forty-five of the 65 "Saber Rider" stations are participating in the promotion, which in most cases began Oct. 1 and in some cases will start between Oct. 15 and 21.

The card tie-in, generally running from four to six weeks, will benefit all parties, Mr. Lacey said. World Events and stations anticipate higher tune-in ratings. Local advertisers (chiefly fast-food outlets) will offer the game cards at their counters to build traffic.

To win, youngsters must scratch off three boxes decorated with sheriff stars and find three identical cartoon characters underneath; the prize is determined by scratching the fourth box.

To keep youngsters tuned in, there is a "forced viewership mechanism" on the card—a "special deputy" number that must be matched against numbers shown by the station later in the series' run, Mr. Lacey said.

Another promotion-minded syndicator, Lorimar Telepictures Corp., Culver City, Calif., has conducted local-station promotions to get its series "Thundercats" and "Silver-Hawks" off to strong starts, with prizes gleaned from tie-in toy licensees.

However, World Events' prizes include children's watches, Texas Instruments calculators, Tiger Electronics games and Wilson Sporting Goods' Michael Jordan basketballs.

World Events' major toy licensee for "Saber Rider" is Impulse Ltd., St. Louis, which plans a line of interactive toys.

Also, World Events is opting for "four-wall" theatrical distribution of the final "Voltron" series episode in about a dozen markets (where carrier stations rented a movie theater to offer free preview screenings and gifts).

It also is planning different promotions for "Vytor, the Starfire Champion" (a stripped cartoon series due in fall 1988) and for "Denver, the Last Dinosaur" (a special due in spring '88 as the first of several periodic one-hour animated specials).

World Events hopes the "Denver" special, already cleared in 50 markets, will draw "one or two national advertisers" for a promotion similar to the "Saber Rider" card idea, Mr. Lacey said. #

THE ADVERTISING MARKETPLACE

An aggressive, respected Christian publisher has opening for experienced Copywriter. Responsibilities will include: Direct marketing, trade and retail catalog copy, promotional pieces, back cover copy and print advertising. Should be a strategic thinker, market sensitive, able to plan, and a self starter.

Winners Sponsors score without 'real' NFL

By VERNE GAY

NEW YORK—As the 1987 National Football League strike fades into a bad memory, the long-term impact on media and advertisers is just emerging.

Major advertisers who pulled out of the games—including Chrysler Corp., Ford Motor Co., General Motors Corp. and Miller Brewing Co.—seem to be questioning whether NFL buys are critical to their marketing strategies, though no one disputes the value of those buys.

These advertisers claim they were able to meet their weekly rating goals via replacement programming and noticed little or no negative impact on sales.

The injury list is still being compiled, but the Big 3 TV networks combined to lose an estimated $16.5 million in NFL advertising revenue during the three-week strike because of defecting advertisers and dramatically lower unit costs for commercial time during the replacement-game telecasts.

During the strike, major sponsors partially refilled the networks' coffers by placing commercials in other network programming.

The networks did suffer a revenue drain, however. ABC, which would have pulled in $9.8 million per Monday night game under normal circumstances, lost an estimated 24% of that revenue on average each week; CBS, which would have pulled in $5.8 million in its higher-rated Sunday game, fell 31%; and NBC, which would have drawn $4.8 million per game, fell 30%.

The networks, in turn, paid the NFL proportionately lower rights fees each week of the players' strike.

Ironically, some advertisers had a windfall from the strike. Procter & Gamble Co., which has a broad audience for many brands, heavied up buys in some of the so-called "scab" games—or those involving substitute players. P&G typically seeks a low cost per thousand; when the networks dropped their prices on the games, P&G instantly climbed aboard.

NFL football, which was not profitable for the Big 3 networks in the last year of

Saatchi tells Thatcher: We want out

By KEVIN COTE

LONDON—Saatchi & Saatchi Co. has sent a letter to British Prime Minister Margaret Thatcher expressing the agency's desire to resign the ruling Conservative Party's advertising account.

Saatchi would not confirm the report, but there has been talk of a parting ever since a Conservative Party victory four months ago.

The relationship, begun in 1977, brought widespread attention to the little-known agency when the then-pioneering campaign put the Tories in power in 1979. It also won the Saatchi brothers important friends in the financial community and provided a basis for the ad agency's speedy growth.

The letter reportedly cites the agency's concern that future affiliation may pose conflict-of-interest problems to the government as Saatchi & Saatchi seeks to diversify into broadcasting and financial services, which are government-regulated.

The Saatchis have gone after two U.K. banks—unsuccessfully—within the past month. And any such acquisition must be approved by the government.

The parting would highlight an important turning point in the de-

Times Mirror pays top dollar for magazines

Diamandis hits goal

By PATRICK REILLY

NEW YORK—Times Mirror Magazines' purchase of four publications from Diamandis Communications Inc. has effectively closed down what might have become the greatest garage sale in the magazine industry's history.

The New York Times Magazine Group and Hearst Corp. still are bidding actively for some of DCI's remaining special-interest consumer magazines, sources said. But Times Mirror's decision to pay top dollar for *Field & Stream*, *Home Mechanix*, *Skiing* and *Yachting* may have spoiled it for others. The magazines sold for $167.5 million.

"Essentially we have met our goals," said DCI Exec VP Robert Spillane. "We may not sell any more magazines." DCI acquired the 21 titles in a $650 million, management-led buyout of CBS Magazines (AA, Oct. 5).

DCI's goal was to sell a handful of magazines to reduce its debt from the buyout, and President-CEO Peter Diamandis said he did not want to sell off more than $80 million in annual ad revenue from his magazines. The total 1986 ad revenue from the four titles sold

Highlights

Shine on, Chiat/Day 4
Success won't spoil Chiat/Day—yet. The agency's work for Nissan Motor Corp. USA breaks this week, just 10 weeks after it won the $150 million account, and Jay Chiat seems to be the only one not worried about what this humongous billings injection will do to the shop. In fact, his only concern is whether to run a daring house ad, timed for the Nissan TV commercials' debut.

Shooting for the whites of their eyes 12
The $500 million contact-lens care market is about to become an advertising and research battleground as companies introduce new campaigns and products. Ross Laboratories and Alcon Laboratories are challenging established category leaders Bausch & Lomb and Allergan Optical.

Becoming emotional over babies 24
Warner-Lambert Co., facing growing competition in the home-pregnancy-test market, is shifting its ad strategy from comparative claims to an emotional pitch as it introduces its latest line extension. The switch comes after the company was ordered in July to discontinue its ad claims after Tambrands filed suit.

U.S. getting hyper 118
Hypermarkets—sprawling stores designed for one-stop shopping—are getting the endorsement of U.S. retail giants, now gearing up to sell consumers on the concept. The stores are designed to appeal to busy customers who value the convenience of finding everything from broccoli to bicycles in one place. Retail analysts agree the giant stores should become an important force, but caution it still is unclear how consumers will respond.

P&G exec rails against takeovers 122
Procter & Gamble Co., a leading opponent of ad agency megamergers, is taking a position against hostile takeovers, corporate raiders and Wall Street's passion for short-term results. Speaking at the company's annual meeting, Chairman-CEO John Smale said hostile takeovers too often burden companies with unmanageable debt and substantially reduced research and development budgets.

Ford shifts gears 123
The growing importance of financial and international operations has spurred Ford Motor Co. to reorganize operations and shift some key senior executives.

INTERNATIONAL

Ad tax disappearing overseas 96
As Florida's ad tax faces the axe, similar proposals have met the same fate in Thailand and Italy, and South Africa is considering scrapping its 3-year-old tax.

Tofutti aims for world consumption 96
It's tofu time up north and Down Under as Tofutti Brands enters into distribution agreements in Canada and Australia, and is targeting Finland as the next market.

Color Puma shoes with red ink 98
German sports shoe and clothing manufacturer Puma AG is heading for its second straight year of red ink, raising doubts about its existence as an independent company. The company's bottom line has been hurt by heavy U.S. losses, resulting from marketing errors and bad luck.

OTHER NEWS

Neutrogena Corp. is testing its first TV advertising in six years, hoping increased awareness of its key soap and shampoo businesses will ease its expansion into skincare. Page 28.

Ogilvy & Mather is looking forward to building its business with Ford Motor Co. instead of lamenting its decision to pass up a shot at the $150 million Nissan Motor Corp. USA account. O&M officials plan to use its new 10-person Dearborn, Mich., office as its base of operation on the Ford account. Page 45.

E&J Gallo Winery intends to bolster its presence in the lucrative varietal wine segment with a new coastal varietal line. Company officials would not disclose details on the expansion, but a Gallo spokesman confirmed industry rumors that such a plan was in the offing. Page 118.

Sex sells. If it didn't, TV commercials would feature more Ernest Borgnines and fewer Christie Brinkleys and there would be no reason to choose James Garner and Cybill Shepherd as spokesmen for the Beef Council. But can sex sell computer software? Barry KuKes gets to be the one who finds out. Page 124.

SPECIAL REPORT

***Marketing to Affluents**—The media is constantly searching for new paths to reach the trend-setting group labeled "Influentials" by Doyle Graf/Roper or "Ultra-Consumers" by Grey Advertising; the age, income and spending habits of those that make up this market for pricey products is going to change the balance of buying power as well as the face and sound of print and broadcast in the near future. Starts after Page 80.*

Agency nets merge, trim, consolidate

By JON LAFAYETTE and JENNIFER LAWRENCE

The strong got stronger and the weaker disappeared last week, as two of the nation's largest agency groups, Interpublic Group of Cos. and Omnicom Group, consolidated resources by merging or trimming operations.

William Weithas becomes chairman-ceo, Lintas:Worldwide.

Interpublic merged SSC&B:Lintas Worldwide and Campbell-Ewald Co. to form a $2.8 billion agency giant christened Lintas:Worldwide (AA, Oct. 12).

The action was bloodless; no clients pulled out and few employees are expected to leave.

The SSC&B name, however, no longer will be used.

At the same time, Interpublic-controlled Lowe Marschalk scaled down its 35-person Houston agency to a service office, and the group's flagship operation, McCann-Erickson, said it will close small offices in Boston and Dallas because of a lack of business.

Omnicom, meanwhile, merged one of its smaller agencies into a larger one. Cargill, Wilson & Acree, Atlanta, which had been a subsidiary of Doyle Dane Bernbach before the three-way deal that created Omnicom, became a unit of Dallas-based Tracy-Locke.

Both agencies were units of Omnicom's Diversified Agency Services arm. Tracy-Locke had been a subsidiary of BBDO before Omnicom was formed in 1986. The Atlanta operation will be called Cargill, Wilson & Acree/Tracy-Locke.

These moves are consistent with those of other leading agencies. D'Arcy Masius Benton & Bowles, J. Walter Thompson Co. and Young & Rubicam either have sold or closed some operations in midsize markets in the past few years.

In explaining the Lintas move, Interpublic Chief Financial Officer Gene Beard said that of the 250 offices the company's agencies maintain, all but a dozen are profitable. "We constantly study them, looking for better economies of scale," he said.

Interpublic Chairman Philip Geier Jr. said "each agency has its own plans" to increase the effi-

(Continued on Page 135)

Networks want answers

Rivals challenge Continental spot

By JENNIFER LAWRENCE

The battle between the airlines will intensify this week as Continental Airlines counters charges from two competitors that its comparative TV spot is deceptive.

Late last week, the Big 3 networks requested that the Texas Air subsidiary's ad agency, N W Ayer, Houston and New York, respond to requests from American Airlines and United Airlines representatives that Continental's new 30-second spot be pulled.

Houston-based Continental, which began airing the spot Oct. 1 as part of a major fourth-quarter, $25 million quality service ad campaign (AA, Sept. 28), contends the commercial is accurate, said James O'Donnell, Continental VP-marketing services.

The airline and its agency are expected to make these points when they respond in writing to the networks' request this week.

The commercial makes the point that Continental handles some aircraft maintenance for 24 carriers including "United, Delta, Federal Express, even American," according to the script.

The visual shows a Continental maintenance crew working on an American Airlines plane.

The commercial is airing in about 20 major spot markets. It will air until each network decides whether to pull the spot from its owned and operated stations. That decision is expected by the end of October.

Additionally, Chicago-based Leo Burnett USA, United's agency, sent a letter on Oct. 9 to the National Advertising Division of the Council of Better Business Bureaus requesting it to check into the matter.

The letter sent to ABC, CBS and NBC came from Loeb & Loeb & Hess, the New York law firm that represents American's ad agency, Bozell, Jacobs, Kenyon & Eckhardt, Dallas.

In the letter, Continental is accused of boosting its image through affiliation with American.

The letter claims the spot "grossly distorts and exaggerates the degree to which American relies on Continental for on-call maintenance."

The challenge request also objected to use of an American plane and logo on camera for longer than the Continental logo. The letter asserts that Continental wishes to "acquire some of American's excellent reputation in place of theirs."

A shorter letter to the networks from Burnett contends that the commercial "grossly misrepresents the airplane maintenance that Continental renders to United and other airlines."

Matthew Margo, CBS VP-program practices, said the challenge comes from American and United and not the network. #

NAD slams spot from Mattel

'Captain Power' gets more flak

NEW YORK—The Children's Advertising Review Unit of advertising's self-regulatory system believes Mattel Inc.'s TV commercial and associated program for "Captain Power" and his Power Jet XT-7 may have confused children by blending fantasy and programming with commercialism.

The challenge to Mattel's children's cartoon TV program and commercial was one of seven cases disposed of in September by the National Advertising Division of the Council of Better Business Bureaus.

Under the NAD's "modified or discontinued" heading, only the Mattel case and a TV spot for a Cadillac rental campaign by Avis Inc. were cited.

The other five cases were closed when advertisers substantiated their claims.

Mattel's commercial, by Ogilvy & Mather, Los Angeles, opened with what seemed to be a cake mix commercial being interrupted by static and voices. Viewers then heard: "I think we're getting through, Captain." "What year?" "19, uh—87—I think. Try it."

The spot turns into a 60-second introduction for a toy line, Captain Power and the Power Jet XT-7, which figures in Mattel's "Captain Power & the Soldiers of Fortune" TV cartoon series.

In the commercial, Captain Power appeals to viewers to fire their Power Jet XT-7 "invisible beams" at "enemy targets" that threaten "human life." He adds, "The power of the future is in your hands."

CARU questioned whether the fantasy enabled children to distinguish between "real and make believe," whether the featured toy was misleading to children, whether Captain Power's appeal could "hamper a young child's ability to distinguish between program/editorial content and advertising," and whether the "urgency of the message" put "extreme sales pressure" on children who are "not as prepared as adults to make judicious, independent purchase decisions."

The case embodies problems cited by parent groups in calling upon the Federal Communications Commission to reopen the issue of regulating TV commercials during children's programming.

Hawthorne, Calif.-based Mattel, in reply, held that the toy was shown clearly in a realistic setting, that children could see that light beams were not being fired by the Power Jet and that it was following CARU guidelines throughout.

CARU reaffirmed that it wants children to be able to distinguish between commercials and programs. Mattel said future Captain Power advertising would "give consideration" to CARU's concerns.

NAD cited Avis for a TV commercial by Backer Spielvogel Bates, New York, in 14 major cities that offered a Cadillac at $45 a day.

The offer was not available in the New York area and TV supers so stated, but a New Yorker who missed the qualifier complained to the NAD.

Avis held that its qualifier was clearly shown. NAD said that it is not proper to substantially change the meaning—"Rent a Cadillac for $45 a day"—with contradictory footnotes or supers.

Garden City, N.Y.-based Avis disagreed but said it would clarify the modifying statement in future advertising of this sort.

Advertising substantiated:

Bristol-Myers Co.'s Drackett Co. subsidiary, Cincinnati (Laurence, Charles, Free & Lawson, New York), substantiated a TV spot claim for new Liquid Vanish toilet bowl cleaner that said it "really does clean tough rust stains below the water line better than Lysol."

Chrysler Corp., Highland Park, Mich. (BBDO Worldwide, Southfield, and Bozell, Jacobs, Kenyon & Eckhardt, Birmingham), was challenged for advertising a price of "$183 per month base model" for its Dodge Caravan. Chrysler was able to substantiate that orders were being accepted for the base vehicle where it was available.

Gillette Co., Boston (Bunker & Bunker Corp.), substantiated a newspaper ad for a Good News! razor promotion with Continental Airlines, Sheraton Hotels and National Car Rental System.

Johnson & Johnson Products, New Brunswick, N.J. (Cadwell Davis Partners, New York), substantiated the claim that Reach toothbrushes "can get your teeth 51% cleaner than the other leading toothbrush" because of its "dental angle."

U.S. Department of the Navy/Navy Recruiting Command, Arlington, Va. (in-house), was challenged on a newspaper classified ad in the *Milwaukee Journal* for an aviation maintenance position. The ad did not state the job required a four-year enlistment in the U.S. Navy.

The Navy said blind ads of this sort are effective in reaching prospects and have been used for years by business and industry. The Navy noted—and NAD agreed—that callers quickly learn when phoning that the Navy had run the ad. #

Mature Outlook readers are different. They like to get up, up and away, and spend a sizable portion of their income doing it. Some examples:
91% of our subscribers traveled purely for pleasure in the U.S. this past year.
They spent an average of 30 days away from home.
65% plan to travel abroad in the next two years.
So, whatever you think about the mature market, it's not the same old story with the *Mature Outlook* reader. And with a rate base of 825,000, readership more than 5,000,000 and our CPM at $20, *Mature Outlook* is the brand new story you should definitely know more about.
For additional information, call us at (312) 291-7625.

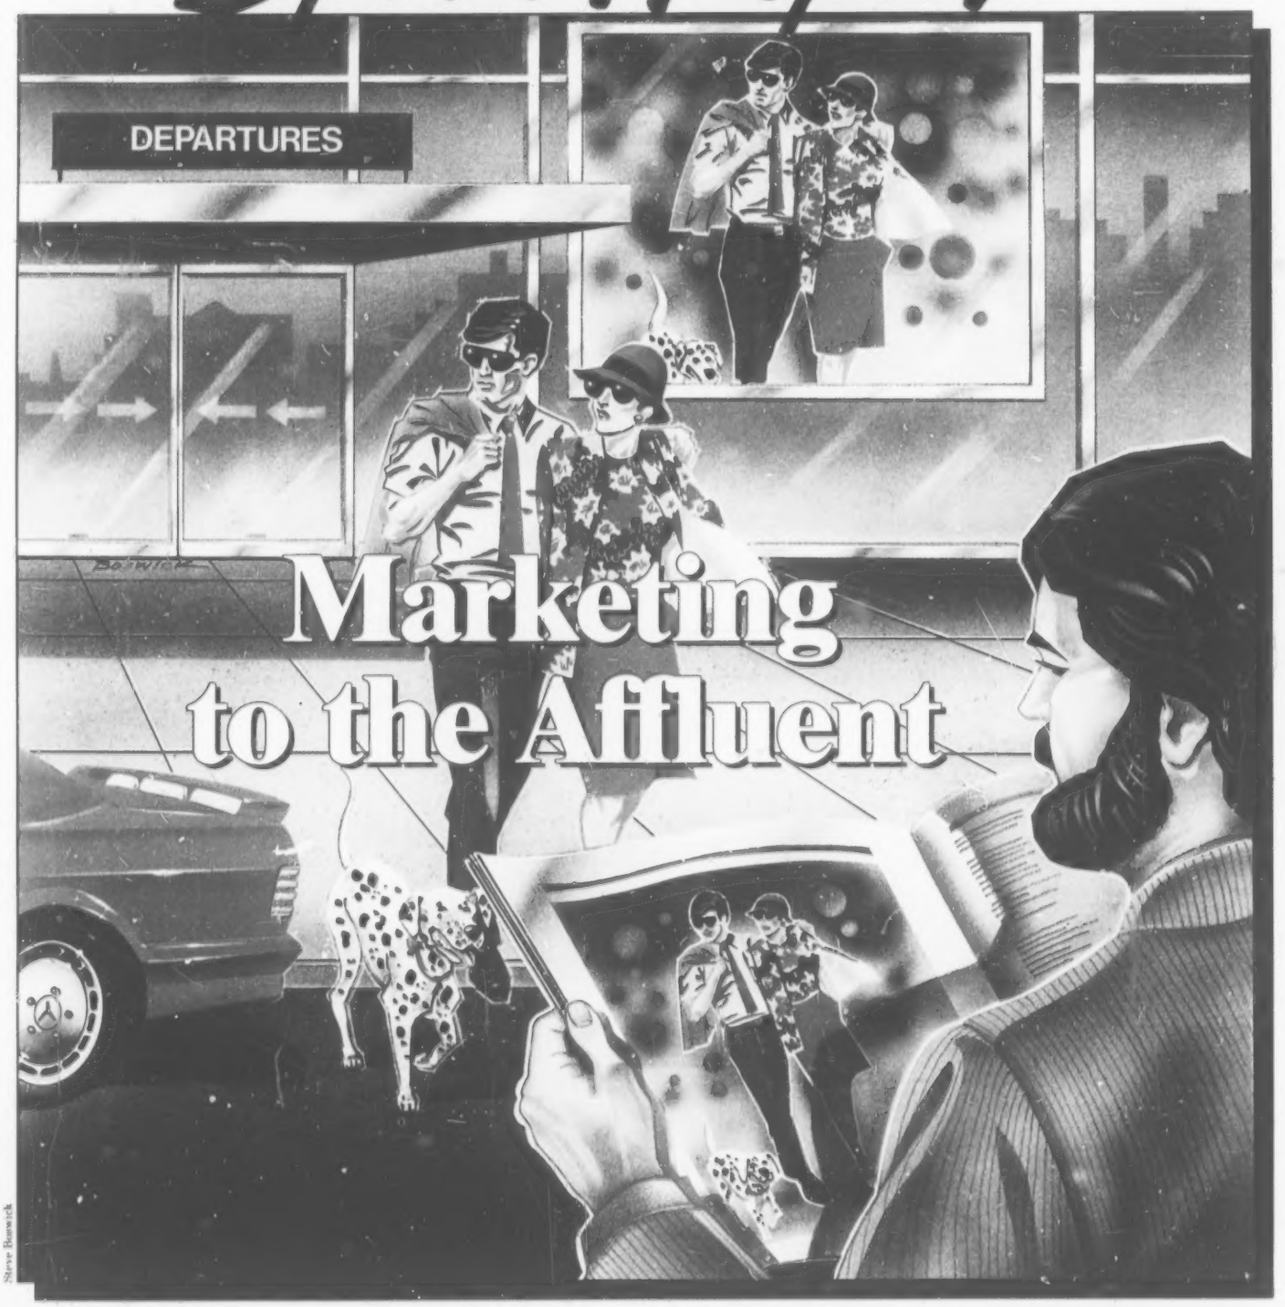
CORRECTIONS & CLARIFICATIONS

The following corrections pertain to ADVERTISING AGE's 1987 "100 Leading National Advertisers" special issue, Sept. 24.

- Unilever PLC/NV had 1986 worldwide sales of $25.37 billion (P. 159). Its sales grew 4.8% during the year. Also, Morris Tabaksblat is chairman, Chesebrough-Pond's; Gordon Stevens is chairman of both Lever Bros. and Unilever U.S.
- John A. Powers of Heublein Inc., a division of GrandMet, should have been listed as chairman of the board (P. 112).
- H.J. Delaney Co., an agency listed for CPL Industries, a division of Colgate-Palmolive Co., is located in New York (P. 82).
- The personnel for NutraSweet Co., a division of Monsanto Inc., were listed incorrectly (P. 131). The corrected listing includes Lauren S. Williams as president-chief operating officer and William Wohlfeil as VP-marketing.
- In the profile on RJR Nabisco (P. 147), Gerald H. Long should have been listed as chairman and president-ceo of R.J. Reynolds Tobacco USA.
- Matthew C. Blank, senior VP-consumer marketing, should have been listed among Home Box Office marketing personnel in the Time Inc. profile (P. 158). #

Special Report



Marketing to the Affluent

Steve Renwick

Touching the top worth the premium

What determines the state of, the who and the why of affluence? Is it household income? Is it attitude? A recently released study of the "Premium Class" by Doyle Graf/Roper, New York, considers 1.8% of the population, with annual household income of $100,000, as affluent. The study, directed by Adam Stagliano, senior VP-director of planning at Doyle Graf Mabley, calls them "Influentials," and suggests that they are not just a market unto themselves, but also perhaps trend setters for premium goods in all product categories.

However, according to *Fortune* it takes a minimum annual income of $75,000—less than 5% of the population is in this group—to live the affluent life.

Donnelly Marketing in Stamford, Conn., studies those "Living Well," with a $50,000 annual household income.

And Grey Advertising, New York, looks to the "UltraConsumer," 26% of the population making $25,000 or more—only 5% of this group is making $75,000. These are the consumers that account for the massive purchases of pricey products—the ones who reach to buy the best whenever possible.

Although, the affluent annual household income may vary, the media search for new avenues to reach the "Influentials" or the "UltraConsumers" is constant.

Cable TV *(see cable story on Page S-18)* has an extensive lineup of financial news programs that sport impressive viewer statistics.

Radio is listening to a presentation on the "Amazing Invisible Market," *(see radio story on Page S-2)* an information campaign that attempts to erase reluctance of advertisers and agencies to target the 35-plus age group—the segment expected to change the balance of buying power in the not too distant future.

'If you can't afford the cover price. . .'

By Hortense Leon

When *Fortune* was launched in 1929, the cover price was $1. In the same year *Life* sold for a modest 10¢.

It is in the *Fortune* mold that today's super-slick magazines, catering to households with an annual income of at least $50,000, are being cast.

"Since 1980," says Samir Husni, professor of service journalism at the University of Mississippi at Oxford, "the revenue supporting magazines has divided into a 50/50 split between advertising and cover price. In the past, it was more like 70/30, with the majority coming from ads.

"The high cover price is a kind of ticket in. In many cases, if a customer can't afford the magazine itself, she or he won't be able to buy what's advertised inside," he says.

Magazines targeted to the affluent, about 5% of the total, have a better chance of making it than middle-of-the road entries. So far in 1987, 370 new magazines have been launched, about 18 target the affluent, but two out of 10 in the total will die before a third anniversary, Mr. Husni says.

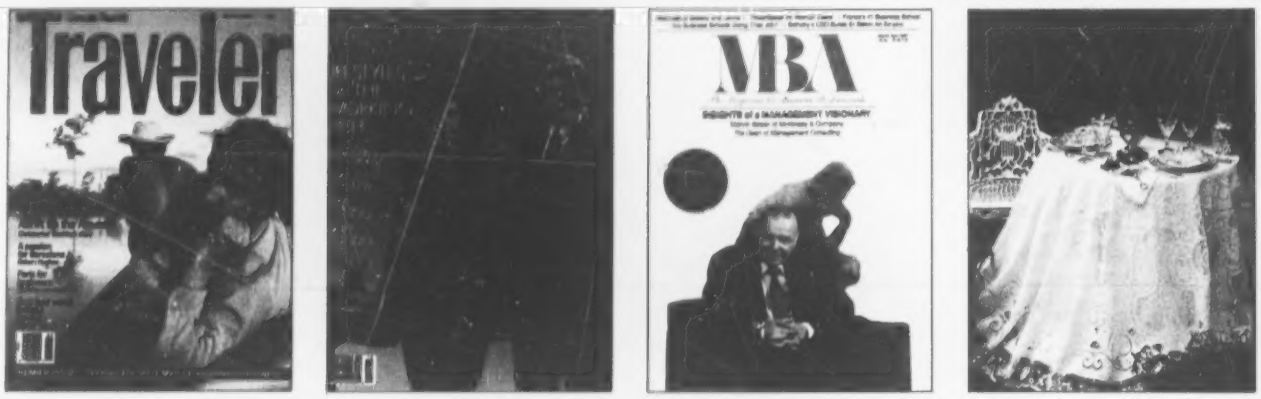
Independent ventures are very hard to fund. "The last thing on Earth I'd want to start is a magazine today. It's suicide," says Stephen Burzon, publisher of New York-based *Metropolitan Home*, backed by the powerful Des Moines, Ia.-based Meredith Corp. "The people on Madison Avenue have so many places to put their dollars. They're not waiting for more titles to put their ads in."

Although difficult to fund, new magazines continue to arrive, and the targeting continues to tighten.

Cleveland-based *MBA*, launched in January is considered by its publisher, Paul Oppmann Jr.—M.B.A., Harvard Business School, 1969—as the *People* of the business world—with more depth. As a business magazine, with a cover price of $5, it appeals not only to a desire for financial success, but to the audience's desire for information, romance and even humor. In fact, it is probably more like *Esquire*, he says.

Start-up costs, Mr. Oppmann says, were more than $1 million, which included research on demographics by National Market Measures, Cleveland,

(Continued on Page S-28)



Magazines recently making their debuts for consumers in the upper income tier and willing to spend accordingly include, from left, Traveler, Millionaire, MBA and Veranda.

'Chi. Times' takes its city seriously

Chicago Times, which hit the newsstands the first week of September, is facing off against 35-year-old *Chicago* magazine, owned by Detroit-based Metropolitan Communications, which last year bought the magazine from WTTW Inc., a public broadcasting company.

But Todd Fandell, president of Chicago Times Co. and former editor of Advertising Age, says his bi-monthly is aiming at a different niche. It is a thinking man's magazine, devoid of "stories on where to find the best artichoke pizza." On the contrary, "*Chicago* Times is a magazine for people who enjoy in-depth articles about the political structure . . . It celebrates Chicago and the region, which should be taken seriously," he says.

"While the magazine appeals to the top few [affluent] percentiles demographically, we were not looking for affluent readers, per se. It just happens that the people who like to read are often those who also have money," he says.

Mr. Fandell says 48% of his readers are found in the city and 49% can be found in the suburbs. Only 3% come from outside metropolitan Chicago. Of the 48% in the city, the biggest concentration of readers comes from the downtown area—people with residential and business addresses there. The second biggest chunk of readers comes from the Gold Coast, the most affluent residential area in the city.

Although editorial is not necessarily targeted to the affluent, the advertising, skewed to an upscale market, includes Marshall Field & Co., Chicago's leading department store, financial institutions such as Northern Trust Bank and Harris Bank, and N.H. Rosenthal Furs.

The magazine was launched for $2 million and is expected to turn a profit by the end of 1989, Mr. Fandell says.

In contrast to the mass-market appeal of 200,000-circulation *Chicago* and other publications of interest to affluents, *CT*'s goal of at least 50,000 circulation and up to 75,000 three or four years from now, is modest.

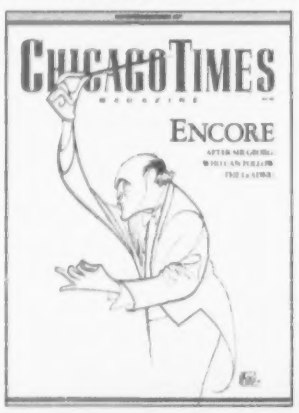
But if the initial goals are modest, the magazine seems to have begun with a bang. The 11,000 newsstand copies of the first issue sold out almost immediately.

The supply given to a downtown bookstore, Kroch & Brentano's, sold out in four hours; the store then received another shipment that it sold in a week. This was supply which was supposed to last two months, until the next issue. Altogether, 63,000 copies already have been sold.

The initial ad budget for the publication was between $450,000 and $500,000, most of which was spent on direct mail that was created in-house with a number of consultants.

Radio spots by Smith, Badofsky & Raffel, Chicago, ran on six stations—including WFMT, a fine-arts station with which the magazine has a trade-out arrangement—the first three weeks the magazine was on the stands, and will run again with the second issue.

—*Hortense Leon*



Chicago Times' second issue (top) plays the Chicago Symphony Orchestra, while the first included a review of the city's architecture boom.

A LOT OF NEW YORK TRAVEL MONEY LIVES IN FAIRFIELD COUNTY.

Any Airline Advertiser wanting to hit home with the high end income core of the N.Y. ADI had better zero in on Fairfield County: home of the 2nd highest household ticket sales in the ADI.

And the FCD Newspaper Network, now with full 3% ADI coverage, is by far the most effective and cost-efficient way to reach it!

If your advertising target is irresistible wealth, call Greg McNally at Landon Associates: (212) 867-1112.

Magazine cover price

(Continued from Page S-26)

and $350,000 to develop a list of 500,000 names—a cost several times more than most lists this size, says David Lee, senior VP, Magazine Publishers Association, New York.

The second issue is ready, says Mr. Oppmann; if $2 million in additional funding can be arranged, it will be out by Thanksgiving.

MBA's problems developed in spite of an almost textbook approach: Readers were culled from the top business schools and Dun & Bradstreet Corp. lists. The early research shows the targeted reader is 36 years old and has an average individual income of $147,000.

The reason for choosing this age group, Mr. Oppmann says, is that U.S. Department of Education figures show that two-thirds of M.B.A.s are under 40; business people relatively fresh out of school identify strongly with their M.B.A.; and the younger reader represents a hole in the marketplace.

The median age is moving up for readers of *Forbes* magazine —51.9 in 1987 up from 51.2 in 1985—and *Business Week* —43.1 in 1985, which is bad for business because people in their 30s tend to make more purchases and more choices about what they will buy for the rest of their lives.

Mr. Oppmann gave away 93,000 out of 100,000 copies of his first issue. He hopes to increase the current 7,500 paid subscribers to 500,000.

MBA's advertisers included Martell and Hennessy Cognac, Cartier watches and Shearson American Express. But only half of the 40 pages of advertising were paid.

Millionaire, West Palm Beach, Fla., has only 24 pages of advertising, out of 104, but most are paid. A round of press parties started in New York on Sept. 21, and Beverly Hills, Calif., Sept.23. With more of the same to come in Dallas, Chicago and Palm Beach, *Millionaire* magazine hit the newsstands Sept. 29.

The price of the launch, says Publisher Doug Lambert, was $3 million, which includes a 1-million-piece direct-mail campaign in October.

The magazine is destined to become synonymous with success and luxury, Mr. Lambert says, just as an earlier brainchild of his, *Playgirl*—sold in 1977 to Stephen Geller, a New York entrepreneur—became synonymous with nudity.

Targeting the 5 million-to-8 million "working rich," Mr. Lambert expects to win 1 million readers. Published 10 times a year with a $4 cover price, *Millionaire* should be in the black after the first six issues, he says.

The first printing is 110,000, and the subscription vs. newsstand split has yet to be determined.

As befits a fashionable magazine, 25 of 80 editorial pages in the first issue feature fashion-oriented editorial; the remainder includes features on travel, lifestyle and money.

While *Millionaire* courts new money, another magazine south of the Mason-Dixon line is courting old affluence. *Veranda*, almost a clone of Birmingham, Ala.-based *Southern Accents*, premiered in March. The similarity comes from Lisa Newsom, editor and publisher of *Veranda*, who had been editor and co-founder of *Southern Accents*.

The magazine also resembles *Architectural Digest* and *House Beautiful*, with features on homes, gardens, food and a social calendar for sports events, fashion shows, historical tours and benefits, as well as selections from southern novelists including Pat Conroy, author of "The Great Santini," and Ann River Siddons.

Ms. Newsom developed the

'Auto Gallery's' interior design plush

As Al Esguerra describes it, *Auto Gallery* is as comparable to other car-enthusiast magazines as an economy hatchback is to a luxury sedan.

Mr. Esguerra is president of Auto Gallery Publishing Co., the Beverly Hills, Calif.-based company that launched the monthly in January.

He says his goal was a publication combining the feel of *Connoisseur*, *Town & Country* and *Vogue*: a slickly designed magazine targeted toward affluent consumers and focused primarily on European automobiles.

A former importer of European autos with a brief background in publishing, Mr. Esguerra sensed a need for a non-vertical auto magazine for consumers "not really concerned with high performance, but comfort and luxury."

He says while *Car & Driver*, *Motor Trend* and *Road & Track* specialize in testing high-performance, mostly American and Japanese cars, *Auto Gallery* instead plans to test cars using indicators like leather quality and "how a car bounces when going over a railroad crossing."

Auto Gallery also does not compete with Murdoch Magazines' *Automobile*, Mr. Esguerra says. "[*Automobile*] is too similar to the other car books. Even though it's classier and more sophisticated, it's not a threat to us."

Originally positioned to advertisers as a regional magazine, *Auto Gallery* is "slowly phasing into national advertising," Mr. Esguerra says. Several auto manufacturers, including Aston Martin Lagonda of North America and Lotus Cars USA, have signed up for 1987 or 1988 schedules.

The magazine depends heavily on Southern California dealerships and dealer associations but also attracts a few non-auto marketers such as American Rarities Investment Corp. and Donzi Marine Corp.

Oversize pages and use of lavish color are designed to set Auto Gallery apart from typical auto buff books.

A four-color page national ad sells for $6,500; as of Jan. 1, the magazine will increase its regional ad rate to $4,200.

Mr. Esguerra says the magazine's current paid circulation is 78,000, with more than half sold on newsstands in 50 affluent U.S. markets. He foresees circulation growing to 350,000.

To build subscribership, the company hired Ogilvy & Mather Direct, Los Angeles, to define the magazine's market and produce a direct-mail solicitation. Some 100,000 packages will be mailed out this month; the target audience is 35-to-50-year-old consumers with yearly household incomes between $75,000 and $110,000.

About 70% of *Auto Gallery* editorial is devoted to reviews and commentary on cars and racing. The rest is set aside for stories on celebrities—ranging from Domino's Pizza founder Tom Monaghan to singer Lou Rawls—travel and other topics peripherally related to cars, such as luggage designed to fit into European autos' smaller-size trunks.

To illustrate these stories, design director Michael Brock relies heavily on close-up photography and a sophisticated layout. *Auto Gallery* is luxuriously oversized at 11 inches by 15 inches, and printed on glossy paper stock.

"Autos represent one of the finest forms of design," Mr. Esguerra says. "We wanted to design a magazine that reflects that belief."

—*Julie Liesse Erickson*

direct-mail lists for both magazines from friends, social clubs and private schools. In late 1986, a 50,000-piece direct mail campaign costing $60,000 heralded the new magazine.

Readership is 60% to 70% female, has a median annual household income of $100,000, and about 20% are decorators. Local and regional advertisers, including galleries, interior design stores and portrait painters are the major advertisers.

The fall issue, third of four in 1987, had a run of 60,000 copies. Each printing has been up 10,000 from the previous one, says Ms. Newsom.

Another newcomer targeting the upscale consumer focuses on a bigger group with lower annual income. Conde Nast bought *Signature* from Citicorp Diners Club for a reported $25 million. The new *Traveler* acts as the *Vanity Fair* of travel magazines.

Conde Nast trimmed circulation to 550,000 from 840,000 by removing the negative option that had been available to Diners Club members, says Ron Galotti, publisher of *Traveler*.

Although circulation is smaller, it represents people who really are interested in the magazine, he says.

As circulation declined, advertising increased, with a mobile outdoor board blitz in New York, a 500,000 direct-mail test in March, and 3.5 million in July. The offer of 12 issues for $15 produced the highest single subscription response of any offering by Conde Nast, Mr. Galotti says. Rapp & Collins, New York, handled.

The publisher expects to sell 200,000 magazines on U.S. newsstands, an unusual move for a travel magazine, says Mr. Galotti. Another departure is that non-travel related ads account for 50% of the total.

The target audience for the magazine is a college-educated male between the ages of 35 and 54 with a median household income of about $66,000.

The problem with aiming just at the rich, says George Rosenbaum, president of Leo J. Shapiro & Associates, Chicago, a market researcher, is that there aren't enough of them to go around.

"Because of the limited numbers of people in this category, a sizable portion of a magazine's audience has to be drawn from the 'non-rich.' In fact, when you seek an audience of households making $100,000 or more, you only have 17 million households to choose from," says Mr. Rosenbaum.

For a publication such as *Millionaire*, which aims for a circulation of 1 million, there must be a lot of readers well below the $100,000 household income level, he says.

"Few actual millionaires will read a magazine called *Millionaire*, just as few playboys read *Playboy*," Mr. Rosenbaum says. "By the same token, a magazine titled *MBA* is a natural to attract those people who feel stifled by not having the degree."

First in a series of discussions in the M/A/R/C Symposium.

A Candid Discussion About Database Marketing.

Q: What is the difference between database marketing and traditional direct marketing?

A: Database marketing is the next evolution of direct marketing. The primary difference is the ability to communicate more precisely with different market segments and incorporate the consumer response back into the database. Once the response information becomes part of the file it can be used for segmentation purposes in creating the next direct marketing program. The advances in the data processing industry over the last 10 years have made storing of large amounts of information about prospects and customers much more affordable. The real magic is in the analysis of the data and its application to a particular marketing problem.

Q: I currently employ targeting tactics in my media buys. How will this be different in a database marketing environment?

A: It'll give you the ability to communicate more precisely with identified market segments. Analysis of promotion responders can yield strategic marketing direction.

So, the collective intelligence of the database improves with use. By appending the database with additional information from previous promotions or database overlays, targeting can be refined to much higher levels. Each new promotion or database overlay added to your consumer database provides more marketing variables to segment market niches that have a higher propensity to respond to your offer.

Q: What kind of marketing applications should be considered for database marketing?

A: Categories which have a high degree of switching, are mature, or have well-defined niches are excellent candidates. Examples of programs which work well in a database strategy are competitive and continuity promotion programs, frequent traveler and shopper programs, sales lead generation and business-to-business direct marketing programs.

Q: If you had to describe the biggest difference between M/A/R/C Database Marketing and others, what would it be?

A: There is a big difference between just collecting information and knowing what to do with it. The most important difference is our ability to leverage over 25 years of marketing and consumer research experience to design, develop and implement marketing programs that best suit your needs. It becomes a matter of knowing what to ask, and then knowing what to do with the answers. Database marketing allows you to communicate with each customer on an individual basis and create a dialogue that will continually enrich your market intelligence. As an example, we very often uncover information that points to needed changes in the marketing mix. So, the results of the interpretation of the information can optimize strategic marketing programs. M/A/R/C can also identify cross-selling opportunities, either for existing products and services or for new introductions. And, you can use it as a tool to outmaneuver your competition's marketing strategy in as many or as few markets as you choose. With M/A/R/C Database Marketing, pre-emptive planning will become the norm because you will have quantified knowledge of the category consumer base.

Q: Isn't database marketing going to make an already expensive advertising vehicle even more so?

A: The true benefit of database marketing is that it optimizes each marketing program that you run. As mass media costs rise and response to these programs gets harder to quantify, the need for measurable marketing solutions increases. The ability to fine tune your targeting, so you only reach those prospects which have a high probability of responding, can dramatically reduce your costs while improving your volume. M/A/R/C can provide a turnkey test of database marketing with your brand or service for less than $100,000.

Q: I know M/A/R/C has a great reputation in custom research, but I imagine you use a service bureau for database management. Don't you?

A: No. Most direct marketing agencies do use a service bureau. M/A/R/C is unique. Information has long been our business and our state-of-the-art computer capabilities enable us to do everything in-house. We think it is the only way to offer clients a formula for success where one plus one equals four.

M/A/R/C has a long history of proactive client service. We have been dedicated for the past two decades to working with clients to understand and create the best product or service mix to sell in changing market conditions. This expertise and dedication to service are carried forward into our newest service, database marketing. When you think about it, an integrated system customized to meet your individual needs – a system that's capable of revolutionizing your marketing strategy – is a powerful concept.

Q: OK. You've got my attention. How do I find out more about M/A/R/C Database Marketing?

A: Call Ken Orton at 1-800-527-2680 or return the coupon.

☐ *Yes. I want to arrange an interview to find out how effective M/A/R/C Database Marketing can be for my company.*

The Artistry of Marketing. It Works.

Papers chummy with rich neighbors

By Joanne Cleaver

A part of the weekly ritual for the residents of tony Boca Raton, Fla., is the arrival of Society Monday, a special insert to the *Boca Raton News* and the *News* of Del Ray Beach, two small daily Knight-Ridder newspapers.

"I'm sure you're going to enjoy reading all about wonderful Ernie Simon who is the subject of today's centerfold feature. What a great guy! My life has definitely been enriched by getting to know him better and I'm sure yours will be too," says Lucille D'Orazio, editor of the pullout section, in her page two column.

And so the prose flows, with page after page of pictures of local residents and celebrities at parties, charity balls and similar events-to-be-seen-at.

Such a blatant attempt to win the favor of the affluent is rarely seen in daily newspapers. The majority of papers target the affluent by more subtle means, generally through zoned editorial coverage, weekly special sections, and Sunday editions that are heavy with specialized features, takeout sections and magazines.

Joanne Cleaver is a frequent contributor to Special Report.

The Society Monday special insert keeps Boca Raton area residents up to date on what their neighbors are up to like few other papers.

At the same time, papers with substantial affluent readerships want to sell those readers to advertisers by emphasizing their market penetration, reader loyalty and timeliness.

Newspapers, like other print media, attract the affluent and better educated consumers. The 1986 Simmons Market Research Bureau study of Media & Markets indicates that among households with incomes of $60,000 or more, daily papers have a 77% penetration, even though only 11.7% of all American households reach that annual income.

Among papers with a wealth of affluent followings, the statistics are also impressive. According to the 1986 Monroe Mendelsohn Survey of Affluent Adults in $50,000 households, the *Wall Street Journal* reached 19% of these households nationally, and the Sunday *New York Times*, had 12% readership.

A study published in April of *Journal* subscribers' travel habits revealed the average 1986 household income of the paper's subscribers was $119,000, with three members average in each household.

"They [the affluent] are 20% more likely to be heavy paper readers," says Ariadne Callas, VP, associate media director of Grey Advertising in New York. "If you look at the stuff they read, it's very trendy—news, style, fashion magazines and local city magazines. The topics they read in magazines indicates that newspapers should follow with their own sections."

Many newspapers with a concentration of affluent people in their markets cultivate their loyalty through a targeted editorial and advertising mix.

The Stamford *Advocate* and *Greenwich Time*, both in Fairfield County, Conn., cover a market where 40% of the adults live in households with incomes of more than $50,000. A 1987 Scarborough Report revealed that the papers are read daily by 62% of the adults in their markets, says VP-marketing Jack Findley. More than half of area residents with household incomes above $50,000 read either paper daily.

(Both papers, which share an advertising department, are owned by Times-Mirror. They have a combined circulation of about 44,000, or about 58% penetration of their market.)

"What we see here is that they have an almost insatiable appetite for local news," says Mr. Findley. "They can get national news from a variety of sources. So we've parlayed that [consumer] desire to our advantage in the market. We're not at all shy about promoting the upscale nature of our market to advertisers. It's our greatest strength."

Both newspapers give front-page coverage to local crimes, politics and other goings-on, but they also devote space to business, fashion, local social and real estate stories—three categories universally popular with the affluent.

That formula also proves successful for the Gannett Westchester/Rockland Newspapers, a group of 10 daily and Sunday papers covering the affluent counties just northwest of New York City.

While weekly fashion, real estate and home sections cater to readers' interests and appeal to local retailers and real estate brokers, the papers also concentrate heavily on local business coverage, says Elliott Eakin, research and sales development director.

With major corporations including IBM and General Foods Corp., located in Westchester County, the papers strive to deliver in-depth business coverage, Mr. Eakin says.

> **and *Greenwich Time***

Besides local financial institutions and investment advisors, national financial services companies, along with airlines and some office equipment companies, consider it essential to regularly buy space in the business sections of even relatively small papers with heavy affluent readership.

"Our research shows that often the affluent are in small businesses or privately held firms, and they're often so involved in their businesses that they don't have time to read much of anything but the local paper," says Rodney Woods, VP, director-consumer market-

ing services for New York-based Merrill Lynch, Pierce, Fenner & Smith.

Merrill Lynch just completed a test with a direct response ad using several metropolitan Atlanta newspapers. "The initial volume of reponse was four times what we expected," says Mr. Woods. Consequently, a similar campaign is scheduled to be tested on the West Coast.

"Local papers allow us to implement regional strategies. We've also spent in them to support product rollouts, or to compete with local banks and trust companies. Papers are one of the fundamental building blocks of our campaigns across the country, especially to build awareness and traffic at the local level," he says. Merrill Lynch has 410 offices across the country.

Local dailies compete with the metros that try to lure the same affluent readers through geographically zoned sections that zero in on upscale neighborhoods.

The *Washington Post* has been refining its local coverage over the past several years, says Ron Browne, research director. Besides giving advertisers a chance to choose virtually any combination of its 84 zones (for inserts) the *Post* has pulled together what it calls the VIP edition.

Nearly 850,000 people live in these areas in Washington itself and surrounding parts of Maryland and Virginia. The Sunday *Post* reaches 89% of the households with incomes of $50,000 and more.

For all the intricacies of courting affluent readers and the advertisers that want to reach them, most newspaper executives emphasize that pursuing this group cannot be so obvious that it alienates readers who are still on their way up the economic ladder.

"The run to the affluent is borne of the immediate need to sell today. Advertisers say that's what they need. But in a newspaper, you can get the target demographics plus the rest of the audience as well," says Vernon Mallinen, director of marketing services at the Denver-based *Rocky Mountain News*, a Scripps/Howard paper.

"Targeted editorial should attract and retain readership in that area. But when it's zoned for limited distribution, you lose that overflow market. I hate to see that happen," he says.

The *Boca Raton News* solved that problem by transforming Society Monday into its only regular total market coverage vehicle; it is distributed free to 48,000 households as well as reaching the papers' 25,000 regular subscribers. The section has been so successful that the *News* is readying launches of several other similar efforts.

In its five years of circulation the section's advertising revenues have grown at an annual rate of 15%, resulting in issues that are routinely 48 to 96 pages. Half of that space is devoted to advertising, making Society Monday account for 8% of the *News*' overall advertising revenues.

Cautious, direct path a healthy one for 'Varia'

Varia is one of a growing number of publications whose publishers aim to take as few chances as possible.

The formula is simple: Send the magazine to a controlled circulation made up of one of the most affluent groups in the nation—doctors.

The median income for the individual reader of *Varia* is $131,300. For advertising, the pharmaceutical companies are ready customers.

The subject matter varies. *Varia*, as the magazine's title suggests, covers lifestyle topics from travel to architecture; while other magazines, such as the 14-year-old *Diversion*, from Hearst Corp., strictly are focused on topics from the travel industry.

Donald Tullach, *Varia's* publisher, has chosen to target its audience further than simply those titled Doctor.

The first year of publishing, beginning last January, limits circulation to the 110,000 primary-care doctors, which includes internists, osteopaths and cardiologists.

Other groups of the medical community will be added next year.

If the 16,000 U.S. psychiatrists are included, the magazine's circulation reaches a healthy 126,000.

Another 7,000 neurologists could be added to a third edition and so on.

Advertisers for this six-times-a-year publication include four companies: Merck, Sharpe & Dohme; Stuart Pharmaceuticals; Smith, Kline &

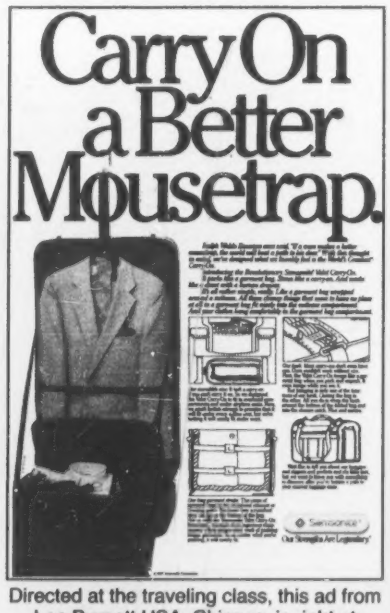
BEST OF PRESS

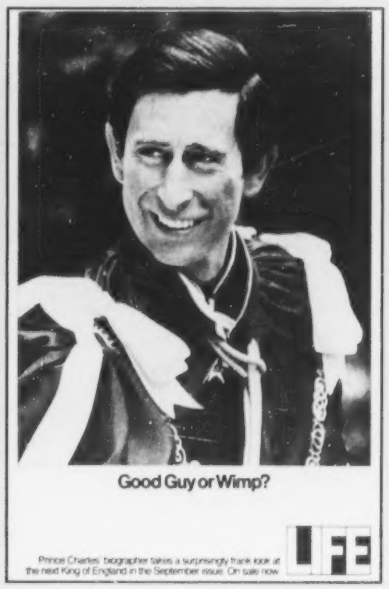
Barneys New York didn't become a top clothing store by being shy. It doesn't hurt, too, that miniskirts are back. The Knicks-height model will get attention if the sharp, with-it headline doesn't. Credit Barneys' in-house department for delighting most Sunday *New York Times* readers. Creative director: Neil Kraft; art director: Fabian Brone; copywriter: Glen O'Brien; photographer: Steve Meisel.

Best of Press selections are made by a committee of three: Hank Simons, VP-creative director, Newspaper Advertising Bureau, New York; James Dunaway, VP-information, Newspaper Advertising Bureau; and Patrick Reilly, ADVERTISING AGE newspaper-industry reporter. National System Inc., St. Louis, provides tearsheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Reilly in AA's New York bureau.



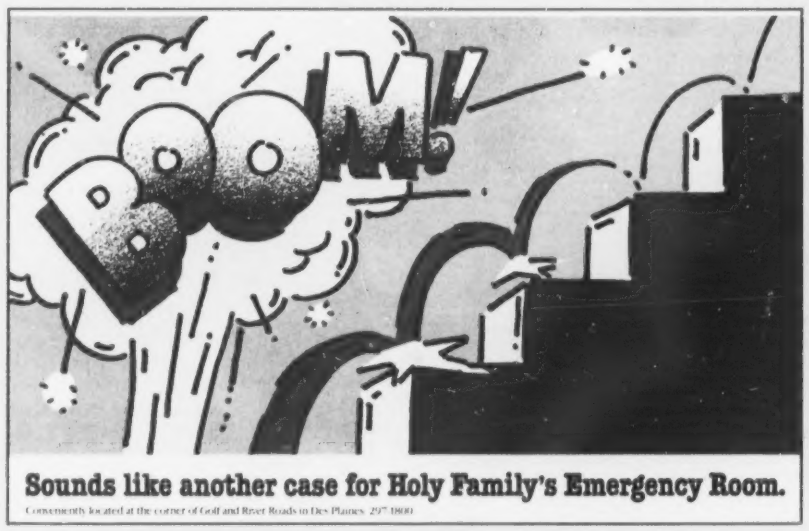
Directed at the traveling class, this ad from Leo Burnett USA, Chicago, is right at home as a page in *USA Today*. Besides emphasizing Samsonite luggage's practicality, the headline and copy target the busy businessman who is looking to simplify, simplify. Creative and art director: Bob Taylor; copywriters: Mr. Taylor and Dave Colwell.

Oldsmobile is not the first thing that comes to mind when you think of fast, state-of-the-art cars, but this ad for General Motors Corp.'s Oldsmobile division, from Leo Burnett USA, Chicago, sure makes you think otherwise. Also, the snappy, informative copy tells Mercedes-Benz, usually the first to trumpet its technological prowess, it's got some home-grown competition. Creative director: Don Gwaltney; art directors: Bob Billings, Joel Machak; copywriter: Dave Colwell.



Good Guy or Wimp?
Prince Charles' biographer takes a surprisingly frank look at the next King of England in the September issue. On sale now.

Perfectly simple . . . and vice versa. *Life* Editor Pat Ryan gets copy credit because the perfect line she wrote for the magazine's cover ended up being used as the ad headline too. The agency, Geer, DuBois, New York, gets credit for being smart enough to know when the client is right. Promotion director: Rip Odell; creative director: Steve Olderman; art director: Catherine Pelton; photographer: Lionel Cherruault.



BOOM!
Sounds like another case for Holy Family's Emergency Room.
Conveniently located at the corner of Golf and River Roads in Des Plaines. 297-1800

With just the right touch in illustration and headline, Sturm Communications Group, Chicago, shows that an ad for a hospital need not be antiseptically dull. It was the first time Holy Family Hospital, based in the Chicago suburb of Des Plaines, had singled out a specific part of its business. Credit Sturm's copywriter, Kim Visokey, for appealing first to people's funny bones. Art director: Gina Popp.

August spending up

NEW YORK—A summertime swoon in department store newspaper ad spending continued in August, according to the ADVERTISING AGE Flash Report on advertiser spending in major-market daily newspapers. The 16-category total for the month still posted a 5.9% gain over the year-ago period, however, to $313.6 million, propelled by robust dollar gains in the new car, food and amusements segments.

Nine of the 16 ad spending categories were up from August 1986 and seven were down *(see chart at right)*.

Department store spending finished August $10.3 million behind the August 1986 pace and $27.5 million behind 1986 for the June-July-August period. May results were ahead of last year.

General-merchandise stores, another big category, posted gains in July and August after a dip in June.

New-car spending continued on a hot streak, up $10.3 million in August over year-ago levels on the heels of big gains in July (up $17.7 million) and June (up $19 million). Spending in the amusement ad category posted another strong month: up $5.8 million in August after a $6.5 million gain in July.

Food store ad spending, another bright spot, bettered August 1986 by $4.4 million, or 15.1%, its second consecutive double-digit monthly gain. Other, smaller categories posting promising August results were: computer stores and supplies; computers, equipment and services; publishing and media; and banks and trust companies.

The airline ad category fell 18% in August from year-ago levels and spending in newspapers for cigarettes continued far behind its 1986 pace, off 45.7% to $1.7 million after declines of 54.3% in July and 50.7% in June.#

Colgate to run tighter ship

Restructuring to cut 600 jobs

By LAURIE FREEMAN

Colgate-Palmolive Co. is refining its global marketing structure and, in the process, eliminating 600 middle-management positions.

The restructuring gives stronger support to the New York-based company's decentralized and entrepreneurial management style. Colgate Chairman, President-CEO Reuben Mark said the changes will "improve the management of our global businesses and new-product momentum."

A Colgate spokeswoman amplified that by saying the company has "more new products that we can afford to launch" and that the restructuring is designed to increase the pace of introductions.

A senior Colgate executive said there will be "substantive changes" in Colgate's marketing strategy. Since all of the individuals involved with the restructuring have not yet been contacted, the Colgate executive declined to elaborate on plans.

He said, however, the restructuring "will add more category coverage than Colgate already has in place."

In Colgate's current setup, category managers have group product managers reporting to them. It reportedly is below that group level where cutbacks will be made. Sources said product managers at Colgate are one or two levels below the group product managers.

The Colgate announcement followed by a week the news that Procter & Gamble Co. was adding a new layer of management to its brand structure (AA, Oct. 12).

P&G's new category general managers will report to division managers and oversee similiar product groups.

Brand managers come under the advertising area *(see accompanying chart, which depicts one division and illustrates just this one area).*

Industry analysts believe Colgate's refinement of its category management organization and continued streamlining of its manufacturing facilities will enable the company to stay competitive with P&G and Unilever, which also has been aggressively restructuring, particularly in the U.S.

Unilever has moved the personal care operations of its Lever Bros. unit to Chesebrough-Pond's, which it recently acquired.

In addition to the management restructuring, New York-based Colgate said it will sell two of its Kendall fiber divisions to International Paper Co., close six factories and streamline 30 others.

The total restructuring will cost the company $211 million before taxes, resulting in a loss for the third quarter, ended Sept. 30. The third-quarter results are expected to be released this week.#

NFL

(Continued from Page 1)

their previous five-year contract with the league, may be in more trouble following the strike.

"Ratings in the [replacement] games dropped as much as 20%, but advertisers who stayed in were well ahead with bonus units," said Bart McHugh, senior VP-director of national radio and TV, DDB Needham Worldwide, New York. "The question is, how does this affect the NFL?"

For advertisers, there was general agreement that the strike would have caused severe damage for many advertisers had it lasted another two or three weeks.

The Major League Baseball championships and the World Series were the primary substitute for major advertisers who pulled out of football.

Some of the big spenders got lucky. Despite a heavy NFL schedule, Miller's primary selling season is the third quarter. Thus, football was temporarily expendable.

The automotive situation was more complex because of the new-car season.

"I'm sure the automakers have some regrets about being out at the beginning of the model year, and they're worried about whether ratings will come back," said Thomas O'Grady, president, Integrated Automotive Resources, a marketing-research company in Wayne, Pa.

Domestic auto sales from Oct. 1 to 10 fell 39% compared with the same period last year. However, Mr. O'Grady blamed the huge slump on the automakers' decision to end incentive financing programs and concerns about the economy.

Along with fall baseball telecasts, NFL telecasts are the key media to support fall introductions. The automakers would have spent an estimated $75 million to $80 million on the NFL this year.

GM returned to the Oct. 18 games, but Ford and Chrysler stayed out.

Due partly to the threat of strikes by the NFL and the United Auto Workers, GM structured a "lull" in its NFL advertising program during the early part of the season.

"We thought about a lot of strikes this year," said Lou Schultz, exec VP-director of media services, Lintas:Campbell-Ewald, Warren, Mich., which handles Chevrolet.

GM also added an unusual provision to its network buying contracts this fall: The company reserved the right to "cancel" advertising in the fourth quarter.

The strike did interrupt the launch of Buick division's 1988 Regal.

Pontiac also was in the midst of launching a major new creative effort. More than 25% of Pontiac's fourth-quarter budget went into NFL telecasts.

Chevy had the least to lose. It dropped ABC's "Monday Night Football" last season and planned to spend only about 10% of its fourth-quarter budget on the NFL.

Some advertisers said that because women buyers account for many new-car purchases, there was a positive fallout: placement of auto ads in prime-time shows, which have more female viewers than the NFL.

"The strike would have hurt us more five years ago, when we had a narrower target and a bigger proportion of our budget was in the NFL," said Peter Schweitzer, VP-general manager of J. Walter Thompson USA's Detroit office, which handles Ford Division.#

Network NFL losses per game

Network	Reg. season unit cost	Strike cost	Strike game revenue	Total loss
ABC	$195,000	$90,000	$7,440,000	$2.3M
NBC	$ 95,000	$30,000	$3,320,000	$1.4M
CBS	$115,000	$35,000	$3,990,000	$1.8M

ADVERTISING AGE cost estimates were based on the average regular season unit costs advertisers are believed to have paid for regular NFL Sunday and Monday telecasts. Because of advertiser defections during the three-week strike, each network had to refill about 20 to 22 30-second units per game out of an average of 50 :30s per game. The domestic car defections (Chrysler, GM, Ford) accounted for 12 :30s per game. Miller Brewing, which also defected, had scheduled about six :30s per game every other week. The remaining vacated units came from a host of other defectors. Advertisers that bought in after the strike started paid the average unit costs outlined above. Estimated revenue losses assume the networks either sold the vacated time or gave remaining advertisers two or three units for one.

Raymond Serafin and Patricia Strnad in Detroit, Cleveland Horton in Los Angeles and Sara Stern and Scott Hume in Chicago contributed to this story.

Tory

(Continued from Page 1)

velopment of the Saatchi empire. S&S has prepared advertising for three election campaigns during the nine years it has held the account.

Privately, executives say the agency has grown frustrated over criticism of its work and also that certain desirable accounts will not consider the Saatchi agency because of its Conservative Party ties.

The relationship itself is highly political. Saatchi intially wanted to resign just after the last election, but felt that would imply the agency was deserting Norman Tebbit, the Conservative Party chairman, who himself resigned. The agency has a solid relationship with Mr. Tebbit.

That position is sought by Minister of Trade & Industry Lord Young, who is believed to favor Lowe Howard-Spink & Bell as an adviser in political advertising.

Some people speculate Saatchi's resignation is timed to pre-empt the agency's firing down the road.

During the latest election, there were rumors that Lowe's Tim Bell was consulted by the Conservatives about advertising, which many observers felt was inferior to that of the Labour Party. Both agencies denied the story.

But it is known the Conservatives did contact executives at Young & Rubicam about lifestyle research in connection with that campaign.

The account has never been lucrative. The party spent more than $6.5 million in media on the latest election, sources said.#

Pasta

(Continued from Page 3)

Gourmet Fresh Pasta, which markets a line of refrigerated pastas in California under the Marie Callendar's name. The company has a licensing arrangement with Ramada Inns' Marie Callendar's Restaurants.

All three companies are hoping to fare better than Camden, N.J.-based Campbell Soup Co., whose Fresh Chef line also featured refrigerated pasta sauces. Campbell pulled Fresh Chef earlier this year (AA, April 6). Fresh Chef also included soups and salads. Campbell cited distribution problems and the failure to recognize regional preferences as reasons for its withdrawal.

Campbell continues to experiment with the line, however, under the auspices of its Mrs. Giles Country Kitchens subsidiary.#

DCI sale

(Continued from Page 1)

to Times Mirror equals $76.5 million. Depending on approval from both companies' boards, Times Mirror will take control of the magazines Dec. 1.

One extremely attractive magazine property remains: *Modern Bride*, an every-other-monthly with circulation of 383,553 and 1986 revenue of $23 million. "There is still tremendous interest in *Modern Bride*," Mr. Spillane said. "If someone came in and hit us with a huge number, we'd have to look at it."

The NYT Magazine Group and Hearst are considered the main contenders, though sources say Playboy Enterprises is keenly interested.

Andrew J. Dempsey, president-ceo, Times Mirror Magazines, said his company did not seek *Modern Bride*, nor was it offered by Mr. Diamandis. "At the outset, those four magazines were the ones we wanted," Mr. Dempsey said.

The deal was closed Oct. 16 and involved three-way, cross-country telephone calls between Times Mirror executives in Los Angeles, Mr. Diamandis at the American Magazine Conference in Palm Desert, Calif., and Mr. Spillane in the DCI New York offices.

The deal significantly changes the complexion of Times Mirror Magazines. Three of the magazines Times Mirror bought—*Field & Stream*, *Home Mechanix* and *Skiing*—duplicate the categories of three of its existing magazines, *Outdoor Life*, *Popular Science* and *Ski*. Times Mirror also publishes *Golf Magazine*.

"The move will give Times Mirror a larger share of the market," said Leo Scullin, senior VP, Young & Rubicam. "They aren't going to close down the titles. They will have a larger share by publishing both."

Times Mirror's Mr. Dempsey said no immediate changes were planned for the new magazines but added that eventually there would be a reorganization of Times Mirror Magazines' sales and marketing areas.

"They [the DCI magazines] have found a good home at Times Mirror," Mr. Scullin said. "Times Mirror knows how to publish in these categories. To this point they have been a quiet publisher focused on the editorial product."#

Zayre

(Continued from Page 3)

ware at the cash register to calculate a club member's total points, which are printed on the receipt.

"We have several million members, and I would be crazy to abandon it," said Cary Deacon, VP-marketing at Zellers.

No other U.S. retailers have introduced such a program, but others are considering it, said Doug Hosking, national director of electronic shopping consulting for Touche Ross, San Francisco. "I think we will see more of it," he said.

Mr. Hosking would not divulge which retailers are examining the programs but noted they include upscale and discount operations.

Mr. Snell said Zayre will spend several million dollars to implement the program. If Frequent Z is successful, it will be rolled out nationally next spring, he said.

Zayre is testing other, undisclosed promotional ideas in several markets, he added.

Frequent Z will be advertised with TV spots and in-store promotion. AC&R/DHB&Bess, New York, replaced Ingalls, Quinn & Johnson on the $20 million account earlier this fall (AA, Oct. 5).#

Consumer shock

Wall Street quake rocks advertisers

By JUDANN DAGNOLI and PATRICIA WINTERS

CORONADO, CALIF.—Advertising executives arriving here last week for the 78th annual meeting of the Association of National Advertisers came joking about the next earthquake, but left talking about the tremors on Wall Street.

The record plunge and recovery of the world's stock markets split ANA members into two camps, with package-goods marketers predicting little change in the pressure to protect and build their brand franchises, and big-ticket marketers—for cars, appliances and discretionary vacation spending—expressing concern about the marketing impact.

The key question is how badly Wall Street's roller-coaster ride has shaken consumer confidence, and whether this will translate into a sales downturn and eventual cutbacks that would affect ad budgets and other promotional strategies.

"If the money for a new car that families were counting on got blown away on Oct. 19, we are going to be hurt," an automobile marketer said.

This view was echoed by others whose products and services depend on family savings and investment program revenues.

For established consumable brands, however,

Major buys put on hold, survey says

CHICAGO—A substantial percentage of U.S. citizens feel this is a bad time to make major purchases, according to a national survey done for ADVERTISING AGE by Leo J. Shapiro & Associates.

The survey by the consumer research company, taken on the two days following Wall Street's "Black Monday" market plunge, showed that 78% of adults felt the stock market woes made "no difference" to them.

But when they were asked specifically about spending, the 508-point plunge in the Dow Jones industrial average caused them to pause —particularly in terms of committing to such purchases as a new car or a house.

Smaller percentages of Americans expect the near-crash to affect purchases of consumables; about one in five indicate they will cut back on eating out, buying food for the home and buying clothes for the family *(see chart on Page 102)*.

The 78% of Americans who said last week's stock market near-crash made "no difference" to them divide into two major subgroups: 34% simply disassociate themselves from the market ("I have little or no stocks"), and 34% say it is too soon to tell ("Hasn't affected me yet").

When asked about the market activity's effect on investments, 42% said it made it a worse time to invest in stocks and 32% said it was

Magazines exchange discount-rate volleys

By PATRICK REILLY

In what looks like a gasoline price war, *U.S. News & World Report* is joining *Newsweek* and *Time* in introducing corporate discount rates.

All of these plans have been launched in the past two months.

Richard C. Thompson, *U.S. News* publisher, said the plan, dubbed "Flex-Plan," would award space credits to advertisers who simply renew or increase their level of spending.

The plan set up by Washington-based *U.S. News* follows the announcement last week that *Newsweek* would launch "Match Plan," a virtual duplicate of "Max Plan," the discount plan that the Time Inc. magazine group, publisher of *Newsweek's* rival, *Time*, introduced last month (AA, Sept. 14).

Like the Time Inc. plan, *Newsweek* will give discounts to advertisers who spend more of their print budgets in the magazine. Time Inc. does that now for advertisers spending more for their budgets in any combination of *Fortune, Life, Money, People, Southern Accents, Southern Living, Sports Illustrated* or *Time*.

R. Thompson

It is a war, all right, if only of words, and publishers as well as advertising executives said it is not going to be pretty.

"This [the discount plans] could cause people who compete with Time Inc. to get down and dirty," Mr. Thompson said.

Many publishers believe New York-based Time Inc.'s plan only will lead to magazines stealing pages from one another rather than addressing the greater problem of magazines losing their share of advertising spending to television and promotion.

"We aren't doing this because it's good for the industry," said *Newsweek* Publisher Gerard Smith. "We do it reluctantly to defend our position in the marketplace."

Several agency executives said the discount plans are a ploy by publishers to avoid negotiating rates below those listed on their rate cards.

Discount plans "are ways of blunting conversation about negotiations," said Joel Kushins, senior VP-media director, Bozell, Jacobs, Kenyon & Eckhardt. "That's one of the objectives of the Time plan."

But the Flex, Match and Max plans are not all the same. The outline for *U.S. News'* Flex-Plan shows it varies significantly from

Last Minute News

Upjohn, P&G to work together on baldness

KALAMAZOO, MICH.—Upjohn Co. here and Procter & Gamble Co., Cincinnati, have signed a long-term research and development agreement on topical minoxidil. Upjohn developed the prescription-only male-pattern baldness treatment; its Rogaine brand will be marketed in the U.S. by yearend. Both companies will be able to market products developed under the new agreement.

Pepsi uncorks Jackson spots

SOMERS, N.Y.—Pepsi-Cola Co. this week breaks the first phase of its much-publicized campaign featuring singer Michael Jackson, say sources close to Pepsi. Pepsi is expected to save its "blockbuster" four-part commercial for early next year (AA, Sept. 14). BBDO Worldwide, New York, handles.

Highlights

'Mac Tonight' shines in AdWatch 4

Risk-taking can pay off even for the most secure market leader. McDonald's Corp. gambled when it began running nationally "Mac Tonight," a local-market TV campaign with a look and feel decidedly different from anything else it had on its network schedule. The campaign, created by Davis, Johnson, Mogul & Colombatto, also set an interesting precedent for McDonald's relationships with its local and national agencies: It marks the first time McDonald's had aired on network TV a mainstream commercial not created by its national agencies.

Playboy bouncing back 12

Not many magazines suffer average circulation losses of 674,000 copies in one year, as *Playboy* did in 1986. And even fewer publishers face the wrath of a U.S. Attorney General's commission on pornography that not so subtly pressures retailers to stop selling what is now its only magazine. But despite its losses, parent Playboy Enterprises says the worst is over in this, the Chinese Year of the Rabbit.

Scaring up candy sales 29

Halloween candy sales apparently are showing renewed spirit this year. Sales from August through October so far are up 7% to 10% from last year. Tampering scares have had only a slight impact on sales in recent years.

DDB Needham still at the drawing board 30

A little more than a year ago, DDB Needham Worldwide heralded itself as "the new creative force" in ads that showed a pencil blasting off like a rocket. The creation of DDB Needham was the centerpiece of the "Big Bang," the three-way merger that rocked the ad world. But DDB Needham still is trying to get its pencil off the launching pad.

Counter-revolution 36

Former Beatle Paul McCartney says you can count him out when it comes to Nike Inc.'s use of the Fab Four's "Revolution" in its ads. "I was not pleased with that [ad campaign], because the Beatles never did any of that," Mr. McCartney said in an interview in *Rolling Stone*. "We were offered Disney, Coca-Cola and the hugest deals in Christendom and beyond," he said. "And we never took them . . ."

IKEA furnishing expansion 58

Sweden's IKEA, already the world's biggest home furnishings retail chain, is continuing to expand rapidly in the East and West. The U.K. became the 19th country to join IKEA's international network in October. A third U.S. outlet will be unveiled soon, and plans are afoot to enter Budapest by 1990. Other outlets will follow in Poland and Yugoslavia. Even the Soviet Union isn't out of bounds.

Aiming for the Apple 59

In an excerpt from his new book "Odyssey—Pepsi to Apple," John Sculley, chairman-ceo of Apple Computer (and president of PepsiCo during the Coia Wars years), offers his perspective on the winner-take-all shootout for the Apple advertising business between Chiat/Day and BBDO.

INTERNATIONAL

Retailers cross international borders 76

The once purely parochial retail industry increasingly is becoming a world traveler as more stores cross international borders to reach new consumers. The question being asked is: Will the industry travel well? But at this moment, everyone from Tiffany & Co. to Toys "R" Us is on the road to Hong Kong, London, Sydney, heading for anyplace where shopping thrives.

Avon plans mass-retail expansions

By PAT SLOAN

NEW YORK—Avon Products' Beauty Group may expand its cosmetics sales to mass-market retailers by 1997.

Beauty Group President-CEO James Preston said the company's long-term goal is to "have three solid legs in cosmetics—direct sales, upscale retail and mass retail."

Avon has a "toe in the water" on the mass-retail side in the U.K., where it supplies private-label cosmetics to the Marks & Spencer chain, Mr. Preston said.

Also, Avon is not ruling out the eventual purchase of a mass-market cosmetics marketer, Mr. Preston said.

For now, Avon is concentrating on its direct-sales and upscale-retail businesses.

Avon began branching into department stores in 1986 through a 50-50 venture in Liz Claiborne Cosmetics with Liz Claiborne Inc.

PHILLIP CROSLAND

The company also has developed internally, through its own Parfums Phenix subsidiary, the Catherine Deneuve fragrance, called Deneuve. But lately it has been seeking additional department-store growth through acquisitions.

Last spring, Avon bought Giorgio Inc., Beverly Hills, Calif., for $165 million. Earlier this fall it paid $160 million for New York-based Parfums Stern.

The acquisitions underscore Avon's commitment to the worldwide upscale retail business; both are slated for expansion.

Giorgio President Michael Gould said his division will introduce a suncare line in March and possibly a second Giorgio women's fragrance next fall. Avon also is committed to expanding Giorgio overseas.

The international strength of Parfums Stern is one reason why Avon was attracted to it. Stern generates half its $100 million in revenues overseas, said Shearson Lehman Bros. analyst Andrew Shore.

The biggest news in color cosmetics for Avon is in its direct-sales business. In January, Avon will introduce Avon Color, an expanded line of cosmetics. The line will compete with Noxell Corp. and Maybelline Co. but will be sold through Avon sales reps.

The line replaces Avon's Color Coordinates, Color Cream and Ultra Wear lines.

Avon will continue to sell Pure Care cosmetics for sensitive skin with its Pure Care treatment line. It also will maintain Color Active, a summer line, under the Avon Color umbrella.

Avon Color has been in the works since 1985, when the company decided a 4-point market share loss from 1980 to '85 had to be turned around, said Phillip Crosland, group VP-marketing.

Avon's color cosmetics sales account for roughly 8% of the Avon division's $2.5 billion in sales, he said.

"But between 1980 and 1985 we clearly weren't growing as fast as the market was," Mr. Crosland said. "We stabilized the business in 1986 and 1987 when we had the first sales growth in recent years."

In a consumer study, Avon found that its cosmetics were not competitive in terms of formula or packaging. "Since color cosmetics is the principal way women equate excellence with a beauty company, it became apparent something had to be done," Mr. Crosland said.

Advertising for the first quarter of 1988 is estimated at more than $5 million for TV spots and multiple-page print ads from N W Ayer. Advertising also will be targeted to the ethnic market through Uniworld Group.

Mr. Crosland said that for 1988 much of Avon's total $23 million budget will be allocated to Avon Color.#

Bugle Boy goes to Rubin Postaer

CHATSWORTH, CALIF.—Bugle Boy Industries has hired Rubin Postaer & Associates, Los Angeles, for its $5 million account, without a review.

The apparel marketer previously used Metro Advertising on a project basis.

Bugle Boy will launch its first TV spots in mid-November.

West Coast News

California Business, Los Angeles, named Inbody-Brick & Chamis as its first agency. The agency will promote the monthly magazine to the advertising trade and will help build awareness for a glossy monthly the company will launch in November. *California Business* executives were unavailable for comment on reports the new publication will focus on Los Angeles area business.

California Egg Commission, Upland, named eight finalists, including incumbent Ketchum Advertising, San Francisco, for its $4 million account. Other finalists are Asher/Gould; DDB Needham Worldwide; Della Femina, Travisano & Partners; Foote, Cone & Belding; and Grey Advertising, all Los Angeles; and BBDO Worldwide and Sokol & Berman, San Francisco.#

McMan-in-Moon spots shine

By SCOTT HUME

Risk-taking can pay off even for the most secure market leader.

McDonald's Corp. in August gambled when it began running nationally a local-market TV campaign with a look and feel decidedly different from anything else it had on its network schedule.

While McDonald's basic national advertising repertoire alternates between emotional commercials that stress the bond between restaurant and customer and product-sell spots that pitch tossed salads or hot breakfast biscuits, the "Mac Tonight" commercials are something completely different.

High above a mock nighttime cityscape, a character with a crescent-moon head and sunglasses plays a piano perched on a two-story Big Mac sandwich. He's singing a customized version of Bobby Darin's 1959 hit "Mack the Knife" and promoting McDonald's as the choice for dinner, a daypart important to McDonald's but rarely addressed specifically in its advertising.

"Mac Tonight" also set an interesting precedent for McDonald's relationships with its local and national agencies. The commercials were created by Davis, Johnson, Mogul & Colombatto, agency for the McDonald's Operators Association of Southern California.

When "Mac Tonight" began its national run on Aug. 27, it was the first time McDonald's had aired on network TV a mainstream commercial not created by its national agencies, Leo Burnett USA and Burrell Advertising, both Chicago.

Adding these offbeat McMan-in-the-Moon spots to McDonald's national commercial pool had the potential to disrupt advertising for a company that long has prided itself on marketing continuity, or to be so incongruous that they worked.

They worked.

McDonald's had by far the best-recalled advertising in September, according to the monthly adWatch survey of advertising awareness.

When the 1,000 respondents were asked by phone to name the first advertising that came to mind from all they had encountered in the previous 30 days, McDonald's advertising was named by 7.4%. That was more than twice the percentage naming the No. 2 advertiser, Coca-Cola Co.

It also is the highest unaided recall percentage any advertiser has captured since the height of the hubbub over Coca-Cola's formula change in summer 1985.

"Mac" appears to have the sex appeal of a lunar Bruce Willis: 61% of those for whom McDonald's advertising came to mind first were females. But McDonald's showed strength in all demographic categories; its advertising was the best recalled by respondents in all age and income groups and in all geographic areas.

The impact the addition of "Mac Tonight" had on awareness of McDonald's advertising is especially impressive when you consider the already-strong numbers that those commercials improved.

McDonald's advertising consistently ranks among the top 10 in overall recall. More than doubling in one month the unaided recall of an advertiser with which consumers already are familiar can be more difficult than having a totally new and unexpected advertiser emerge out of the blue into the top 10.

"Mac Tonight's" impact also was evident when respondents were asked to name the first fast-food advertising that came to mind. Not surprisingly, McDonald's consistently has dominated this category, garnering an average 43.6% of first mentions during the previous eight monthly surveys in 1987.

In September, McDonald's was named first by 51.7% of the sample, 10.3 points above its 41.4% share in August. That meant share declines for its two closest competitors. Burger King Corp.'s share of first mentions fell 4.5 points to 12.4%; Wendy's International was down 2.5 points at 6.1%.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Advertising awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind from all heard, read or seen in the previous 30 days. Consumers are queried on the first ad they recall overall and then in a variety of product areas.

Those changes in advertising awareness deemed statistically significant by adWatch researchers are attributable to more than sample variation.

In other changes of note in the September survey results:

- IBM Corp. bounced back a bit in the **computer** category with a 3.8-point gain to 22.6% of first mentions. That followed two successive months of ad awareness decline.

Apple Computer, which has just begun a new TV campaign for its Macintosh line (AA, Oct. 12), continued to hold the No. 1 slot with 28.1% of first mentions, compared with 29.1% in August. Tandy Corp.'s Radio Shack division was third with 2.6%.

- Michelin reversed its loss in August with a 3.3-point gain in the **automotive tire** category in September's survey. That spurt gave Michelin Tire Corp. 18.8% of first mentions, second to Goodyear Tire & Rubber Co.'s 23.2% and ahead of Firestone Tire & Rubber Co.'s 7.1% share.#

For more information or data, contact SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Holly Farms drops Grey for LH&C

By JANET MEYERS

Holly Farms Foods, fighting to stay a leg up in the competitive chicken market, last week switched its $25 million account to Long, Haymes & Carr from five-year incumbent Grey Advertising.

Winston-Salem, N.C.-based LH&C, which handled Holly Farms from 1972 to 1981, evidently snared the business by pitching an aggressive regional campaign targeting competitor Perdue Farms, Salisbury, Md.

The switch was conducted without a review.

Perdue recently began a campaign for its chickens in Holly Farm's home turf. Wilkesboro, N.C.-based Holly Farms, the leading seller of branded chickens with a 20% share, leads Perdue's 5% share nationally.

Sources at New York-based Grey believe the agency change resulted from personal friendships between executives at Holly Farms and LH&C.

The sources said the move surprised them because LH&C's TV billings are only slightly larger than the Holly Farms account. The Holly Farms account boosts LH&C's billings to $83 million.

"We just needed a freshness in our approach," said John Creel, senior VP-marketing at Holly Farms. "Holly Farms felt it needed a local agency, and Long, Haymes & Carr has grown nicely in terms of size and capability."

Holly Farms will continue using Dinah Shore, its spokeswoman of the past four years, Mr. Creel said.#

Spot production costs drop 4%

4A's credits agency, client awareness

By JAMES P. FORKAN

NEW YORK—The American Association of Advertising Agencies' first survey on TV commercial production costs contains a pleasant surprise: Costs dropped in 1986.

The Four A's "Survey of Television Production Costs 1984-1986" found the average commercial cost $113,940 in 1986, down 4% from 1985 (AA, Oct. 19). That was in sharp contrast to 1985, when the average $117,962 cost jumped 13.6% from 1984.

The averages cover "all lengths" combined, though the 30-second spot dominated, the Four A's noted.

The three-year data are based on responses from 37 of the 100 largest member agencies. Those 37—including eight of the top 10 agencies—represent $5 billion in billings and about 85% of the dollars spent on commercial production, the Four A's said.

Last fall, the Association of National Advertisers' 1984-85 study reported the average TV spot had increased 29% to $125,000 based on replies from 17 major advertisers, up from 10 used in an earlier, 1979-84 trend report.

At that time, Dick Hall, exec VP at the Griner/Cuesta & Associates production shop, who was president of the Association of Independent Commercial Producers, questioned the ANA's results.

By focusing on about 100 of the "30,000, 40,000 or 50,000 commercials produced in a year," he said, the ANA could not deliver meaningful results. "I wonder how many of their own heavyweights would work with such a sample."

The ANA's previous studies were based on small samples of clients and covered relatively few TV spots, said Danielle Korn, a member of a Four A's broadcast production subcommittee and VP-television and print business affairs at Saatchi & Saatchi DFS Compton.

By contrast, she said, the Four A's project is based on more than 6,000 commercials shot from 1984 through 1986, including 2,771 during 1986 alone.

The project reported music costs fell 8% on average to $6,217 in 1986. Talent—excluding celebrity endorsers—dropped 6% to $4,303, and gross production company costs—including celebrities—slipped 4% to $113,940.

Comparing 1985 with '84, the survey showed that gross production costs had jumped 14% and music by 13%, as post-production/editing rose 9% and talent 5%.

The report also examined how costs rose or declined in various major product categories.

"It is more important for an auto advertiser to know what other auto advertisers are spending" than to try to compare its commercial costs to an industrywide average, said Jean-Claude Kaufman, chairman of the Four A's committee on broadcast production and senior VP-director of broadcast production, Lord, Geller, Federico, Einstein.

Only two categories broken out by the Four A's showed higher costs in 1986, with beauty/fashion/cosmetics up 10% to $138,831 for the average commercial and package goods up 6% to $105,766. The beauty category's costs gained 11% in 1985, while package goods rose by 14%.

The appliance category dipped 2% to $153,319, still the highest average commercial cost in '86, after having soared 19% in 1985.

Costs for the toys/recreation group fell 22% to $70,219; its 1985 cost had skyrocketed by 84% from 1984 levels, the Four A's found.

The automotive category's costs decreased 20% in 1986 to $116,495, compared with a 1% increase from 1984 to 1985.

Consumer services/travel/corporate image group dropped 7% to $132,615, compared with a 13% increase for 1985.

Fast food/beer/soft drinks fell 3% to $130,769, compared with a 12% hike for 1985.

The reasons behind the overall cost decline, besides the broader-based research sample, included emphasis by agencies and clients on controlling production costs, said George Bragg, vice chairman of the Four A's committee and senior VP-director, broadcast production, Lintas:New York.

The organization's own January 1986 seminar on the topic may have been a key contributor, he said.

"The fruits are finally beginning to come to bear" after years of discussion and debate, Mr. Bragg said.

Saying that agencies felt "hurt" by the years of negative media about soaring commercial production costs, Mr. Kaufman said this study—which he likened to "taking the temperature once a year"—shows that agencies have worked to keep production costs in check.

Other reasons for reduced costs ranged from shooting more spots in Canada, Florida and Minnesota, where they are less expensive, to moving toward "more packaging" (producing several spots at once), other Four A's officials said.

Thr Four A's will get cost updates quarterly for the 1987 survey, Mr. Bragg said. It also plans to examine how much production is done in Canada and other "out-of-town" sites.

Ms. Korn said there may be more data compiled that make regional comparisons between production sites in the East, Midwest and West.#

Commercial production costs

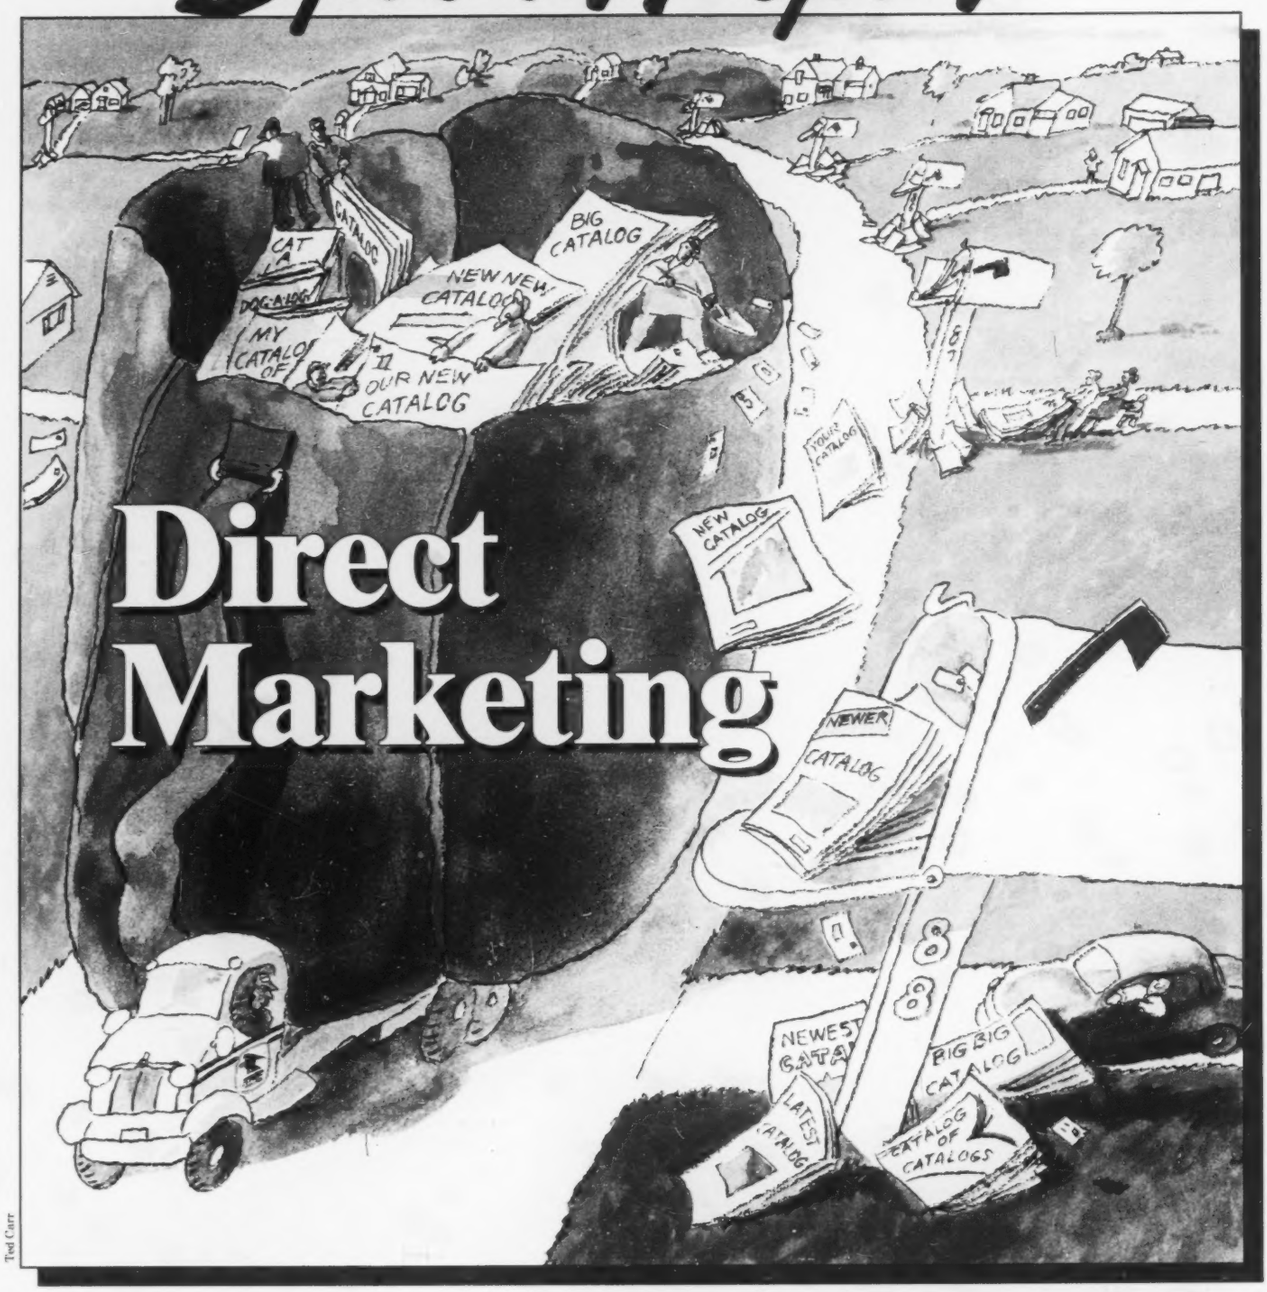
Special Report



Ted Carr

Cacophony of catalogs fill all niches

By Janice Steinberg

Pity the poor postman.

In 1986 the U.S. Postal Service shuffled 11.8 billion copies of 8,500 different catalogs through the mails, according to New York-based Direct Marketing Association. These figures can be compared with 1981's 5.3 billion copies of 4,000 different catalogs. Roughly translated, every American will receive almost 50 catalogs this year.

In an informal DMA survey, 93% of catalogers polled were mailing more catalogs this September than last; last September's figure was 67%. Only 7% said they were sending out fewer catalogs than last year. In planning for next year, 78% say they will mail more catalogs in spring 1988 compared with 68% last year.

From standbys like apparel and housewares to specialty items like lingerie for petite women to business products such as computer software, almost anything that can be sold is offered in a catalog—or more likely in three dozen catalogs.

As the market has become more crowded, catalogers are employing strategies to attract new customers while maintaining their existing buyer bases. Some analysts say catalog marketing has reached maturity and faces the problem that confronts any business moving out of its infancy—how to compete in a less expansive universe of buyers.

"There are limits to the capacity of consumers to spend through mail-order means, and it's become increasingly difficult and costly to replenish buyers who become inactive," says Arnold Fishman, president of Marketing Logistics, a Lincolnshire, Ill.-based mail-order consultancy. "One can no longer expect to go

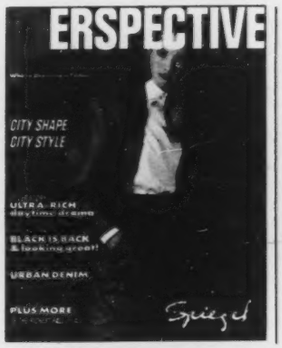
Generalists divvy up the segments

Once upon an uncomplicated time, there was the Sears catalog and the Spiegel catalog and the J.C. Penney catalog—one catalog from each general merchandiser, published once or twice a year, containing all of the company's product offerings.

Not any more. The general merchandisers now send waves of "specialogs" into the mails. Even small, already specialized catalogs are creating spinoffs, such as Williams-Sonoma's Hold Everything, a collection of string, baskets and products that somehow hold items.



Perspective is one of the 68 Spiegel Inc. specialogs put out this year.

"There has definitely been an increase in catalogs focusing on very special types of products, such as catalogs devoted to children's clothing or catalogs devoted to larger women's sizes," says Karen Generelli, manager-media relations, New York-based Direct Marketing Association. She attributes the trend to mail order's more sophisticated segmentation and targeting techniques.

As specialogs are catching on, general merchandise books have been stagnating, says Arnold Fishman, president of Marketing Logistics, a Lincolnshire, Ill.-based mail-order consultancy. "Alden's went out of business five years ago. Montgomery Ward went out of the catalog business one or two years ago.

"Spiegel has demonstrated outstanding growth in the general merchandising area, but at the expense of a very considerable investment," he says. "They completed the heroic task of completely restructuring their business, up-

PRESSURE YOUR COMPETITION
LIKE NEVER BEFORE!

JFY AUDIT AMERICA
"MAKING COMPETITION VULNERABLE TO DIRECT PRESSURE MARKETING"

INTRODUCING PRESSURE MARKETING FOR 1988

Welcome a fresh new strategy that puts pressure squarely on the competition in a way that they will find hard to monitor and even more difficult to neutralize.

It's called **Direct Pressure Marketing**™, and its roots come from **JFY Audit America**®, the nation's largest builder of customized brand user audiences.

For the past six years, we have been working quietly with some of the country's largest packaged goods companies under confidential arrangements that have dramatically changed the way they confront competition today.

In one case, **Direct Pressure Marketing**™ began in 1980 and has expanded each year without interruption. In fact, it now represents an important share of this advertiser's annual corporate marketing budget of several hundred million dollars.

And, they have been our oldest and largest customer.

To arrange a private, confidential and quietly informal disclosure meeting with our top management, call or write today. We'll show you just how vulnerable your competition can be, and how you might best apply **Direct Pressure Marketing**™ to your benefit.

Call or write today.

JFY Audit America®

Catalogs

(Continued from Page S-1)

into the market, start up a new program and have built-in advantages over retail competition."

Mr. Fishman says that 1986 catalog revenues grew at 10% compared with a retail growth rate of 5.2%. However, the catalog growth rate is down from the 17.5% experienced three or four years ago. Mr. Fishman says catalog sales growth is approaching parity with retail.

"Catalogers have gone about as far as they can go, especially with the traditional methods of marketing and merchandising," says Don Schultz, professor of advertising at Evanston, Ill.-based Northwestern University's Medill School of Journalism, in a speech given to catalog marketers last May. "In fact, catalogers who stay with the basics may well disappear in the 1990s."

Catalog companies have found another outlet than the mails by selling them in book stores.

Others say that catalog marketing is far from tottering. The recent DMA survey showed that 78% of those polled report profit increases compared with 77% last year; 88% report stronger response rates compared with last year's 81%.

"Only 5% of retail sales are through catalogs," says Jay Walker, chairman of Catalog Media Corp., a Ridgefield, Conn.-based company that sells catalog ad space and distributes catalogs to book stores.

"Now it's hard for you to tell me that a channel is mature at 5% penetration, when the underlying demographics of the population at large favor the channel," he says. "More working women, less time, more affluence, more credit cards, 800 numbers—all of these things favor the catalog industry as a major growth trend."

The reason more catalogs are being mailed is that people are saying that's the way they want to buy, says Maxwell Sroge, president, Marke/Sroge Communications, a Chicago-based catalog development consultancy. "People are increasingly turning to catalog buying as a preferential way of shopping." He projects catalog sales

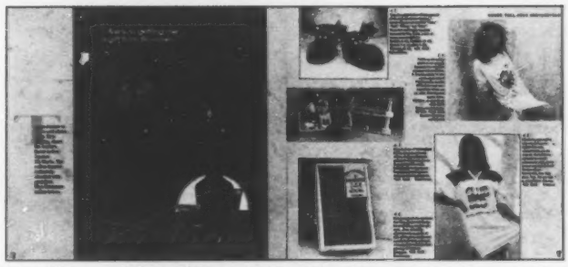
Catalogs

(Continued from Page S-2)

will grow 12% to 15% this year.

Charles Tannen, publisher and editor-in-chief of Stamford, Conn.-based *Catalog Age*, says market maturity or not, "The guys who are going to shine and be the growing companies are the guys who stand out through good service and bright marketing and merchandise selection. You could almost point to those catalogs now, and say, 'Those are the catalogs that are going to succeed no matter what.' You could point to Lands' End or Inmac and say, 'Those are brilliant marketers.' "

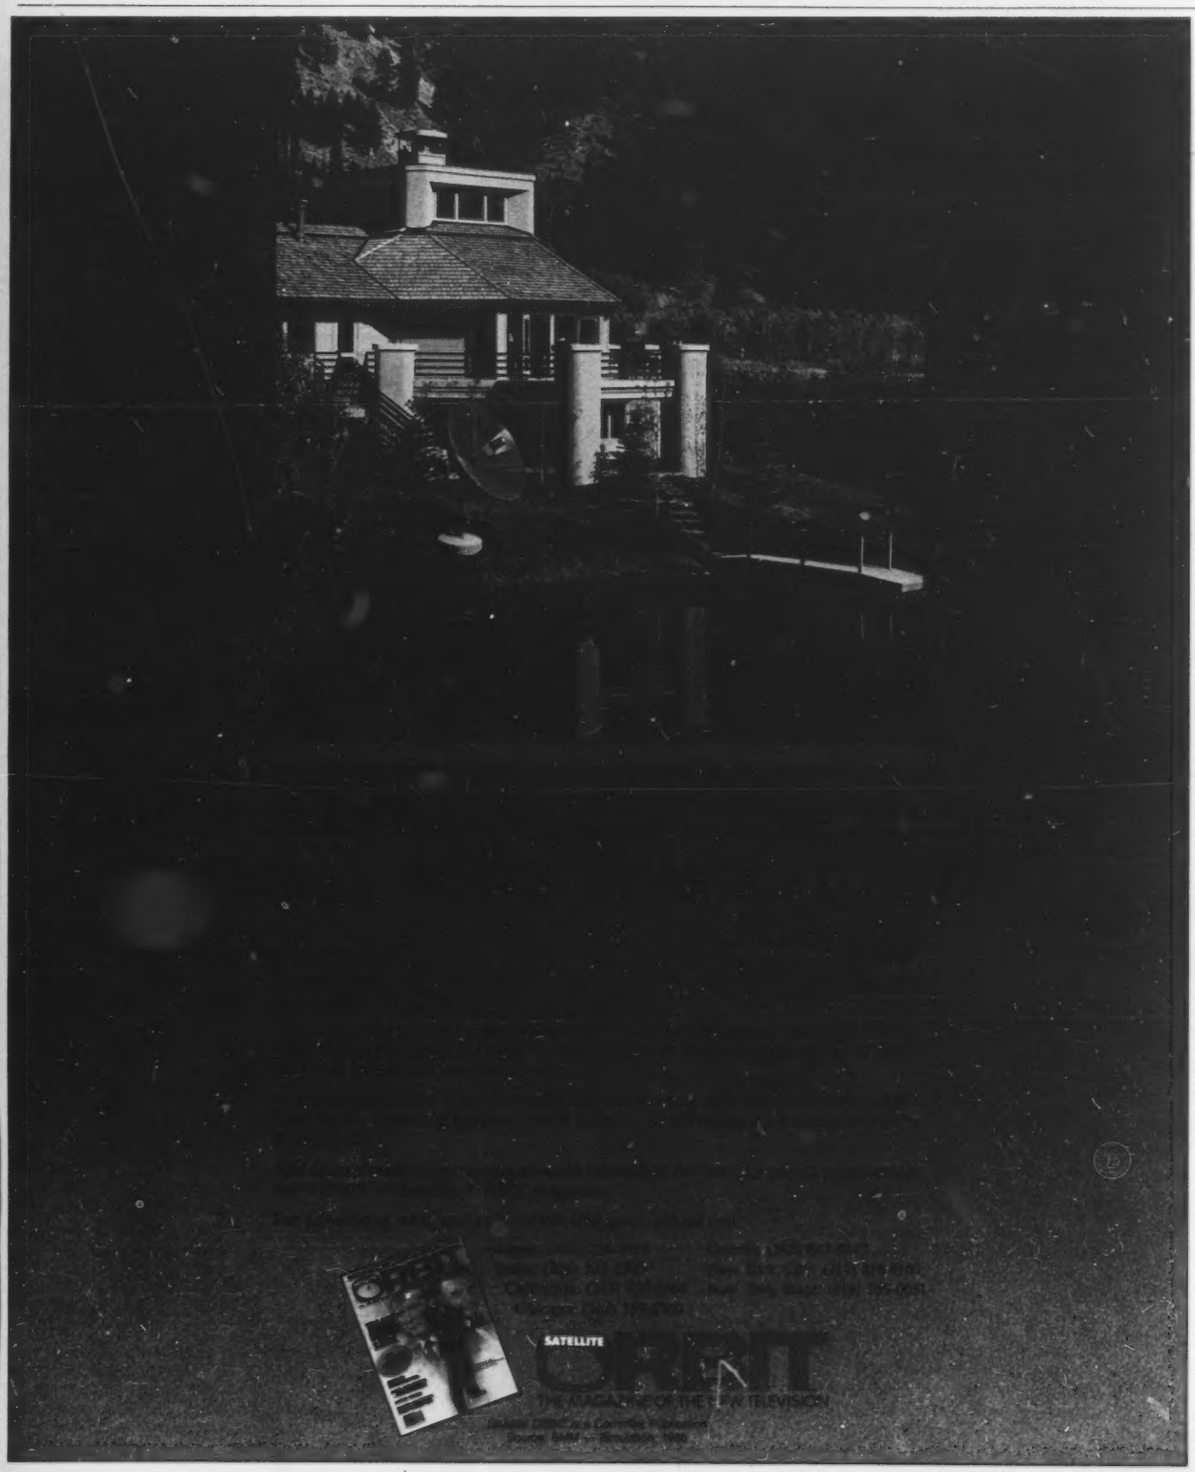
While catalog sales may be rising, as growth moderates some of the largest companies are branching out from the pages of catalogs into retail outlets, TV home shopping and electronic kiosks. *(See related stories.)*



Ads will generate $10 million in 1987 for 40 catalogers—including this Tia Maria ad in Bloomingdale's catalog—up from $2.5 million last year.

And while the growth of TV home shopping is cutting into some catalog business, says Mr. Fishman, it may expand the universe of potential mail-order buyers. "They'll come in through a satisfactory experience with TV home shopping and eventually they'll become used to buying through catalogs."

In addition to branching into non-catalog outlets, many catalogers are augmenting traditional list-based prospecting for



Generalists

(Continued from Page S-2)

scaling and upgrading it, and almost entirely changing their customer base, as well as their product mix."

Although Oak Brook, Ill.-based Spiegel Inc., executives were unable to comment because of a quiet period preceding a public offering, the 1987 catalog schedule lists 68 catalogs, including specialogs devoted to petite women, children, stationery, gifts, cruise and resort wear, shoes, intimate apparel, men, beds and bedding, ladies' leather, men's leather, and men's sweats.

J.C. Penney Co. has a shorter list of specialogs. But following the company's move from New York to Dallas early next year, "in the latter part of 1988 we'll begin aggressively pursuing special markets," says Chris O'Connell, manager-special market catalogs. "Special markets are really where it's at, as far as the future is concerned."

Currently Penney offers 765 pages annually of specialized catalogs in the areas of petite women, extra size women, tall women, big and tall men, nurses' uniforms, men's work clothes, maternity wear, bridal wear and non-apparel infant products.

Although Penney's first specialog came out in 1975, the company only recently began to exploit specialized markets' potential, says Mr. O'Connell. In the first and second quarters, 1987, revenue growth generated by specialogs exceeded other Penney catalog revenue growth by about 20%. "The estimated sales increase for special market catalogs in 1987 is 29%," he says.

Although Sears, Roebuck & Co. released Changes Volume II, a contemporary women's sportswear specialog in August, the Chicago-based company primarily is taking a different approach in augmenting its big book. Rather than creat-

new customers by offering their catalogs in book stores. Catalog Media Corp. joined forces with New York-based Curtis Circulation Co. to place 200 different catalogs on 76,000 newsstand magazine racks, beginning Sept. 15 (AA, Aug. 31).

The move to newsstands followed a six-month test in which 40 different catalogs were marketed in 1,000 Waldenbooks stores. Sales averaged 100,000 per month and the response rate was 5% to 14%—"seven times what most catalogs get, prospecting by mail," says Mr. Walker.

"This is a very attractive way to reach beyond the traditional renting of mailing lists, which is an incestuous zero-sum game," he says. "Here are people who browse in the catalog, pick it up, walk to the cash register, reach into their pockets, and buy it. It doesn't get too much more self-selective than that."

Mr. Walker also sells adver-

(Continued on Page S-6)

ing specialogs, this year Sears split its catalog into two separate books, one devoted to home fashion and apparel and the other offering hard goods.

Sears had been putting out a single catalog twice a year. While the home fashion and apparel catalog still comes out twice, only one hard-goods book is released annually, sent with the spring apparel catalog to contain mailing costs. The shift allowed Sears to reduce the number of pages printed annually from 2,686 to 2,607, expand apparel and home fashion offerings and improve catalog quality, says a spokeswoman.

General merchandisers aren't the only ones creating specialized catalogs. Williams-Sonoma, Brookstone and L.L. Bean also have developed spinoffs.

"It was a natural progression, saying here's a type of merchandise that makes a lot of sense, let's now spin it off and do a catalog," says Charles Tannen, publisher and editor-in-chief of Stamford, Conn.-based *Catalog Age*. "It's less risky [than starting from scratch] because you know the audience . . . It's a smart way to keep moving toward new ideas, pinpointing new audiences."

Catalogers can get into trouble with spinoffs, however, says Steve Millard, chairman of Millard Group, a Peterborough, N.H.-based industry consultancy, and a former Brookstone executive. Spurred by the success of Brookstone's Hard to Find Tools catalog, the Peterborough-based company spun off a successful gift catalog aimed at the wives of the mostly male customers. Next came a gourmet food catalog, which was a disaster.

"You could go just so far," says Mr. Millard. "You've got the tools and then you had the gifts, and then you kind of lose believability. Here we are, known for tools, and we're selling gourmet pates?"

—*Janice Steinberg*

First in a series of discussions in the M/A/R/C Symposium.

A Candid Discussion About Database Marketing.

Q: What is the difference between database marketing and traditional direct marketing?

A: Database marketing is the next evolution of direct marketing. The primary difference is the ability to communicate more precisely with different market segments and incorporate the consumer response back into the database. Once the response information becomes part of the file it can be used for segmentation purposes in creating the next direct marketing program. The advances in the data processing industry over the last 10 years have made storing of large amounts of information about prospects and customers much more affordable. The real magic is in the analysis of the data and its application to a particular marketing problem.

Q: I currently employ targeting tactics in my media buys. How will this be different in a database marketing environment?

A: It'll give you the ability to communicate more precisely with identified market segments. Analysis of promotion responders can yield strategic marketing direction.

So, the collective intelligence of the database improves with use. By appending the database with additional information from previous promotions or database overlays, targeting can be refined to much higher levels. Each new promotion or database overlay added to your consumer database provides more marketing variables to segment market niches that have a higher propensity to respond to your offer.

Q: What kind of marketing applications should be considered for database marketing?

A: Categories which have a high degree of switching, are mature, or have well-defined niches are excellent candidates. Examples of programs which work well in a database strategy are competitive and continuity promotion programs, frequent traveler and shopper programs, sales lead generation and business-to-business direct marketing programs.

Q: If you had to describe the biggest difference between M/A/R/C Database Marketing and others, what would it be?

A: There is a big difference between just collecting information and knowing what to do with it. The most important difference is our ability to leverage over 25 years of marketing and consumer research experience to design, develop and implement marketing programs that best suit your needs. It becomes a matter of knowing what to ask, and then knowing what to do with the answers. Database marketing allows you to communicate with each customer on an individual basis and create a dialogue that will continually enrich your market intelligence. As an example, we very often uncover information that points to needed changes in the marketing mix. So, the results of the interpretation of the information can optimize strategic marketing programs. M/A/R/C can also identify cross-selling opportunities, either for existing products and services or for new introductions. And, you can use it as a tool to outmaneuver your competition's marketing strategy in as many or as few markets as you choose. With M/A/R/C Database Marketing, pre-emptive planning will become the norm because you will have quantified knowledge of the category consumer base.

Q: Isn't database marketing going to make an already expensive advertising vehicle even more so?

A: The true benefit of database marketing is that it optimizes each marketing program that you run. As mass media costs rise and response to these programs gets harder to quantify, the need for measurable marketing solutions increases. The ability to fine tune your targeting, so you only reach those prospects which have a high probability of responding, can dramatically reduce your costs while improving your volume. M/A/R/C can provide a turnkey test of database marketing with your brand or service for less than $100,000.

Q: I know M/A/R/C has a great reputation in custom research, but I imagine you use a service bureau for database management. Don't you?

A: No. Most direct marketing agencies do use a service bureau. M/A/R/C is unique. Information has long been our business and our state-of-the-art computer capabilities enable us to do everything in-house. We think it is the only way to offer clients a formula for success where one plus one equals four.

M/A/R/C has a long history of proactive client service. We have been dedicated for the past two decades to working with clients to understand and create the best product or service mix to sell in changing market conditions. This expertise and dedication to service are carried forward into our newest service, database marketing. When you think about it, an integrated system customized to meet your individual needs – a system that's capable of revolutionizing your marketing strategy – is a powerful concept.

Q: OK. You've got my attention. How do I find out more about M/A/R/C Database Marketing?

A: Call Ken Orton at 1-800-527-2680 or return the coupon.

☐ *Yes, I want to arrange an interview to find out how effective M/A/R/C Database Marketing can be for my company.*
☐ *I'm interested, but before we meet, call me at my office.*

The Artistry of Marketing. It Works.

Catalogs

(Continued from Page S-5)

tising space in catalogs. He expects the 40 catalogs currently carrying advertising to sell $10 million worth of space this year, up from $2.5 million in 1986. Catalog ad sales will be a $100 million business within three years, he predicts.

Ad dollars also are going in the other direction, as catalog marketers are building name recognition and seeking new customers via ads. Last year Dodgeville, Wis.-based Lands' End spent $3 million in print, says Elsa Gustafson, project manager-public relations. "We were trying to tell people about the whole experience of shopping by catalog and how satisfying it can be."

More attention also is being paid to catalog marketing strategies, including product selection and presentation, individualized books and sales catalogs.

"Uniqueness of merchandise is probably the single most important strategy that we've identified," says Richard Grunsten, president, GSP Marketing Services, a Chicago-based catalog specialist.

Mr. Grunsten also recommends testing a product before it is marketed in a catalog. He runs tests in which people view photographs of potential products with brief, catalog-like descriptions and rate them in terms of whether they'd be likely to buy the product, whether the price is right and whether the product is appropriate for the specific catalog.

Gift wrap/stationery marketer Current Inc. is individualizing portions of its 1987 Christmas catalog, says Barry Nolan, president-ceo of the Colorado Springs, Colo.-based company. "The binding capacity exists to literally custom-bind a catalog. You may have a base number of pages in your catalog and then you'll merchandise four or eight-page sections [of certain products] that the binding machine, triggered by a computer, will drop into a catalog destined for a certain individual who, because of their past history, appears to be a good prospect for that certain range of products."

Catalogers crank up the volume

	Number mailed (billions)	% growth
1986	11.8	18.0%
1985	10.0	17.6
1984	8.5	26.9
1983	6.7	13.6
1982	5.9	11.3
1981	5.3	12.8
1980	4.7	-

Source: Direct Marketing Association

For example, designs featuring cats habitually do well with about 15% of their customers. "Maybe we can spend only 15% of the money and send four pages of 30 cat-design products to 15% of our house list, but still get 80% or 90% of the sales," Mr. Nolan says.

Another catalog trend is cutting merchandise prices. "Four or five years ago, nobody talked about [discount] sales in mail-order catalogs because they couldn't afford it," says Steve Millard, chairman of Millard Group, a Peterborough, N.H.-based industry consultancy. "Then all of a sudden, five years ago, a few little sales supplements crept into catalogs. And other people who didn't offer sales were incensed."

No matter how good the catalog looks and how well it is priced and targeted, customer service currently is the make-or-break issue, some analysts say.

In an August study, Steven Ashley, VP-senior investment analyst at Milwaukee-based Blunt, Ellis & Loewi, singles out Lands' End as "the premier catalog retailer in America today."

Among Lands' End advantages, he cites a computerized system that allowed the company to fill 99.5% of its orders within 24 hours.

"Customer service is what it's all about," he says. "How fast merchandise is delivered and how well an order is processed are going to be absolutely key to those who are going to be successful vs. those who aren't." AA

Keeping up with the Jones.

Keeping up with your customers means keeping track of data. Data on where they live. What they've bought. What they're doing. And why they're doing it.

In fact, a good marketing database is essential to successful direct marketing. And Wiland can help you keep track of all that data, no matter how extensive your needs may be.

With our help, your marketing database can retain information on existing customers, former customers and good prospects.

By keeping track of this critical data, you can control the communications that you have with everyone on your database. This control will help you spot trends in the marketplace, provide effective customer communication, and tell you where your direct marketing investment will produce the best results.

In addition to storing data that you have on your customers, we can also provide you with extensive data from **ULTRAbase,**™ our database of over 1,000 demographic, geographic and lifestyle data elements. And when you use our other list enhancement capabilities such as NCOA*, ZIP Code Correction, Address Correction, Unduplication and Postal Presorting, you can be sure that your marketing database is always accurate and deliverable.

By using our sophisticated analysis techniques we can help you identify who your customers and prospects are — and who they aren't.

This information can be readily incorporated into your marketing database for precise target marketing.

Simply put, Wiland offers everything you need to effectively manage your marketing database to ensure that you increase profits and maximize response.

Sportswear, accessories for computer hot

Although total catalog growth rate is humming along at an estimated 10% annually, some categories obviously are buzzing louder than others. According to Arnold Fishman, president of Marketing Logistics, a Lincolnshire, Ill.-based consultancy, certain categories are experiencing 20% to 30% growth.

In general, business-to-business catalogs are performing significantly better than consumer books. Maxwell Sroge, president of Marke/Sroge Communications, a Chicago-based catalog-development company, says the greatest momentum is in computer supplies and accessories. "Every major manufacturer, with perhaps the exception of Apple, has a sophisticated direct-marketing operation."

Below Messrs. Fishman and Sroge pick what's hot and what's not in mail order.

Winners: sportswear and women's apparel; office supplies and equipment, particularly computer hardware and software; video and films; physical fitness equipment; aids for the handicapped; and products for children, including educational toys.

Losers: footwear; crafts; gardening and horticulture products; collectibles, and general merchandising, with the exception of Spiegel Inc.

—*Janice Steinberg*

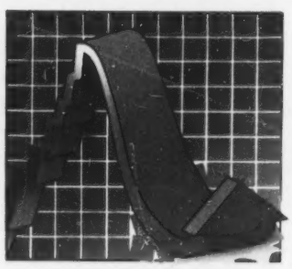
BLACK MONDAY

Unstable Dow may prompt media sell-offs

By VERNE GAY

NEW YORK—Wall Street's wild ride could have a severe effect on the media industry.

The primary impact might be in advertising sales. But if the stock market's intense fluctuation foreshadows a recession, a flurry of TV station or newspaper acquisitions might result.



Both CBS and NBC have said they are especially anxious to buy a TV station. Properties have been scarce, however, and CBS President-CEO Laurence Tisch has refused to pay top prices for stations.

Top TV stations and newspapers have sold recently for as much as 20 times cash flow.

"Up until the last couple of days, companies with low-quality credit could raise money easily," said Ronald Doerfler, senior VP-chief financial officer, Capital Cities/ABC. "Now they won't be able to get money as cheaply. It could create an opportunity [for well-endowed] buyers, but it's premature to make a judgment."

"What's happened to the stock market will only make the acquisition process more selective," said Will Whetzel, VP at Kidder, Peabody & Co.'s Media and Entertainment Group.

Radio station sales boomed last year, but had slowed before last week's so-called "Black Monday."

"I think there might be a softening in prices the next two to three months until we see what's going on. We are in totally new territory," said Jim Duncan, an industry analyst with Duncan's American Radio, Kalamazoo, Mich.

Two major media transactions crumbled last week. United Artists Communications and United Cable Television called off a merger, partly because their stocks collapsed. MTM Entertainment postponed a public stock offering.

Lorimar Telepictures Corp. proceeded with a plan to repurchase up to 15% of its outstanding common shares.

Agreements to sell Lorimar's advertising subsidiary, Bozell, Jacobs, Kenyon & Eckhardt, and three broadcast properties also were unaffected.

In print media, Diamandis Communications Inc. still could sell its *Modern Bride* within a week. "Our bidders are not scared by the market, and they've shown no indication of backing off," said Arthur Sukel, DCI senior VP-chief financial officer.

The market's volatility could affect ad spending almost immediately. Advertisers last week began negotiations with the Big 3 TV networks on first-quarter scatter commercial inventory. Before last Monday high prices had been anticipated.

"What [the market volatility] will do is dry up any [network TV] scatter money that would have come in late December," said Peter Chrisanthopoulos, president-chief operating officer at RJR Nabisco Broadcast.#

Patrick Reilly in New York and Wayne Walley in Los Angeles contributed to this story.

Tables turn on Wall St.

By JUDITH GRAHAM

Is it over?

Many economists believe the stock market turmoil and its impact on consumer confidence have only just begun.

As a result, analysts are reviewing their "buy" and "sell" recommendations for agencies, media companies and advertisers in light of the declines in those industries.

Also, many companies, including Interpublic Group of Cos., returned to the market after the downturn and bought back shares, showing confidence that the share prices of those companies would rebound.

By the time the market closed on Friday, Oct. 23, the Dow Jones industrial average was down only 141.14 points for the week, after a record 508 slide on Monday, Oct. 19.

If the market does not stabilize within the next several weeks, the consequences for consumer spending will be "disastrous," said Joel Stern, managing partner of Stern, Stewart & Co., a New York financial consultancy.

The stock market's unpredictable gyrations indicate "the economy has a lot of strength but it does not have a lot of people who are confident in it," said Steven R. Malin, senior economist at the Conference Board.

Mr. Malin predicted that scared consumers will spend their money more cautiously and this will contribute to a mild recession starting in the first quarter of 1988.

Meanwhile, stock analysts frankly admitted to confusion about the market's short-term course.

"It will continue to fluctuate," said Fred Anschel, media analyst at Dean Witter Reynolds.

Compared with Aug. 25 share prices, when the Dow Jones industrial average peaked, agency groups, media companies and advertisers took some severe hits on "Black Monday." They had only partially recovered by week's end.

Among the agency groups, Saatchi & Saatchi Co. and Interpublic were hit hardest. Agency income is sensitive to economic trends, and investors are concerned about the potential impact of a recession, said Jim Dougherty, VP, County Securities.

Mr. Dougherty and other analysts have not yet changed their "buy, sell or hold" recommendations for specific agencies, but several analysts said they were reviewing recommendations.

Hit even harder than agencies were media stocks, with Turner Broadcasting System, Dow Jones & Co., and Gannett Co. sustaining big declines.

"My gut feeling is that a number of these stocks represent good long-term buying opportunities. I don't think they can go much lower," Mr. Anschel said.

The biggest losers

In some cases, price drops reflect the withdrawal of corporate takeover threats as raiders retired to the sidelines.

Auto companies' stocks were battered by fears of a recession. Chrysler Corp. and Ford Motor Co. used the occasion to repurchase outstanding stock, as did many other companies, including Shearson Lehman Bros. and Merrill Lynch & Co.

Buybacks bolster stock prices by reducing the number of outstanding shares and reflect companies' expectations that their stock prices will bounce back. They also tend to make takeovers more difficult.

Major retailers also suffered from anxiety about a possible recession.

If the economy slows down considerably, K mart Corp. probably would lose share to Wal-Mart Stores, one analyst said.

"The outlook for retail sales has definitely deteriorated," said Fred Wintzer, retail analyst at Alex. Brown & Sons, Baltimore.#

How consumers reacted to stock market dive

Has the stock market near-crash made things better or worse for you and your family?

Worse	Better	No difference
19%	3%	78%

Do you feel that the stock market near-crash has made it a better or worse time for you to...

	Worse	Better	No difference
Buy a home	44%	14%	42%
Buy a new car	40	13	48
Purchase air travel	27	10	63

Do you feel you will be cutting back or increasing your spending for...

	Cutting back	Increasing	No difference
Eating out	22%	4%	74%
Food at home	20	7	73
Clothes for family	20	5	76
Gasoline and driving your car	12	6	83

a better time.

About one in four (27%) felt it was a worse time to invest in real estate, while 36% felt it was a better time.

While the stock market dominated the news, Americans kept their perspective. When asked which events of the past week "really rocked the nation," the stock market was mentioned by 73%, the U.S. action against Iran by 57% and Jessica McClure's rescue from a well in Texas by 20%.

The telephone survey of 702 men and women was conducted after the stock market closed on Tuesday, Oct. 20, and Wednesday, Oct. 21. A balanced sample was interviewed each evening to pick up changes in consumer reactions as events developed.

But Shapiro said that, despite a sharp increase in stock prices on Oct. 21, there were no substantial differences between results of the two evenings' surveys.

Other consumer researchers are finding that, despite the market's partial recovery, consumers are going to remember the "Black Monday" plunge for a long time.

"This is the first time anything bad has happened to them, and they never forget the first time," said Faith Popcorn, chairman of BrainReserve, a New York marketing consultancy.

The market's crash will join with the "cocooning" trend to make consumers more homebound, she said. Cocooning is the trend of consumers staying at home and shutting themselves off from the world.

Even people who are not in the stock market and have not lost money will change their spending habits, Ms. Popcorn said. Smart advertisers should take this opportunity to quickly "talk to the consumer" and make clear their political positions and environmental practices.

The market plunge also fits in with a new trend that Ms. Popcorn called "cashing in."

With the increasing willingness of people to trade money and success for quality of life, the market's volatility is further discrediting "workaholism."

Paul Getman, a financial analyst with Wharton Econometics, a Philadelphia-based economic forecasting company, said there is no question consumer spending next year will be "below the level it would have been" if the market had not tumbled.

"Our economic models show that for every $1 change in stock price, it produces a 5¢ change in consumer spending over the subsequent year," he said. "The market, which dropped half-a-billion dollars on Monday, could cause a $25 billion drop in consumer spending next year."

Mr. Getman said the crash occurred at the worst possible moment, right before the yearend holiday buying rush.

"If this happened in January, consumers may not have cared quite so much because they already would have spent everything they had," Mr. Getman said. "Retailers are going to feel the pinch this year."

He said it is not known yet how much damage has been done to consumer confidence, but that "yuppies" finally may be getting a dose of reality. "They're going to find out what it's like to live on 50% of the national median income, not five times that," Mr. Getman said.

However, another researcher said the impact on consumer confidence will be short-term. Barry Bosworth, an economist with the Brookings Institute, Washington, said consumer spending may be cut by about $15 billion, but predictions of a screeching halt to the economy's growth are an overreaction to the market plunge.

Instead, Mr. Bosworth predicted there may be some negative effects on consumer and company spending for only a few months, before the economy returns to a more realistic, solid growth rate and the stock market to 1985 prices.

A stock market fall can be a sign of an impending recession, Mr. Bosworth said, but in this case the plunge "was a panic" and as such doesn't serve as a reliable indicator of a downturn.#
